The view of Grotius, which has been followed by some scholars of eminent name, among whom are found Hammond, Mill, Venema, Wetstein, and Paley, rests chiefly on two grounds; *viz.*, the testimony of Marcion, and the close resemblance between this Epistle and that to the Colossians, taken in connection with Coloss. iv. 16. With respect to the former of these grounds, it is alleged that, as Marcion was under no temptation to utter a wilful falsehood in regard to the destination of this Epistle, he probably had the authority of the church at Laodicea, and it may be the tradition of the churches generally of Asia Minor for the opinion which he expresses (Grotius, *Proleg. ad Ephes.*; Mill, *Proleg. ad N. T.* p. 9, Oxon, 1707). But, without charging Marcion with *designedly* uttering what was false, we may suppose that, like some critics of recent times, this view was suggested to him by the apostle's allusion, in Col. iv. 16, to an epistle addressed by him to the Laodiceans. Nor is there the least ground for supposing that Marcion spoke in this instance on the authority of the Asiatic churches; on the contrary, there is every reason to believe the opposite, for not only do Origen and Clement of Alexandria, who were fully acquainted with the views of the eastern churches on such matters, give no hint of any such tradition being entertained by them, but Tertullian, to whom we are indebted for our information respecting the opinion of Marcion,* expressly says that in that opinion he opposed the tradition of the orthodox churches, and imposed upon the Epistle a false title, through conceit of his own superior diligence in exploring such matters ('Ecclesiæ quidem veritate epistolam istam ad Ephesios habemus emissam, non ad Laodicenos, sed Marcion ei titulum aliquando interpolare gestiit, quasi et in isto diligentissimus explorator.'—*Adv. Marc.* v. 17). It is plain that to a statement of such a nature no weight can be safely attached. With regard to the other argument by which this view is advocated, we cannot help expressing surprise that such men as Mill and Paley should have deemed it of so much importance as to rest upon it the chief weight of their opinion. To us it appears to possess no force whatever in support of the view which they espouse. Admitting the fact of a close resemblance between the Epistle to the Colossians and that before us, and the fact that Paul had, some time before sending the former Epistle, written one to the church at Laodicea, which he advises the Colossians to send for and read, how does it follow from all this that the Epistle to the Laodiceans and that now under notice were one and the same? To us it appears more probable that, seeing the two extant Epistles bear so close a resemblance to each other, had the one now bearing the inscription 'to the Ephesians' been really the one addressed to the Laodiceans, the apostle would not have deemed it of so much importance that the churches of Colossæ and Laodicea should interchange epistles. Such being the chief arguments in favour of this hypothesis (for these which, in addition, Wetstein alleges from a comparison of this Epistle with that to the church at Laodicea, in the Apocalypse, are not deserving of notice; see Michaelis, *Introd.* vol. iv. p. 137), we may venture to set it aside as without any adequate support. It may be observed also that it seems incompatible with what the apostle says, Col. iv. 15, where he enjoins the church at Colossæ to send his greetings to the brethren at Laodicea, &c. Now one sends greetings by *another* only when it is impossible to express them oneself. But if Paul wrote to Laodicea at the same time as to Colossæ, and sent both letters by the same bearer, Tychicus, there was manifestly no occasion whatever for his sending his salutations to the latter of these churches through the medium of the former; it was obviously as easy, and greatly more natural, to have sent his salutations to the church at Laodicea in the Epistle addressed to themselves. This seems to prove that the Epistle to the Laodiceans had been written some considerable time before that to the Colossians, and therefore could not have been the same with that now under notice.

The opinion that this epistle was a sort of circular letter was first broached by Archbishop Usher. His words are (*Annal. Vet. et Nov. Test.* p. 680, Bremæ, 1686), 'Notandum, in antiquis nonnullis codicibus (ut ex Basilii lib. 2, adv. Eunomium, et Hieronymi in hunc Apostoli locum commentario apparet) generatim inscriptam fuisse hanc epistolam τοῖς ἁγίοις τοῖς οὖσι, καὶ πιστοῖς ἐν Χρ. Ἰη. vel (ut in literarum

* Epiphanius also speaks of Marcion as having an Epistle to the Laodiceans in his *Apostolicon*; but, as he states that he had also the Epistle to the Ephesians, this cannot be regarded as corroborating the testimony of Tertullian.

encyclicarum descriptione fieri solebat) *sanctis qui sunt . . . . . et fidelibus in Christo Jesu;* ac si Ephesum primo, ut præcipuam Asiæ metropolim, missa ea fuisset, transmittenda inde ad reliquas (insertis singularum nominibus) ejusdem provinciæ ecclesias.' To this opinion the great majority of critics have given their suffrage; indeed, it may be regarded as the received opinion of Biblical scholars in the present day. This may make it apparently presumptuous in us to call it in question; and yet it seems to us so ill supported by positive evidence, and exposed to so many objections, that we cannot yield assent to it. In the *first* place it is to be observed that it is an hypothesis entirely of *modern* invention. No hint is furnished of any such notion having been entertained concerning the destination of this epistle by the early church. With the solitary exception of Marcion, so far as we know, all parties were unanimous in assigning Ephesus as the place to which this epistle was sent, and Marcion's view is as much opposed to the supposition of its being a circular letter as the other. As respects the external evidence, therefore, this hypothesis is purely destitute of support.—2. It is an hypothesis suggested for the purpose of accounting for certain alleged facts, some of which are, to say the least, doubtful, and others of which may be explained as well without it as with it. These facts are, 1. The alleged omission of the name of any place at the commencement of the epistle; 2. Marcion's assertion that this epistle was addressed to the Laodiceans, which, it is said, arose probably out of his having seen that copy of this circular epistle which had been sent to Laodicea; 3. The want of any precise allusions to personal relations subsisting between the apostle and those to whom this epistle was addressed; and 4. The expressions of unacquaintedness with those to whom he wrote, which occur in this epistle, *e. g.* iii. 1-4. How these facts may be reconciled with the supposition that this epistle was addressed to the Ephesians will fall to be considered afterwards; at present the question is, How do they favour the hypothesis that this was a circular letter? Now, supposing them to be unquestionable, and admitting that they are not irreconcilable with this hypothesis, it must yet appear to all that they go very little way towards affording *primary* evidence in its support. It is not one which grows naturally out of these facts, or is suggested *by* them; it is plainly of foreign birth, and suggested *for* them. But when it is remembered that the *first* of these alleged facts is (to say the least) very doubtful; that the *second* is made to serve this hypothesis only by means of another as doubtful as itself, and that, were its services admitted, it would prove too much, for it would go to show that, to the Laodiceans, the apostle not only sent a peculiar epistle, mentioned Col. iv. 16, but gave them a share also in this circular epistle written some time after their own; and that the *third* and *fourth* are both either partially or wholly questionable, it must be admitted that this hypothesis stands upon a basis which is little better than none. 3. Had the epistle been addressed to a particular circle of churches, some designation of these churches would have been given, by which it might have been known what churches they were to which this letter belonged. When it is argued that this must be a circular letter, because there is no church specified to which it is addressed, it seems to be forgotten that the designation of a particular set of churches is as necessary for a circular epistle, as the designation of one church is for an epistle specially addressed to it. If we must leave out the words ἐν Ἐφέσῳ in ch. i. 1, what are we to put in their place? for if we take the passage as it stands without them, it will follow that the epistle was addressed to *all* Christians everywhere, which is more than the advocates of the hypothesis now under notice contend for. It will not much help them to say with Usher, that the name of the place was left blank to be filled up; for the question immediately arises, By whom was it to be filled up? If by the church at Ephesus, to whom the epistle was first sent, then it could not be a circular epistle, but was a special epistle to the church at Ephesus, which they were left to communicate to as many or as few other churches as they pleased; and this may be said, we suppose, of all Paul's Epistles; nor is it at all improbable that this is exactly what the Ephesians would have done of their own accord, without any blank being left to give them the hint. If we say with Michaelis that the blank was left to be filled up by the Apostle himself, who had a number of copies written, which he thus addressed to particular churches, the question occurs, How do we know in that case that there ever was a blank at all? If *every* copy of this epistle that was sent by the Apostle had the name of a place written in it before it left him, there was, of course, no blank in any of them. The reasoning here is in fact is a mere *petitio principii.* If we ask, How is it known that this was a circular epistle? the answer is, Because the name of the place was left blank to be filled in by the Apostle. If, now, we ask, How is it known that the place was left blank? it is answered, Because this is a circular epistle, 'ut in literarum encyclicarum descriptione hoc fieri solebat!' Besides, it seems hardly consistent with the Apostle's perfect integrity of character to suppose that he would insert in the copy sent to each church the name of the place where that church was located, in such a way as to lead the members of that church to suppose that the epistle they received was specially addressed to them. As an apostolic letter was usually esteemed a treasure of no ordinary value by the church to which it was originally sent, we may easily suppose that it would occasion no small mortification to each of the churches round Ephesus, to find that what each had supposed to be a letter specially addressed to itself was in fact only a copy of what had been sent to many others. In fine, this suggestion of Michaelis renders it very difficult to account for the prevailing insertion of ἐν Ἐφέσῳ in the text, as well as the universal tradition of the church, that such was the destination of this epistle. The solution proposed by Michaelis himself, viz., that 'when the several parts of the Greek Testament were collected into a volume, the copy inserted in this collection must have been procured from Ephesus,' besides being mere unsupported supposition, proceeds on the assumption that the Canon of the New Testament was formed by authority, which is what cannot be proved [CANON]. Hug's opinion that 'the title πρὸς Ἐφεσίους was given

to it, either because Ephesus was the most eminent of the Asiatic cities, or was the first which received it,' might account, perhaps, for a *preponderance* of testimony in favour of this title, but is certainly inadequate to account for the *unanimity* of testimony by which it is supported. On these grounds the suggestion of Michaelis appears to be inadmissible, and our objection to Usher's hypothesis remains in full force. 4. In ch. vi. 21, 22, Paul mentions that he had sent to those for whom this epistle was destined, Tychicus, who should make known to them all things, that they might know his affairs, and that he might comfort their hearts. From this it appears that Tychicus was not only the bearer of this letter, but that he was personally to visit, converse with, and comfort those to whom it was addressed. On the supposition that this was a circular letter, the following questions are naturally raised by this statement of the Apostle: Was Tychicus to carry this letter from church to church? or had he a distinct copy for each church in the circle? If the former, it will follow that no church ever *possessed* this epistle, but that certain churches around Ephesus enjoyed the advantage of *reading* it or *hearing* it read, while the bearer of it stayed with them. If the latter, then it may be asked, Was Tychicus, as he carried round these copies to deliver them, bound to abide at each church, and to answer all the demands and inquiries which the Apostle's declarations in the passage quoted would prompt its members to make? To affirm of either of these suppositions that it is *impossible*, would be, perhaps, to go too far; but it must be felt by every one, that, under all the circumstances of the case, neither of them is very *probable*.

The objections just stated seem to us to justify the rejection of Usher's hypothesis respecting the destination of this Epistle: we now turn to the consideration of the common and, as we believe, the true view of this matter. Here it will be necessary to consider, in the first instance, the objections which have been offered to this view. These are borrowed from the Epistle itself, in which, it is said, we not only miss those allusions to personal relations and intercourse which we should expect in an epistle from Paul to a church with which he had been so closely connected as with that at Ephesus, but we meet with statements which seem to imply that the parties to whom this Epistle was written were, at the time, strangers to the Apostle. As respects the former of these objections, it must be admitted that the Epistle contains no direct allusions to previous intercourse between the writer and those whom he addresses; but this may be partly accounted for by the circumstance that several years had now elapsed since that intercourse took place; and probably, during the interval messages had been sent by the Apostle to the Ephesians which rendered it unnecessary to allude to his earlier personal intercourse with them, in this Epistle. It is worthy of remark, on the other hand, that the tone and style of the Epistle are such as of themselves to suggest the probability of previous intercourse between the parties; such warmth of feeling and so much of a free outpouring of thought not being customary in a letter addressed to strangers, however strong might be the writer's general interest in their welfare. With regard to the passages in which it is alleged that Paul writes as if the parties he addresses were personally unknown to him, they are all susceptible of a very different construction. When the Apostle says (i. 15), 'Wherefore also, *I having heard of* your faith,' &c., he is not necessarily to be understood as intimating that this knowledge had then for the *first* time been obtained by him through the report of others; he rather means that, as some years had elapsed since he left them, he was rejoiced to hear that they were still stedfast in the faith. Again, when he says (iii. 2), '*If* ye have heard of the dispensation of the grace of God which is given me to you-ward,' &c. and (iv. 21), '*If* so be that ye have heard him,' &c., the force of the particle εἴγε is not *adversative*, but rather, according to its proper meaning (comp. Hermann. *ad Viger.* § 512; Kühner's *Gram. d. Gr. Sp.* § 704, th. ii. 1), and the ordinary usage of the Apostle, *concessive*; it is thus equivalent to *since*, *forasmuch as*, and expresses rather the confidence of knowledge than the uncertainty of ignorance. To these passages, then, no weight whatever deserves to be attached as tending to show the erroneousness of the ordinary designation of this Epistle. In favour of this designation, on the other hand, are to be urged the reading ἐν Ἐφέσῳ (i. 1), and the unanimous testimony of Christian antiquity. This reading is that supplied by all the MSS.* and ancient versions. From a passage, however, in one of the writings of Basil (*Adv. Eunomium*, lib. ii.), it has been inferred that in his day some MSS. were extant in which these words were not found. In maintaining against Eunomius, that Jesus Christ may justly be styled ὁ ὤν, Basil argues that this is the more proper from the circumstance that the Apostle, writing to the Ephesians, calls Christians ὄντας, absolutely and peculiarly saying τοῖς ἁγίοις τοῖς οὖσι καὶ πιστοῖς ἐν Χρ. Ἰη., and adds 'for so those before us have handed down, and we have found it in old copies.' Now there can be no doubt that Basil here means to say that he had both traditional and documentary authority for reading τοῖς οὖσι absolutely without the addition of ἐν Ἐφέσῳ after these words, else his whole argument against Eunomius, based on this quotation, must go for nothing. But in the first place, supposing that in these MSS. to which Basil refers, the words ἐν Ἐφέσῳ were not found at all in the address of the Epistle, of what weight, in a critical point of view, is this fact? Of the age, number, source, and general worth of these testimonies to which Basil appeals, we know nothing, and we must be jealous of taking a keen controversialist's authority for the value of what serves his purpose against his antagonist. As the case stands, we have on the one side the unanimous testimony of all the extant witnesses in favour of ἐν Ἐφέσῳ; we have against it only the assertion of a writer who, to support what he considers a good stroke at his adversary, assures us that he had heard a tradition that these words were to be omitted, and had seen some MSS. in which they were omitted, thereby at the same time implicitly assuring us that in his day the *received* reading was the same as in ours. In such a case it is surely

* Though in the Vatican Codex it appears only on the margin, Hug says it is inserted there by the first hand (*De Antiquitate Cod. Vat.* p. 26).

preposterous to attach any weight whatever to such a testimony. But, secondly, does Basil's statement necessarily deny the existence of the words ἐν Ἐφέσῳ in *any* part of this verse? Admitting that he did not read them after τοῖς οὖσι, does it follow that he did not read them here at all? May not the passage have stood, in the authorities to which he appeals, thus—τοῖς ἐν Ἐφέσῳ τοῖς ἁγίοις τοῖς οὖσι, κ. τ. λ.? the words having been transposed by some transcriber whose blunder Basil, with the blind zeal of a controversialist, hailed as proving his argument? This supposition has in its favour, 1. that Basil, in the passage quoted, formally states that Paul wrote thus in *an Epistle to the Ephesians;* 2. that this reading supports as well Basil's argument against Eunomius, as if ἐν Ἐφέσῳ had been entirely omitted; and 3. that unless we insert those or similar words somewhere in the passage, the inscription of this Epistle becomes so vague and indefinite as to be without meaning. Some confirmation of this suggestion may be drawn, perhaps, from the place in which Jerome alludes to the argument here urged by Basil from this passage. After stating the argument he adds, 'Alii vero simpliciter non ad eos *qui sunt*, sed *qui Ephesi sancti et fideles sunt*, scriptum arbitrantur,' where he arranges the words in the same order, substantially, in which we have supposed them to have stood in Basil's MSS. If this suggestion, however, be deemed ungrounded or improbable, we have still the fact that Basil's evidence is unsupported to fall back upon in support of the received reading. Stress has also been laid by Hug and others upon the passage from Tertullian, already quoted, in which he charges Marcion with having altered the title of this Epistle. Had the MSS., it is argued, in Tertullian's time contained ἐν Ἐφέσῳ, Marcion must have had to alter not only the title of the Epistle, but, to be consistent, the text also of the first verse; and with this Tertullian does not charge him, though 'not accustomed,' as Hug reminds us, 'to overlook anything in him.' But this, surely, is at best, very precarious reasoning. Tertullian may have not deemed it worth while to specify Marcion's alteration of the text just because it was rendered so obviously necessary by his alteration of the title, that in mentioning the latter (which was all his purpose required), he, by implication, also intimated the former.

From these considerations it appears that the received reading ἐν Ἐφέσῳ is impregnable. As a necessary consequence it follows that the title πρὸς Ἐφεσίους expresses the original and proper destination of this Epistle.

The Epistle is so much the utterance of a mind overflowing with thought and feeling that it does not present any precisely marked divisions under which its different parts may be ranked. After the usual apostolic salutation Paul breaks forth into an expression of thanksgiving to God and Christ for the scheme of redemption (i. 3-10), from which he passes to speak of the privileges actually enjoyed by himself and those to whom he was writing, through Christ (i. 11-23). He then reminds the Ephesians of their former condition when they were without Christ, and of the great change which, through divine grace, they had experienced (ii. 1-22). An allusion to himself as enjoying by divine revelation the knowledge of the mystery of Christ leads the Apostle to enlarge upon the dignity of his office and the blessed results that were destined to flow from the exercise of it to others (iii. 1-12). On this he grounds an exhortation to his brethren not to faint on account of his sufferings for the Gospel, and affectionately invokes on their behalf the divine blessing, concluding this, which may be called the more doctrinal part of his Epistle, with a doxology to God (iii. 13-21). What follows is chiefly hortatory, and is directed partly to the inculcation of general consistency, stedfastness in the faith, and propriety of deportment (iv. 1; v. 21), and partly to the enforcement of relative duties (v. 22; vi. 9). The Epistle concludes with an animated exhortation to fortitude, watchfulness and prayer, followed by a reference to Tychicus as the bearer of the Epistle, and by the usual apostolic benediction (vi. 10-24).

This Epistle was written during the earlier part of the Apostle's imprisonment at Rome, at the same time with that to the Colossians [Colossians, Epistle to the].

Of commentaries specially on this Epistle, the following deserve particular notice: Seb. Schmid., *Paraphras. super Ep. ad Ephes.*, 4to., Strasburg, 1684; Rückert, *Der Brief Pauli an die Ephes. erlaütert und vertheidigt*, 8vo. Leipz. 1834; Matthias, *Erklärung des Br. Pauli an d. Ephes.* 8vo. Greifswald, 1834; Harless, *Commentar. üb. d. Br. Pauli an d. Ephes.* 8vo. Erlangen, 1834.—W. L. A.

EPHESUS (Ἔφεσος), an old and celebrated city, capital of Ionia, one of the twelve Ionian cities in Asia Minor in the Mythic times, and said to have been founded by the Amazons, was in later ages inhabited by the Carians and Leleges, and taken possession of by the Ionians, under Androclus, the son of Codrus. It lay on the river Cayster, not far from the coast of the Icarian sea, between Smyrna and Miletus. It was also one of the most considerable of the Greek cities in Asia Minor; but while, about the epoch of the introduction of Christianity, the other cities declined, Ephesus rose more and more. It owed its prosperity in part to the favour of its governors, for Lysimachus named the city Arsinoë, in honour of his second wife, and Attalus Philadelphus furnished it with splendid wharfs and docks; in part to the favourable position of the place, which naturally made it the emporium of Asia on this side the Taurus (Strabo, xiv. pp. 641, 663). Under the Romans Ephesus was the capital not only of Ionia, but of the entire province of Asia, and bore the honourable title τῆς πρώτης καὶ μεγίστης μητροπόλεως τῆς Ἀσίας, *of the first and greatest metropolis of Asia.* (Boeckh, *Corp. Inscr. Gr.* 2968-2992). The Bishop of Ephesus in later times was the president of the Asiatic dioceses, with the rights and privileges of a patriarch (Evagr. *Hist. Eccl.* iii. 6). In the days of Paul Jews were found settled in the city in no inconsiderable number (compare Joseph. *Antiq.* xiv. 10, 11), and from them the Apostle collected a Christian community (Acts xviii. 19; xix. 1; xx. 16), which, being fostered and extended by the hand of Paul himself, became the centre of Christianity in Asia Minor. On leaving the city the Apostle left Timothy there (1 Tim. i. 3): at a later period, according to a tradition which prevailed extensively in ancient times, we find the Apostle John

in Ephesus, where he employed himself most diligently for the spread of the gospel, and where he not only died, at a very old age, but was buried, with Mary the mother of the Lord. Some make John bishop of the Ephesian communities, while others ascribe that honour to Timothy. In the book of Revelations (ii. 1) a favourable testimony is borne to the Christian churches at Ephesus.

The classic celebrity of this city is chiefly owing to its famous temple, and the goddess in whose honour it was built, namely, 'Diana of the Ephesians.' This goddess has been already noticed, and a figure given of her famous image at Ephesus [Artemis].

Around the image of the goddess was afterwards erected, according to Callimachus (*Hymn. in Dian.* 248), a large and splendid temple:

τοῦ δ' οὔ τι θειότερον ὄψεται ἠώς
Οὐδ' ἀφνειότερον· ῥέα κεν Πυθῶνα παρέλθοι·

This temple was burnt down on the night in which Alexander was born, by an obscure person of the name of Eratostratus, who thus sought to transmit his name to posterity; and, as it seemed somewhat unaccountable that the goddess should permit a place which redounded so much to her honour to be thus recklessly destroyed, it was given out that Diana was so engaged with Olympias, in aiding to bring Alexander into the world, that she had no time nor thought for any other concern. At a subsequent period, Alexander made an offer to rebuild the temple, provided he was allowed to inscribe his name on the front, which the Ephesians refused. Aided, however, by the whole of Asia Minor, they succeeded in erecting a still more magnificent temple, which the ancients have lavishly praised and placed among the seven wonders of the world. It took two hundred and twenty years to complete. Pliny (*Hist. Nat.* xxxvi. 21), who has given a description of it, says it was 425 feet in length, 220 broad, and supported by 127 columns, each of which had been contributed by some prince, and were 60 feet high: 36 of them were richly carved. Chersiphron, the architect, presided over the undertaking, and, being ready to lay violent hands on himself, in consequence of his difficulties, was restrained by the command of the goddess, who appeared to him during the night, assuring him that she herself had accomplished that which had brought him to despair. The altar was the work of Praxiteles. The famous sculptor Scopas is said by Pliny to have chiselled one of the columns. Apelles, a native of the city, contributed a splendid picture of Alexander the Great. The rights of sanctuary, to the extent of a stadium in all directions round the temple, were also conceded, which in consequence of abuse the Emperor Tiberius abolished. The temple was built of cedar, cypress, white marble, and even gold, with which it glittered (Spanh. *Observat. in Hymn. in Dian.* 353). Costly and magnificent offerings of various kinds were made to the goddess, and treasured in the temple; such as paintings, statues, &c., the value of which almost exceeded computation. The fame of the temple, of the goddess, and of the city itself, was spread not only through Asia but the world, a celebrity which was enhanced and diffused the more readily because sacred games were practised there, which called competitors and spectators from every country. Among his other enormities Nero is said to have despoiled the temple of Diana of much of its treasure. It continued to conciliate no small portion of respect, till it was finally burnt by the Goths in the reign of Gallienus.

At Ephesus Diana was worshipped under the name of Artemis. There was more than one divinity which went by the name of Artemis, as the Arcadian Artemis, the Taurian Artemis, as well as the Ephesian Artemis. It will be seen, from the figure already given, that this last differed materially from the Diana, sister of Apollo, whose attributes are the bow, the quiver, the girt-up robe, and the hound; whose person is a model of feminine strength, ease, and grace; and whose delights were in the pursuits of the chace.—

Along the shady hills and breezy peaks
Rejoicing in the chace, her golden bow
She bends, her deadly arrows sending forth.

The 'silver shrines' of the Ephesian Artemis, mentioned in Acts xix. 24, have been already noticed [Demetrius, 3].

Among the distinguished natives of Ephesus in the ancient world, may be mentioned Apelles and Parrhasius, rivals in the art of painting, Heraclitus, the man-hating philosopher, Hipponax, a satirical poet, Artemidorus, who wrote a history and description of the earth. The claims of Ephesus, however, to the praise of originality in the prosecution of the liberal arts, are but inconsiderable; and it must be content with the dubious reputation of having excelled in the refinements of a voluptuous and artificial civilization. With culture of this kind a practical belief in, and a constant use of, those arts which pretend to lay open the secrets of nature and arm the hand of man with supernatural powers, have generally been found conjoined. Accordingly, the Ephesian multitude were addicted to sorcery; indeed, in the age of Jesus and his Apostles, adepts in the occult sciences were numerous: they travelled from country to country, and were found in great numbers in Asia, deceiving the credulous multitude and profiting by their expectations. They were sometimes Jews, who referred their skill and even their forms of proceeding to Solomon, who is still regarded in the East as head or prince of magicians (Joseph. *Antiq.* viii. 2, 5; Acts viii. 9; xiii. 6, 8). In Asia Minor Ephesus had a high reputation for magical arts (Ortlob, *De Ephes. Libris combustis*).

The books mentioned, Acts xix. 19, were doubtless books of magic. How extensively they were in use may be learnt from the fact that 'the price of them' was 'fifty thousand pieces of silver.' Very celebrated were the Ephesian letters (Ἐφέσια γράμματα), which appear to have been a sort of magical formulæ written on paper or parchment, designed to be fixed as amulets on different parts of the body, such as the hands and the head (Plut. *Sym.* vii.; Lakemacher, *Obs. Philol.* ii. 126; Deyling, *Observ.* iii. 355). Erasmus (*Adag. Cent.* ii. 578) says that they were certain signs or marks which rendered their possessor victorious in everything. Eustathius (*ad Hom. Odys.* τ 694) states an opinion that Crœsus, when on his funeral pile, was very much benefited by the use of them; and that when a Milesian and an Ephesian were wrestling in the Olympic games, the former could gain no advantage, as the latter had Ephesian letters bound round his heel; but, these being discovered and removed, he lost his superiority and was thrown thirty times. These passages

show the feeling which prevailed respecting the books that were brought and burned, and serve to illustrate the remark made by the writer of the Acts, 'So mightily grew the word of the Lord and prevailed.'

The ruins of Ephesus lie two short days' journey from Smyrna, in proceeding from which towards the south-east the traveller passes the pretty village of Sedekuy; and two hours and a half onwards he comes to the ruined village of Danizzi, on a wide, solitary, uncultivated plain, beyond which several burial-grounds may be observed; near one of these, on an eminence, are the supposed ruins of Ephesus, consisting of shattered walls, in which some pillars, architraves, and fragments of marble have been built. The soil of the plain appears rich. It is covered with a rank, burnt-up vegetation, and is everywhere deserted and solitary, though bordered by picturesque mountains. A few corn-fields are scattered along the site of the ancient city, which is marked by some large masses of shapeless ruins and stone walls. Towards the sea extends the ancient port, a pestilential marsh. Along the slope of the mountain and over the plain are scattered fragments of masonry and detached ruins, but nothing can now be fixed upon as the great temple of Diana. There are some broken columns and capitals of the Corinthian order of white marble: there are also ruins of a theatre, consisting of some circular seats and numerous arches, supposed to be the one in which Paul was preaching when interrupted by shouts of, 'Great is Diana of the Ephesians.' The ruins of this theatre present a wreck of immense grandeur, and the original must have been of the largest and most imposing dimensions. Its form alone can now be spoken of, for every seat is removed,

282. [Ephesus.]

and the proscenium is a hill of ruins. A splendid circus (Fellows' *Reports*, p. 275) or stadium remains tolerably entire, and there are numerous piles of buildings seen alike at Pergamus and Troy as well as here, by some called gymnasia, by others temples; by others again, with more propriety, palaces. They all came with the Roman conquest. No one but a Roman emperor could have conceived such structures. In Italy they have parallels in Adrian's villa near Tivoli, and perhaps in the pile upon the Palatine. Many other walls remain to show the extent of the buildings of the city, but no inscription or ornament is to be found, cities having been built out of this quarry of worked marble. The ruins of the adjoining town, which arose about four hundred years ago, are entirely composed of materials from Ephesus. There are a few huts within these ruins (about a mile and a half from Ephesus), which still retain the name of the parent city, *Asalook*—a Turkish word, which is associated with the same idea as Ephesus, meaning the City of the Moon (Fellows). A church dedicated to St. John is thought to have stood near, if not on the site of, the present mosque. Arundell (*Discoveries*, vol. ii. p. 253) conjectures that the gate, called the Gate of Persecution, and large masses of brick wall, which lie beyond it, are parts of this celebrated church, which was fortified during the great Council of Ephesus. The tomb of St. John was in or under his church, and the Greeks have a tradition of a sacred dust arising every year, on his festival, from the tomb, possessed of miraculous virtues: this dust they term manna. Not far from the tomb of St. John was that of Timothy. The tomb of Mary and the seven *παιδία* (boys, as the *Synaxaria* calls the Seven Sleepers) are found in an adjoining hill. At the back of the mosque,

on the hill, is the sunk ground-plan of a small church, still much venerated by the Greeks. The sites of two others are shown at Asalook. There is also a building, called the Prison of St. Paul, constructed of large stones without cement.

Though Ephesus presents few traces of human life, and little but scattered and mutilated remains of its ancient grandeur, yet the environs, diversified as they are with hill and dale, and not scantily supplied with wood and water, present many features of great beauty. Arundell (ii. 244) enumerates a great variety of trees, which he saw in the neighbourhood, among which may be specified groves of myrtle near Ephesus. He also found heath in abundance, of two varieties; and saw there the common fern, which he met with in no other part of Asia Minor.

Dr. Chandler (p. 150, 4to) gives a striking description of Ephesus, as he found it on his visit in 1764:—'Its population consisted of a few Greek peasants, living in extreme wretchedness, dependence, and insensibility, the representatives of an illustrious people, and inhabiting the wreck of their greatness—some the substructure of the glorious edifices which they raised; some beneath the vaults of the stadium, once the crowded scene of their diversions; and some in the abrupt precipice, in the sepulchres which received their ashes. Such are the present citizens of Ephesus, and such is the condition to which that renowned city has been reduced. It was a ruinous place when the Emperor Justinian filled Constantinople with its statues and raised the church of St. Sophia on its columns. Its streets are obscured and overgrown. A herd of goats was driven to it for shelter from the sun at noon, and a noisy flight of crows from the quarries seemed to insult its silence. We heard the partridge call in the area of the theatre and of the stadium. The pomp of its heathen worship is no longer remembered; and Christianity, which was then nursed by apostles, and fostered by general councils, barely lingers on, in an existence hardly visible.' However much the Church at Ephesus may (Rev. ii. 2), in its earliest days, have merited praise for its 'works, labour, and patience,' yet it appears soon to have 'left its first love,' and to have received in vain the admonition—'Remember, therefore, from whence thou art fallen, and repent and do the first works; or else I will come unto thee quickly, and will remove thy candlestick out of his place, except thou repent.' If any repentance was produced by this solemn warning, its effects were not durable, and the place has long since offered an evidence of the truth of prophecy, and the certainty of the divine threatenings, as well as a melancholy subject for thought to the contemplative Christian. Its fate is that of the once-flourishing seven churches of Asia: its fate is that of the entire country—a garden has become a desert. Busy centres of civilization, spots where the refinements and delights of the age were collected, are now a prey to silence, destruction, and death. Consecrated first of all to the purposes of idolatry, Ephesus next had Christian temples almost rivalling the pagan in splendour, wherein the image of the great Diana lay prostrate before the cross; and, after the lapse of some centuries, Jesus gives place to Mahomed, and the crescent glittered on the dome of the recently Christian church. A few more scores of years, and Ephesus has neither temple, cross, crescent, nor city, but is 'a desolation, a dry land, and a wilderness.' Even the sea has retired from the scene of devastation, and a pestilential morass, covered with mud and rushes, has succeeded to the waters which brought up ships laden with merchandise from every part of the known world (Herod. i. 26, ii. 148; Liv. i. 45; Pausan. vii. 2, 4; Philo, *Byz. de 7 Orb. Mirac.* Gronov. *Thesaur.* viii.; Creuzer, *Symbol.* ii. 13; Hassl, *Erdbeschr.* ii. 132; for a plan of Ephesus, see Kiepert' Atlas, von Hellas; Arundell's *Visit to the Seven Churches of Asia;* Fellows' *Excursion in Asia Minor*, 1839; *Discoveries in Asia Minor*, by Rev. T. Arundell, 1834).—J. R. B.

EPHOD, an article of dress worn by the Hebrew priests. [PRIESTS.]

EPHRAIM (אֶפְרַיִם; Sept. Ἐφραίμ), the younger son of Joseph, but who received precedence over the elder in and from the blessing of Jacob (Gen. xli. 52; xlviii. 1). That blessing was an adoptive act, whereby Ephraim and his brother Manasseh were counted as sons of Jacob in the place of their father; the object being to give to Joseph, through his sons, a double portion in the brilliant prospects of his house. Thus the descendants of Joseph formed *two* of the tribes of Israel, whereas every other of Jacob's sons counted but as one. There were thus, in fact, thirteen tribes of Israel; but the number twelve is usually preserved, either by excluding that of Levi (which had no territory), when Ephraim and Manasseh are separately named, or by counting these two together as the tribe of Joseph, when Levi is included in the account. The intentions of Jacob were fulfilled, and Ephraim and Manasseh were counted as tribes of Israel at the departure from Egypt, and as such shared in the territorial distribution of the Promised Land (Num. i. 33; Josh. xvii. 14; 1 Chron. vii. 20). The precise position of the immediate descendants of Joseph in Egypt might form an interesting subject for speculation. Being the sons of one in eminent place, and through their mother connected with high families in Egypt, their condition could not at once have been identified with that of the sojourners in Goshen; and perhaps they were not fully amalgamated with the rest of their countrymen until that king arose who knew not Joseph.

At the departure from Egypt, the population of the two tribes of Ephraim and Manasseh together amounted to 72,700 men capable of bearing arms, greatly exceeding that of any single tribe, except Judah, which had somewhat more. During the wandering, their number increased to 95,200, which placed the two tribes much higher than even Judah. At the Exode, Ephraim singly had 40,500, and Manasseh only 32,200; but a great change took place in their relative numbers during the wandering. Ephraim lost 8000, and Manasseh gained 20,500; so that just before entering Canaan, Ephraim stood at 32,500, and Manasseh at 52,700. At the departure from Egypt, Ephraim, at 40,500, was above Manasseh and Benjamin in numbers; at the end of the wandering it was, at 32,500, above Simeon only, which tribe had suffered a still greater loss of numbers (comp. Num. i. and xxvi.).

One of the finest and most fruitful parts of

Palestine, occupying the very centre of the land, was assigned to this tribe. It extended from the borders of the Mediterranean on the west to the Jordan on the east: on the north it had the half-tribe of Manasseh, and on the south Benjamin and Dan (Josh. xvi. 5, sq.; xvii. 7, sq.). This fine country included most of what was afterwards called Samaria, as distinguished from Judæa on the one hand, and from Galilee on the other. The tabernacle and the ark were deposited within its limits, at Shiloh; and the possession of the sacerdotal establishment, which was a central object of attraction to all the other tribes, must, in no small degree, have enhanced its importance, and increased its wealth and population. The domineering and haughty spirit of the Ephraimites is more than once indicated (Josh. xvii. 14; Judg. viii. 1-3; xii. 1) before the establishment of the regal government; but the particular enmity of Ephraim against the other great tribe of Judah, and the rivalry between them, do not come out distinctly until the establishment of the monarchy. In the election of Saul from the least considerable tribe in Israel, there was nothing to excite the jealousy of Ephraim; and, after his heroic qualities had conciliated respect, it rendered the new king true allegiance and support. But when the great tribe of Judah produced a king in the person of David, the pride and jealousy of Ephraim were thoroughly awakened, and it was doubtless chiefly through their means that Abner was enabled to uphold for a time the house of Saul; for there are manifest indications that by this time Ephraim influenced the views and feelings of all the other tribes. They were at length driven by the force of circumstances to acknowledge David upon conditions; and were probably not without hope that, as the king of the nation at large, he would establish his capital in their central portion of the land. But when he not only established his court at Jerusalem, but proceeded to remove the ark thither, making his native Judah the seat both of the theocratical and civil government, the Ephraimites became thoroughly alienated, and longed to establish their own ascendancy. The building of the temple at Jerusalem, and other measures of Solomon, strengthened this desire; and although the minute organization and vigour of his government prevented any overt acts of rebellion, the train was then laid, which, upon his death, rent the ten tribes from the house of David, and gave to them a king, a capital, and a religion suitable to the separate views and interests of the tribe. Thenceforth the rivalry of Ephraim and Judah was merged in that between the two kingdoms; although still the predominance of Ephraim in the kingdom of Israel was so conspicuous as to occasion the whole realm to be called by its name, especially when that rivalry is mentioned.

2. EPHRAIM (Ἐφραΐμ), a city in the wilderness of Judæa, to which Jesus withdrew from the persecution which followed the miracle of raising Lazarus from the dead (John xi. 54). It is placed by Eusebius (*Onomast.* s. v. Ἐφρών) eight Roman miles north of Jerusalem. This indication would seem to make it the same with the Ephrain which is mentioned in 2 Chron. xiii. 19, along with Bethel and Jeshanah, as towns taken from Jeroboam by Abijah. And this again is doubtless the same which Josephus also names along with Bethel as 'two small cities' (πολίχνια), which were taken and garrisoned by Vespasian while reducing the country around Jerusalem (*De Bell. Jud.* iv. 9, 9).

3. EPHRAIM, a mountain or group of mountains in central Palestine, in the tribe of the same name, on or towards the borders of Benjamin (Josh. xvii. 15; xix. 50; xx. 7; Judg. vii. 24; xvii. 1; 1 Sam. ix. 4; 1 Kings iv. 8). From a comparison of these passages it may be collected that the name of 'Mount Ephraim' was applied to the whole of the ranges and groups of hills which occupy the central part of the southernmost border of this tribe, and which are prolonged southward into the tribe of Benjamin. In the time of Joshua these hills were densely covered with trees (Josh. xvii. 18), which is by no means the case at present. In Jer. l. 19, Mount Ephraim is mentioned in apposition with Bashan, on the other side of the Jordan, as a region of rich pastures, suggesting that the valleys among these mountains were well watered and covered with rich herbage, which is true at the present day.

4. EPHRAIM, THE FOREST OF, in which Absalom lost his life (2 Sam. xviii. 6-8), was in the country east of the Jordan, not far from Mahanaim. How it came to bear the name of a tribe on the other side the river is not known. Some think it was on account of the slaughter of the Ephraimites here in the time of Jephthah (Judg. xii. 4-6); but others suppose that it was because the Ephraimites were in the habit of bringing their flocks into this quarter for pasture; for the Jews allege that the Ephraimites received from Joshua, who was of their tribe, permission to feed their flocks in the woodlands within the territories of any of the tribes of Israel; and that as this forest lay near their territories on the other side the Jordan, they were wont to drive their flocks over to feed there (see Jarchi, Kimchi, Abarbanel, &c., on 2 Sam. xviii. 6).

EPHRATAH, otherwise BETHLEHEM, which see.

EPHRON, a Hittite residing in Hebron, who sold to Abraham the cave and field of Machpelah as a family sepulchre (Gen. xxiii. 6).

EPICUREANS. [PHILOSOPHY, GREEK.]

EPISTLES. In directing our inquiry first of all towards the relation in which the Epistles stand to the other component parts of the New Testament, we find that both the Old and New Testament have been arranged by divine wisdom after one and the same plan. All the revelations of God to mankind rest upon history. Therefore in the Old, as well as in the New Testament, the history of the deeds of God stands FIRST, as being the basis of holy writ; thereupon follow the books which exhibit the doctrines and internal life of the men of God—in the Old Testament the Psalms, the writings of Solomon, &c., and in the New Testament the Epistles of the Apostles; finally, there follow in the Old Testament the writings of the prophets, whose vision extends into the times of the New Testament; and at the conclusion of the New Testament stands its only prophetic book, the Revelation of John.

In this also we must thankfully adore divine wisdom, that the Epistles, which lay down the doctrines of the Christian religion, originate, not

from one apostle alone, but from all the four principal apostles; so that one and the same divine truth is presented to our eyes in various forms as it were in various mirrors, by which its richness and manifold character are the better displayed.

The Epistles of the New Testament divide themselves into two parts—the PAULINE and the so-called CATHOLIC.

The PAULINE Epistles are thirteen in number; or fourteen, if we add to them the Epistle to the Hebrews. Up to our days their genuineness has almost unanimously been recognised in Germany, with the exception only of the pastoral epistles, and more especially the first letter to Timothy. Eichhorn and Bauer have attacked the genuineness of all the three pastoral epistles, and Schleiermacher that of the first epistle to Timothy. Indeed, the very peculiar character of the Pauline Epistles is so striking to any one who is not ignorant of the want of ease and originality conspicuous in the counterfeit writings of early times, as to leave not the least doubt of their genuineness. Depth of thought, fire of speech, firmness of character—these manly features, joined withal to the indulgence of feelings of the most devoted love and affection, characterize these epistles. The amiable personal character of the apostle may be most beautifully traced in his Epistles to the Philippians and to Philemon.

All the Epistles, except the one to the Romans, were called forth by circumstances and particular occasions in the affairs of the communities to which they were addressed. Not all, however, were preserved; it is, at least, evident, from 1 Cor. v. 9, that a letter to the Corinthians has been lost; from Col. iv. 16, it has also been concluded—though probably erroneously, since there perhaps the letter to the Ephesians is referred to—that another letter to the community of Laodicea has likewise been lost. Press of business usually compelled Paul—what was, besides, not uncommon in those times—to use his companions as amanuenses. He mentions (Gal. vi. 11), as something peculiar, that he had written this letter with his own hand. This circumstance may greatly have favoured the temptation to forge letters in his name, because since the period of Alexandrine literature it was not unusual to indite spurious books, as is evident from Eusebius (*Hist. Eccles.* p. 23); and even Christian bishops made complaints about the falsification of their letters. Paul alludes to this (2 Thes. ii. 2), and therefore writes the greeting (2 Thes. iii. 17) with his own hand. Paul himself exhorted the communities mutually to impart to each other his letters to them, and read them aloud in their assemblies (Col. iv. 16). It is therefore probable that copies of these letters had been early made by the several communities, and deposited in the form of collections. So long therefore as the various communities transmitted the manuscripts to each other, no other letters, it is obvious, could come into the collections than those to whose genuineness the communities to whom they were originally addressed, bore witness. Even Peter (2 Pet. iii. 16) seems to have had before him a number of Paul's letters, as, about forty years later, a number of letters of Ignatius were transmitted by Polycarp to Smyrna, while the church of Philippi forwarded to him those directed to them (*Ep. Polic.* sub fin.; Euseb. *Hist. Eccles.* iii. 36). This Pauline collection, in contra-distinction to the gospels, passed by the name of ὁ ἀπόστολος.

The letters of Paul may be chronologically arranged into those written before his Roman imprisonment, and those written during and after it: thus beginning with his first letter to the Thessalonians, and concluding with his second to Timothy, embracing an interval of about ten years (A.D. 51-64). In our Bibles, however, the letters are arranged according to the pre-eminent parts and stations of the communities to whom they were addressed, and conclude with the epistles to the two bishops and a private letter to Philemon.

That the Epistles offered great difficulties was already felt in the earliest times (2 Peter iii. 16). In the Roman Church their true understanding was more particularly lost by the circumstance that it understood by THE LAW, only the *opus operatum* of the ceremonial law; consequently the Roman Church could not comprehend justification by faith, and taught instead justification by works; as soon, therefore, as the true understanding of the Pauline epistles dawned upon Luther, his breach with the Roman Church was decided.

Among the more ancient interpreters of the Pauline letters Chrysostom and Calvin deserve particular distinction; though the former, with all his zeal and psychological penetration, was still deficient in the true hermeneutic method.

THE CATHOLIC EPISTLES.—There is, in the first instance, a diversity of opinion respecting their name: some refer it to their WRITERS (letters from all the other apostles who had entered the stage of authorship along with Paul); some, again, to their CONTENTS (letters of no special but general Christian tenor); others, again, to the RECEIVERS (letters addressed to no community in particular). None of these views, however, is free from difficulties. The first and the second views—and more especially the first—cannot be brought to harmonize with the idiomatic expressions in the extant pages of the ancient writers; the second is, besides, contradicted by the fact that the letter of James is of a special tenor, while, on the contrary, that to the Romans is of such a general character as to deserve the name CATHOLIC in that sense. The third opinion is most decidedly justified by passages from the ancient writers (Euseb. *Hist. Eccles.* v. 18; Clem. Alex. *Strom.* iv. 15, ed. Potter, p. 606; Orig. *c. Cels.* i. 63). The Pauline Epistles had all their particular directions, while the letters of Peter, James, 1 John, and Jude were circular epistles. The Epistles 2 and 3 John were subsequently added, and included on account of their shortness, and to this collection was given the name CATHOLIC LETTERS, in contradistinction to the PAULINE, which were called ὁ ἀπόστολος.—A. T.

EPISTLES OF THE APOSTOLICAL FATHERS. Under this head we shall briefly notice those remains of Christian antiquity which are ascribed to the writers usually styled the Apostolic Fathers, from the circumstance that they were converted to the Christian faith during the life-time, and probably by the instrumentality, of the Apostles. Of Barnabas and the epistle which bears his name we have already spoken at length [BARNABAS].

1. CLEMENT, or CLEMENS ROMANUS. It will probably be generally admitted that no produc-

tion of the early church approaches so near the apostolic writings, in the union of devout feeling with justness and sobriety of thought, as that denominated the 'First Epistle of Clement to the Corinthians' but addressed in the name of 'the Church sojourning at Rome (ἡ παροικοῦσα Ῥώμην) to the Church of God sojourning at Corinth.' Eusebius terms it, 'great and wonderful' (μεγάλη τε καὶ θαυμασία), and states that in his own and former times it was read in most churches. (*Hist. Eccles.* iii. 16; iii. 38; iv. 22, 23). Irenæus calls it ἱκανωτάτην γραφήν, 'a most powerful writing' (Euseb. *Hist. Eccles.* v. 6). It is frequently quoted by Clemens Alexandrinus (*Strom.* i. 7, § 38; Opera, ed. *Klotz*, ii. p. 29), ὁ ἀπόστολος Κλήμης; *Strom.* iv. 17, § 107; ii. p. 335; *Strom.* v. 12, § 81; iii. p. 57; *Strom.* vi. 3, § 65; iii. p. 137. The only known manuscript of this Epistle is that appended to the celebrated Alexandrian Codex, which was presented to Charles I. by Cyrillus Lucaris, the patriarch of Constantinople. The same manuscript contains also a fragment of the so-called second Epistle. They were first published at Oxford, in 1633, by Patrick Young, the royal librarian. Sir Henry Wotton re-examined the manuscript, amended Young's copy in above eighty places, and published a very correct edition at Cambridge, in 1718. Certain portions of the first epistle have been thought to bear internal evidence of spuriousness. Bignonius, in a letter to Grotius, instances ch. xl., which relates to the presentation of offerings at set times, in which the word λαϊκός occurs; and the epithet *ancient* (ἀρχαίαν) applied to the Corinthian church in ch. xlvii. Mosheim asserts that some passages are evidently taken from Clement of Alexandria (Mosheim's *Commentaries*, transl. by Vidal, vol. i. p. 271). The main object of this Epistle was to allay the dissensions which had arisen in the Corinthian church, and especially to repress the unruly spirit shown by many against their teachers. It is worthy of notice that Clement uniformly speaks of the opposition of the Corinthians against their presbyters, never of their insubordination to their bishop: he inculcates submission to the presbyters, but never to the bishop. Thus in ch. xlvii., 'It is disgraceful, beloved, and unworthy of your training in Christ, to have it reported that the well-established and ancient Corinthian church has been excited by one or two individuals to revolt against the presbyters' (*its priests*, Abp. Wake's transl.). Ch. liv., 'Only let the flock of Christ be at peace with the presbyters that are set over it' (τῶν καθεσταμένων πρεσβυτέρων). Ch. lvii., 'Do ye who laid the foundation of the dissension submit to the presbyters' (*priests*, Abp. Wake's transl.). In two other passages the term πρεσβυτέροι appears to denote simply the elder members of the church, while the term ἡγούμενοι (Heb. xiii. 7, 17, 24) is used for their teachers or superintendents. Ch. i., 'Being subject to those that have the rule over you' (τοῖς ἡγουμένοις ὑμῶν), 'and giving due honour to the aged among you' (τοῖς παρ' ὑμῖν πρεσβυτέροις). Ch. xxi., 'Let us honour those that are set over us' (τοὺς προηγουμένους); 'let us respect the aged that are among us' (τοὺς πρεσβυτέρους); 'let us instruct the young,' &c. In ch. xlii. he speaks of bishops and deacons in a manner which shows that he considered the former as synonymous with presbyters: 'They (the Apostles) appointed their first-fruits to be bishops and deacons (*ministers*, Abp. Wake's transl.) of those who should believe. Nor was this any new thing, seeing that long before it was written concerning bishops and deacons. For thus the Scripture, in a certain place, saith, I will appoint their overseers (bishops, τοὺς ἐπισκόπους), and their ministers (deacons, τοὺς διακόνους) in faith.' It has indeed been supposed that the bishop of the Corinthian church was deceased, and that the disorders which Clement sought to repress broke out before his successor was appointed. But had this been the case, for which there is not the slightest evidence, it is almost incredible that no allusion should be made to it. The only legitimate inference appears to be, 'that the original constitution of the church of Corinth still subsisted in Clement's time; the government was still vested not in one man, but in many' (Dr. Arnold's *Sermons on the Christian Life, Introduction*, p. xlvi.).

In Clement's Epistle only one book of the New Testament is expressly named, Paul's first Epistle to the Corinthians; but though the Evangelists are not named, several sayings of Christ contained in our Gospels are repeated. There are also evident allusions to the Acts, all the Pauline Epistles (1 Thessalonians excepted), the Epistles of Peter and James, and the Epistle to the Hebrews. A tabular view of these passages is given by Dr. Lardner (*Credibility of the Gospel History*, pt. ii. ch. ii.; *Works*, vol. ii. pp. 35-53). Eusebius, speaking of Clement's Epistle, says, 'He has inserted in it many sentiments taken from the Epistle to the Hebrews, and sometimes makes use of the identical expressions, from which it is evident that that composition is not a recent one. . . . . Paul having addressed the Hebrews in their native language, some say that the Evangelist Luke, and others that this very Clement, translated the document; an opinion which is supported by the fact, that the Epistle of Clement and that to the Hebrews are marked by the same peculiarities of style, and in both compositions the sentiments are not unlike.'—(*Hist. Eccles.* iii. 38, ed. Valessii, 1672, p. 110.)

As to the date of this epistle it has been fixed by Grabe, Galland, Wotton, and Hefele about the year 68; but Cotelerius, Tillemont, and Lardner think that it was written at the close of the Diocletian Persecution in 96 or 97. A passage in ch. xli., in which Clement speaks in the present tense respecting the sacrifices of the Mosaic law, has been supposed to favour the earlier date; but Josephus adopts the same phraseology in his *Antiquities*, which were not finished till twenty years after the destruction of Jerusalem.

The first writer that notices the second Epistle of Clement is Eusebius, who does not absolutely pronounce it spurious, but says that it was less known than the former, and not quoted by ancient writers (*Hist. Eccles.* iii. 38). Photius states decidedly that it was rejected as spurious. It is only a fragment, and its style is rather homiletic than epistolary. The Gospels are quoted several times in it, more expressly than in the first Epistle, and there is one passage from an apocryphal writing called the Gospel according to the Egyptians (Lardner's *Credibility, &c.*, part ii. ch. 3; *Works*, ii. 55). In 1752, John James Wetstein published, at the end of his edition of

the Greek Testament, two epistles in Syriac (accompanied by a Latin translation), attributed to Clement, which were discovered at the end of a manuscript of the Syriac New Testament. Immediately on their publication Dr. Lardner examined the evidence for their genuineness, and gave the result of his inquiries in a *Dissertation* (*Works*, vol. x. pp. 186-212), to which we refer the reader, only remarking that the whole strain of these compositions, and the allusions to prevailing practices, sufficiently indicate that they were written long after Clement's time.

The following works have also been attributed to Clement, but, as they are unquestionably supposititious, we shall merely give their titles. 1. The *Apostolic Constitutions*, in eight books. 2. The *Apostolic Canons*. 3. The *Recognitions of Clement*. 4. The *Clementina*. They are all printed in the *Patres Apostolici* of Cotelerius, vol. i. (Mosheim's *Commentaries*, translated by Vidal, vol. i. pp. 270-274).

2. IGNATIUS, according to Eusebius (*Hist. Eccles.* iii. 36) and Origen (*Hom.* vi. *in Luc.*; *Opera*, ed. Lommatzsch, v. 101), the second bishop, or, according to Jerome (*De Vir. Illustr.* xvi.), the third bishop of Antioch in Syria. Fifteen epistles bear his name. Three of these (one addressed to the Virgin Mary, the other two to St. John) are preserved only in a Latin version. The rest are extant in Greek and in an ancient Latin version, and are addressed to Mary of Cassabolis or Neapolis, to Hero, to the churches at Tarsus, Antioch, Philippi, Ephesus, Magnesia, Trallium, Rome, Philadelphia, Smyrna, and to Polycarp. The first eight are unanimously allowed to be spurious. Of the remaining seven (which were written on his journey from Antioch to Rome, where he suffered martyrdom by exposure to wild beasts), there are two recensions, one longer, the other shorter. It has been warmly controverted whether the longer epistles are interpolations of the shorter, or the shorter abridgments of the longer. Mr. Whiston contended earnestly in favour of the longer recension, including the Epistles to Tarsus, Antioch, and Hero, and attempted to prove that the smaller were only heretical extracts from them made in the fourth century. He published both recensions, with translations and various readings, in the first volume of his *Primitive Christianity Revived*, London, 1711, 5 vols. 8vo. The same opinion has lately been maintained by Dr. Charles Meier of the University of Giessen (*Studien und Kritiken*, 1836, p. 340), whose arguments have been met by Dr. Richard Rothe in an essay on the genuineness of the Ignatian Epistles appended to his work *Die Anfänge der Christlichen Kirche und ihrer Verfassung*, Wittenberg, 1837. Lardner and most modern critics adopt the shorter recension. Mosheim expresses himself very doubtfully, and, while he allows the seven epistles to have 'somewhat of a genuine cast,' confesses that he is unable to determine how much may be considered as authentic (*Commentaries*, translated by Vidal, vol. i. pp. 276, 277). Dr. Neander, while he allows many passages to bear the impress of antiquity, considers even the shorter recension to be grossly interpolated. The support which it was supposed might be drawn from these epistles in favour of episcopacy gave, on their publication, an exaggerated importance to the question of their genuineness, and called forth the polemical skill of several distinguished theologians of the seventeenth century. In 1666 a work appeared by Dallæus (Jean Daillé), entitled, *De Scriptis quæ sub Dionysii Areopagitæ et Ignatii Antiocheni nominibus circumferuntur Libri duo*, in which he maintains that the Ignatian Epistles were forged at the close of the third, or at the beginning of the fourth century (c. xxxviii. p. 461). In reply to this and other writers, Bishop Pearson published his celebrated *Vindiciæ Ignatianæ*, Cantab. 1672, which was reprinted by Cotelerius in his edition of the *Apostolic Fathers*, vol. ii. pp. 251-444. (Wake's *Genuine Epistles of the Apostolical Fathers*, London, 1737, pp. xl.-li. pp. 60-128; Campbell's *Lectures on Ecclesiastical History*, London, 1800, vol. i. pp. 139, 184-197; Dr. Arnold's *Sermons on the Christian Life*, 1841; *Introduction*, pp. xlvi.-xlix.; Lardner's *Credibility*, pt. ii. ch. 5; *Works*, vol. ii. pp. 73-94; Neander's *Allgemeine Geschichte*, i. Abth. ii. Band. 1140, 2nd edit. 1843).

3. POLYCARP's *Epistle to the Philippians*. Irenæus, in a letter to Florinus the Valentinian, preserved in part by Eusebius (*Hist. Eccles.* v. 20), gives an interesting account of his early recollections of Polycarp, and refers to the epistles which he sent to the neighbouring churches. Only one, however, has been preserved; it was addressed to the Philippians, and in Jerome's time was publicly read in the assembly of Asia—'Scripsit ad Philippenses valde utilem epistolam quæ usque hodie in Asiæ conventu legitur' (*De Vir. Illustr.* c. 13). It is also mentioned by Eusebius (*Hist. Eccles.* iii. 36), who cites two passages from it (§ 8 and § 13) relating to Ignatius, and remarks that it contains several quotations from the first epistle of Peter (*Hist. Eccles.* iv. 14). It is divided into fourteen sections, of which the first nine and the thirteenth, preserved by Eusebius, are in the original Greek, and the rest only in an ancient Latin Version. This version of the whole epistle was first printed at Paris in 1498. Peter Halloix published the Epistle in Greek and Latin in 1633, from a copy sent by the Jesuit Sirmond to Turrianus. Fourteen years after, Archbishop Usher obtained another copy, from which he prepared an edition in 1647. An excellent edition, edited by Sir Thomas Smith, appeared in 1709 (Hefele's *Patrum Apostolicorum Opera*, p. xviii.; Lardner's *Credibility*, pt. ii. ch. 6).

4. *The Shepherd of Hermas* [HERMAS].—J. E. R.

EPISTLES, SPURIOUS [APOCRYPHA]. Of these many are lost, but there are several still extant: the principal are

The Epistle of Paul to the Laodiceans.
The Third Epistle of Paul to the Corinthians.
The Epistle of Peter to James.
The Epistles of Paul and Seneca.

There was an Epistle to the Laodiceans extant in the beginning of the second century, which was received by Marcion; but whether this is the same with the one now extant in the Latin language is more than doubtful. 'There are some,' says Jerome, 'who read the Epistle to the Laodiceans, but it is universally rejected.' The original Epistle was most probably a forgery founded on Coloss. iv. 16. 'And when this Epistle is read among you, cause

that it be read also in the church of the Laodiceans, and that *ye likewise read the Epistle from Laodicea.*' The apparent ambiguity of these last words has induced some to understand St. Paul as speaking of an epistle written by him to the Laodiceans, which he advises the Colossians to procure from Laodicea, and read to their church. 'Some,' says Theodoret, 'imagine Paul to have written an Epistle to the Laodiceans, and accordingly produce a certain forged epistle; but the Apostle does not say, the Epistle *to*, but the Epistle *from*, the Laodiceans.' Bellarmine, among the Roman Catholics, and among the Protestants Le Clerc and others, suppose that the passage in Colossians refers to an epistle of St. Paul, now lost, and the Vulgate translation—*eam quæ Laodicensium est*—seems to favour this view. Grotius, however, conceives that the Epistle to the Ephesians is here meant, and he is followed by Hammond, Whitby, and Mill, and also by Archbishop Wake (*Epistles of the Apostolic Fathers*). Theophylact, who is followed by Dr. Lightfoot, conceives that the epistle alluded to is 1 Timothy. Others hold it to be 1 John, Philemon, &c. Mr. Jones conjectures that the epistle now passing as that to the Laodiceans (which seems entirely compiled out of the Epistle to the Philippians) was the composition of some idle monk not long before the Reformation; but this opinion is scarcely compatible with the fact mentioned by Mr. Jones himself, that when Sixtus of Sienna published his *Bibliotheca Sancta* (A.D. 1560), there was a *very old* manuscript of this epistle in the library of the Sorbonne. This epistle was first published by James Le Fevre of Estaples in 1517. It was the opinion of Calvin, Louis Capell, and many others, that St. Paul wrote several epistles besides those now extant. One of the chief grounds of this opinion is the passage 1 Cor. v. 9. There is still extant, in the Armenian language, an epistle from the Corinthians to St. Paul, together with the Apostle's reply. This is considered by Mr. La Croze to be a forgery of the tenth or eleventh century, and he asserts that it was never cited by any one of the early Christian writers. In this, however, he is mistaken, for this epistle is expressly quoted as Paul's by St. Gregory the Illuminator in the third century, Theodore Chrethenor in the seventh, and St. Nierses in the twelfth. Neither of them, however, is quoted by any ancient Greek or Latin writer (Henderson, *On Inspiration*, p. 497. The passages are cited at length in Father Paschal Aucher's *Armenian and English Grammar*, Venice, 1819).

The *Epistle of Peter to James* is a very ancient forgery. It was first published by Cotelerius, and is supposed to have been a preface to the *Preaching of Peter*, which was in great esteem among some of the early Christian writers, and is several times cited as a genuine work by Clement of Alexandria, Theodotus of Byzantium, and others. It was also made use of by the heretic Heracleon, in the second century. Origen observes of it, that it is not to be reckoned among the ecclesiastical books, and that it is neither the writing of Peter nor of any other inspired person. Mr. Jones conceives it to be a forgery of some of the Ebionites in the beginning of the second century.

The *Epistles of Paul and Seneca* consist of eight pretended Latin letters from the philosopher Seneca to St. Paul, and six from the latter to Seneca. Their antiquity is undoubted. St. Jerome had such an idea of the value of these letters that he was induced to say, 'I should not have ranked Seneca in my catalogue of saints, but that I was determined to it by those Epistles of Paul to Seneca and Seneca to Paul, which are read by many......... He was slain by Nero, two years before Peter and Paul were honoured with martyrdom.' St. Augustine also observes (*Epistle to Macedonius*) that 'Seneca wrote certain epistles to St. Paul, which are now read.' The epistles are also referred to in the spurious 'Acts' of Linus, the first bishop of Rome after the Apostles. But these *Acts* are a manifest forgery, and were first alluded to by a monk of the eleventh century. The letters do not appear to have been mentioned by any other ancient writer; but it seems certain that those now extant are the same which were known to Jerome and Augustine. The genuineness of these letters has been maintained by some learned men, but by far the greater number reject them as spurious. Mr. Jones conceives them to be a forgery of the fourth century, founded on Philip. iv. 22. Indeed, there are few persons mentioned in the New Testament, as companions of the Apostle, who have not had some spurious piece or other fathered on them.

These are the principal of the ancient forged epistles. Among those now universally rejected are the well-known *Epistle of Lentulus* to the Roman Senate, giving a description of the person of Christ (*Orthodoxographia*, p. 2, Basil, 1555; Fabricii *Cod. Epig.*, 1719), and some pretended epistles of the Virgin Mary. One of these is said to be written in Hebrew, and addressed to the Christians of Messina in Sicily, of which a Latin translation has been published, and its genuineness gravely vindicated (*Veritas Vindicata*, 1692, fol.). It is dated from Jerusalem, in the 42nd year 'of our Son,' nones of July, *Luna* 17, *Feria quinta*. The metropolitan church of our Lady of *the Letter*, at Messina, takes its name from the possession of this celebrated epistle, of which some have pretended that even the autograph still exists. An epistle of the Virgin to the Florentines has been also celebrated, and there is extant a pretended letter from the same to St. Ignatius, together with his reply.—W. W.

ERASTUS (Ἔραστος), a Corinthian, and one of Paul's disciples, whose salutations he sends from Corinth to the Church at Rome as those of 'the chamberlain of the city' (Rom. xvi. 23). The words so rendered (οἰκονόμος τῆς πόλεως; Vulg. *arcarius civitatis*) denote the city treasurer or steward, an officer of great dignity in ancient times (comp. Joseph. *Antiq.* vii. 8, 2). We find this Erastus with Paul at Ephesus, whence he was sent along with Timothy into Macedonia (Acts xix. 22). They were both with the apostle at Corinth when he wrote, as above, from that city to the Romans: at a subsequent period Erastus was still at Corinth (2 Tim. iv. 20), which would seem to have been the usual place of his abode.

ERECH (אֶרֶךְ; Sept. Ὀρέχ), one of the cities which formed the beginning of Nimrod's kingdom in the plain of Shinar (Gen. x. 10). It is not said that he built these cities, but that he established his power over them; from which

we may conclude that they previously existed. An ancient tradition, which Jerome and others have followed, but which is against all probability, and has no foundation to rest upon, identifies Erech with Edessa. Bochart, however, rather seeks the name in the Aracca or Aracha of the old geographers, which was on the Tigris, upon the borders of Babylonia and Susiana (Ptolemy, vi. 3; Ammian. Marcell. xxxiii. 6, 26). This was probably the same city which Herodotus (i. 185; vi. 119) calls Arderikka, *i. e.* Great Erech. Rosenmüller happily conjectures that Erech probably lay nearer to Babylon than Aracca; and this has been lately confirmed by Col. Taylor, the British resident at Bagdad, who is disposed to find the site of the ancient Erech in the great mounds of primitive ruins, indifferently called Irak, Irka, and Senkerah, by the nomade Arabs; and sometimes El Assayiah, 'the place of pebbles.' These mounds, which are now surrounded by the almost perpetual marshes and inundations of the lower Euphrates, lie some miles east of that stream, about midway between the site of Babylon and its junction with the Tigris. Some have thought that the name of Erech may be preserved in that of Irak (*Irak-Arabi*), which is given to the region enclosed by the two rivers, in the lower part of their course.

ERES or ÆRES (אֶרֶז) occurs in numerous places of Scripture, but authors are not agreed on the exact meaning of the term: Celsius (*Hierobot.* i. 106, sq.), for instance, conceives that it is a general name for the pine tribe, to the exclusion of the cedar of Lebanon, which he considers to be indicated by the word BEROSH. The majority of authors, however, are of opinion that the cedar of Lebanon (*Pinus Cedrus* or *Cedrus Libani* of Botanists) is alone intended. It is unfortunate that there should be discrepancy of opinion as to the identification of so remarkable a tree, as it necessarily produces a distrust in the conclusions which are arrived at respecting, what would appear to be, the less easily distinguished plants and trees mentioned in the Bible. The discrepancy of opinion has on this occasion, however, arisen from the doubt whether Eres, in the numerous passages of Scripture where it occurs, is always used in the same signification; that is, whether it is always intended to specify only one particular kind of the pine tribe, or whether it is not sometimes used generically. In the latter case others of the pine tribe appear to be intended along with the cedar of Lebanon, and not to its exclusion, as advocated by the learned Celsius. We are disposed to think that the different passages in which *Eres* occurs authorize our considering it a general term, applied to different species.

But before proceeding to compare these passages with one another, it will be desirable to ascertain its modern acceptation, as well as the meaning which it bears in Arabic works on Materia Medica. In these such terms are generally used in a more precise sense than in general works, the authors of which are usually unacquainted with the correct appellation of the products of nature.

In the first place, there is no doubt that the name *arz* or *ars* (ارز) is, at the present day, applied to the cedar of Lebanon, by the Arabs in the neighbourhood. Mr. Harmer, on Canticles v. 15, observes that the country people near the mountain call the cedar *ars*, which is very nearly the original name. But the same name appears to be applied also to others of the pine tribe: thus 'at Aleppo the fir-tree is included under the name *ars*' (Niebuhr, as quoted by Rosenmüller, *Bibl. Bot.* p. 246). So we find the term *alerce*, that is *al-arz*, applied by the Arabs to a coniferous plant, a native of Mount Atlas, and of other uncultivated hills on the coast of Africa. The wood-work of the roof of the celebrated mosque, now the cathedral, of Cordova, which was built in the ninth century, has been proved to be formed of the wood of this tree (Loudon's *Arboret.* p. 2463). From *alerce* the English name *larch* is supposed to have been derived. If we consult Persian works on Materia Medica we find the name *aras* or *orus* given as a synonyme of *abhul*, which is a species of juniper: so, again, *ooruz* is described as *durukht sunoburbe bur*, that is, 'the pine-tree without fruit;' *sunobur* appearing as the general term for pine-trees, which are distinguished by the name of *sunobur sughar*, 'the lesser pine,' called also *tunoob*, and *sunobur kubar*, 'the larger pine:' of this are given, as synonymes, *nasòv* and *chilghozah*, which is the Pinus Gerardiana of Botanists. With the Arabs, as quoted by Celsius, *l. c.* p. 107: 'ارز (*arz*) nomen generale est ad pini species designandas;' and he further quotes Abu'l Fadli, as stating, 'Arz est arbor zanaubar (pinus) cujus, quoad omnes ejus species, mentionem faciemus sub lit. Z. si Deus volet.—Loco condicto hoc modo pergit: Zanaubar (pinus) est arbor magna. Gignitur in montibus, et regionibus frigidis. Ejus tres sunt species, mas nempe, et fœmina major, atque minor.' It is not necessary for us on the present occasion to determine what are the species intended by the Arabian authors. They no doubt sometimes follow Dioscorides, and at other times insert names and descriptions which will apply only to the species indigenous in the mountains of Persia. Different species of pine, therefore, will be adduced as the kinds intended, in different countries. We may also remark, as stated by Celsius, that the translators of the sacred Scriptures into Arabic sometimes use the term *sunobar*, sometimes *arz*, as the representative of *eres*.

Rosenmüller states that 'the word eres, which occurs so frequently in the Old Testament, is, by the ancient translators, universally rendered cedar' (κέδρος). Therefore it has been inferred by him, as well as others, that the cedar of Lebanon must be intended: but the name does not appear to have been applied specially to this tree by the ancients. Thus the κέδρος of Dioscorides is supposed by Sprengel, in his edition of that author, to be a species of juniper, and Dr. Lindley, the editor of the last numbers of Sibthorpe's *Flora Græca*, agrees with him: 'κέδρος, juniperus oxycedrus, vel potius J. Phœnicea, secundum Sprengelium, cui assentio, κέδρος μικρά, juniperus communis.' J. oxycedrus is the brown-berried juniper, and J. Phœnicea is the Phœnician juniper or cedar, while J. Lycia, the Lycian juniper or cedar, is cedrus Phœnicea altera Plinii et Theophrasti. These have already been mentioned under the article BEROSH.

Pliny, speaking of the plants of Syria, says, 'Juniperi similem habent Phœnices et cedrum minorem. Duo ejus genera, Lycia et Phœnicia,

differunt folio: nam quæ durum, acutum, spinosum habet, oxycedros vocatur, ramosa et nodis infesta: altera odore præstat. Fructum ferunt myrti magnitudine, dulcem sapore. Et majoris cedri duo genera: quæ floret, fructum non fert. Frugifera non floret: et in ea antecedentem fructum occupat novus. Semen ejus cupresso simile. Quidam cedrelaten vocant. Ex hac resina laudatissima' (*Hist. Nat.* xiii. 11). The conclusion of this passage, as translated by Holland, is, 'and the timber of it is everlasting: wherefore in old time they were wont to make the images of the gods of this wood, as it appeareth by the statue of Apollo Sosianus, made of cedar wood brought from Seleucia.' Again (xvi. 39), 'as for cedars, the best simply be those that grow in Candia, Africke, and Syrie. This vertue hath the oile of cedar, that if any wood or timber be thoroughly anointed therewith it is subject neither to worm nor moth, nor yet to rottennesse.' The greater part of this account of the different kinds of cedar is adopted from Theophrastus (iii. 12); though, no doubt, the latter was also acquainted with a large cedar, as appears from lib. v. c. 9, where, speaking of Syria, he says, 'Illic enim cedri in montibus, cum longitudine, tum crassitudine præstantissimæ nascuntur.' Quintus Curtius also uses the term κέδρος in a general sense, when he says of the palace of Persepolis, 'multa cedro ædificata erat regia.'

283. [Cedar of Lebanon.]

If we proceed to compare the several passages of Scripture in which the word Eres occurs, we shall equally find that one plant is not strictly applicable to them all. The earliest notice of the cedar is in Lev. xiv. 4, 6, where we are told that Moses commanded the leper that was to be cleansed to make an offering of two sparrows, cedar-wood, wool dyed in scarlet, and hyssop; and in ver. 49, 51, 52, the houses in which the lepers dwell are directed to be purified with the same materials. Again, in Num. xix. 6, Moses and Aaron are commanded to sacrifice a red heifer: 'And the priest shall take cedar-wood and hyssop and scarlet.' As remarked by Lady Callcott (*Scrip. Herbal*, p. 92), 'The cedar was not a native of Egypt, nor could it have been procured in the desert without great difficulty; but the juniper is most plentiful there, and takes deep root in the crevices of the rocks of Mount Sinai.' That some, at least, of the cedars of the ancients were a species of juniper is evident from the passages we have quoted; the wood of most of them is more or less aromatic. The ancients, it may be remarked, threw the berries of the juniper on funeral piles, to protect the departing spirit from evil influences, and offered its wood in sacrifice to the infernal gods, because they believed its presence was acceptable to them. They also burned it in their dwelling-houses to keep away demons. It is curious that, in the remote parts of the Himalayan Mountains, another species of this genus is similarly employed, as the present writer has mentioned elsewhere (*Himalayan Botany*, p. 350): 'Here there is also another species, *Juniperus religiosa*, Royle, called *gogul* by the natives, and employed for burning as incense in their religious ceremonies.'

At a later period we have notices of the various uses to which the wood of the *eres* was applied, as 2 Sam. v. 11; vii. 2-7; 1 Kings v. 6, 8, 10; vi. 9, 10, 15, 16, 18, 20; vii. 2, 3, 7, 11, 12; ix. 11; x. 27; 1 Chron. xvii. 6; 2 Chron. ii. 8; ix. 27; xxv. 18. In these passages we are informed of the negotiations with Hiram, King of Tyre, for the supply of cedar-trees out of Lebanon, and of the uses to which the timber was applied in the construction of the Temple, and of the king's palace: he 'covered the house with beams and boards of cedar;' 'the walls of the house within were covered with boards of cedar;' there were 'cedar pillars,' and 'beams of cedar;' and the altar was of cedar. In all these passages the word *eres* is employed, for which the Arabic translation, according to Celsius (*loc. cit.*), gives *sunobar* as the synonyme. There is nothing distinctive stated respecting the character of the wood, from which we might draw any certain conclusion, further than that, from the selection made and the constant mention of the material used, it may be fairly inferred that it must have been considered as well fitted, or rather, of a superior quality, for the purpose of building the Temple and palace. From this, however, proceeds the difficulty in admitting that what we call the cedar of Lebanon was the only tree intended by the name *Eres*. For modern experience has ascertained that its wood is not of a superior quality. To determine this point, we must not refer to the statements of those who take their descriptions from writers who, indeed, describe cedar-wood, but do not prove that it was derived from the cedar of Lebanon. The term 'cedar' seems to have been as indefinite in ancient as in modern times. Now we find it applied to the wood of *Juniperus virginiana*, which is red or pencil cedar; and to that of J. Bermudiana or Bermuda cedar. J. oxycedrus yields the cedar of the north of Spain and south of France, but the term is also applied to many other woods, as to white cedar, that of Melia Azedarach; and Indian cedar, that of Cedrela Toona.

Mr. Loudon, in his *Arboretum* (p. 2417), describes it thus: 'The wood of the cedar is of a reddish white, light and spongy, easily worked, but very apt to shrink and warp, and by no means du-

rable.' But when the tree is grown on mountains, the annual layers of wood are much narrower and the fibre much finer than when it is grown on plains; so much so that a piece of cedar-wood brought from Mount Lebanon by Dr. Parisel, in 1829, and which he had made into a small piece of furniture, presented a surface compact, agreeably veined, and variously shaded, and which, on the whole, may be considered handsome (*Hist. du Cèdre*, p. 43). But Dr. Pococke, who brought away a piece of one of the large cedars which had been blown down by the wind, says that the wood does not differ in appearance from white deal, and that it does not appear to be harder. Varennes de Feuille considers it as the lightest of the resinous woods, and he adds that it contains very little resin; that its grain is coarse, and that he thinks the wood can neither be so strong nor so durable as it has the reputation of being. Mr. Loudon says (*loc. cit.*) that a table which Sir J. Banks had made out of the Hillingdon cedar was soft, without scent (except that of common deal), and possessed little variety of veining; and the same remarks will apply to a table which Mr. L. had made from a plank which is referred to as having been kindly presented to him by J. Gostling, Esq. of Whitton Park. Dr. Lindley (*Gardener's Chronicle*, vol. i. p. 699) calls it 'the worthless, though magnificent cedar of Mount Lebanon.' A correspondent, however, at p. 733, says, 'Mr. Wilcox of Warwick, a most ingenious and skilful carver (in his works little inferior to the celebrated Gibbons), has now in his rooms some specimens of furniture made of cedar of Lebanon, ornamented with carved work, in flowers, leaves, &c. &c., in the best taste, and in sharpness and colour so similar to box-wood that any common observer would mistake it to be such.' In reply to this Dr. Lindley adds, The fact last mentioned is the first that has come to our knowledge of the cedar of Lebanon having been found of important use.' He is of opinion that some of the cedar-trees sent by Hiram, king of Tyre, may have been obtained from Mount Atlas, and may have been the produce of the above *Alerce* or Al Arz—the Callitris quadrivalvis—which no doubt furnished the ancients with one of their most valued woods [THYINE]. This is hard, durable and fragrant, and commonly used in religious buildings in the East.' Though we have seen both temples and palaces built entirely with one kind of cedar (that of the Cedrus Deodara), we think it more probable that, as the timber had to be brought from a distance, where all the kinds of cedar grew, the common pine-tree and the cedar of Lebanon would both furnish some of the timber required for the building of the Temple, together with juniper cedar. The name *arz*, as we have seen, is applied by the Arabs to all three; and they would give all the qualities of timber that could be required. We have shown that the *κέδρος* of the ancients was most probably the wood of a juniper. Celsius was of opinion that the *eres* indicated the Pinus sylvestris or Scotch pine, which yields the red and yellow deals of Norway, and which is likewise found on Mount Lebanon. This opinion seems to be confirmed by Ezekiel xxvii. 5, 'They have made all thy ship boards of fir-trees of Senir, they have taken cedar from Lebanon to make masts for thee.' For it is not probable that any other tree than the common pine would be taken for masts, when this was procurable, since even in the present day 'Pallas assures us that the pine of Livonia and Lithuania differs not from the Pinus sylvestris; masts, he says, are not made of any peculiar species, as foreigners, and more especially the French, think; but they are all of the Pinus sylvestris' (Loudon, *Arboret.* p. 2158).

Though Celsius appears to us to be quite right in concluding that *eres*, in some of the passages of Scripture, refers to the pine-tree, yet it seems equally clear that there are other passages to which this tree will not answer. It certainly appears improbable that a tree so remarkable for the magnificence of its appearance as the cedar of Lebanon should not have been noticed in the Sacred Scriptures; and this would be the case if we applied *eres* exclusively to the pine, and *berosh* to the cypress. If we consider some of the remaining passages of Scripture, we cannot fail to perceive that they forcibly apply to the cedar of Lebanon and to the cedar of Lebanon only. Thus, in Ps. xcii. 12, it is said, 'The righteous shall flourish like a palm-tree, and spread abroad like a cedar of Lebanon.' It has been well remarked 'that the flourishing head of the palm and the spreading abroad of the cedar are equally characteristic.' But the prophet Ezekiel (ch. xxxi.) is justly adduced as giving the most magnificent and, at the same time, the most graphic description of this celebrated tree (ver. 3): 'Behold, the Assyrian was a cedar in Lebanon with fair branches, and with a shadowy shroud, and of an high stature; and his top was among the thick boughs:' (ver. 5) 'Therefore his height was exalted above all the trees of the field, and his boughs were multiplied, and his branches became long because of the multitude of waters:' (ver. 6) 'All the fowls of heaven made their nests in his boughs, and under his branches did all the beasts of the field bring forth their young.' In this description, Mr. Gilpin has well observed, 'the principal characteristics of the cedar are marked: first, the multiplicity and length of its branches. Few trees divide so many fair branches from the main stem, or spread over so large a compass of ground. 'His boughs are multiplied,' as Ezekiel says, 'and his branches become long,' which David calls spreading abroad. His very boughs are equal to the stem of a fir or a chestnut. The second characteristic is what Ezekiel, with great beauty and aptness, calls his shadowy shroud. No tree in the forest is more remarkable than the cedar for its close-woven leafy canopy. Ezekiel's cedar is marked as a tree of full and perfect growth, from the circumstance of its top being among the thick boughs.' The other principal passages in which the cedar is mentioned are 1 Kings iv. 33; 2 Kings xix. 23; Job xl. 17; Ps. xxix. 5; lxxx. 10; xcii. 12; civ. 16; cxlviii. 9; Cant. i. 17; v. 15; viii. 9; Isa. ii. 13; ix. 8, 10; xiv. 8; xxxvii. 24; xli. 19; xliv. 14; Jer. xxii. 7, 14, 23; Ezek. xvii. 3, 22, 23; Amos ii. 9; Zeph. ii. 14; Zech. xi. 1, 2; and in the Apocrypha, 1 Esdras iv. 48; v. 55; Ecclus. xxiv. 13; l. 12; but it would occupy too much space to adduce further illustrations from them of what indeed is the usually admitted opinion.

It is, however, necessary before concluding to give some account of this celebrated tree, as noticed by travellers in the East, all of whom make

a pilgrimage to its native sites. The cedar of Lebanon is well known to be a widely-spreading tree, generally from 50 to 80 feet high, and when standing singly, often covering a space with its branches, the diameter of which is much greater than its height. The horizontal branches, when the tree is exposed on all sides, are very large in proportion to the trunk, being disposed in distinct layers or stages, and the distance to which they extend diminishes as they approach the top, where they form a pyramidal head, broad in proportion to its height. The branchlets are disposed in a flat fan-like manner on the branches. The leaves, produced in tufts, are straight, about one inch long, slender, nearly cylindrical, tapering to a point, and are on short footstalks. The male catkins are single, solitary, of a reddish hue, about two inches long, terminal and turning upwards. The female catkins are short, erect, roundish, and rather oval; they change after fecundation into oval oblong cones, which, when they approach maturity, become from 2½ inches to 5 inches long. Every part of the cone abounds with resin, which sometimes exudes from between the scales. Belon, who travelled in Syria about 1550, found the cedars about 28 in number, in a valley on the sides of the mountains. Rauwolf, who visited the cedars in 1574, 'could tell no more but 24, that stood round about in a circle; and two others, the branches whereof are quite decayed from age.' De la Roque, in 1688, found but 20. Maundrell, in 1696, found them reduced to 16, and Dr. Pococke, who visited Syria 1744 and 1745, discovered only 15. One of these, that had the soundest body, though not the largest, measured 24 feet in circumference, and another, with a sort of triple body, and of a triangular figure, measured 12 feet on each side. 'The wood,' he says, 'does not differ from white deal in appearance, nor does it seem to be harder. It has a fine smell, but is not so fragrant as the juniper of America, which is commonly called cedar, and it also falls short of it in beauty. I took a piece of the wood from a great tree that was blown down by the wind, and left there to rot: there are 15 large ones standing.' Mr. Buckingham, in 1825, says, 'Leaving Biskerry on our right, we ascended for an hour over light snow, until we came to the *Arz-el Libinien*, or the cedars of Lebanon.' M. Laure, who, in company with the Prince de Joinville, visited the cedars in 1836, calls them *El-Herzé*. M. Lamartine, in 1832, says, 'These trees diminish in every succeeding age. Travellers formerly counted 30 or 40; more recently, 17; more recently still, only 12. There are now but 7. These, however, from their size and general appearance, may be fairly presumed to have existed in biblical times. Around these ancient witnesses of ages long since past, there still remains a little grove of yellow cedars, appearing to me to form a group of from 400 to 500 trees or shrubs. Every year, in the month of June, the inhabitants of Beschierai, of Eden, of Kandbin, and the other neighbouring valleys and villages, climb up to these cedars, and celebrate mass at their feet. How many prayers have resounded under these branches, and what more beautiful canopy for worship can exist!'—J. F. R.

ESAR-HADDON. [Assyria.]

ESAU (עֵשָׂו; Sept. Ἡσαῦ). The origin and meaning of the name are not quite free from ambiguity. Simon, deriving the word from עָשָׂה, texit, renders it *pilis opertus* (covered with hair), and some such reason as this implies, seems involved in the passage Gen. xxv. 25. Cruden, however, explains the name as meaning *one who does* (qui facit), an actor or agent. His surname of Edom (red) was given him, it appears (Gen. xxv. 30) from the red pottage which he asked of Jacob. Esau was the eldest son of 'Isaac, Abraham's son' (Gen. xxv. 19) by Rebekah, 'the daughter of Bethuel the Syrian of Padan-aram, the sister to Laban the Syrian.' The marriage remaining for some time (about 19 years; compare xxv. 20, 26) unproductive, Isaac entreated Jehovah, and she became pregnant. Led by peculiar feelings 'to inquire of Jehovah,' Rebekah was informed that she should give birth to twins, whose fate would be as diverse as their character, and, what in those days was stranger still, that the elder should serve the younger. On occasion of her delivery the child that was born first was 'red, all over like an hairy garment; and they called his name Esau.' Immediately afterwards Jacob was born.

In process of time the different natural endowments of the two boys began to display their effects in dissimilar aptitudes and pursuits. While Jacob was led by his less robust make and quiet disposition to fulfil the duties of a shepherd's life, and pass his days in and around his tent, Esau was impelled, by the ardour and lofty spirit which agitated his bosom, to seek in the toils, adventures, and perils of the chace, his occupation and sustenance: and, as is generally the case in natures like his, he gained high repute by his skill and daring.

A hunter's life is of necessity one of uncertainty as well as hardship; days pass in which the greatest vigilance and the most strenuous exertions may fail even to find, much less capture, game. The hunting tribes of North America often find themselves, after severe and long-continued labour and watching, unprovided with food, and necessitated to a length of abstinence which would be fatal to persons bred in towns or living by the ordinary pursuits of the field. Esau had on one occasion experienced such a disappointment, and, wearied with his unproductive efforts, exhausted for want of sustenance, and despairing of capturing any prey, he was fain to turn his steps to his father's house for succour in his extremity. On reaching home he found his brother enjoying a carefully prepared dish of pottage: attracted by the odour of which he besought Jacob to allow him to share in the meal. His brother saw the exigency in which Esau was, and determined not to let it pass unimproved. Accordingly he puts a price on the required food. Esau was the elder, and had in consequence immunities and privileges which were of high value. The surrender of these to himself Jacob makes the condition of his complying with Esau's petition. Urged by the cravings of hunger, alarmed even by the fear of instant death, Esau sold his birthright to his younger brother, confirming the contract by the sanction of an oath. Jacob having thus got his price, supplied the famishing Esau with needful refreshments.

Arrived now at years of maturity Esau, when 40 years of age, married two wives, Judith and Bashemoth. Some unhappy feelings appear to

have previously existed in the family; for while Esau was a favourite with his father, in consequence, it appears, of the presents of venison which the youth gave him, Jacob was regarded with special affection by the mother. These partialities, and their natural consequences in unamiable feelings, were increased and exaggerated by Esau's marriage. Judith and Bashemoth were Canaanites, and, on account of their origin, were unacceptable to Isaac and Rebekah. The latter was especially grieved. 'I am weary,' she said (Gen. xxvii. 46), 'of my life, because of the daughters of Heth.' Esau thus became alienated from the parental home. Even his father's preference of him may have been injuriously affected. The way was in some measure smoothed for the transference of the coveted birthright to the younger son.

The time for the fulfilment of the compact between the brothers at length arrived. Isaac is 'sick unto death.' His appetite, as well as his strength, having failed, is only to be gratified by provocatives. He desires some savoury venison, and gives the requisite instructions to Esau, who accordingly proceeds in quest of it. On this Rebekah begins to feel that the critical time has come. If the hated Hittites are not to enter with her less favoured son into possession of the family property, the sale of the birthright (the original idea of which she may have suggested to the 'plain man,' her son Jacob) must now in some way be confirmed and consummated. One essential particular remained—the father's blessing. If this should be given to Esau, all hope was gone; for this, like our modern wills, would hand the inheritance and the accompanying headship of the tribe to Esau and his wives.

Isaac, however, had lost his sight—indeed, all his senses were dull and feeble. It was therefore not very difficult to pass off Jacob upon him as Esau. Rebekah takes her measures, and, notwithstanding Jacob's fears, succeeds. Isaac, indeed, is not without suspicion, but a falsehood comes to aid Jacob in his otherwise discreditable personation of Esau. The blessing is pronounced, and thus the coveted property and ascendancy are secured. The affectionate endearments which pass between the deceiver and the abused old blind father stand in painful contrast with the base trickery by which mother and son had accomplished their end.

Esau, however, returns from the field, approaches his decrepid and sightless father, declaring who he is. 'And Isaac trembled very exceedingly, and said, Who? where is he that hath taken venison and brought it me, and I have eaten of all before thou camest, and have blessed him?—yea, and he shall be blessed.' On this Esau becomes agitated, and entreats a blessing for himself—'Bless me, even me also, O my father.' Urging this entreaty again and again, even with tears, Isaac at length said unto him, 'Behold, thy dwelling shall be the fatness of the earth, and of the dew of heaven from above; and by thy sword shalt thou live, and shalt serve thy brother; and it shall come to pass when thou shalt have the dominion that thou shalt break his yoke from off thy neck' (Gen. xxvii.).

Thus, deprived for ever of his birthright, in virtue of the irrevocable blessing, Esau but too naturally conceived and entertained a hatred of Jacob, and even formed a resolution to seize the opportunity for slaying him, which the days of mourning consequent on the approaching decease of their father would be likely to afford. Words to this effect, which Esau let drop, were repeated to his mother, who thereupon prevailed on her younger son to flee to his uncle Laban, who lived in Haran, there to remain until time, with its usual effect, might have mitigated Esau's wrath. Meanwhile Esau had grown powerful in Idumæa, and when, after many years, Jacob intended to return within the borders of the Jordan, he feared lest his elder brother might intercept him on his way, to take revenge for former injuries. He accordingly sent messengers to Esau in order, if possible, to disarm his wrath. Esau appears to have announced in reply, that he would proceed to meet his returning brother. When, therefore, Jacob was informed that Esau was on his way for this purpose with a band of four hundred men, he was greatly distressed, in fear of that hostility which his conscience told him he had done something to deserve. What then must have been his surprise when he saw Esau running with extended arms to greet and embrace him? and Esau 'fell on his neck, and kissed him, and they wept.' Jacob had prepared a present for Esau, hoping thus to conciliate his favour; but with the generous ardour which characterizes, and somewhat of the disinterestedness which adorns, natures like his, Esau at first courteously refused the gift—'I have enough, my brother, keep that thou hast unto thyself' (Gen. xxxiii.).

The whole of this rencontre serves to show that, if Jacob had acquired riches, Esau had gained power and influence as well as property; and the homage which is paid to him indirectly, and by implication, on the part of Jacob, and directly, and in the most marked and respectful manner, by the females and children of Jacob's family, leads to the supposition that he had made himself supreme in the surrounding country of Idumæa.

Esau from this time appears but very little in the sacred narrative. He was ready to accompany Jacob, or to send with him an escort, probably for protection, but Jacob's fears and suspicions induced him to decline these friendly offers; and they separated on the same day that they met, after an interview in which Jacob's bearing is rather that of an inferior to his lord than that of a brother, and Esau's has all the generousness which a high nature feels in forgiving an injury and aiming to do good to the injurer. The latter, we are merely told, 'returned on his way to Seir' (Gen. xxxiii. 16).

Jacob and Esau appear together again at the funeral rites which were paid to their deceased father; but the book of Genesis furnishes no particulars of what took place.

Esau is once more presented to us (Gen. xxxvi.) in a genealogical table, in which a long line of illustrious descendants is referred to 'Esau, the father of the Edomites' (Gen. xxxvi. 43).

If the historical outline now given is supported by the scriptural narrative, the character of Esau has not ordinarily received justice at the hands of theologians. The injurious impression against him may be traced back to a very ancient period. The Targum of Jonathan sanctioned and spread, if it did not originate, the misjudgment, by un-

warrantable additions to the account given in Genesis. The reason, it states, why Esau did not at once slay his brother was, lest, as happened in the case of Cain and Abel, another man-child might be born, and thus he should be still deprived of the inheritance; he, therefore, resolved to wait till the death of Isaac, when the murder of Jacob would leave him in safe and undisputed possession. Representations made in the Talmud are of a similar tendency (Winer's *Realwörterbuch*, in voc.). The fathers of the Church, particularly Augustine, regard Esau as the representative of the damned, while they admire Jacob as that of the elect.—J. R. B.

ESDRAELON, PLAIN OF. [PALESTINE.]

ESDRAS, BOOKS OF, (APOCRYPHA); Gr. Ἔσδρας, Lat. *Esdras*. In several manuscripts of the Latin Vulgate, as well as in all the printed editions anterior to the decree of the Council of Trent, and in many since that period, there will be found four books following each other, entitled the 1st, 2nd, 3rd, and 4th books of Ezra. The two first are the canonical books of Ezra and Nehemiah, the 3rd and 4th form the subject of the present article. They are the same which are called 1st and 2nd Esdras in the English Authorized Version.

The THIRD BOOK OF EZRA is found in all the manuscripts of the Seventy, where it is called the *first* book, and precedes the second or canonical Ezra, which, in this version, includes the book of Nehemiah. It contains 109 *κεφαλαια*. It is little more than a recapitulation of the history contained in the canonical Ezra, interspersed with some remarkable interpolations, the chief of which are chap. i., taken from 2 Chron. xxxv. xxxvi., part of the last chapter, from Nehem. viii., and the narration of the themes or sentences of Zorobabel and the two other young men of Darius's body-guard (3 Esd. iii. 4). The book is more properly a version than an original work. The style is acknowledged to be elegant, and not unlike that of Symmachus. This book was made use of by Josephus, who cites it largely in his *Antiquities*, but nothing further has been ascertained respecting the age either of the original or the translation. It is cited by Clemens Alexandrinus (*Stromata*, i.), the author of the *Imperfect Work on Matt.* (Hom. i.), Athanasius (*Orat.* iii. *cont. Arianos*), and by Cyprian (*Epist. ad Pompeium*).

From the circumstance of Jerome's having declined to translate the third and fourth books of Ezra, they are (with the exception of the book of Job and the Psalms) the only portions either of the canonical or apocryphal writings of the Old Testament which have been preserved to us entire in the old Latin translation. We have already noticed the contempt in which Jerome held these books (see the extract from his letter to Vigilantius, *supra*, p. 177, APOCRYPHA, where *Athanasius* is a misprint for *Jerome*). In his preface to Ezra and Nehemiah, he observes, 'None should be troubled by the circumstance that only one book [of Ezra] has been published by us, nor should any take pleasure in the dreams of the third and fourth apocryphal books, for, in the Hebrew, Ezra and Nehemiah form but one volume, and what is not of the twenty-four elders is to be utterly rejected.' Augustine speaks of the third book with more respect, although we have already seen [DEUTERO-CANONICAL] that he did not include it in his catalogue. Ezra, he says (*De Civitate Dei*, lib. xviii. cap. 36) . . . . 'who is rather to be considered a historian than a prophet, unless, indeed, he may be understood to have prophesied, when . . . . he demonstrates that *truth is the strongest* (alluding to 3 Ezra, ch. iii. iv.), for, in the gospel, Christ is acknowledged to be the truth.'

This book does not, however, appear to have been included in the catalogue of any council, nor has any portion of it been read in the offices of the church. Having been rejected as apocryphal by the Council of Trent, it has been removed, together with the fourth book, in the Sixtine and Clementine editions of the Vulgate, to the end of the volume, with the observation that they are thus retained in order to 'preserve from being altogether lost books which had been sometimes cited by some of the holy fathers. The following is the order of the books of the Old Testament declared to be canonical by this council:—5 of Moses; Joshua; Judges; Ruth; 4 of Kings; 2 of Chronicles; 2 of Ezra (viz. Ezra and Nehemiah); Tobit; Judith; Esther; Job; Psalms; Proverbs; Ecclesiastes; Canticles; Wisdom; Ecclesiasticus; Isaias; Jeremias with Baruch; Ezekiel; Daniel; 12 minor Prophets, viz. Hosea, Joel, Amos, Abdias, Jonas, Micah, Nahum, Habacuc, Zephanias, Haggai, Zecharias, Malachi, and 2 of Maccabees.

The FOURTH BOOK OF EZRA is quite of a different character from the former, and it has been even doubted whether it more properly belongs to the Apocrypha of the Old or the New Testament, but the circumstance of the author's personating the celebrated scribe of that name has been supposed to have led to its obtaining a place in the former. It consists of a number of similitudes or visions, resembling in some passages the Apocalypse. The descriptions are acknowledged to be sometimes most spirited and striking, occasionally rising to great sublimity of thought, energy of conception, and elegance of expression (Lee's *Epistolary Discourse;* Laurence's *Æthiopic Version of Ezra*). This would probably be still more apparent had we the book in the original, for it seems highly probable that this, as well as the former book, is a translation from the Hebrew or Chaldee (Morini *Exercit. Bibl.* lib. ii. p. 225; Fabricii *Cod. Pseud. V. T.* iii. 189). But neither this nor the Greek Version, which was known to Clemens Alexandrinus in the second century (*Stromata*, iii.), are any longer in existence, and the book was supposed to have been preserved only in the old Latin Ante-Hieronymian Version, until the middle of the seventeenth century, when an Arabic version was discovered in the Bodleian Library by Mr. Gregory, a translation of which, by Simon Ockley, the Arabic Professor at Cambridge, was published, in 1711, by Mr. William Whiston (*Primitive Christianity*, vol. iv.). Subsequently an Ethiopic version, which, although known to Ludolf, was concealed from the world, was published for the first time, accompanied by a Latin and English translation, by the late Archbishop Laurence, in 1820. It had been supposed indeed by some, that the work was extant in Hebrew, and Archbishop Laurence states, on the authority of Father Simon, that Leo Judah's translation, which ap-

peared in Robert Stephen's octavo Bible (1545?), was from a Hebrew manuscript, which, however, the Archbishop asserts, was itself unquestionably a translation into Hebrew from the printed Vulgate. The truth of the matter, however, we believe to be, that Leo Judah only translated the canonical books, while the apocryphal were done by Cholin, who merely put such Hebrew words in the margin as he conjectured to have been the originals; for the translator observes in the preface that he had 'never seen the book either in Greek or Hebrew.' It is remarked in some of Stephen's editions, that the *prophet* Ezra, who wrote this book, was probably a different person from the *scribe*. But, scornfully as Jerome looked upon this book, and that probably more on dogmatical than purely critical grounds, it was highly esteemed by others among the Fathers of the Christian church. The book is ascribed to the *prophet* Ezra by Clemens Alexandrinus (*Strom.* b. iii.), who looked upon it as canonical and divine, as did Irenæus, Tertullian, and Ambrose, who has made several quotations from this 'prophet,' as he also styles him (Sixtus Senensis, *Biblioth. Sanct.*), and among others, one which no longer exists in the Latin, but is found both in the Arabic and Æthiopic (Laurence's *Ezra*). In the church of Rome the mass for Whit-Tuesday commences with a sentence from 4 Ezra, ch. ii. 36, 37 ('Receive,' &c., to 'kingdom'), and on the anniversary of the Martyrs, with another from the same chapter, ver. 45, 'Now are they crowned and receive palms.' Jahn observes that the 'catholics have made many martyrs on its authority' (*Heb. Commonwealth*, b. v.). Pico de Mirandula considered this book as divinely inspired, and Gaspar Zamora placed it in his Concordance between Nehemiah and Maccabees. An 'anonymous catholic,' cited by Jahn, maintains that the Pseudo-Ezra was considered as an inspired writer until the time of the Council of Trent; but this is scarcely consistent with the fact, that although all the printed editions of the Vulgate, before the time of the council, contain the four books of Ezra without any mark of doubt, very few *manuscripts* are known to possess the fourth. Among modern writers, Whiston (*Authentic Records*), and others, both before and since his time, have considered this book as an inspired composition, and as the genuine production of Ezra (See *Prophecy that hath lain hid above these* 2000 *years; Middle State of the Souls Departed; the Prophecies of the Second Book of Esdras*, by Sir John Floyer).

Author and Age of the Fourth Book of Ezra.—Jahn (*ut supra*) supposes the author to have been a Jew, educated in Chaldea, who borrowed his style from Daniel, and who, having become a Christian, still retained his reverence for Cabalistic traditions. He places him in the first or early in the second century (see also Vogel's *Commentatio de quarto lib. Esdræ*, Altorf. 1795). Archbishop Laurence, on the other hand (*ut supra*), conceives that the author was a Jew who never changed his creed, and endeavours to destroy the two main arguments in favour of the work having emanated from a Christian: one of these is founded on the remarkable fact that the author speaks of Jesus by name (chap. vii. 28), the other on the circumstance of his being plainly conversant with the Christian Scriptures. As to the former, Dr. Laurence appeals to the Ethiopic Version, where the text is (not *my Son Jesus*, but) '*my Messiah* shall be revealed, which is confirmed by the Arabic reading, *my Son Messiah*. The Archbishop considers these texts both in the Latin and Arabic to be interpolations or explanatory glosses. The argument derived from the author's acquaintance with the Christian Scriptures is principally founded on the two first chapters, which are wanting in both the Arabic and Ethiopic Versions, and in most manuscripts of the Latin are placed at the beginning of the third book of Ezra, or at the end of Nehemiah, where they form a distinct book The two last chapters are equally wanting in these versions, and in most Latin manuscripts form a fifth book, or are otherwise clearly distinguished from the former part of the book. This fifth book is in some manuscripts divided into seven chapters, and the whole of the fourth into thirty-nine. The division into two chapters is erroneously ascribed by Dr. Frank Lee to Robert Stephen, for the same division is found in the Editio Princeps by Fust and Schoeffer, printed in 1462, where also the two last chapters, as well as the two first, are incorporated into the rest of the book, and have so continued in all subsequent editions. Dr. Laurence concludes from other internal grounds, that the book was written before the Christian era, after the death of Mark Anthony, and before the accession of Augustus, or between the 28th and 25th year before Christ. Upon this hypothesis he conceives, that besides that the doctrine of the immortality of the soul and a separate state of spiritual existence between death and judgment are distinctly described as the general and popular belief, the most important use of the book consists in the testimony which it bears to the Jewish idea of the Messiah, who is herein clearly and familiarly denominated by the appellation of the *Son of God*—as well as to the belief that previously to his appearance on earth he existed in heaven.

Dr. Lee (*ut supra*) is strongly of opinion that the author of this book was contemporary with the author of the book of Enoch, or rather that both these books were written by one and the same author. It does not appear that Josephus was aware of its existence.

Among the most remarkable passages in this book is that famous one (4 Ezra xiv.) which ascribes the recension of the entire Scriptures to Ezra. It is well known that the Rabbins have a tradition, preserved in the Talmud, that on the rebuilding of the Temple, Ezra assembled a college of 120 literati, known by the name of the Great Synagogue, for the purpose of collecting and arranging the Scriptures. Among the members are enumerated Daniel, Shadrach, Meshach, and Abednego, Haggai, Zechariah, Ezra, and Nehemiah, and Simon the Just. Ezra, who, they say, was the same with the prophet Malachi, they represent as the first, and Simon the Just, its latest surviving member, as the last president of the college. They further represent all these eminent men as living at the same period, under Darius Hystaspis, whom they suppose to be the same Darius who was subdued by Alexander, and also as that Artaxerxes who sent Ezra and Nehemiah to Jerusalem. Daniel is thus made to have

lived to the time of Alexander the Great, and Simon the Just they hold to be the same with Jaddua, the high-priest, who received Alexander in Jerusalem. To this synagogue the Rabbins ascribe the formation of the canon, to which they add that its members wrote Ezekiel, the twelve minor Prophets, Daniel and Esther, while Ezra wrote the book bearing his name, and the genealogies in Chronicles down to his time (*Bava Bathra*). Jahn (*Einleitung*, 28) supposes that as there is no authority whatever for the existence of this synagogue, all that can be meant is, that the canon was settled by Ezra and the others named as members of the synagogue, and closed by Simon, who filled the office of high-priest for nine years till his death, B.C. 292 (Eusebius, *Chron.*). But, in addition to this, there was a current opinion among the early Christian writers to the effect that the law having been burned at the destruction of the Temple by Nebuchadnezzar, Ezra restored the whole from memory, or by divine inspiration. This notion of a revision or restoration of the Scriptures, founded on the statement of the Pseudo-Ezra, was looked upon as an undoubted fact by Irenæus (*Advers. Hæres.* iii. 25); Tertullian (*De Habit. Mulier.* cap. 1. p. 3, § 25); Clemens Alexandrinus (*Strom.* i. 329, 330, 342); Basil (*Epist. ad Chilon.* Paris, 1839, ii. pt. i. p. 184); Chrysostom (*Hom.* viii. *in Heb.*); Jerome (*Cont. Helvid.*); Augustine (*De Mirabilibus Scrip.* ii. 33); the author of the *Synopsis* (*op. Athanas.* ii. p. 121); Theodoret (*Præf. Com. in Cant.*); and Leontius of Byzantium (*De Sectis*, p. 428). It was revived by Spinoza (*Tract. Theol. polit.* ch. 8, 9) and other modern sceptics, who sought to undermine the authority of the Scriptures by ascribing their composition to Ezra (in refutation of which opinion see the *Introductions* of Carpzov, Eichhorn, Jahn, and De Wette), and who referred, in proof of their theory, to certain passages which seem to betray a later date than that usually ascribed to the composition of these books.

Dean Prideaux, who observes (*Connexion*, part i., b. v.) that 'it would shock the faith of the whole should it be held that it owed its present being to such a revival, it being obvious for sceptical persons to object that he who should be said thus to revise it, then forged the whole,' has formed out of these traditions a hypothesis, which, although resting on no historic basis, has met with a favourable reception from its supposed probability. He assumes that Ezra settled the canon up to his time, and was the probable author of Chronicles, Ezra, and Esther, which, together with the books of Nehemiah and Malachi, were added by Simon the Just, by whom the canon was closed in the commencement of the third century before Christ. As, however, mention is made in Nehemiah of Darius, who lived a century later than Ezra, and of Jadduah, who died two years after the death of Alexander the Great; and as the genealogy in Chronicles is brought down to about the year B.C. 300, which circumstances have induced some to ascribe the writing of these books to a period not more ancient than the era of Alexander, Prideaux looks upon these passages as late additions or interpolations, added by those who completed the canon; which is also the opinion of Jahn (*Introd.*), although he conceives the author not to have been Ezra. Dean Prideaux, in fine, supposes that Ezra gave a new edition of the Scriptures, corrected the errors of transcribers, adding what appeared necessary for illustrating, correcting, or completing them, changing names, and supplying what was wanting. He further maintains that Ezra was the author of several interpolations in all the books which passed his examination, and Simon the Just in all the rest, which were added afterwards (see the authorities in Buxtorf's *Tiberius*, c. xi. p. 103). By this hypothesis, which is a modification of the ancient idea, he endeavours to meet the objection raised against these books, and to supply by ingenious conjectures a deficiency where Scripture and history are silent. The reader will find some animadversions on Prideaux's hypothesis by the author of the article *Théologie*, in the *Encyclopédie*, who maintains that the pretended Great Synagogue had no divine and infallible authority to decide upon and close the canon. Eichhorn thinks it possible that Simon the Just has been confounded in the Talmudical fable with Simon the Maccabee, as he supposes that all the books in the canon could not have been written so early as the time of Simon the Just, but that the canon may have been closed under Simon the Maccabee (B.C. 141–135). St. Jerome mistakes him for Simeon, the contemporary of our Saviour. [MACCABEES; WISDOM OF SIRACH; SYNAGOGUE.]

Although Esdras is included in the 6th article among the other books read for edification, &c. (DEUTERO-CANONICAL), it will be observed that no lessons are taken from it in the offices of the church of England. References are, however, made from it in the Authorized Version to parallel passages in the Old and New Testament. Grabe and others have conceived that this was the book cited as the '*Wisdom of God*' (Luc. xi. 9, comp. with 4 Esdras i. 32).—W. W.

ESHBAAL. [ISHBOSHETH.]

1. ESHCOL (אֶשְׁכֹּל; Sept. Ἐσχώλ), one of the Amoritish chiefs with whom Abraham was in alliance when his camp was near Hebron, and who joined with him in the pursuit of Chedorlaomer and his allies, for the rescue of Lot (Gen. xiv. 13, 24).

2. ESHCOL. The name of the valley in which the Hebrew spies obtained the fine cluster of grapes which they took back with them, borne 'on a staff between two,' as a specimen of the fruits of the Promised Land (Num. xiii. 24). The cluster was doubtless large; but the fact that it was carried in this manner, does not, as usually understood, imply that the bunch was as much as two men could carry, seeing that it was probably so carried to prevent its being bruised in the journey. The valley of Eshcol probably took its name from the distinguished Amorite already mentioned, and is hence to be sought in the neighbourhood of Hebron. Accordingly the valley through which lies the commencement of the road from Hebron to Jerusalem is indicated as that of Eshcol. This valley is now full of vineyards and olive-yards; the former chiefly in the valley itself, the latter up the sides of the enclosing hills. 'These vineyards are still very fine, and produce the finest and largest grapes in all the country.' (Robinson, i. 317).

ESHEL (אֵשֶׁל), also Eschel and Aishel, occurs in three places of Scripture, in one of which, in our Authorized Version, it is rendered *grove*, and in the other two *tree*. Celsius (*Hierobot.* i. 535) maintains that אשל has always a general, and not a specific signification, and that it is properly translated *tree*. This, as stated by Rosenmüller, has been satisfactorily refuted by Michaelis in his *Supplem.* p. 134. If we compare the passages in which the word *eshel* occurs, we shall see that there is no necessity for considering it a generic term: the more so, as we find in the Arabic a name very similar to it, and applied to a tree of which the character and properties would point it out as likely to attract notice in the situations where *eshel* is mentioned. The first notice of this tree is in Gen. xxi. 33, 'And Abraham planted a *grove* (*eshel*) in Beersheba, and called there on the name of the Lord.' The second notice is in 1 Sam. xxii. 6: 'Now Saul abode in Gibeah under a *tree* (*eshel*) in Ramah, having his spear in his hand, and all his servants were standing about him.' Under such a tree also he and his sons were buried, for it is said (1 Sam. xxxi. 13), 'And they took their bones, and buried them under a *tree* (*eshel*) at Jabesh, and fasted seven days.' In the parallel passage of 1 Chron. x. 12, the word *alah* is employed. This signifies a 'terebinth tree,' but is translated 'oak' in the Authorized Version: 'They arose, all the valiant men, and took away the body of Saul, and the bodies of his sons, and brought them to Jabesh, and burned their bones under the oak in Jabesh, and fasted seven days.'

284. [Tamarisk. Tamarix orientalis.]

Celsius has quoted several authorities in support of his opinion that *eshel* is used in a generic sense, as R. David Kimchi, who remarks, '*Eschel* est nomen generale omni arbori;' and with reference to the passage in Genesis, 'Et plantavit Eschel, h. m. interpretatur: et plantavit plantationem.' So Rosenmüller, though considering the term to be specific, says, 'We have the testimony of Rabbi Jonah or Abulwalid, in his *Hebrew-Arabic Lexicon*, that the Arabic term *athle* is not unfrequently used for any large tree, as was the word *eshel* by the later Hebrews.' The word *athle* which is cited, is no doubt the Arabic اثل *asul* or *athul*. The letter ث is the fourth letter of the Arabic alphabet: its legitimate power appears to be that of *th* in the English word *thing*; but in the mouth of a Turk, Syrian, Egyptian, Persian, and a native of Hindoostan, it is either pronounced like an *s* lisped, or not to be distinguished from that character. In a few instances it is pronounced like *t* (Richardson, *Persian and Arabic Dictionary*). In that work اثل *asl* is translated 'a tamarisk shrub;' اثلات *asalat*, 'large prickly tamarisks.' In *Illustr. Himal. Bot.* p. 214, we have said 'The Arabic name *asul* or *atul* is applied to *furas* (an arboreous species of tamarisk) in India, as to *T. orientalis* in Arabia and Egypt.' So in the *Ulfaz Udwiyeh*, translated by Mr. Gladwin, we have at No. 36, اثل *ussel*, the tamarisk bush, with '*jhaou* as the Hindee; and گز *gus* as the Persian' synonyme. The tamarisk and its products were highly valued by the Arabs for their medicinal properties, and are described in several places under different names in Avicenna; the plant being noticed under *toorfa*, and the galls, which are often found on it, under *jouz-al-toorfa*, but which are also called *chezmezech* or *kuzmezech*. They adopt much of the description of Dioscorides, though the translation of Serapion no doubt errs in making *athel* the ἀκακαλίς of the Greeks. But Serapion himself, from Isaac eben Amram, says, 'Athel est species tamarisci.'

If we refer to travellers in eastern countries, we shall find that most of them mention the *athul*. Thus Prosper Alpinus (*De Plantis Ægypti*, c. ix. *De Tamarisco* atle *vocata*) gives a figure which sufficiently shows that it must grow to the size of a large tree: 'Alterum vero tamarisci domesticum genus in Ægypto spectatur—quod ad magnæ olivæ magnitudinem crescit;' and says that he had heard of its attaining, in another place, to the size of a large oak; that its wood was employed for making a variety of vessels, and its charcoal used throughout Egypt and Arabia; and that different parts of it were employed in medicines. So Forskal, who calls the species *Tamariscus orientalis*, gives *atl* as its Arabic name, and identifies it with אשל, says, 'Gallæ Tamaricis in officinis usurpantur loco fructus.' Belon (in his *Observ.* ii. 28), says, 'Tamarices in Ægypto humidis et siccioribus locis indifferenter nascuntur; illarum enim silvulæ perinde in aridioribus locis reperiuntur atque in humidis littoribus. Eæ autem excrescentia quam Gallam nominavimus adeo onustæ sunt, ut parum absit quin rami præ pondere rumpantur.' In Arabia Burckhardt found the tree called *asul* in the neighbourhood of Medina, and observes that the Arabs cultivated it on account of the hardness of its wood. If we endeavour to trace a species of tamarisk in Syria, we shall find some difficulty, from the want of precision in the information supplied by travellers on subjects of Natural History. But a French naturalist, M. Bové, who travelled from Cairo to Mount Sinai, and from

thence into Syria, has given ample proofs of the existence of species of tamarisk in these regions. Thus near Sinai, he says, 'Le lendemain, je m'avançai dans la vallée el Cheick, presque entièrement couverte de *tamarix mannifera*.' In proceeding from Suez to Gaza, in an extensive plain of barren sand, he again finds a tamarisk; and further on, 'De là nous arrivâmes à quelques dunes de sable, ou je remarquai de très gros Tamarix.' On the borders of Palestine, and the day before reaching Gaza, he says, 'Vers midi, nous nous arrêtâmes dans la vallée Lésare, bordée de dunes de sable mouvant, et remplie de Tamarisc qui ont trois à quatre métres de circonférence, et de douze à quinze métres de hauteur:' that is, in the very country in which Beersheba is supposed to have been situated, we have tamarisk trees, now called *asul*, where the *eshel* is described as having been planted.

It is very remarkable that the only tree which is found growing among the ruins of Babylon is a tamarisk. Thus, on the north side of the Kasr, where Ker Porter thought he saw traces of the hanging gardens, there stands upon an artificial eminence a tree to which the Arabs give the name of *athela*. It is a species of tree altogether foreign to the country. Two of the attendants of Ker Porter, who were natives of Bender Bushire, assured him that there are trees of that kind in their country, which attain a very great age, and are called *gaz*. 'The one in question is in appearance like the weeping-willow, but the trunk is hollow through age, and partly shattered. The Arabs venerate it as sacred, in consequence of the Calif Ali having reposed under its shade after the battle of Hillah' (Rosenmüller, *Bibl. Geog.* ii. p. 20, from Ker Porter; comp. Ainsworth's *Researches*, p. 125). It may be observed that the present writer has already quoted the two names here given as applied to the tamarisk, in a Persian work on Materia Medica, published in India.

From the characteristics of the tamarisk-tree of the East, it certainly appears as likely as any to have been planted in Beersheba by Abraham, because it is one of the few trees which will flourish and grow to a great size even in the arid desert. It has also a name in Arabic, *asul*, very similar to the Hebrew *eshel*. Besides the advantage of affording shade in a hot country, it is also esteemed on account of the excellence of its wood, which is converted into charcoal. It is no less valuable on account of the galls with which its branches are often loaded, and which are nearly as astringent as oak-galls. It is also one of those trees which were esteemed by the ancients, being the μυρίκη of Theophrastus, Dioscorides, &c. 'Hanc enim vaticinaturi manu gestabant, ut Apollo in Lesbo, inde *Myriceus* dictus, &c.' To this they were probably led, as in some other instances, by finding that it was esteemed in those eastern countries, from which much of their information and opinions were, in the first instance, derived. The only difficulty is to ascertain the exact species found in the several situations we have indicated—a difficulty which arises from their similarity to one another, rendering it almost impossible to distinguish them in the state of dried specimens. Ehrenberg, who has most recently investigated the species, gives a *tamarix tetragyna* as a species of Syria, and *T. orientalis* of Forskal as the species found in Arabia, Persia, and India, and *T. arborea* as a variety of *T. gallia* found near Cairo. But as they are all so similar, any of the arboreous species or varieties which flourish in the most barren situations, would have the name *asul* applied to it, and this name would appear to an Arab of those regions the most appropriate translation for *eshel*, in the passage where Abraham is described as planting a tree, and calling on the name of the Lord, the everlasting God.—J. F. R.

ESSENES (Ἐσσηνοί), one of the three great Jewish sects, of which the other two were the Pharisees and the Sadducees. The derivation of the name Essenes is by no means certain. Philo (*Quod omnis probus liber*, § 12) deduces it from ὅσιος, 'holy.' Some have found its origin in the Chaldee word אסא, 'to heal;' supporting their opinion by reference to the fact that the Essenes were a class of men who professed to heal both mind and body. De Wette gives the preference to the Syriac ܚܣܝܐ, signifying 'pious.'

These sects sprung up in the decline of the Jewish state, after the Babylonish captivity, influenced in their rise and spread not less by ascetic philosophy than by the national degradation and the decay of morality. In all states religion comes first, for it is spontaneous, the natural answer of the heart to God. Philosophy is an after-thought, an act and an achievement of the reasoning faculty, which, if it has sometimes purified, has also sophisticated religion.

While the Pharisees gave their countenance to sustain the past, with all its transmitted influences, indiscriminately, and the Sadducees adhered rigidly to the ancient Mosaic institutions, to the rejection of what was traditionary and adventitious, the Essenes attempted to form a third way, which, without neglecting the past, should bring new and powerful appliances to bear on the actual ills of society; seeking not merely to reform and repair, but rather to heal and revive. For this purpose they gave themselves up to a contemplative mode of life, as well as to those labours by which only thought and practice can be united in harmony, and the good which God designed be wrought out for man. Making small account of the outward observances of the Pharisee, and standing religiously aloof from the scepticism and narrow worldly spirit of his opponent the Sadducee, the Essenes aimed at something practical—sought to originate an influence which should stem the advance of corruption, and pour a sanatory and life-giving power into the veins of society. For this purpose they founded a brotherhood, devised institutions, and became the earliest example, if not the actual parent, of all the teeming brood of hermits, monks, friars, and nuns, which have since been seen. They were a moral and religious order, while the Pharisees partook more of the character of a party (in the modern and political sense of the word), and the Sadducees exhibited not a few of the features of a sect.

The Essenes were ascetics. The ordinary pleasures of life they avoided as something morally bad, and held self-control and freedom from the slavery of the passions to be virtue. Marriage they despised. Selecting among the children of others those whom they considered the most pro-

mising, they endeavoured to form them according to their own model. In this conduct they appear to have been influenced not so much by any absolute disapproval of wedded life and its natural fruits, as by fears and cautions, which the immoral character of their age may in some degree have justified. Riches, too, they held in contempt. Whatever they had they were ready to share with others. Superfluity was unknown in a community where all things were held in common. As soon as a new-comer was received among them, he put his property, whatever it was, into the common stock; or, if he had little or nothing, his wants were thence gratuitously supplied. Neither riches nor poverty, therefore, were known in their body. None had less, none more than enough.

Stewards were appointed by them, whose business it was to take due care of what in each case was entrusted to them, not for their own individual advantage, but for the common good.

Dwelling as they did in various cities, they would from time to time have to enter places where, as individuals, they were unknown; but, true to their principle of a community of goods, the brethren in any strange city received and entertained them the same as if they had come to their own property. Scarcely any occasion was there, in consequence, for making provision when they travelled; and they appear to have taken nothing with them except weapons of defence, which they judged the insecurity of the country rendered necessary. In order that travellers might by no possibility suffer want or experience disappointment, there was in every city one of the brethren, who was specially charged to provide them with food, clothing, and other necessaries. These duties of hospitality, however, could not have been so onerous then as they would under similar circumstances be now, if what Josephus states is to be taken literally, that the Essenes did not change their shoes or garments till they were worn out and tattered. Buying and selling, as might be expected, were unknown among them: give and take was their simple plan, which appears to have been observed no less between the members of different communities than between those of the same.

The account which Josephus has given of their pious exercises, and of their daily engagements, is no less striking than it is in strict agreement with their ascetic character in general. Rising before the sun, they abstained from all ordinary conversation, and put up their ancestral prayers, not forgetting to beg for a renewal of the light of day. Then, under the supervision of curators or foremen, they proceeded to exercise each one the art in which he was skilled, labouring diligently till eleven o'clock in the forenoon. Then assembling together, and being covered with white veils, they bathed in cold water; after which, entering their refectory with certain religious solemnities, they quietly seated themselves, when there being set before each of them a loaf of bread and a single plate of one sort of food, and a priest having invoked the divine blessing, they proceeded to take refreshment. When the repast was over the same priest made an offering of thanks to the Great Benefactor of the world, and the brethren all returned to their several employments. These being terminated in the evening, another meal with similar observances was partaken by all in common.

These set regulations, and their moderation in eating, produced a regularity and order which appeared something mysterious to the uninitiated: a feeling which was enhanced by the law which, forbidding any one to speak unless in his turn, kept their abodes free from confusion, and sustained a tranquillity which was eminently conducive to the exercise of the head and the heart.

Their entire manner of life, indeed, was subject to the strictest rule. Only in their ministrations of charity were they left free to the spontaneous movements and impulses of their breasts. Lest, however, a species of nepotism should misguide their hand in dispensing mercy, and thus misapply and waste the common resources, they were prohibited from giving succour to any of their kindred who might be in need, unless under the supervision of their overseers.

Next to God, Moses was the object of their reverent homage. To blaspheme the name of Moses was a capital offence. As might be expected, their observance of the Sabbath was more strict than ordinary. Their food they cooked the day before. On the Sabbath they would not remove a vessel from its place, even for the most pressing wants of nature.

If, indeed, all may be believed which Josephus relates touching their opinions, a pious and self-denying life on their part was any thing but unnatural. According to him, they regarded the body as frail and corruptible, but the soul as living for ever. Ascetism was the necessary result of their conviction that souls came out of the most subtle air, from the loftiest empyræum, and are lodged in bodies as in prisons, from which when once set free, they rejoice and soar away to their native regions. After death punishment awaits the bad, blessedness the good; each in their own place. The fear of the one and the hope of the other exerted, they believed, a most salutary influence on the actions of men while yet in this state of being. 'These,' adds Josephus, 'are the divine doctrines of the Essenes about the soul, which lay an unavoidable bait for such as have once had a taste of their philosophy.'

They even made pretensions to the gift of prophecy, drawing their light from reading the sacred books, especially from the study of the prophetic writings, and from the careful and diligent use of purifications. Dean Aldrich enumerates three successful efforts of this kind, as narrated by Josephus (note to Whiston's *Transl. Jew. War*, ii. 12), who himself asserts 'it is but seldom that they miss in their predictions.' It would have been surprising if, aided by their scholars, no less than by 'the chapter of accidents,' they had not sometimes proved true prophets, especially if they were accustomed to do as did one of them, who, thinking he had failed in prophesying the death of one Antigonus, thus complained to a numerous band of pupils, who were not likely to be deaf to their teacher's wishes:—'O strange! it is good for me to die now, since truth is dead before me, and somewhat that I have foretold hath proved false; for this Antigonus is this day alive, who ought to have died this day; and the place where he ought to be slain was Strato's tower, which is at the distance of six hundred furlongs from where we are.' News, however, in time arrived, which relieved the master's dejection, and esta-

blished the prophet's—shall we say veracity, or influence? Antigonus was dead (Joseph. *De Bell. Jud.* i. 3. 5).

Their pursuits, trades, and professions were such as conduce to human good. They tilled the ground; they made useful articles; they bred and pastured cattle: but in the fabrication of arms they took no part. Even peaceful pursuits which ministered to vice they carefully avoided. It must not be concealed, however, that some of their notions bordered on extravagance, and that some of their practices betrayed a fastidiousness which amounts to the ridiculous.

In morals they seem to have attained no ordinary excellence. Over anger they kept a guard like just stewards. All the passions they knew how to restrain. They were eminent for fidelity, and ministers of peace. Their word was more to be trusted than some men's oaths. Swearing indeed they studiously avoided, alleging, with no small reason, that the man is already condemned who cannot be believed without an oath.

The great aim of their inquiries, whether they searched the books of the ancients or studied the virtues of plants, was to gather such lessons of wisdom as might render them able to administer, like skilful physicians, to the maladies both of the mind and the body.

Persons who are convicted of heinous crimes are expelled from their society. Of those thus excommunicated, some perish miserably; others are received back only when they have undergone the severest punishment which want and wretchedness can inflict; for, being still under the vows and regulations of their order, they are prohibited from all food but such as the niggard products of spontaneous vegetation may supply.

Admission into their communities was not easy. A noviciate of twelve months was imposed, in order that it might be ascertained how far the candidate was able to endure the rigours of the system. At the expiration of the year those who are approved are habited in white, and receive a girdle and a sort of small hatchet, being made 'partakers of the waters of purification,' that is, probably, baptised. A further probation of two years must be undergone. If the novice is then found worthy he is admitted into the society. Certain vows,* however, are first to be taken—a proceeding which seems scarcely compatible with what the same authority tells us regarding the aversion of the Essenes to oaths. These vows or oaths bind the neophyte to exercise piety towards God and justice towards men; to hate the bad and assist the good; to harm no one, either of his own accord or by the command of others; to be faithful to all men, especially to such as are in authority; to love truth and reprove the liar; to keep his hands clean from theft, and his soul pure from unlawful gain; to conceal nothing from the brotherhood, and reveal to others none of their secrets, not even should life thereby be put in peril; to transmit the Essene doctrines unchanged to others; to preserve their books and the names of their officers (ἄγγελοι, angels) in strict secrecy.

When the time of their preparatory trial is come to an end, the newly-admitted brethren are distributed among four classes. Still a distinction is observed. If all are now Essenes, some are younger than others; and the distinction of age is so rigidly observed that, if a senior do but touch a junior brother, the first must undergo a purification by water, as much as if he had been in contact with a foreigner.

All events, the destiny of man not less than other things, the Essenes referred to the ordinations of the Divine will, without, nevertheless, attempting to deny human freedom. It is not with philosophical precision that they spoke on the subject, but with a view to pious edification they taught that everything depended on a certain Fate, which was lord of all, without which nothing happens to man.

They did not offer oblations in the Temple at Jerusalem, though they sometimes sent presents thither. A pure heart they held to be the best offering. Religious ablutions they considered acts of holiness.

They had no slaves; all were free, serving one another. They repudiated lordship as unjust, as destructive of natural equality, as irreligious, as opposed to the laws of nature. Nature they held to be the common mother and instructress of all; and with them all men were brethren, not in name, but in reality.

Thus, while they were careful to preserve a practical subordination in their communities, without which social existence is an impossibility, those who were highest amongst them held office merely for the common good, and in themselves were neither richer nor better clad than others, nor had they any political power.

They did not admit logic among their studies, since, in their opinion, it does nothing for the furtherance of virtue. Metaphysics they avoided, as relating to subjects which are too high for man; yet they made an exception in favour of those branches which refer to the existence of God and the creation of the world. Morality—the morality which they by their own process learnt from Moses—was the chief object of their studious care.

Pliny (*Hist. Nat.* v. 17) seems to have been much struck with the Essenes. 'They dwell,' he

* If the long passage in Josephus respecting the Essenes is now as it was when it left the historian's hand, there seems on the face of it a marked contradiction in what he says about oath-taking—making them in one instance eschew oaths altogether, and in another take oaths of the most solemn nature and widest application. The rendering which we have given in the text, 'vow,' seems justified by the nature of the communities which they formed—a sort of monastic life; and by usages which, at least at a later date, we know to have been connected with such institutions. The rendering, however, is not unaccompanied with difficulties.

Stäudlin (*Sittenlehre Jesu*, i. 460), referring to the fact that it was only the novices from whom this vow or oath was exacted, supposes that it was truly an oath which they took (Josephus terms it 'fearful oaths,' ὅρκους ὄμνυσι φρικώδεις); and that this was the last oath they swore—sworn as candidates, not as Essenes, for that those who were really Essenes swore not at all. There seems, however, no little inconsistency in requiring of the scholar that which the master condemned and shunned.

says, 'along the Dead Sea, avoiding such proximity to its waters as would be hurtful. They are a solitary people, and more wonderful than any other, as they are without females, emancipated from sexual intercourse, having no money, dwellers amid palm-groves. Their community is daily renewed by new comers—persons who are weary of life, and who flee to their retreats from its stormy waves. Thus a people among whom a birth is never known remains (incredible as it may appear) unimpaired through successive ages: so prolific to them is the weariness of life which is felt by others.'

Philo (*Quod omnis probus liber*, § 12) agrees with Pliny in representing them as fleeing from the ordinary dwellings of men, and living together in villages or establishments specially erected by and for themselves.

The same writer speaks, in terms similar to those employed by Josephus, of their religious views and spirit. They did not sacrifice animals. They were very observant of institutions and practices received from their fathers, which, especially on the seventh day, they taught to their disciples, who appear to have been very numerous (Joseph. *De Bell. Jud.* i. 3. 5). The seventh was with them a sacred day, on which they abstained from all kind of labour, frequented the sacred places, called synagogues, where the young sat arranged in classes according to age under the eye of their elders. Here one took and read, and another expounded, the sacred books. A system of allegorical interpretation prevailed. Among their instructions the virtues of holiness, justice, and economy held a prominent place; nor did they omit the duties which men owe to the state. Their teachings were accompanied by definitions and rules, and were enforced by a regard to the love of virtue, the love of man, and the love of God. Of their love of God they gave very many proofs; among which Philo reckons their life-long chastity, their abstaining from oaths, their abhorrence of lying, their referring to God all the good and none of the evil found in the world. Their love of virtue they proved by their contempt of wealth, honour, and pleasure, their self-government, their patience, fortitude, the fewness of their wants, their simple manner of life, their modesty, their respect for the law; while in their benevolence, their practical equality, their doing good to all irrespectively, and their community of goods, they gave distinguished exemplifications of their love of man. Every Essene was for every other a brother, and nothing more. Their humanity was specially manifested towards the sick and the aged. The first were attended in the most careful and loving manner. Never was old age more honoured, or in a more felicitous condition, than among the Essenes. Every one strove to render to the old services of all kinds, and they found themselves as if in the midst of numerous tender-hearted children. Among all the bitter, open and secret persecutors and foes of the Jewish people, no one (so says Philo) had convicted, or even impeached, an Essene of any crime. The virtue of these men cannot be denied; all writers show them respect as free-born men, who were a law to themselves, distinguishing with special praise their brotherhood and their community of goods. Even royalty has expressed its admiration of their institutions, and held it an honour to show towards them marks of its high esteem.

Some minor observances and regulations may be mentioned. The Essenes had a peculiar liking for white garments, not improbably because an emblem of that purity of life to the practice of which they were devoted.

The will of the majority was law. 'Accordingly,' says Josephus, 'if ten of them be sitting together, no one of them will speak while the other nine are against it. They also avoid spitting in the midst of them, or on the right side.'

In their criminal procedures they were no less just than accurate. No sentence could be passed unless at least a hundred voices concurred: but the resolves of that number were unalterable.

Their manner of life was eminently conducive to health and longevity. Many of them lived above a hundred years.

Pain they disregarded; the miseries of life they held of small account; and they even preferred death to living always.

The calm and unmoved firmness with which they endured at the hands of the Romans, during 'the Jewish war,' the cruellest tortures, and death itself, rather than be faithless to their convictions or forswear their order, serves to show that the ascetic spirit and the martyr-spirit have no little in common, and exhibits within the limits of Palestine the very same results, from the very same discipline, as Sparta was proud to call her own.

With their ascetic notions it was natural they should disregard the body, and the usual care which, especially among the ancients, was taken of it. Accordingly they considered oil a defilement, and if any one was anointed contrary to his will the body was carefully cleansed.

Josephus, in continuation of his account, makes report of another kind of Essenes, who do not appear to have essentially differed from those whom we have already described. The chief point of diversity was in regard to marriage. This second kind entertained less unfavourable opinions of female virtue and honour than did the first, and, holding that marriage was a divine ordinance for the propagation of the human species, they did not think themselves justified in condemning or avoiding it. At the same time, with a suspicion which was akin to the avoidance of their brother Essenes, they used the best precautions in their power, and specially gave those females whom they thought of marrying a trial for three years, at the expiration of which they actually married them, provided they were satisfied. Marriage, however, they considered merely as a duty, and accordingly did not neglect the same ascetic principles which characterize the whole of the Essene life.

In the account which has now been given we have followed in the main the authority of Josephus and Philo. The latter speaks of a species of Essenes under the name of Therapeutæ, whom we shall describe when we come to that word, when we shall subjoin some general reflections on the subject, contenting ourselves at present with remarking that, generally excellent as were the institutions and practices of the Essenes in their peculiar circumstances, yet a good deal of the warm colouring of the picture, if not some of its objects, may have been borrowed from the ima-

gination of the artists by whom it was originally drawn. Besides Josephus and Philo the reader may consult Stäudlin, *Sittenlehre Jesu*, Gotting. 1799; De Wette, *Sittenlehre*, Berlin, 1833; De Wette, *Archäologie*, Leipzig, 1830.—J. R. B.

ESTHER (אֶסְתֵּר; Sept. Ἐσθήρ), a damsel of the tribe of Benjamin, born during the Exile, and whose family did not avail itself of the permission to return to Palestine, under the edict of Cyrus. Her parents being dead, Esther was brought up by her uncle Mordecai. The reigning king of Persia, Ahasuerus, having divorced his queen, Vashti, on account of the becoming spirit with which she refused to submit to the indignity which a compliance with his drunken commands involved, search was made throughout the empire for the most beautiful maiden to be her successor. Those whom the officers of the harem deemed the most beautiful were removed thither, the eventual choice among them remaining with the king himself. That choice fell on Esther, who found favour in the eyes of Ahasuerus, and was advanced to a station, enviable only by comparison with that of the less favoured inmates of the royal harem. Her Jewish origin was at the time unknown; and hence, when she avowed it to the king, she seemed to be included in the doom of extirpation which a royal edict had pronounced against all the Jews in the empire. This circumstance enabled her to turn the royal indignation upon Haman, the chief minister of the king, whose resentment against Mordecai had led him to obtain from the king this monstrous edict. The laws of the empire would not allow the king to recall a decree once uttered; but the Jews were authorized to stand on their defence; and this, with the known change in the intentions of the court, averted the worst consequences of the decree. The Jews established a yearly feast in memory of this deliverance, which is observed among them to this day [Purim]. Such is the substance of the history of Esther, as related in the book which bears her name. The details as given in that book afford a most curious picture of the usages of the ancient Persian court; the accuracy of which is vouched not only by the historical authority of the book itself, but by its agreement with the intimations afforded by the ancient writers, as well as by the fact that the same usages are in substance preserved in the Persian court at the present day.

'The objections which have been advanced against the book of Esther on the ground of the follies, wickedness, and cruelties narrated in it, have been ably refuted by Jahn and other critics, who have shown that these things are not recorded with approbation, but simply as facts of history, illustrative of the operations of the providence of God, with a view to effect the deliverance of his people' (Henderson, *On Inspiration*, p. 48). With reference to the somewhat sanguinary character of Esther and Mordecai, Jahn remarks that no difficulty arises from thence, seeing that they are not represented as saints, but as deliverers of their nation.

It should be observed that Esther is the name which the damsel received upon her introduction into the royal harem, her Hebrew name having been Hadassah (הֲדַסָּה, *myrtle*, Esth. ii. 7). Esther is most probably a Persian word. Gesenius cites from that diffuse Targum on this book which is known as the second Targum on Esther, the following words: 'She was called Esther from the name of the star Venus, which in Greek is *Aster*.' Gesenius then points to the Persian word *Satârah*, star, as that of which Esther is the Syro-Arabian modification; and brings it, as to signification, into connection with the planet Venus, as a star of good fortune, and with the name of the Syrian goddess Ashtôreth, according to the etymology of the word, already referred to in that article.

The difficulties of the history of the book of Esther, especially as regards the identity of the king, have been examined under Ahasuerus, and are also noticed in the following article.

ESTHER, BOOK OF, one of the eleven books styled *Ketubim* [Hagiographa], and of the five *Megilloth* [Canticles]. It is called by the Jews *Megillah Esther*, and sometimes simply *Megillah*, as it forms by itself a distinct roll. In the Christian Church it has been also called *Ahasuerus*, which name it bears in some copies and printed editions of the Vulgate. In the Hebrew it is placed with the other *Megilloth*, after the Pentateuch, between the books of Joshua and Ecclesiastes, and sometimes among the *Hagiographa*, between Ecclesiastes and Daniel. In the Vulgate, Tobit and Judith are placed between Nehemiah and Esther. Luther placed it immediately after Nehemiah, so as to make it the last among the historical books, although the book of Nehemiah was supposed to refer to a later history. His design in this arrangement was to prevent the books of Nehemiah and Ezra from being disunited. It has continued to retain this position in the Reformed versions.

The Jews hold this book in veneration next to the books of Moses (see Carpzov's and Eichhorn's *Introductions*), and there appears to be no authentic foundation for the statement of Richard Baxter (*Saints' Rest*, part iv.), that the book of Esther was treated so ignominiously by the Jews that they were in the habit of throwing it on the ground before reading it.

Subject of Esther.—As the subject of this book has been treated of under the article Ahasuerus, it will be sufficient to refer to that head; only we may here observe that the book of Esther has this peculiarity among the historical books, that although the author, a Persian Jew, records a remarkable preservation from destruction of that portion of his countrymen which remained in Persia after the exile, he does not refer their deliverance to the act of God, whose name is not even once mentioned. This has been explained by supposing that the author wished to avoid giving offence to the Persians, or that the whole was taken from the Persian annals, which are appealed to, ch. x. 2. (See Pareau's *Principles of Interpretation*, and Hottinger's *Thes. Phil.* p. 488.)

The historical and other difficulties of this book have been the subject of much controversy and embarrassment. Not the least of these has been the solution of the question—What king of Persia is meant by Ahasuerus? For there has been no Persian monarch from Astyages, who died B.C. 603, and his son Cyaxares, to Darius Ochus, who died B.C. 358, or his son, who died twenty years later, who has not been maintained to be the husband of Esther. Those who have

most suffrages are Darius Hystaspis, Xerxes, and Artaxerxes Longimanus; for which last monarch we have the authority of Josephus and of the Septuagint Version, wherein he is called by the name of Artaxerxes [AHASUERUS]. Jahn (*Introduction*) falls in with the view of Scaliger, who supposes that Amestris, the cruel and vindictive wife of Xerxes, is no other than Esther, as both the name and the character of Amestris favour the supposition that she is the Esther of the Bible. But she is said by Herodotus to have been the daughter of Otanes, a *Persian*, and to have been married to Xerxes before his Grecian expedition. Bellarmine, who adopts the view of Josephus, is not affected by the circumstance that, in this case, Mordecai's age must have exceeded 165 years, as he himself had known 'a hale old man of 105, who was likely to live still many years.'

The difficulties and apparent improbabilities in the narrative have had the effect of inducing some of the learned to consider the book of Esther a fiction, of which opinion is De Wette (*Lehrbuch*), who conceives that this book betokens the utter destruction of Hebrew historical writing, and that its only historical basis is the feast of Purim; which, however, he allows to have been 'occasioned by an event similar to that related in Esther.' Eichhorn, who is admitted by De Wette to have solved most of the individual objections against the credibility of the narrative, maintains that the circumstance alone of a national festival having been founded in commemoration of the events described in the book of Esther, and which had been already of long standing in the time of Judas Maccabæus (2 Macc. xv. 36), is a sufficient voucher for the correctness of the principal event in the history, and that it would be absurd to suppose that a national festival was founded on a mere fable. Pareau, who agrees with Eichhorn in supposing Xerxes to be the husband of Esther, and conceives that the principal difficulties are removed by this supposition, describes the author as accurate to minuteness, and equal to any history, as having acquired his skill among the more cultivated Persians. De Wette, also, while he describes the book as 'breathing the spirit of revenge and haughtiness,' observes that it is simple in its style, free from declamation, and thus advantageously distinguished from the similar stories in the apocrypha (*Introduction*, Parker's translation, Boston, 1843).

Author and Age of Esther.—This is a question involved in much difficulty. Of the author nothing is known, nor have we any data on which to form a reasonable conjecture. Augustine (*De Civitate Dei*) ascribes the book to Ezra. Eusebius (*Chronic.* xlvii. d. 4), who observes that the facts of the history are posterior to the time of Ezra, ascribes it to some later but unknown author. Clemens Alexandrinus (*Stromata*, lib. i. p. 329) assigns it, and the book of Maccabees, to Mordecai. The pseudo-Philo (*Chronographia*) and Rabbi Azarias maintain that it was written at the desire of Mordecai by Jehoiakim, son of Joshua, who was high-priest in the 12th year of the reign of Artaxerxes. The subscription to the Alexandrian version states that the epistle regarding the feast of Purim was brought by Dositheus into Egypt, under Ptolemy and Cleopatra (B.C. cir. 160); but it is well known that these subscriptions are of little authority. The authors of the Talmud say that it was written by the members of the Great Synagogue, who also wrote Ezekiel and the twelve Prophets. But the whole account of the Great Synagogue, said to have been instituted by Ezra, and concluded by Simon the Just, who is said to have closed the canon, and whose death took place B.C. 292, is by most looked upon as a rabbinical romance [ESDRAS]. De Wette (*loc. cit.*) assigns it to the age of the Ptolemies and Seleucidæ, whose era commenced B.C. 312, while Jahn maintains that it must have been written soon after the facts which it records, and before the destruction of the Persian monarchy (B.C. 330), to whose annals it appeals.

Canonicity of Esther.—Some doubts have been thrown on the canonical authority of this book from the fact that it is never referred to in the New Testament, that it is not cited by Philo, and that it is omitted in several of the ancient catalogues, some of which expressly exclude it from the canon. As to the New Testament, there are several other books whose canonicity is unquestioned which are never once referred to therein, viz. the books of Ruth, Ezra, Nehemiah, Canticles, Lamentations, and Ezekiel; and the same may be said of Philo, who, although he mentions or refers to all the other books of the Jewish Canon, makes no reference to Ruth, Chronicles, Nehemiah, Esther, Lamentations, Daniel, Ecclesiastes, and Canticles. Carpzov (*Introduction*) maintains that it is referred to in Matt. i. 11. Its omission by Melito (A.D. 170) [DEUTERO-CANONICAL] has been accounted for by supposing that he included it, as well as the book of Nehemiah, under the name of Ezra, and there are, in fact, some manuscripts of the Vulgate extant, in which Esther is called the sixth book of Ezra (Whiston's *Josephus*, b. xi. ch. 6, note.) The other ancient writers who are said to have omitted or excluded Esther from the canon are Amphilochius, Leontius, Nicephorus, Junilius, Gregory Nazianzen, and Athanasius. The first of these (*Iambics*), after giving the names of the other books of the Hebrew canon, observes, '*to these some add Esther.*' Junilius, A.D. 560 (*De Partibus Div. Leg.*), who divides the books of Scripture into books of perfect, of middle, and of no authority, omits the book of Esther from those of perfect authority; Nicephorus reckons among the *antilegomena* of the Old Testament, three books of Maccabees, Wisdom, Jesus Sirach, the Psalms, the Hymns of Solomon, *Esther*, Judith, Susannah, and Tobit.

There are two works attributed to Athanasius, in both of which the book of Esther is excluded from the canon, the *Festal Epistle*, and the *Synopsis Scripturæ*. The genuineness of the former of these is generally but not universally acknowledged, and as to the *Synopsis Scripturæ*, although it has been by many, including the learned Montfaucon, considered to be a genuine work of St. Athanasius, it is now generally given up as pseud-epigraphal, and is supposed to be about a century posterior to the time of Athanasius, although Whiston conceived its author to have been contemporary with Origen. It is, however, held in great veneration in the Greek Church, and holds the same place in the authorized Bibles of that communion which Jerome's prefaces do in the Latin Vulgate. The canon of the Greek Church

seems to be chiefly founded on the authority of this *Synopsis*, although it does not name the three books of Maccabees, the Psalms, nor the twelve prophets: which are all nevertheless contained in the authorized Greek Bibles. The canon of the Greeks is in effect the same with the Septuagint version, with the addition of the fourth book of Ezra, which they have translated from the Latin [ESDRAS]. There is indeed no distinction made in the modern Greek Bibles between canonical and apocryphal books; but that such distinction actually exists among them is evident from their authorized books of theology. Thus in the *Dogmatic Theology*, published by authority of the Theological Academy of Moscow in 1839, after giving the catalogue of the books of Holy Scripture,—thirteen historical, five pragmatical, and 15 prophetical,—it is added, 'All these books are called *canonical*, from the word *κανών*, because they contain the immutable rule of faith and practice. The *apocryphal* books are so called from the word *ἀποκρύπτω*, inasmuch as their origin is lost in uncertainty. These books were written after the prophetical age, during the last four centuries before Jesus Christ, after the completion of the canon; and on this account, as they formed no part of the collection of sacred writings, they were neither preserved in the Temple, nor read in the synagogues, but in the course of time they were added to the other books as worthy of respect from the nature of their subject and the rich store of edification which they contained. They are as follows:—Tobit; Judith; certain passages of the book of Esther, which are not distinguished in the Greek manuscripts nor in the Slavonic Bibles; Wisdom; Jesus Sirach; the prophet Baruch; the Epistle of Jeremiah, added to Lamentations; the Prayer of Manasses; the Song of the Three Children (Dan. iii.); Susanna (xiii.); Bel and the Dragon (xiv.); 2 [3] Esdras; 3 [4] Esdras; 1st, 2nd, and 3rd Maccabees.' The reader will observe that, notwithstanding the authority of the *Synopsis*, the book of Esther is here reckoned among the canonical books.

It has been questioned whether Josephus considered the book of Esther as written before or after the close of the canon. Du Pin maintains that, as Josephus asserts [see DEUTERO-CANONICAL] that the sacred books were all written between the time of Moses and the reign (ἀρχῆς) of Artaxerxes, and (*Antiq.* xi.) places the history of Esther in that reign, he consequently includes it among those books which he says were of inferior authority, as written under and since the reign of that prince (*Complete Hist. of the Canon*, p. 6). Eichhorn, on the other hand, favours the opinion that Josephus meant to include the reign of that prince within the prophetical period; and concludes that this historian considered the book of Esther as the latest of the canonical writings. All other ancient writers and catalogues include Esther among the books of the Jewish canon. Jerome expressly names it as the ninth book of the Hagiographa (*Prologus Galeatus*). It has, however, been classed by Sixtus of Sienna, Bellarmine, and others of the Roman church, in the second order of sacred books, or as *deutero-canonical;* that is, according to these writers, among those prophetical and apostolical books whose authority has not been always equally certain, in opposition to those of the first class, respecting whose authority there has never been any dispute among catholics' (Sixtus Senensis, *Bibl. Sanct.;* Bellarmine, *De Verbo Dei*, ch. iv.). These writers define the *third* class to consist of such books as, although sometimes received by the learned as divine and canonical, were not approved by the public judgment of the whole church. In the second order the same writers place not only the deutero-canonical books of the Old Testament, including that of Esther, but also the Antilegomena of the New, including the last chapter of St. Mark's Gospel, the narrative of Christ's bloody sweat, and his consolation by the angel in St. Luke (xxii. 43, 44), and the history of the adulteress (John viii.). Eichhorn considers as conclusive of Esther's having formed part of the Jewish canon, the fact of its having been translated by the Seventy, under the reign of Ptolemy Philometor, about the middle of the second century before Christ, before the time usually assigned to the translation of the prophets. For this date we have the authority of the subscription to the Septuagint Version.

Luther has been accused of attacking the canonicity of Esther, and the following passages have been adduced from his writings, and his *Table Talk*, in proof of this assertion:—'The book of Esther I toss into the Elbe.' 'I am so an enemy to the book of Esther, that I would it did not exist; for it Judaises too much, and hath in it a great deal of heathenish naughtiness' (see *Edinburgh Review*, No. cxxi. p. 228). And in his work, *De Serv. Arbit.*, addressed to Erasmus, after saying, 'in regard to *Ecclesiasticus*, although I might justly refuse it, yet I receive it, in order not to lose time in involving myself in a dispute concerning the books received into the canon of the Hebrews,' he adds, 'which canon you do not a little reproach, when you compare the Proverbs and the Love-Song (as you sneeringly call it) with the two books of Esdras, and Judith, Susannah, the Dragon, and the book of Esther; but *though they have this last in their canon, it is in my judgment more worthy than all of being excluded from the canon* (*quamvis hunc habeant in canone, dignior omnibus, me judice, qui extra canonem habeatur*).' Sebastian Smith, however, vindicates Luther by observing that he only speaks of Esther comparatively with the books of Solomon; and Carpzov thinks that Luther refers to the book of Esther as it is extant in the Septuagint, with its spurious additions. (See also Müller, *Defens. Lutheri*, p. 631.) However this may be, it is certain that Sixtus of Sienna, one of the most learned Roman Catholic theologians, maintained the same views regarding the effect of these additions [ESTHER, APOCRYPHAL ADDITIONS TO], saying that, in the time of Gregory and the other ancient fathers who doubted of the canonicity of Esther, 'its authority was rendered suspected by the apocryphal additions which had been rashly inserted into this book; so that although written in Hebrew, and received by the Hebrews, its reception in the Christian church was very late: and it was rejected as spurious by Athanasius,' that is, by the author of the *Festal Epistle*, and of the *Synopsis*. In the former it is said that 'there are other books not in the canon, which our fathers commanded to be read for instruction in piety by catechumens,

as Wisdom, Sirach, *Esther*, Judith, Tobit, the Doctrine of the Apostles, and the Shepherd;' and it is stated in the *Synopsis*, that there are some controverted books, as Wisdom—some apocryphal, as Enoch; and of *Esther* it is observed, that 'some of the ancients have said that it was received by the Hebrews.' We have not dwelt on the circumstance of the book of Esther's being included in the 59th canon of the Council of Laodicea, as there exist strong suspicions that this canon was interpolated into the acts of that council in the twelfth century. Vicenzi (*Introd. in Script. Deuterocan.*, p. 195) supposes that it may have been inserted from the catalogue in the 85th of the pretended apostolical canons, with which, however, it is far from being identical. It is observed by Du Pin (*On the Canon*) that the genuineness of these canons was first called in question by Erasmus. But whatever doubts may have existed among some of the Christian fathers as to the authenticity of Esther, it does not appear that it was ever doubted by the Jews, or by the Christian Church in its collective capacity.—W. W.

ESTHER (Apocryphal additions to). In the version of the Seventy the book of Esther, besides other variations, is enriched with several detached fragments which are not found in the Hebrew. These were also contained in the old Latin, which was translated from the Greek, and were retained in his own version by Jerome, who removed them to the end of the book, in which position they are still found in all manuscripts and printed editions of the Vulgate, forming the seven last chapters according to Cardinal Hugo's division. Luther proceeded still further, and removed them to a separate place among the *Apocrypha*. They are as follows:—

1. The Greek version commences with what forms the 11th chapter in the Vulgate, 'In the fourth year of the reign of Ptolemy and Cleopatra,' describing Mordecai's dream of the two dragons, and the conspiracy of the two eunuchs (Vulg. xii.).

2. The king's letter for the destruction of the Jews (Vulg. xiii.) follows in the Greek the 13th verse of chap. iii. to ver. 14.

3. The Prayer of Esther (Vulg. xiv.), Sept. iv. commencing after the 17th verse in the Vulgate.

4. A detailed and embellished description of Esther's visit to the king (Vulg. xv.), Sept. v. to ver. 3.

5. The king's letter in favour of the Jews (Vulg. xvi.), Sept. viii. after 13th verse.

6. The whole concludes in the Sept. with Mordecai's recollection of his dream of the great and little fountain and the two dragons (Vulg. i.), after which is the subscription, purporting that the letter concerning the feast of Purim was brought into Egypt by Dositheus, and translated by Lysimachus in the fourth year of the reign of Ptolemy and Cleopatra (B. C. 165).

Jerome (*Preface to Esther*) compares these additions to the themes of schoolboys. Sixtus of Sienna (*Bib. Sanct.* 1560) observes that these are the work of some unknown Greek author (Jahn adds 'of more than one'), and that the same are found word for word in the 11th chap. of the *Antiquities* of Josephus. The Chaldee version of them (from the Greek), as well as the Samaritan and Arabic, are still extant. Sixtus of Sienna rejects them as apocryphal, notwithstanding the decree of the council of Trent, wherein it was declared that, 'He is to be anathema who does not receive these entire books, *with all their parts*, as they have been accustomed to be read in the Catholic church, and are found in the ancient editions of the Latin Vulgate, as sacred and canonical, and who knowingly and wilfully despises the aforesaid traditions. . . . . All may, therefore, understand, after the clearing up of this foundation of the Confession of Faith, in what order and method the Synod is to proceed, and what evidences and guarantees it furnishes in the confirmation of doctrines and the reformation of manners in the church.' 'Sixtus maintains that this decree includes only the genuine parts of books, but not the additions and interpolations of unknown writers, which are rejected from the canon not only by Hugo, de Lyra, and others, but utterly repelled by Jerome and exploded by Origen in his letter to Africanus.' Origen, however, only asserts that they were wanting in the Hebrew, from which he supposes they had been lost (an opinion also held by Whiston), and Bellarmine maintains, in opposition to Sixtus, that the phrase *all their parts* in the decree of the council of Trent can only refer to the portions which were hereby declared to be canonical. This is also maintained by Du Pin (*Canon of Scripture*), but denied by Jahn (*Introduction*), who further observes that they contradict the canonical Esther. It would appear to be the sentiment of these divines (who denominate the deutero-canonical portions by the title of the Church-Canon) that these books were not obligatory on Christians for the first fifteen centuries, or before the fourth session of the council of Trent. Bellarmine further observes that these additions to Esther are not only contained in the editions of the Vulgate, but that a portion of them is read in the offices of the church; viz., part of the 13th chap. on the Thursday after the second Sunday in Lent, in the mass against the Pagans, and Esther's prayer (ch. xiv.) on the third Sunday after Trinity. De Wette conceives, from the religious tone of these additions, that they are of Hellenistic and Alexandrian origin. [Esdras.]—W. W.

ETAM (עֵיטָם; Sept. Αἰτάμ), a town in the tribe of Judah, which was decorated by Solomon with gardens and streams of water, and fortified by Rehoboam along with Bethlehem and Tekoa (1 Chron. iv. 3, 32; 2 Chron. xi. 6; Joseph. *Antiq.* viii. 7. 3). From this place, according to the Rabbins, water was carried by an aqueduct to Jerusalem. Josephus places it at fifty stadia (in some copies sixty) from Jerusalem (southward); and alleges that Solomon was in the habit of taking a morning drive to this favoured spot in his chariot. Dr. Robinson (*Researches*, i. 168) inclines to find Etam at a place about a mile and a half south of Bethlehem, where there is a ruined village called Urtas, at the bottom of a pleasant valley of the same name. Here there are traces of ancient ruins, and also a fountain, sending forth a copious supply of fine water, which forms a beautiful purling rill along the bottom of the valley. It is usually supposed that 'the rock Etam,' to which Samson withdrew (Judg. xv. 8, 11), was near the town of the same name. Urtas seems too far inland for this; there is, however, a little to the east, the Frank mountain, which (this consideration apart) would have furnished

just such a retreat as the hero seems to have found.

ETHAM, the third station of the Israelites when they quitted Egypt [Exodus].

1. ETHAN (אֵיתָן; Sept. Αἰθάμ), one of four persons ('Ethan the Ezrahite, and Heman, and Chalcol, and Darda, the sons of Mahol') who were so renowned for their sagacity that it is mentioned to the honour of Solomon that his wisdom excelled theirs. In 1 Kings iv. 31, Ethan is distinguished as 'the Ezrahite,' from the others, who are called 'sons of Mahol'—unless, indeed, this word *Mahol* be taken not as a proper name, but appellatively, for 'sons of music, dancing,' &c., in which case it would apply to Ethan as well as to the others. This interpretation is strengthened by our finding the other names associated with that of Ethan in 1 Chron. ii. 6, as 'sons of Zerah,' *i. e.* of Ezra, the same as Ezrahites. The evidence of identity afforded by this collocation of names is too strong to be resisted; and we must therefore conclude that Ethan and the others, the tradition of whose wisdom had descended to the time of Solomon, are the same who, in 1 Chron. ii. 6, appear as sons of Zerah, who was himself the son of the patriarch Judah. With this agrees the Jewish chronology, which counts them as prophets during the sojourn in Egypt (*Seder Olam Rabba*, p. 52), although the Jews have also a tradition confounding Ethan with Abraham, Heman with Moses, and Chalcol with Joseph. (Jerome, *Comment. on 2 Kings* iv. 31.)

2. ETHAN, a Levite, the son of Kishi, and one of the masters of the Temple music (1 Chron. vi. 44; xv. 17), to whom the 89th Psalm is ascribed, and whom some interpreters suppose to be the Ethan of 1 Kings iv. 31, to whose wisdom that of Solomon is compared.

ETHANIM. [Tishri.]

ETHIOPIA (Αἰθιοπία, Judith i. 10) is the name by which the English and most other versions render the Hebrew Cush. As used among the Greeks and Romans, the word was employed in all the latitude of its etymological meaning, to denote any of the countries where the people are of a sable, sun-burnt complexion—Αἰθίοψ (Acts viii. 27), Αἰθιόπισσα (Num. xii. 1), Αἰθίοπες (2 Chron. xiv. 12), from *αἴθομαι, to burn*, and *ὤψ, the face*. But we have shown in the article Cush (to which we refer the reader) that its use in the language of Scripture is much more restricted, and that while it may sometimes include part of Southern Arabia, it for the most part exclusively designates the 'Ethiopia of Africa,' which is the subject of the present article. 'Of the four sons of Ham,' says Josephus (*Antiq.* i. 6, 2), 'time has not at all hurt the name of Chus; for the Ethiopians over whom he reigned are even at this day, both by themselves and by all men in Asia, called *Chusites*.' The Peschito Syriac Version of Acts viii. 27 styles both Queen Candace and her treasurer *Cushæans*.

By Ethiopia, or African Cush, in the widest acceptation of the name, the Hebrews understood the whole of the region lying south of Egypt above Syene,* the modern Assouan (Ezek. xxix. 10; xxx. 6; comp. Strabo, xviii. p. 817; Pliny, *Hist. Nat.* v. 9; vi. 35; Joseph. *De Bell. Jud.* iv. 10, 5). Its limits on the west and south were undefined; but they probably regarded it as extending eastward as far as the Red Sea, if not as including some of the islands in that sea, such as the famous Topaz Isle (Job xxviii. 19; Pliny, *Hist. Nat.* vi. 29; xxxvii. 8; Strabo, xvi. 4, 6; Diod. Sic. iii. 39). It thus corresponded, though only in a vague and general sense, to the countries known to us as Nubia and Abyssinia, so famous for the Nile and other great rivers. Hence the allusions in Scripture (Isa. xviii. 1; Zeph. iii. 11) to the far distant 'rivers of Ethiopia,' a country which is also spoken of (Isa. xviii. 2) in our version as the land 'which the rivers have *spoiled*,' there being a supposed reference to the ravages committed by inundations (Bruce's *Travels*, iii. p. 158, and Taylor's *Calmet*, iii. pp. 593-4); but recent translators prefer to render בזא by 'divide,' *q. d.* 'a land intersected by streams.' Isaiah likewise takes notice of the כלי גמא, or vessels of papyrus, which the Ethiopians employed upon the waters, a fact which is confirmed by Heliodorus in his *Æthiopica* (x. p. 460), and also by Bruce, who states that the only kind of boat in Abyssinia is that called *Tancoa*, which is made of reeds, 'a piece of the Acacia tree being put in the bottom to serve as a keel, to which the plants are joined, being first sewed together, then gathered up at stem and stern, and the ends of the plants tied fast there.' It is to the swiftness of these papyrus vessels that Job (ix. 26) compares the rapid speed of his days.

But that part of the vast region of Cush which seems chiefly intended in these and most other passages of Scripture is the tract of country in Upper Nubia, which became famous in antiquity as the *kingdom of Ethiopia*, or the state of Meroë. The Ethiopian nations generally ranked low in the scale of civilization; 'nevertheless (to use the language of Heeren), there did exist a better cultivated, and, to a certain degree, a civilized Ethiopian people; who dwelt in cities; who erected temples and other edifices; who, though without letters, had hieroglyphics; who had government and laws; and the fame of whose progress in knowledge and the social arts spread in the earliest ages over a considerable part of the earth.' Meroë Proper lay between the river Astaboras (now the Atbara or Tacazzé) on the east, and the Nile on the west. Though not completely enclosed with rivers, it was called an island, because, as Pliny observes, the various streams which flowed around it were all considered as branches of the Nile; so that to it the above description of a 'country of rivers' was peculiarly appropriate. Its surface exceeded that of Sicily more than a half, and it corresponded pretty nearly to the present province of Atbara, between 13° and 18° N. lat. In modern times it formed a great part of the kingdom of Sennaar, and the southern portion belongs to Abyssinia. Upon the island of Meroë lay a city of the same name, the metropolis of the kingdom, the site of which has been discovered near a place called Assur, about

* Jablonsky and Champollion both seek the derivation of Syene in the Coptic; but the former thinks it denotes 'boundary,' the latter 'key,' *i. e.* of Egypt. It was always considered the natural frontier towards Ethiopia.

twenty miles N. of the town of Shendy, under 17° N. lat. The splendid ruins of temples, pyramids, and other edifices found here and throughout the district have been described by Cailland, Gau, Rüppell, Belzoni, Waddington, Hoskins, and other travellers, and attest the high degree of civilization and art among the ancient Ethiopians.

Josephus, in his account of the expedition of Moses when commander of the Egyptian army against the Ethiopians, says that the latter 'at length retired to Saba, a royal city of Ethiopia which Cambyses afterwards called Meroë, after the name of his own sister' (*Antiq.* ii. 10. 2). The same origin of the name is given both by Strabo and Diodorus Siculus, but see Mannert's *Geog. of the Greeks and Romans*, x. 199. There is still a place called *Merawé* considerably north of the island and near Mount Berkal, where Heeren thinks there may have been a settlement of the parent state called by the same name. The opinion of Josephus that Meroë was identical with Seba accords well with the statement in Gen. x. 7, that Seba was the eldest son of *Cush*, and as his name is written with a *samech* (סבא), he is not to be confounded with either of the Shebas (שבא), who are mentioned as descendants of *Shem* (Gen. x. 28; xxv. 3). Now this country of African Seba is classed with the Arabian Sheba as a rich but far-distant land (Ps. lxxii. 10). In Isa. xliii. 3 God says to Israel, 'I have given Egypt for thy ransom; Cush and Seba in thy stead:' and in Isa. xlv. 14, 'The wealth of Egypt and the merchandise of Cush and of the Sebaïm men of stature shall pass over to thee and shall be thine.' Charles Taylor, the ingenious but fanciful editor of *Calmet*, had the singular notion that by אנשי מדה is meant men of *short* measure, or dwarfs; and hence he identifies the Ethiopians with the Pygmies of antiquity (*Fragments to Calmet*, cccxxii). But the Hebrew phrase plainly denotes 'tallness of stature' (comp. 1 Chron. xi. 23), and the Ethiopians are described by Herodotus as ἄνδρες μέγιστοι (iii. 114), μέγιστοι ἀνθρώπων (iii. 20); and Solinus affirms that they were twelve feet in height (*Polyhist.* cap. xxx). In common with the other Cushite tribes of Africa the skin was black, to which there is an obvious allusion in Jer. xiii. 23: 'Can the Cushite change his skin?' Bruce finds Seba in Azab, a sea-port on the east coast of Africa near the entrance to the Red Sea, and in this he is followed by Heeren, while others think of a place called Subah about lat. 15° N., where are some of the most remarkable ruins of Nubian grandeur; but both opinions are merely conjectural.

Among other tribes of Africa said to have been in alliance with Egypt, the prophet Ezekiel (xxx. 5) mentions along with Ethiopia the name of *Chub*, which Michaelis connects with *Kobé*, a trading town described by Ptolemy as on the west coast of the Red Sea. But in the Arabic translation made from the Septuagint, instead of *Chub* we find 'the people of Nubia.' The Hebrew letters כ and נ might easily be confounded by a transcriber, and in the MS. 409 of De Rossi it is not כוב *Chub*, but נוב *Nub*, which is probably the true reading. There are still two districts adjoining Meroë on the south-west, called *Cuba* and *Nuba*, which are said to abound in gold. The *Sukkiim*, who, along with the Cushites and Lubim or Libyans, formed part of the host of Shishak (2 Chron. xii. 3), are in the Sept. designated Troglodytes, *i. e.* cave-dwellers, and were, no doubt, the people known to the Greeks by the same name as inhabiting the mountain-caverns on the west coast of the Red Sea (Diod. Sic. iii. 32; Strabo, xvii. p. 785). They were noted for swiftness of foot and expertness in the use of the sling, and hence were employed, as Heliodorus informs us (*Æthiopica*, viii. 16), as light troops. Pliny makes mention of a town of *Suche* in that region (*Hist. Nat.* vi. 29. 34), and there is still on the same coast a place called Suakim, described by Burckhardt in his *Travels in Nubia*. If, however, the term *Sukkiim* be of Hebrew derivation, it would specially denote those who lived in booths, *i. e.* tabernacles made of the *boughs of trees*; and it deserves remark that the Shangallas who inhabit that country, still dwell during the good season in arbours fitted up for tents, repairing in winter to their rocky caves.

In the age of Herodotus, the countries known to us as Nubia and Sennaar were occupied by two different races, one of whom he includes under the general appellation of Ethiopians, the other an immigratory Arabian race leading, for the most part, a nomadic life. This distinction has continued down to the present day. Among the aboriginal inhabitants the first place is due to the Nubians, who are well-formed, strong, and muscular, and with nothing whatever of the negro physiognomy. They go armed with spear, sword, and a shield of the skin of the hippopotamus. South of Dongola is the country of the Scheygias, whose warriors are horsemen, also armed with a double-pointed spear, a sword, and a large shield (comp. Jer. xlvi. 9, the 'Cushites who handle the shield'). They were completely independent till subdued by Mehemet Ali, pacha of Egypt. It is in their country that the pyramidal monuments which adorned the ancient Meroë are first met with, and even its name has been preserved in that of their chief place, Merawé, though the original Meroë must be sought farther south. Next comes the territory of the Berbers, strictly so called, who, though speaking Arabic, evidently belong to the Nubian race. Above these regions beyond the Tacazzé and along the Nile the great mass of the inhabitants, though sometimes with a mixture of other blood, may be regarded as of Arab origin. But between the valley of the Nile and the Red Sea there is still, as of old, a variety of scattered aboriginal tribes, among whom the Arabic is much less common: they are, doubtless, partly the descendants of the above-mentioned Sukkiim, or Troglodytes, and of the Ichthyophagi, or fish-eaters. Some of them spread themselves over the plains of the Astaboras, or Tacazzé, being compelled to remove their encampments, sometimes by the inundations of the river, at other times by the attacks of the dreaded *zimb*, or gad-fly, described by Bruce, and which he supposes to be the 'fly which is in the utmost part of the rivers of Egypt' (Isa. vii. 18). Another remarkable Ethiopic race in ancient times was the *Macrobians*, so called from their supposed longevity. They were represented by the ambassadors of Cambyses as a very tall race, who elected the highest in stature as king: gold was so abundant that they bound their prisoners with golden fetters—circumstances which again remind us of Isaiah's description of Ethiopia and Seba in ch. xlv. 14.

With regard to the ancient civilization of Ethiopia Proper, or the kingdom of Meroë, it was closely connected with the religion of the country, which was the worship of Ammon and his kindred deities, and the 'Oracles of Ammon' were its main support. The government was in the hands of a race or caste of priests, who chose from among themselves a king; and this form continued down to the reign in Egypt of the second Ptolemy, when Ergamenes, at that time king, massacred the priests in their sanctuary, and became absolute monarch.

Of the history of Ethiopia, previous to that last revolution, only scanty information has been preserved, but it is enough to evince its high antiquity and its early aggrandizement. In the Persian period it was certainly an independent and important state, which Cambyses in vain endeavoured to subdue. But its most flourishing era was between the years B.C. 800 and 700, when arose three potent kings, Sabaco, Sevechus, and Tarhako, or Tirhakah, who extended their conquests over a great part of Egypt. Sevechus is supposed to have been the So or Sua king of Egypt, to whom an embassy was sent by Hoshea, king of Israel (2 Kings xvii. 4), whose reign ended B.C. 722. He was thus the contemporary of Salmanassar, king of Assyria, as was Tirhakah of the next Assyrian monarch, Sennacherib, who (about the year B.C. 714) was deterred from the invasion of Egypt merely by the rumour that Tirhakah was advancing against him (2 Kings xix. 9). There seems no reason to doubt that the remarkable prophecy in the 18th chapter of Isaiah was addressed to Tirhakah and his people, to announce to them the sudden overthrow of the Assyrian host before Jerusalem: 'Ho! thou land with rustling wings [i. e. *armies* in the clangour of battle, as in chap. viii. 8] beyond the streams of Cush [for the country lay south of its great rivers], which sendest its messengers on the [Red] sea, and in vessels of papyrus on the waters [of the Nile]. Up! ye swift messengers, to the nation robust and valiant, the nation formidable from the first and hitherto, the nation powerful and all-crushing, whose country is intersected with streams,' &c. This description of the Ethiopian nation is repeated at verse 7 almost *verbatim*, and it is intimated that, struck at the mighty deeds of the God of Judah, this distant people should send gifts to his dwelling-place at Zion. They were, no doubt, among the 'many' who are described in 2 Chr. xxxii. 23, as having 'brought gifts unto Jehovah at Jerusalem, and presents to king Hezekiah, so that he was magnified in the sight of all the nations.' But it is remarked by Gesenius (*Comm. on Isaiah*, in loc.) that the expectation of the entire conversion of the Ethiopians is frequently expressed by the Hebrew prophets (Isa. xlv. 14; Zeph. iii. 10; Ps. lxviii. 32; lxxxvii. 4); and he adds, 'Those who take pleasure in tracing the fulfilment of such predictions in subsequent history may find it in Acts viii. 27 (the conversion both to Judaism and Christianity of the treasurer of Queen Candace), and still more in the circumstance that Abyssinia is to this day the only great Christian state in the eastern world.' Wilkinson informs us that the figure and name of Tirhakah, and the expedition he undertook against Sennacherib, are recorded on the walls of a Theban Temple. 'It is probable,' says he, 'that in the early part of his reign Sethos divided the kingdom with him, and ruled in Lower Egypt, while the Ethiopian monarch possessed the dominion of the upper country; and this would account for the absence of the name of Sethos on the monuments of Thebes. Whether Tirhakah and Sabaco's claims to the throne of Egypt were derived from any right acquired by intermarriage with the royal family of that country, and whether the dominion was at first confined to the Thebaïd, it is difficult to determine; but the respect paid by their successors to the monuments they erected argues the probability of their having succeeded to the throne by right rather than by usurpation or the force of arms' (*Ancient Egyptians*, vol. i. p. 140; comp. Rosellini, mon. ii. tab. 8). Of the military renown of Tirhakah, Megasthenes speaks in Strabo (xv. 1. 6), where he mentions *Τεάρκωνα τὸν Αἰθίοπα* along with Sesostris and Nebuchadnezzar, as one who had penetrated into Europe, and advanced as far as the pillars of Hercules—the usual limit of great conquerors. According to Julius Africanus, Tirhakah reigned eighteen years; according to Eusebius twenty: the former calls him *Ταρκός*, the latter *Ταρακός*. 'Contemporary with him,' says Gesenius, 'there existed two dynasties in Sais and Tanis. and, without doubt, his had its seat in Thebais. In the last years of his reign falls the Dodekarchy, at the end of which the Ethiopians withdrew into their original kingdom (Herod. ii. 139). From this connection we may derive a satisfactory explanation of the fact, that Isaiah often mentions Egypt and Ethiopia in so close political relation (see especially chap. xx. 3-6). The same fact is noticeable in the latter prophets, and proves the continuance of a friendly understanding (Ezek. xxx. 4, sq.; Jer. xlvi. 9; Nahum iii. 9; Dan. xi. 43). In fine, Ethiopia is employed chiefly as the name of the national and royal family that were now in the ascendancy.'

If we go back about two centuries, to the reign of Asa, king of Judah (B.C. 950), we read of Zerah, or rather Zerach, an Ethiopian going out against him with a host of a thousand thousand men and three hundred chariots (2 Chron. xiv. 9). It is doubtful whether this was an Ethiopian monarch or commander, or only a mere Cushite adventurer; but that his army was mainly of African and not Arabian original is evident from the fact of its having included Libyans as well as Cushites (2 Chron. xvi. 8), and from the mention of war-chariots, which never were in use in Arabia. Farther back than this the records of history are silent. Pliny, indeed (*Hist. Nat.* vi. 35), after observing that Ethiopia was ruined by its wars with Egypt, which it sometimes subdued and sometimes served, adds, that 'it was powerful and illustrious even as far back as the Trojan war, when Memnon reigned.' Existing monuments confirm that high antiquity which tradition assigns to the state of Meroë. The name of Rameses, or Sesostris, has been found on many of the ruins of Nubia, and he is well known in history as its conqueror (Herod. ii. 110). That the Pharaohs indeed should have carried their conquests into Ethiopia, ought not to seem strange to us in whose days the same scene has been acted; for scarcely was Mehemet Ali firmly possessed of Egypt than he sent his son to subdue Ethiopia, and he not only penetrated to Meroë, but much farther south.

The era of Rameses cannot be placed later than 1500 years B.C. But the name of Pharaoh Thutmosis, the expeller of the Hyksos, has been found by Champollion on the Nubian Temple of Amada, and the sculptures found there show a degree of civilization that can only be ascribed to a nation which had long existed. We thus approach the age of Moses, at which Jewish tradition, as reported by Josephus, assigns the conquest of Meroë to Moses himself, as general of the army of Egypt; and the traditions of the Egyptian priesthood also agree in this, that the Ethiopians laid the foundation of the most ancient states of Egypt.

The state of Meroë appears to have resembled the larger states in the interior of Africa at the present day, comprising a number of different races or tribes united together by no strong political bond, but by a common form of worship, which placed the rule in the hands of the priesthood, the dominant caste of the country. There is every reason to conclude that the separate colonies of the priest-caste spread from Meroë into Egypt; and the primeval monuments in Ethiopia strongly confirm the native traditions reported by Diodorus Siculus, that the worship of Ammon and Osiris originated in Meroë, and thus render highly probable the opinion that commerce and civilization, science and art, descended into Egypt from Nubia and the upper regions of the Nile. One great cause of the early prosperity and grandeur of Ethiopia was the carrying-trade, of which it was the centre, between India and Arabia on the one hand, and the interior of Africa, and especially Egypt, on the other. This has been well illustrated by Heeren in his work *On the Ancient Nations of Africa*, vol. i. p. 289 sqq. 'In proportion,' says he, 'as we ascend into the primeval ages, the closer seems the connection between Egypt and Ethiopia. The Hebrew poets seldom mention the former without the latter; the inhabitants of both are drawn as commercial nations. When Isaiah celebrates the victories of Cyrus, their submission is spoken of as his most magnificent reward (Isa. xlv. 14). When Jeremiah extols the great victory of Nebuchadnezzar over Pharaoh-nechoh, near Carchemish, the Ethiopians are allied to the Egyptians (Jer. xlvi. 9). When Ezekiel threatens the downfal of Egypt, he unites it with the distant Ethiopia (Ezek. xxx. 4). Every page, indeed, of Egyptian history exhibits proofs of the close intimacy in which they stood. The primitive states of Egypt derived their origin from these remote regions. Thebes and Meroë founded in common a colony in Libya; Ethiopian conquerors more than once invaded Egypt; Egyptian kings in return forced their way into Ethiopia; the same worship, the same manners and customs, the same mode of writing, are found in both countries; and, under Psammetichus, the noble and numerous party of malecontents retired into Ethiopia. Egypt, also, as far as history reaches back, abounded in all the commodities of the southern regions. Whence did she obtain the spices and drugs with which she embalmed her dead? whence the incense that burned on her altars? whence that immense quantity of cotton in which her inhabitants were clad, and which her own soil so sparingly produced? Whence came into Egypt that early rumour of the Ethiopian gold countries, which Cambyses set out to discover, and lost half his army in the attempt? Whence that profusion of ivory and ebony which the ancient artists of Greece and Palestine embellished? Whence that general and early spread of the name of Ethiopia, which glimmers in the traditional history of so many nations, and which is celebrated as well by the Jewish poets as by the earliest Grecian bards? Whence but from the international commerce of which Ethiopia was the seat and centre? Its principal route is still pointed out by a chain of ruins, extending from the shores of the Indian sea to the Mediterranean. Adule, Azab, and Axum, are links of this chain between Arabia Felix and Meroë; Thebes and Ammonium between Meroë, Egypt, and Carthage.'

Queen Candace, who is mentioned in Acts viii. 27, was doubtless the reigning sovereign of Meroë [CANDACE], where it is likely a form of Judaism was at that period professed by a portion of the inhabitants, as seems to have been the case in the adjacent region of Abyssinia. The prophets (*e. g.* Isa. xi. 11) sometimes allude to the Jews who were scattered throughout Cush. Ebed-melech, the benevolent eunuch of King Zedekiah, who showed such kindness to the prophet Jeremiah, was an Ethiopian (Jer. xxxviii. 7; comp. Acts viii. 27). Josephus calls the queen of Sheba, who visited Solomon, a queen of Egypt and Ethiopia, and with this agrees the tradition of the Abyssinians, who claim her as a native queen, give her the name of Maqueda, and maintain that she had a son by Solomon, called Menilek, who bore the title of David I. Yet Sheba was undoubtedly in Arabia Felix, though it is possible that, in remote antiquity, the sovereignty of its monarchs extended across the Red Sea to the coast of Ethiopia.—N. M.

ETHIOPIC LANGUAGE. As it is maintained by competent judges that the Amharic and the Tigré are really dialects of the ancient Ethiopic or Geez,* it may be expected, from the recent progress of comparative grammar, that future scholars will apply them to elucidate the structure of the other Syro-Arabian languages. At present, however, as even the Amharic is not yet able to boast of adequate and accessible means for its study, and as neither possesses any ancient version of any part of the Bible, the Geez is the only one which claims a particular notice here.

The ancient Ethiopic or Geez, which is the only one of the three dialects which either has been, or is now, generally used in written documents of a sacred or civil kind, is to be classed as an ancient branch of the Arabic. This affinity is evident from the entire grammatical structure of the language: it is confirmed by the relation of its written character to that of the Himjarite alphabet; and either supports, or is supported by, the assumption that Habesh was actually peopled by a colony from southern Arabia. The grammatical structure of the Geez shows a largely predominant identity with that of Arabic; but it

* Adelung and Vater, in the *Mithridates*, appear to be the chief authorities for doubting the intimate affinity of the Geez and Amharic. In this particular, and throughout the subject, we have followed Gesenius, in his two articles on the Ethiopic and Amharic languages in Ersch and Gruber's *Allgemeine Encyclopädie*.

also possesses some traits which are in closer accordance with the other Syro-Arabian idioms, and some which are peculiar to itself alone. The main features of its structure are as follow:—The verb possesses the first ten conjugations of the Arabic verb, with the exception of the eighth and ninth; besides these it has two other conjugations which are unknown to the Arabic. The formation of nouns resembles most that of Hebrew; but nouns often have superfluous end-vowels, which are modified in particular cases, and are analogous to the Arabic nunnation. As for the flexion of nouns, the masculine and feminine plurals are either formed by affixed syllables (*ân*, *ât*) on the principle common to the whole Syro-Arabian family; or by changes within the compass of the radical letters, after the manner of the so-called *broken* plurals of the Arabic grammar. The state construct, and that relation of the noun which is equivalent to our objective case, are denoted by changes in the final vowels. There is no form for the dual number either in the verb or the noun. With regard to the vocabulary of the language, one-third of the roots are to be found in the same state in Arabic. By making allowance for commutations and transpositions, many other roots may be identified with their Arabic correspondents: some of its roots, however, do not exist in our present Arabic, but are to be found in Aramaic and Hebrew. Besides this it has native roots peculiar to itself: it has adopted several Greek words, but shows no traces of the influence of Coptic.

The alphabet possesses twenty-six consonants, arranged in a peculiar order, twenty-four of which may be regarded as equivalents to the same number of letters in the Arabic alphabet (the ones excepted being ث, ذ, ظ, and غ). The remaining two are letters adopted to express the Greek Π and Ψ. The vowel-sounds, which are seven, are not expressed by separable signs, as in the Hebrew and Arabic punctuation, but are denoted by modifications in the original form of the consonants, after the manner of the Dêvanâgari alphabet. The mode of writing is from left to right. As for the written characters, Gesenius has traced the relation between some of them and their equivalents in the Phœnician alphabet. There is, however, the most striking resemblance between the Geez letters generally and those in the Himjarite inscriptions; a circumstance which accords well with the supposed connection of Southern Arabia and Habesh. Moreover, Lepsius, in an interesting essay, *Ueber die Anordnung und Verwandschaft des Semitischen, Indischen, Aethiopischen, &c. Alphabets* (in his *Zwei Sprachvergleichende Abhandlungen*, Berlin, 1836, 8vo. pp. 74-80), has adduced some striking arguments to prove that the Dêvanâgari alphabet must have had some influence on the development of the Geez.

The literature of the Geez language is very scanty indeed, and that little is almost exclusively of a Biblical or ecclesiastical character. It possesses nothing, not even an imitation of the national poetry, nor of the lexicographical and grammatical works, of the Arabs. Some few historical works in the shape of chronicles, and a few medical treatises, constitute the main body of their profane literature. The Geez has ceased, ever since the beginning of the fourteenth century, to be the vernacular language of any part of the country, having been supplanted at the court of the sovereign by the Amharic. It still continues, however, to be the language used in religious rites, in domestic affairs of state, and in private correspondence.—J. N.

ETHIOPIC VERSION. The libraries of Europe contain some, although very rarely complete, manuscript copies of a translation of the Bible into the Geez dialect. This version of the Old Testament was made from the Greek of the Septuagint, according to the Alexandrian recension, as is evinced, among other things, by the arrangement of the Biblical books, and by the admission of the Apocrypha without distinction. It is divided into four parts: *The Law*, or the Octateuch, containing the Pentateuch and the books of Joshua, Judges, and Ruth; *The Kings*, in thirteen books, consisting of two books of Samuel, two of Kings, two of Chronicles, two of Ezra (Ezra and Nehemiah), Tobit, Judith, Esther, Job, the Psalms; *Solomon*, in five books, consisting of Proverbs, Ecclesiastes, Canticles, Wisdom, and Sirach; *Prophets*, in eighteen books, consisting of Isaiah, Jeremiah's prophecy and Lamentations, Baruch, Ezekiel, Daniel, and the twelve minor prophets: lastly, they have also two books of the Maccabees. Besides this, they possess an apocryphal book of Enoch, which they place next to that of Job. The critical uses of this version are almost exclusively confined to the evidence it gives as to the text of the Septuagint. The version of the New Testament was made direct from the Greek original. It follows the verbal arrangement of the Greek very closely, and has mistakes which are only to be explained by the confusion of words which resemble each other in that language. It is difficult to determine what recension it follows; but it frequently agrees with the Peshito and the Itala. It is impossible to ascertain the date of the execution of either of these translations; but they may both be ascribed with much probability to the beginning of the fourth century. Only small portions of the former have been printed. The whole New Testament has, however, appeared. The Gospels were edited anew from MSS. by T. P. Platt, M.A., in 1826, in 4to.—J. N.

ETHUN (אטון) occurs in Prov. vii. 16, in connection with Egypt, and as a product of that country. It is translated *fine linen* in the Authorized Version. 'I have decked my bed with coverings of tapestry, with carved works, with *fine linen* (*ethun*) of Egypt.' As Egypt was from very early times celebrated for its cultivation of flax and manufacture of linen, there can be little doubt that *ethun* is correctly rendered, though some have thought that it may signify rope or string of Egypt, 'funis Ægyptius,' 'funis salignus v. intubaceus;' but Celsius (*Hierobot.* ii. p. 89) observes, 'Ethun non funem, sed linum et linteum esse, clamat græca vox *ὀθόνη* vel *ὀθόνιον*, quam ab *ethun* esse deducendam.' So Mr. Yates, in his *Textrinum Antiquorum*, p. 265, says of *ὀθόνη*, that 'it was in all probability an Egyptian word, adopted by the Greeks to denote the commodity to which the Egyptians themselves applied it.' For אטון, put into Greek letters, and with Greek terminations, becomes *ὀθόνη* and *ὀθόνιον*. Hesychius states, no doubt correctly, 'that *ὀθόνη* was applied by the

Greeks to any fine and thin cloth, though not of linen.' Mr. Yates further adduces from ancient Scholia that ὀθόναι were made both of flax and of wool; and also that the silks of India are called ὀθόναι σηρικαὶ by the author of the *Periplus of the Erythræan Sea*. We have also shown from the same work, in the article COTTON, p. 473, that the name ὀθόνιον was applied to cloths exported from Cutch, Ougein, and Baroach, and which must have been made of cotton. Mr. Yates moreover observes, that though ὀθόνη, like σινδὼν, originally denoted linen, yet we find them both applied to cotton cloth. As the manufacture of linen extended itself into other countries, and as the exports of India became added to those of Egypt, all varieties, either of linen or cotton cloth, wherever woven, came to be designated by the originally Egyptian names Ὀθόνη and Σινδών.

In the New Testament the word ὀθόνιον occurs in John xix. 40—'Then took they the body of Jesus and wound it in *linen clothes*' (ὀθονίοις); in the parallel passage, Matt. xxvii. 59, the term used is σινδόνι, as also in Mark xv. 46, and in Luke xxiii. 53. We meet with it again in John xx. 5, 'and he stooping down saw the *linen clothes* lying.' It is generally used in the plural to denote 'linen bandages.' Ὀθόνη occurs in Acts x. 11, 'and (Peter) saw heaven opened, and a certain vessel descending unto him, as it had been a great *sheet* knit at the four corners, and let down to the earth,' and also in xi. 5, where this passage is repeated.

From the preceding observations it is evident that ὀθόνιον may signify cloth made either of linen or cotton, but most probably the former, as it was more common than cotton in Syria and Egypt [v. COTTON and LINEN].—J. F. R.

ETZ-ABOTH (עץ עבת) occurs in Lev. xxiii. 40, and Neh. viii. 15, and in both passages is mentioned along with *etz-shemen*. These words occur also in Ezek. xx. 28, where, as well as in the other passages, they are translated *thick trees*: 'For when I had brought them into the land, &c., then they saw every high hill and all the *thick trees* (*etz-aboth*), and they offered there their sacrifices.' The word *etz* or *otz*, used in several places in Scripture to designate a tree, is said to be derived from the verb *otze*, 'to fix' 'to make steady.' The word *aboth*, according to Celsius (*Hierobot.* i. p. 322), is by the Rabbins, as well as in the Chaldee and Syriac versions, understood to mean the *myrtle*. But Celsius himself follows the Septuagint, the Vulgate, and several other authorities, in considering the *etz-aboth* to signify a *shady tree*, 'foliis et frondibus densa.'

The shade of trees must always have been highly esteemed in eastern, or rather in warm climates. The planting of trees was early practised, as we have seen in the case of the *eshel* planted by Abraham at Beersheba, when he called on the name of the Lord. We know also that among the nations of antiquity the planting of groves, and their consecration to their gods, were antecedent to the building of temples and altars, and were of almost universal adoption; and that groves were the scenes of their idolatrous worship and licentious rites. Hence probably the Jews were prohibited from planting trees around or near the altar of God. Shade and solitude seem always to have been considered as giving an air of mystery and devotion to religious services. Seneca, as quoted by Dr. Carpenter, says, 'If you find a grove thick set with ancient oaks that have shot up to a vast height, the tallness of the wood, the retirement of the place, and the pleasantness of the shade, immediately make you think it to be the residence of some god.' The prophet Hosea also gives the following description: 'They sacrifice upon the tops of the mountains, and burn incense upon the hills, under oaks and poplars and elms, because the shadow thereof is good' (Hos. iv. 13). Hence, in the above passages, it is more than probable that *etz-aboth* has a general, and not a specific, signification. There is no proof of the myrtle being intended; in fact, it is not likely to have been found in any part of the wilderness, and no better material can be required for the construction of booths than the boughs of thick or shady trees.—J. F. R.

ETZ-HADAR (עץ הדר) occurs only once in Scripture, in Lev. xxiii. 40, where the Israelites are directed, in remembrance of their dwelling in tents or booths when they were brought out of the land of Egypt, to leave their homes and dwell in booths for a season every year. 'And ye shall take you on the first day the *boughs of goodly trees* (*peri etz-hadar*), branches of palm-trees, and the boughs of thick trees (*etz-aboth*), and willows of the brook; and ye shall rejoice before the Lord your God seven days.' *Etz-aboth* has been noticed in the preceding article; *etz-hadar* has been variously translated. The words in the original, *peri etz-hadar*, the Septuagint renders καρπὸν ξύλου ὡραῖον, and the Vulgate, *fructus arboris pulcherrimæ*, the 'fructus ligni honoris' of Ursini. These translations are followed in many versions, as enumerated by Celsius (*Hierobot.* i. p. 252); but, as this author also shows, Onkelos and others consider the phrase to signify 'fructus arboris citrei:' so R. Aben Esra, in Hebrew, but as translated by Celsius, 'Fructus arboris speciosæ est citrus. Nam certe nullus fructus arboreus speciosior est illo.' The term *etragh* or *atruj* is that translated *citrus*. This interpretation has been adopted by the Jews, and is that given by Josephus. The orange and lemon have sometimes been adduced as the *citrus* of the above passages, but both were unknown in those early times so far north as Palestine; while the citron seems to have been early introduced from Media, and was known to the Greeks and Romans, as we shall show under the article TAPHUAH. Some again are of opinion that the olive is intended by the word *hadar*, as the olive is mentioned instead of this tree by Nehemiah (viii. 15), in reference apparently to the above passage. Instead of fruit, however, some, as Tremellius and Dr. Geddes, conceive that *peri* signifies young growing shoots or boughs, as indeed it is interpreted in our authorized version. There can be no objection to the citron being considered the *hadar*, as is done by the Jews; since we learn from Josephus that they had them in their hands *in festo Scenopegiorum*, when they threw them at King Alexander Jannæus; and they still continue to use citrons at the Feast of Tabernacles. But this does not prove that the citron was common in Palestine, or rather in the desert, at the time of Moses. The law-giver, if he specified

any, would no doubt direct the Israelites to take such fruits or branches as were procurable in the desert; but it is probable, as maintained by the majority of commentators, that the term is general, rather than specific, and therefore that the fruit or branches of any goodly tree might be thus employed. Ursini has observed, 'Nam si species aliqua defecisset, nec omnibus æque ad manum fuisset, imposita fuisset necessitas Scenopegia celebraturis, vel omittendi gestationem horum ramusculorum, vel prævaricandi contra legis præscriptum. Cogita, si omnibus *citreæ* frondes fructibus suis onustæ, aut *oleaginæ*, aut *myrteæ* gestandæ fuissent, quanta circa Hierosolymas hortorum quotannis fuisset calamitas; quanta frondium talium raritas et caritas' (*Arboret. Bibl.* p. 577).—J. F. R.

ETZ-SHEMEN (עֵץ שֶׁמֶן) occurs three times in Scripture, and is differently translated in all the three passages in the Authorized Version. At the institution of the Feast of Tabernacles (Lev. xxxiii. 33-34), we have seen [ETZ-HADAR] that the Israelites were directed to make booths of the boughs of palm-trees, of willows of the brook, of goodly trees (*etz-hadar*), and of thick trees (*etz-aboth*). At the rebuilding of the temple, Nehemiah (viii. 15) directs the Israelites to 'go forth unto the mount and fetch *olive* and *pine branches* (*etz-shemen*), and *myrtle*-branches, and *palm*-branches, and branches of thick trees (*etz-aboth*), to make booths, as it is written.' Thus we see that two names are the same in both passages, viz. the *palm* and *etz-aboth;* while *etz-hadar* and *willows* of the brook are mentioned in the first, and *myrtle* branches, *olive* branches, and *etz-shemen* in the second.

This term occurs also in Isa. xli. 19: 'I will plant in the wilderness the cedar, the shittah-tree, and the myrtle, and the *etz-shemen* [here translated 'oil-tree']: I will set in the desert the fir-tree, and the pine, and the box-tree together.' The third mention of *etz-shemen* is in 1 Kings vi. 23, where its wood is described as being employed: 'And within the oracle he made two cherubim of *etz-shemen* [translated *olive*-tree], each two cubits high.' If we collate the several passages in which *etz-shemen* occurs, we shall find reason to conclude that it is not the olive-tree, as it is translated in 1 Kings vi. 23, since in Neh. viii. 15, the olive-tree (*zait*) is distinguished from *etz-shemen*, which is there rendered *pine-tree;* and that it is as little likely to be the pine-tree, since in Isa. xli. 19, *etz-shemen*, translated *oil*-tree, is mentioned as distinct from both the fir and the pine.

Though the above names, occurring in the same sentences with *etz-shemen*, enable us to say that it is not likely to have been any of them, it is not more easy to say what tree is intended. Several have been adduced in addition to those mentioned above, as the different kinds of pine, including the cedar of Lebanon, the cypress, the citrus, the balsam-tree; but there is no proof in favour of any of these. Ursini and Celsius are both of opinion that the term is used generically, and therefore that no particular kind of tree is intended. This may appear to be the case in the earlier passages; but in those of Isa. xli. 19, and of 1 Kings vi. 23, a specific tree seems to be pointed out; but we have no means of determining the particular tree, though there are several in Palestine which are not noticed in our version of the Scriptures, and though it is probable that some even of the modern Arabic names may bear some similarity to the Hebrew. The Arabic *shamanat*, signifying fragrant things, and the Persian *shamanah*, signifying anything odoriferous, a fragrant smell, seem to be connected with it. But Hebrew scholars consider *shemen* as having some reference to oiliness or fatness. Thus Celsius (*Hierob.* i. 310) quotes R. D. Kimchi as commenting on 1 Kings vi. 23, as follows: 'Intellige per עֵץ שֶׁמֶן speciem aliquam pini, ex qua manat pinguedo, unde faciunt picem; nam inde dicitur עֵץ שֶׁמֶן arbor pinguedinis.' The objection to *etz-shemen* being one of the pine tribe, is that it is mentioned as apparently distinct from both the pine and fir in the passage of Isaiah, while in that of Kings a tree is required having wood fit for making the cherubim. As no tree has yet been pointed out having a name similar either in meaning or sound to the Hebrew, and with wood of a good quality, it is better to consider *etz-shemen* as one of those not yet ascertained, than to add one more to the other unsatisfactory guesses.—J. F. R.

EVANGELISTS (Εὐαγγελισταί). This term is applied in the New Testament to a certain class of Christian teachers who were not fixed to any particular spot, but travelled either independently, or under the direction of one or other of the Apostles, for the purpose of propagating the Gospel. Philip, one of the seven deacons, is termed *the Evangelist* (Acts xxi. 8). St. Paul exhorts Timothy 'to do the work of an *Evangelist*' (2 Tim. iv. 5); and though this name is not given to Titus, the injunctions addressed to him, and the services he rendered, are so similar as to render the propriety of applying it to him unquestionable. In the Epistle to the Ephesians (iv. 11) the Εὐαγγελιστάς (*Evangelists*) are expressly distinguished from the ποιμένας καὶ διδασκάλους (*pastors and teachers*). The chief points of difference appear to be that the former were itinerant, the latter stationary; the former were employed in introducing the Gospel where it was before unknown; the business of the latter was to confirm and instruct the converts statedly and permanently. Such is the representation given by Eusebius (*Hist. Eccles.* iii. 37). Referring to the state of the church in the time of Trajan, he says, 'Many of the disciples of that time, whose souls the Divine word had inspired with an ardent love of philosophy, first fulfilled our Saviour's precept by distributing their substance among the poor. Then travelling abroad they performed the work of Evangelists (ἔργον ἐπετέλουν Εὐαγγελιστῶν), being ambitious to preach Christ, and deliver the Scripture of the Divine Gospels. Having laid the foundations of the faith in foreign nations, they appointed other pastors (ποιμένας τε καθιστάντες ἑτέρους), to whom they entrusted the cultivation of the parts they had recently occupied, while they proceeded to other countries and nations.' He elsewhere speaks of Pantænus and others as *Evangelists of the Word* (Εὐαγγελισταὶ τοῦ λόγου (*Hist. Eccles.* v. 10). In the same writer the term Evangelist is also applied, as at present, to the authors of the canonical gospels (*Hist. Eccles.* iii. 39). (Campbell's *Lectures on Ecclesiastical History*, vol. i. pp. 148-150; Neander's *History of the Planting of the Christian Church*, Eng. transl. vol. i. p. 173).—J. E. R.

EVE, the name of the first woman. Her history is contained in that of ADAM, which see.

EVENING. [DAY.]

EVIL-MERODACH (אֱוִיל מְרֹדַךְ; Sept. Εὐιαλμαρωδέκ, Οὐλαιμαδάχαρ), son and successor of Nebuchadnezzar, king of Babylon, who, on his accession to the throne (B.C. 562), released the captive king of Judah, Jehoiachin, from prison, treated him with kindness and distinction, and set his throne above the thrones of the other conquered kings who were detained at Babylon (2 Kings xxv. 27; Jer. lii. 31-34) [CHALDÆANS]. A Jewish tradition (noticed by Jerome on Isa. xiv. 29) ascribes this kindness to a personal friendship which Evil-merodach had contracted with the Jewish king, when he was himself consigned to prison by Nebuchadnezzar, who, on recovering from his seven years' monomania, took offence at some part of the conduct of his son, by whom the government had in the meantime been administered. This story was probably invented to account for the fact. Evil-merodach is doubtless the same as the Ilvarodam of Ptolemy's *Canon*. The duration of his reign is made out variously by chronologers, some extending it to twenty-four years, others reducing it to two or three. Hales, who adopts the last number, identifies him with the king of Babylon who formed a powerful confederacy against the Medes, which was broken up, and the king slain by Cyrus, then acting for his uncle Cyaxares. But this rests on the authority of Xenophon's *Cyropædia*, the historical value of which he estimates far too highly [CYRUS].

The latter half of the name Evil-Merodach is that of a Babylonian god [MERODACH]. Two modes of explaining the former part of it have been attempted. Since *evil*, as a Hebrew word, means 'foolish,' Simonis proposes to consider it the derivative of אול, in the Arabic signification of 'to be first,' affording the sense of 'prince of Merodach.' This rests on the assumption that the Babylonian language was of Syro-Arabian origin. Gesenius, on the other hand, who does not admit that origin, believes that some Indo-Germanic word, of similar sound, but reputable sense, is concealed under *evil*, and that the Hebrews made some slight perversion in its form to produce a word of contemptuous signification in Hebrew, just as is assumed in the case of Beelzebul.

EUNICE (Εὐνίκη), the mother of Timothy, a Jewess, although married to a Greek and bearing a Greek name, which signifies *good victory*, and is that of one of the Nereides, daughters of Oceanus. She was a believer in Christ, and even her mother Lois lived in the faith of the expected Messiah, if she did not live to know that he had come in the person of Jesus of Nazareth (2 Tim. i. 5; Acts xvi. 1).

EUNUCH (εὐνοῦχος). This word, which we have adopted from the Greek, has, in its literal sense, the harmless meaning of 'bed-keeper,' *i. e.* one who has the charge of beds and bed-chambers; but as only persons deprived of their virility have, from the most ancient times, been employed in Oriental harems, and as such persons are employed almost exclusively in this kind of service, the word 'bed-keeper' became synonymous with 'castratus.' In fact there are few eastern languages in which the condition of those persons is more directly expressed than by the name of some post or station in which they are usually found. The admission to the recesses of the harem, which is in fact the domestic establishment of the prince, gives the eunuchs such peculiar advantages of access to the royal ear and person, as often enables them to exercise an important influence, and to rise to stations of great trust and power in Eastern courts. Hence it would seem that, in Egypt, for instance, the word which indicated an eunuch was applied to any *court* officer, whether a castratus or not. The word which describes Joseph's master as 'an *officer* of Pharaoh' (Gen. xxxvii. 6; xxxix. 1) is סריס *saris*, which is used in Hebrew to denote an eunuch; and in these places is rendered רבא, 'prince,' in the Targum, and εὐνοῦχος, 'eunuch,' in the Septuagint.

Authority would be superfluous in proof of a matter of such common knowledge as the employment of eunuchs, and especially of black eunuchs in the courts and harems of the ancient and modern East. A noble law, which, however, evinces the prevalence of the custom prior to Moses, made castration illegal among the Jews (Lev. xxii. 24; Deut. xxiii. 1). But the Hebrew princes did not choose to understand this law as interdicting the use of those who had been made eunuchs by others; for that they had them, and that they were sometimes, if not generally, blacks, and that the chief of them was regarded as holding an important and influential post, appears from 1 Kings xxii. 9; 2 Kings viii. 6; ix. 32, 33; xx. 8; xxiii. 11; Jer. xxxviii. 7; xxxix. 16; xli. 16. Samuel was aware that eunuchs would not fail to be employed in a regal court; for he thus forewarns the people, 'He (the king) will take the tenth of your seed and of your vineyard, and give to his eunuchs [A. V. 'officers'] and to his servants' (1 Sam. viii. 15).

Under these circumstances, the eunuchs were probably obtained from a great distance, and at an expense which must have limited their employment to the royal establishment; and this is very much the case even at present.

In Matt. xix. 12, the term 'eunuch' is applied figuratively to persons naturally impotent. In the same verse mention is also made of persons 'who have made themselves eunuchs for the kingdom of heaven's sake;' which is a manifestly hyperbolical description of such as lived in voluntary abstinence (comp. Matt. v. 29, 30); although painful examples have occurred (as in the case of Origen) of a disposition to interpret the phrase too literally, and thus to act upon the following injunction, or permission, 'Let him who is capable of doing this, do it'—ὁ δυνάμενος χωρεῖν χωρείτο.

EUODIAS (Εὐοδίας), a female member of the church at Philippi, who seems to have been at variance with another female member named Syntyche. Paul describes them as women who had 'laboured much with him in the gospel,' and implores them to be of one mind (Philip. iv. 2, 3).

EUPHRATES (Εὐφράτης), termed in Deut. i. 7, 'the great river,' where it is mentioned as the eastern boundary of the land which (ver. 8) God gave to the descendants of Abraham. In Gen. ii. 14, the Euphrates (פרת) is stated to be the fourth of the rivers which flowed from a common stream in the garden of Eden. Divines and geographers have taken much trouble in order to

learn the position of Eden from the geographical particulars given in the Bible, without remembering that probably nothing more than a popular description was intended. It is true that two of the rivers mentioned in the passage, namely, the Tigris and the Euphrates, have their sources in the same high lands; but scientific geography neither sanctions nor explains the Scriptural account, if Eden is to be sought in the mountainous range in different and distant parts of which they rise.

In consequence of its magnitude and importance, the Euphrates was designated and known as 'the river,' being by far the most considerable stream in Western Asia. Thus in Exod. xxiii. 31, we read, 'from the desert unto the river' (comp. Isa. viii. 7).

It has two sources and two arms—a western and an eastern—which rise in the mountains of Armenia. Of these streams the western is the shorter, and is called Kara Sou, or Melas; the eastern is itself made up of several streams, the longest of which bears the name of Murad, or Phrat. The two arms unite about three days' journey from Erzeroom, near which rise two of the tributaries that concur in forming the Phrat. Thus uniting, they give rise to the Euphrates strictly so called, which, flowing to the south, divides Armenia from Cappadocia; but, being driven westward by the Anti-Taurus and Taurus mountains, it works its circuitous way through narrow passes and over cataracts, until, breaking through a defile formed by the eastern extremity of Mons Amanus (Alma Dagh), and the north-western extremity of Mons Taurus, it reaches the plain country not far from Samosata (Schemisat), then winds south and south-east, passing the north of Syria, and the north-east of Arabia Deserta, and at length, after many windings, unites with the Tigris, and thus united finds its termination in the Persian Gulf. (Herod. i. 180; Strabo, ii. p. 521; Ptolem. v. 13; Plin. *Hist. Nat.* v. 20; Q. Curt. i. 13; *Orbis Terrarum*, C. Kaercher Auct.; Map to *Report from the Select Committee on Steam Navigation to India.*) In conjunction with the Tigris, it forms the rich alluvial lands of Mesopotamia, over which it flows or is carried by canals, and thus diffuses abroad fertility and beauty. At Bagdad and Hillah (Babylon), the Euphrates and Tigris approach comparatively near to each other, but separate again, forming a kind of ample basin, till they finally become one at Koorma. Under the Cæsars the Euphrates was the eastern boundary of the Roman empire, as under David it was the natural limit of the Hebrew monarchy.

Although occasionally much more, the breadth of the Euphrates varies between 200 and 400 yards; but for a distance of 60 miles through the Lemlun marshes the main stream narrows to about 80 yards. The general depth of the Upper Euphrates exceeds 8 feet. In point of current it is for the most part a sluggish stream; for, except in the height of the flooded season, when it approaches 5 miles an hour, it varies from 2½ to 3½, with a much larger portion of its course under 3 than above. Its general description for some distance below Erzingan is that of a river of the first order, struggling through high hills, or rather low mountains, making an exceedingly tortuous course, as it forces its way over a pebbly or rocky bed, from one natural barrier to another. As it winds round its numerous barriers, it carries occasionally towards each of the cardinal points a considerable body of water; and is shallow enough in some places for loaded camels to pass in autumn, the water rising to their bellies, or about 4½ feet. The upper portion of the river is enclosed between two parallel ranges of hills, covered for the most part with high brush-wood and timber of moderate size, having a succession of long narrow islands, on several of which are moderate-sized towns; the borders of this ancient stream being still well inhabited, not only by Bedouins, but by permanent residents. The following towns may be named: Samsat, Hao-roum, Romkala, Bir, Giaber, Deir, Rava, Anna, Hadisa, El Oos, Jibba, Hit, Hillah, Lemlun, Korna, and Bussora. The scenery above Hit, in itself very picturesque, is greatly heightened by the frequent recurrence of ancient irrigating aqueducts, beautiful specimens of art, which are attributed by the Arabs to the Persians when fire-worshippers: they literally cover both banks, and prove that the borders of the Euphrates were once thickly inhabited by a highly civilized people. They are of stone. Ten miles below Hit is the last of these. The country now becomes flatter, with few hills; the river winds less; and the banks are covered with Arab villages of mats or tents, with beautiful mares, cattle, and numerous flocks of goats and sheep. From Hit to Babylon the black tent of the Bedouin is almost the only kind of habitation to be seen. This distance is cultivated only in part; the rest is desert, with the date-tree showing in occasional clusters. In descending, the irrigating cuts and canals become more frequent. Babylon is encircled by two streams, one above, the other below the principal ruin; beyond which they unite and produce abundance. For about thirty miles below Hillah both banks have numerous mud villages, imbedded in date-trees: to these succeed huts formed of bundles of reeds. The country lower down towards Lemlun is level and little elevated above the river; irrigation is therefore easy: in consequence, both banks are covered with productive cultivation, and fringed with a double and nearly continuous belt of luxuriant date-trees, extending down to the Persian Gulf. At one mile and a half above the town of Dewania is the first considerable deviation from this hitherto majestic river; another takes place 22 miles lower; and nine miles farther—at Lemlun—it again separates into two branches, forming a delta not unlike that of Damietta, and when the river is swollen, inundating the country for a space of about 60 miles in width with a shallow sheet of water, forming the Lemlun marshes, nearly the whole of which is covered with rice and other grain the moment the river recedes (in June). Here mud villages are swept away by the water every year.

Below Lemlun the Tigris sends a branch to the Euphrates, which is thus increased in its volume; and turning to the east, receives the chief branch of the Tigris, thence running in one united stream, under the name of the Shat ul Arab, as far as the sea (the Persian Gulf). In this last reach the river has a depth of from 3 to 5 fathoms, varies in breadth from 500 to 900 yards, and presents banks covered with villages and cultivation, having an appearance at once imposing and majestic. The length of the navigable part of

the river, reckoning from Bir to Bussora, is 143 miles; the length of the entire stream, 1400 miles. It is very abundant in fish. The water is somewhat turbid; but, when purified, is pleasant and salubrious. The Arabians set a high value on it, and name it Morad' Sou; that is, Water of desire, or longing.

The river begins to rise in March, and continues rising till the latter end of May. The consequent increase of its volume and rapidity is attributable to the early rains, which, falling in the Armenian mountains, swell its mountain tributaries; and also in the main to the melting of the winter snows in these lofty regions. About the middle of November the Euphrates has reached its lowest ebb, and ceasing to decrease, becomes tranquil and sluggish.

The Euphrates is, on many accounts, an object of more than ordinary interest. 'The great river' is linked with the earliest times and some of the most signal events in the history of the world. Appearing among the few notices we have of the first condition of the earth and of human kind, it continues, through the whole range of Scripture history down to the present hour, an object of curiosity, interest, wonder, hope, or triumph.

In ancient as well as in modern times the Euphrates was used for navigation. Herodotus states that boats—either coracles or rafts, floated by inflated skins—brought the produce of Armenia down to Babylon. The trade thus carried on was considerable.

The Emperor Trajan constructed a fleet in the mountains of Nisibis, and floated it down the Euphrates. The Emperor Julian also came down the river from the same mountains, with a fleet of not fewer than 1100 vessels.

A great deal of navigation is still carried on from Bagdad to Hillah, the ancient Babylon; but the disturbed state of the country prevents any above the latter place. In the time of Queen Elizabeth merchants from England went by this river, which was then the high road to India.

The prophets made use of the Euphrates as a figurative description of the Assyrian power, as the Nile with them represented the power of Egypt; thus in Isa. viii. 7, 'The Lord bringeth up upon them the waters of the river, strong and many, even the king of Assyria' (Jer. ii. 18). Rep. of Steam Navigation to India*, 1834.—J. R. B.

EUROCLYDON. [WINDS.]

EUTYCHUS (Εὔτυχος), a young man of Troas, who sat in the open window of the third floor while St. Paul was preaching late in the night, and who, being overcome by sleep, fell out into the court below. He was 'taken up dead' (ἤρθη νεκρός); but the Apostle, going down, extended himself upon the body and embraced it, like the prophets of old (1 Kings xvii. 21; 2 Kings iv. 34); and when he felt the signs of returning life, restored him to his friends, with the assurance that 'his life was in him.' Before Paul departed in the morning the youth was brought to him alive and well. It is disputed whether Eutychus was really dead, or only in a swoon; and hence, whether a miracle was performed or not. It is admitted that the circumstances, and the words of Paul himself, sanction the notion that the young man was not actually dead; but, on the other hand, it is contended that the words of the narrator, 'taken up dead,' are too plain to justify us in receiving them in the modified sense of 'taken up for dead,' which that interpretation requires (Acts xx. 5-12).

EXECRATION. The Greek word so rendered, κατάρα, occurs in Num. xxiii. 8; xxiv. 9; Josh. vi. 26; 1 Sam. xvii. 43. It is used also in profane authors to denote the imprecations which it was customary among ancient nations to pronounce upon their enemies for the purpose of calling down the divine wrath, branding them with infamy, and exciting against them the passions of the multitude. By this means they also devoted their enemies to the ruin they considered them to deserve. These imprecations were chiefly pronounced by priests, enchanters, or prophets [BALAAM]. The Athenians made use of them against Philip of Macedon. They convened an assembly, in which it was decreed that all statues, inscriptions, or festivals among them, in any way relating to him or his ancestors, should be destroyed, and every other possible reminiscence of him profaned; and that the priests, as often as they prayed for the success of the Athenian affairs, should pray for the ruin of Philip. It was also customary, both among the Greeks and Romans, after having destroyed cities in war, the revival of whose strength they dreaded, to pronounce execrations upon those who should rebuild them. Strabo observes that Agamemnon pronounced execrations on those who should rebuild *Troy*, as Crœsus did against those who should rebuild *Sidena*; and this mode of execrating cities Strabo calls an ancient custom (κατὰ παλαιὸν ἔθος; xiii. p. 898, edit. 1707). The Romans published a decree full of execrations against those who should rebuild Carthage (Zonaras, *Annal.*). An incident somewhat analogous is related (Josh. vi. 26) after the taking of Jericho. From the words 'and Joshua adjured them at that time,' it is likely that he acted under a divine intimation that Jericho should continue in ruins, as a monument of the divine displeasure and a warning to posterity. The words 'cursed *be* the *man* (the *individual*) before the Lord that riseth up and buildeth this city Jericho,' although transformed into an execration by the word *supplied* by the translators, amount to no more than a *prediction* that 'he shall lay the foundation thereof in his first-born, and in his youngest son shall he set up the gates of it,' that is, he shall meet with so many impediments to his undertaking that he shall *out-live* all his children, *dying in the course of nature* before he shall complete it. Execrations were also pronounced upon cities and their inhabitants before undertaking a siege (Macrobius has preserved two of the ancient forms used in reference to the destruction of Carthage, *Saturnal.* iii. 9), and before engaging with enemies in war. Tacitus relates that the priestesses of ancient Britain devoted their Roman invaders to destruction, with imprecations, ceremonies, and attitudes, which for a time overwhelmed the soldiers with terror (*Annal.* xiv. 29). The execrations in the 83rd Psalm, probably written on the occasion of the confederacy against Jehoshaphat, and other instances of a like nature, partake of the execrations of the heathens in

nothing but form, being the inspired predictions or denunciations of divine vengeance against the avowed enemies of the God of Israel, notwithstanding the proofs they had witnessed of his supremacy; and the object of these imprecations, as in many other instances, is charitable, namely, their conversion to the true religion (ver. 18; see also Ps. lix. 12).—J. F. D.

EXILE. [CAPTIVITY.]

EXODUS. The intention of Jehovah to deliver the Israelites from Egyptian bondage was made known to Moses from the burning bush at Mount Horeb, while he kept the flock of Jethro, his father-in-law. Under the divine direction Moses, in conjunction with Aaron, assembled the elders of the nation, and acquainted them with the gracious design of Heaven. After this they had an interview with Pharaoh, and requested permission for the people to go, in order to hold a feast unto God in the wilderness. The result was, not only refusal, but the doubling of all the burdens which the Israelites had previously had to bear. Moses hereupon, suffering reproach from his people, consults Jehovah, who assures him that he would compel Pharaoh 'to drive them out of his land.' 'I will rid you out of their bondage, and I will redeem you with a stretched-out arm and with great judgments' (Exod. iii.-vi. 6). Then ensue a series of miracles, commonly called the plagues of Egypt (Exod. vi.-xii.) [PLAGUE]. At last, overcome by the calamities sent upon him, Pharaoh yielded all that was demanded, saying, 'Rise up, and get you forth from among my people, both ye and the children of Israel; and go serve the Lord as ye have said; also take your flocks and your herds, and be gone.' Thus driven out, the Israelites, to the number of about 600,000 adults, besides children, left the land, attended by a mixed multitude, with their flocks and herds, even very much cattle (Exod. xii. 31, sq.). Being 'thurst out' of the country, they had not time to prepare for themselves suitable provisions, and therefore they baked unleavened cakes of the dough which they brought forth out of Egypt.

On the night of the self-same day which terminated a period of 430 years, during which they had been in Egypt, were they led forth from Rameses, or Goshen [GOSHEN]. They are not said to have crossed the river Nile, whence we may infer that Goshen lay on the eastern side of the river. Their first station was at Succoth (Exod. xii. 37). The nearest way into the Land of Promise was through the land of the Philistines. This route would have required them to keep on in a north-east direction. It pleased their divine conductor, however, not to take this path, lest, being opposed by the Philistines, the Israelites should turn back at the sight of war into Egypt. If, then, Philistia was to be avoided, the course would lie nearly direct east, or south-east. Pursuing this route, 'the armies' come to Etham, their next station, 'in the edge of the wilderness' (Exod. xiii. 17, sq.). Here they encamped. Dispatch, however, was desirable. They journey day and night, not without divine guidance, for 'the Lord went before them by day in a pillar of a cloud, to lead them the way; and by night in a pillar of fire, to give them light; to go by day and night.' This special guidance could not well have been meant merely to show the way through the desert; for it can hardly be supposed that in so great a multitude no persons knew the road over a country lying near to that in which they and their ancestors had dwelt, and which did not extend more than some forty miles across. The divine guides were doubtless intended to conduct the Israelites in that way and to that spot where the hand of God would be most signally displayed in their rescue and in the destruction of Pharaoh. 'I will be honoured upon Pharaoh and upon all his host, that the Egyptians may know that I am the Lord.' For this purpose Moses is directed of God to 'speak unto the children of Israel that they *turn* and encamp before Pi-hahiroth, between Migdol and the sea, over against Baal-zephon; before it shall ye encamp by the sea: and they did so' (Exod. xiv. 2-4). We have already seen reason to think that the direction of the Israelites was to the east or south-east; this turning must have been in the latter direction, else they would have been carried down towards the land of the Philistines, which they were to avoid. Let the word 'turn' be marked; it is a strong term, and seems to imply that the line of the march was bent considerably towards the south, or the interior of the land. The children of Israel then are now encamped before Pi-hahiroth, between Migdol and the sea, also 'by the sea.' Their position was such that they were 'entangled in the land, the wilderness hath shut them in.'

A new scene is now laid open. News is carried to Pharaoh which leads him to see that the reason assigned (namely, a sacrifice in the wilderness) is but a pretext; that the Israelites had really fled from his yoke; and also that, through some (to him) unaccountable error, they had gone towards the south-east, had reached the sea, and were hemmed in on all sides. He summons his troops and sets out in pursuit—'all the horses and chariots of Pharoah, and his horsemen and his army;' and he 'overtook them encamping by the sea, beside Pi-hahiroth, before Baal-zephon' (Exod. xiv. 9). The Israelites see their pursuing enemy approach, and are alarmed. Moses assures them of divine aid. A promise was given as of God that the Israelites should go on dry ground through *the midst* of the sea; and that the Egyptians, attempting the same path, should be destroyed: 'and I will get me honour upon Pharaoh and all his host, upon his chariots and his horsemen' (ver. 17). Here a very extraordinary event takes place: 'The angel of God, which went before the camp of Israel, removed and went behind them; and the pillar of the cloud went from before their face and stood behind them; and it came between the camp of the Egyptians and the camp of Israel; and it was a cloud and darkness to them, but it gave light by night to these; so that the one came not near the other all the night' (ver. 19, 20). Then comes the division of the waters, which we give in the words of the sacred historian: 'And Moses stretched out his hand over the sea, and the Lord caused the sea to go back by a strong east wind all that night, and made the sea dry land, and the waters were divided. And the children of Israel went into the midst of the sea upon the dry ground; and the waters were a wall unto them on their right hand and on their left. And the Egyptians pursued and went in after them to *the midst of the sea*, even all Pharaoh's

horses, his chariots, and his horsemen.' Delays are now occasioned to the Egyptians; their chariot-wheels are supernaturally taken off, so that 'in the morning-watch they drave them heavily.' The Egyptians are troubled; they urge each other to fly from the face of Israel. 'Then Moses stretched forth his hand over the sea, and the sea returned to his strength when the morning appeared; and the Egyptians fled against it; and the Lord overthrew the Egyptians in *the midst of the sea*. And the waters returned and *covered the chariots and the horsemen and all the host of Pharaoh* that came into the sea after them; there remained not as much as one of them. But the children of Israel walked upon dry land in the midst of the sea, and the waters were a wall unto them on their right hand and on their left. And Israel saw the Egyptians dead upon the seashore; and the people feared the Lord, and believed the Lord and his servant Moses' (ver. 28-31). From the song of triumph which Moses sang upon this occasion we learn some other particulars, as that '*the depths* covered Pharaoh's host, *they sank to the bottom* as a stone;' language which, whatever deduction may be made for its poetic character, implies that the miracle took place in deep water. 'Thou sentest forth thy wrath which consumed them as stubble, and with the blast of thy nostrils the waters were gathered together, the floods stood upright as an heap, and *the depths* were congealed *in the heart of the sea;* thou didst blow with thy wind, the sea covered them; they *sank as lead in the mighty waters*'—all which would be not poetry, but bombast, had not the wind been as miraculous as any other part of the event, and had not the sea been large and deep (Exod. xv.; comp. Ps. cvi. 9, sq.).

Such is the bearing and import of the sacred narrative. If any intelligent reader, knowing nothing of the theories of learned men, were to peruse the account given in Exodus with a map before him, he would, we doubt not, be led to conclude that the route of the Israelites lay towards the south-east, up the Red Sea, and that the spot where they crossed was at a place encircled by mountains on the side of the desert, and fronted by deep and impassable waters: he would equally conclude that the writer in Exodus intended to represent the rescue as from first to last the work of God. Had the Israelites been at a place which was fordable under any natural influences, Pharaoh's undertaking was absurd. He knew that they were entangled,—mountains behind and on either hand, while the deep sea was before them. Therefore he felt sure of his prey, and set out in pursuit. Nothing but the divine interposition foiled and punished him, at the same time redeeming the Israelites. And this view, which the unlearned but intelligent reader would be led to take, involves, in fact, all that is important in the case. But a dislike of the miraculous has had an influence, and erudition has tried to fix the precise spot: whence have arisen views and theories which are more or less discordant with the Scripture, or are concerned with comparative trifles. So far as aversion to miracle has had an influence in the hypotheses which have been given, all we shall remark is, that in a case which is so evidently represented as the sphere of miracle, there is but one alternative,—they who do not admit the miracle must reject the narrative; and far better would it be to do so frankly than to construct hypotheses which are for the most part, if not altogether, purely arbitrary. A narrative obviously miraculous (in the intention of the writer) can be explained satisfactorily on no rationalistic principles: this is not to expound but to 'wrest' the Scriptures; a position which, in our opinion, has been fully established, in relation to the Gospels, against the whole of the rationalistic school of interpretation.

The account now given must, as being derived immediately from the Scripture, be in the main correct. If the authority is denied, this can be done effectually by no other means than by disproving in general the authority of the books whence it is derived; and it may with truth be affirmed, that no view opposed to that given can possess greater claims on our credit, while any mere sceptical opinion must rest on its own intrinsic probability, contested, so far as it opposes the Scripture, by scriptural authority.

When, however, we descend from generals to particulars, and attempt to ascertain precise localities and determine details, diversity of opinion may easily arise, and varying degrees of probability only are likely to attend the investigation. For instance, the immediate spot which Moses proposed to reach, was, we know, on the Red Sea; but the precise line which he took depended of course on the place whence he set out. With difference of opinion as to the spot where the Hebrews had their rendezvous, there cannot be agreement as to the route they followed.

The position of Goshen, where the Israelites were settled, we shall endeavour to fix in another article. It is enough here to say, that it was on the eastern side of the Nile, probably in the province of Esh-Shurkiyeh. Rameses was the place of rendezvous. The direct route thence to the Red Sea was along the valley of the ancient canal. By this way the distance was about thirty-five miles. From the vicinity of Cairo, however, there runs a range of hills eastward to the Red Sea, the western extremity of which, not far from Cairo, is named Jebel-Mokattem; the eastern extremity is termed Jebel-Attaka, which, with its promontory Ras Attaka, runs into the Red Sea. Between the two extremes, somewhere about the middle of the range, is an opening which affords a road for caravans. Two routes offered themselves here. Supposing that the actual starting point lay nearer Cairo, the Israelites might strike in from the north of the range of hills, at the opening just mentioned, and pursue the ordinary caravan road which leads from Cairo to Suez; or they might go southward from Mokattem, through the Wady el Tih, that is, the Valley of Wandering, through which also a road, though less used, runs to Suez. According to Niebuhr they took the first, according to ancient tradition, Father Sicard (*Ueber der Weg der Israeliten*, Paulus, *Samml.* v. 211, sq.), and others, they took the last. Sicard found traces of the Israelites in the valley. He held Rameses to be the starting point, and Rameses he placed about six miles from ancient Cairo, where Bezatin is now found. Here is a capacious sandy plain, on which Sicard thinks the Israelites assembled on the morning when they began their journey. In this vicinity a plain is still found, which the Arabs call the Jews' Cemetery, and where, from an indefinite period, the Jews have

buried their dead. In the Mokattem chain is a hill, a part of which is called Mejanat Musa, 'Moses' Station.' On another hill in the vicinity, ruins are found, which the Arabs name Meravad Musa, 'Moses' Delight.' Thus several things seem to carry the mind back to the time of the Hebrew legislator. Through the valley which leads from Bezatin (the Valley of Wandering) to the Red Sea, Sicard travelled in three days. He reckons the length to be twenty-six hours, which, if we give two miles to each hour (Robinson), would make the distance fifty-two miles. This length is also assigned by Girard (*Descrip. Topograp. de la Vallée de l'Egarement*). The valley running pretty much in a plain surface would afford a convenient passage to the mixed bands of Israelites. About eighteen miles from Bezatin you meet with Gendelhy, a plain with a fountain. The name signifies a military station, and in this Sicard finds the Succoth (tents) of Exodus, the first station of Moses. The haste with which they left (were driven out) would enable them to reach this place at nightfall of their first day's march. Sicard places their second station, Etham, in the plain Ramliyeh, eighteen miles from Gendelhy and sixteen from the sea. From this plain is a pass, four miles in length, so narrow that not more than twenty men can go abreast. To avoid this, which would have caused dangerous delay, the order was given to turn (Exod. xiv. 2). Etham is said (Exod. xiii. 20) to be on the edge of the wilderness. Jablonski says the word means terminus maris, the termination or boundary of the sea. Now, in the plain where Sicard fixes Etham (not to be confounded with the Eastern Etham, through which afterwards the Israelites travelled three days, Num. xxxiii. 8), is the spot where the waters divide which run to the Nile and to the Gulf of Suez, and Etham is therefore truly *terminus maris*. Here the Israelites received command to turn and encamp (Exod. xiv. 2) before Pi-hahiroth, between Migdol and the sea, over against Baal-zephon. Pi-hahiroth (the mouth of the hiding-places) Sicard identifies with Thuarek (small caves), which is the name still given to three or four salt springs of the plain Baideah, on the south side of mount Attaka, which last Sicard identifies with Baal-zephon, and which is the northern boundary of the plain Baideah, while Kuiabeh (Migdol) is its southern limit. The pass which leads to Suez, between Attaka and the sea, is very narrow, and could be easily stopped by the Egyptians. In this plain of Baideah, Pharaoh had the Israelites hemmed in on all sides. This then, according to all appearance, is the spot where the passage through the sea was effected. Such is the judgment of Sicard and of Raumer (*Der Zug der Israeliten*, Leipzig. 1837; for a description of the Valley of Wandering see also Ritter, *Erdkunde*, i. 858). It cannot be denied that this route satisfies all the conditions of the case. Equally does the spot correspond with the miraculous narrative furnished by holy writ. A different route is laid down by Niebuhr (*Arab.* p. 407). Other writers, who, like him, endeavour to explain the facts without the aid of miracle, imitate his example.

It is no small corroboration of the view now given from Sicard and Raumer, that in substance it has the support of Josephus, of whose account we shall, from its importance, give an abridgment. The Hebrews, he says (*Antiq.* ii. 15), took their journey by Latopolis, where Babylon was built afterwards when Cambyses laid Egypt waste. As they went in haste, on the third day they came to a place called Baal-zephon, on the Red Sea. Moses led them this way in order that the Egyptians might be punished should they venture in pursuit, and also because the Hebrews had a quarrel with the Philistines. When the Egyptians had overtaken the Hebrews they prepared to fight them, and by their multitude drove them into a narrow place; for the number that went in pursuit was 600 chariots, 50,000 horsemen, and 200,000 infantry, all armed. They also seized the passages, shutting the Hebrews up between inaccessible precipices and the sea; for there was on each side a ridge of mountains that terminated at the sea, which were impassable, and obstructed their flight. Moses, however, prayed to God, and smote the sea with his rod, when the waters parted, and gave the Israelites free passage. The Egyptians at first supposed them distracted; but when they saw the Israelites proceed in safety, they followed. As soon as the entire Egyptian army was in the channel, the sea closed, and the pursuers perished amid torrents of rain and the most terrific thunder and lightning.

The opposition to the scriptural account has been of two kinds. Some writers (Wolfenb. *Fragm.* p. 64, sq.) have at once declared the whole fabulous; a course which appears to have been taken as early as the time of Josephus (*Antiq.* ii. 16. 5). Others have striven to explain the facts by the aid of mere natural causes; for which see Winer, *Handwörterbuch*, in Meer Rothes. A third mode of explanation is pursued by those who do not deny miracles as such, and yet, with no small inconsistency, seek to reduce this particular miracle to the smallest dimensions. Writers who see in the deliverance of the Hebrews the hand of God and the fulfilment of the divine purposes, follow the account in Scripture implicitly, placing the passage at Ras Attaka, at the termination of the Valley of Wandering; others, who go on rationalistic principles, find the sea here too wide and too deep for their purpose, and endeavour to fix the passage a little to the south or the north of Suez.

The most recent advocate of the passage at or near Suez is the learned Dr. Robinson (*Biblical Researches in Palestine*), from whom we hesitate to differ, and should hesitate still more, did not his remarks bear obvious traces of being, however the author may be ignorant of the fact, influenced, if not dictated, by some foregone conclusion and certain rationalistic habits of mind. While, however, we pay every proper tribute of respect to Dr. Robinson's learning and diligence, we must prefer the authority of Scripture and the obvious facts of the case to all other considerations. The *route* taken by Moses was, according to Robinson, from Rameses to the head of the Arabian Gulf, through Succoth, to Etham. The last place he fixes on the edge of the desert, on the eastern side of the line of the gulf. Instead of passing down the eastern side, at the top of which they were, the Israelites thence marched down the western side of the arm of the gulf, stopping in the vicinity of Suez, where the passage was effected.

This view represents Moses as having actually conducted his people first out of all danger, and then led them at once into it, by placing the gulf between them and safety. Such a proceeding ill became a prudent leader having to do with a self-willed and stiff-necked band. But the chief objection to this representation of the route is, that it does not answer to what Scripture requires; for in Exod. xiii. 18, we are told that 'God led the people *about through the wilderness of the Red Sea.*' How, according to Robinson, did he 'lead them about,' especially '*through* the wilderness of the Red Sea,' which they must merely have touched upon?

The *passage* Robinson thinks took place 'across shoals adjacent to Suez on the south and south-west,' 'where the broad shoals are still left bare at the ebb, and the channel is sometimes forded,' 'a distance of three or four miles from shore to shore;' or 'it might have been effected through the arm of the gulf above Suez.' A simple reference to the language of Scripture previously cited confutes this supposition; for where, in or near this place, are the deep waters of which Moses speaks? Besides, is it for a moment to be supposed that Pharaoh was not well acquainted with the tides of a sea which lay so near his capital? and would he have been so infatuated as to remain quietly in his position (for the Scripture shows that the two armies were some time in sight of each other) until the Israelites had availed themselves of the ebb, and then, when the flood came, quietly go into the sea and be destroyed? In order to help out his hypothesis, conscious, apparently, that the body of water here was insufficient, Dr. Robinson advances a supposition (but for suppositions his view would *look* as groundless as it really *is*), namely, that with the flood-tide the wind was changed. But a perusal of his scriptural reference (Exod. xv. 8-10) shows that this alleged change is without evidence—a pure supposition: the language in the 8th verse has respect to the wind which divided the sea; and the language in the 10th verse in no way implies any change of direction whatever; the same wind, in the hand of God, could both divide and close the sea.

The great question, however, is *the cause* or instrument employed in securing the Israelites a passage on dry ground, and overwhelming the Egyptians. On this point we complain of a want of explicitness in Dr. Robinson. He does not deny a miracle, but blends together the miraculous and the natural, so as to confuse his own and his reader's mind. 'It (the miracle) was wrought by natural means supernaturally applied.' A north-east wind was brought of God to act on the water as the sea was ebbing, which gave a dry passage to the Israelites. We are therefore 'to look only for *the natural effects* arising from the operation of such a cause.' The sole causes then in the case were a north-east wind, the ebb-tide, the flood, and a change of wind to aid the action of the flood. Of these causes, the last, the change of wind, is, as we have seen, a gratuitous assumption. From 'north-east wind' we must strike out 'north,' as being another gratuitous assumption—it is 'a strong east wind' of which Moses speaks. An east wind, however, would by no means effect the purposes needful for Dr. Robinson's hypothesis. Of his remaining causes, the ebb and flood tide, enough has already been said; and, so far as an east wind, acting *naturally*, would have an effect, it would drive the waters upon the shallows, which Dr. Robinson wants dry. But we much question whether his assumed 'north-east wind' would cause what he requires. It would, he alleges, 'have the effect to drive out the waters from the small arm of the sea which runs up by Suez, and also from the end of the gulf itself, leaving the shallower portions dry, while the more northern part of the arm, which was anciently broader and deeper than at present, would still remain covered with water. Thus the waters would be divided, and be a wall to the Israelites on the right hand and on the left.' We desire the reader to consult the map appended to Dr. Robinson's first volume. While considering the hypothesis in question, he must remember that the action of ebb and flood tide rests on no better ground than an assumption; the Scripture says nothing thereof. Now a wind setting in at the head of the gulf would commence its influence of course at the end of the arm which runs up to the east of Suez, and would, so far as it acted, bear down the waters from the top towards the very place which the hypothesis requires to be dry, namely, the head of the gulf, thus covering the shallows. But if, to avoid this difficulty, Dr. Robinson fixes the passage in the arm itself, then how could a wind, acting on the waters in the arm, 'divide' them? Drive them out, scatter them to some extent, it might, but surely not divide them. Nor does Dr. Robinson secure by his other supposition, namely, the passage over the shallows, such a division as the Scripture requires. Supposing the effect which he contemplates to be produced, then there would be on the north side of the shallows so much of the sea as the wind had left in the arm, and so much of the sea as lingered under its driving impulse on the south side of the shallows. With this in his mind let the reader peruse the scriptural account, 'the waters were a wall to them on the right hand and on the left.' By Dr. Robinson's account there was no wall at all, but such a state of the sea and land as would render the choice of the language employed by Moses most inappropriate. In truth, however, the east wind of which Moses speaks was precisely the influence to bring about the effect which he alleges to have taken place. Acting on the sea at a right angle it would literally divide the waters, causing the mid-way to be dry, and a wall to stand on either side. Such obviously is the view which Moses intended to give. In endeavouring to define and estimate the action of this east wind, however, it must be borne in mind that the Scripture represents the entire affair as miraculous. It was from first to last 'the hand of the Lord,'—the east wind and its action, as much as the collapse of the sea. The east wind, indeed, is also termed 'the blast of thy nostrils;' and so 'thou didst blow with thy wind, the sea covered them.'

The miraculous character of the transaction, as affirmed in Scripture, takes all point from the question of time, which Dr. Robinson says is fatal to the alternative hypothesis, namely, that the Israelites crossed from Wady Tawarik; since there is no occasion, in order to sustain the narrative of Moses, to calculate whether the interval

between the ebb and the flow of the tide afforded sufficient time for the Israelites to cross the bed of the sea, a distance of twelve geographical miles. The passage did not depend on ebb or flow. It was not a question of mere time. The right hand of the Lord was at work.

It appears then very clear, by comparing Dr. Robinson with Moses and with facts, that his 'extraordinary ebb, brought about by natural means,' could not have produced such a state of things as he supposes, still less such a state of things as the miracle requires. The only resource is to deny the miracle, and disown the entire account. If this bold course is declined, then the passage at Suez or across the arm must be given up in favour of one lying far more to the south.

These strictures on Dr. Robinson's hypothesis are in no way prompted by any previous leaning to a preference in favour of the passage at Ras Attaka, for they were penned exclusively under the influence of the scriptural narrative. And if authority is needed as against one who has been on the spot, what has already been given from Sicard might be deemed sufficient, especially when it so obviously agrees with the tenor of the accounts found in Exodus and in Josephus. But other witnesses are not wanting. Mr. Blumhardt, in his missionary visit to Abyssinia, passed through Suez (Oct. 1836, see *Church Missionary Record*, No. 1, Jan. 1838), and furnishes some remarks on the subject. 'The Red Sea at Suez is exceedingly narrow, and in my opinion it cannot be that the Israelites here experienced the power and love of God in their passage through the Red Sea. The breadth of the sea is at present scarcely a quarter of an hour by Suez. Now if this be the part which they crossed, how is it possible that all the army of Pharaoh, with his chariots, could have been drowned? I am rather inclined to believe that the Israelites experienced that wonderful deliverance about thirty miles lower down. This opinion is also strengthened by most of the Eastern churches, and the Arabs, who believe that the Israelites reached the opposite shore at a place called Gebel Pharaou, which on that account has received this name. If we accept this opinion, it agrees very well with the Scripture.' Still more important is the evidence of Dr. Olin (*Travels in the East*, New York, 1843). Many of his remarks we have anticipated in our observations on Robinson. Dr. Olin, however, agrees with Robinson in fixing Etham 'on the border of the wilderness which stretches along the eastern shore of the arm of the sea which runs up above Suez.' At this point he says the Hebrews were commanded to turn. They turned directly southward and marched to an exposed position, hemmed in completely by the sea, the desert, and Mount Attaka. A false confidence was thus excited in Pharaoh, and the deliverance was made the more signal and the more impressive alike to the Israelites and to Egypt. Admitting the possibility that the sea at Suez may have been wider and deeper than it is now, Olin remarks, 'it must still have been very difficult, if not impossible, for the army of Israel, encumbered with infants and aged people, as well as with flocks, to pass over (near Suez) in the face of their enemies' (i. 346). Besides, the peculiarities of the place must have had a tendency to disguise the character and impair the effect of the miracle. The passage made at the intervention of Moses was kept open all night. The Egyptians followed the Hebrews to *the midst of the sea*, when the sea engulphed them. 'The entire night seems to have been consumed in the passage. It is hardly credible that so much time should have been consumed in crossing near Suez, to accomplish which one or two hours would have been sufficient.' 'Nor is it conceivable that the large army of the Egyptians should have been at once within the banks of so narrow a channel. The more advanced troops would have reached the opposite shore before the rear had entered the sea; and yet we know that all Pharaoh's chariots and horsemen followed to the *midst* of the sea, and, together with all the host that came in after them, were covered with the returning waves' (i. 348). Preferring the position at Ras Attaka, Olin states that the gulf is here ten or twelve miles wide. 'The valley expands into a considerable plain, bounded by lofty precipitous mountains on the right and left, and by the sea in front, and is sufficiently ample to accommodate the vast number of human beings who composed the two armies.' 'An east wind would act almost directly across the gulf. It would be unable to co-operate with an ebb tide in removing the waters—no objection certainly if we admit the exercise of God's miraculous agency;' but a very great impediment in the way of any rationalistic hypothesis. 'The channel is wide enough to allow of the movements described by Moses, and the time, which embraced an entire night, was sufficient for the convenient march of a large army over such a distance.' 'The opinion which fixes the point of transit in the valley or wady south of Mount Attaka derives confirmation from the names still attached to the principal objects in this locality. Upon this point I acknowledge my obligations to the Rev. Mr. Leider, of Cairo, who has spent more than ten years in Egypt, is familiar with the Arabic language, and has devoted much attention to this vexed question. He recently spent several days in this neighbourhood in making investigations and inquiries in reference to the passage of the Israelites. Jebel Attaka, according to Mr. Leider, who only confirms the statements of former travellers, means in the language of the Arabs "the Mount of Deliverance." Baídeah or Bedéah, the name of this part of the valley, means "the Miraculous," while Wady el Tih means "the Valley of Wanderings." Pi-hahiroth, where Moses was commanded to encamp, is rendered by scholars "the mouth of Hahiroth," which answers well to the deep gorge south of Attaka, but not at all to the broad plain about Suez' (i. 350).

Other parts of the line of march pursued by the Israelites will be found treated of under the heads MANNA, SINAI, WANDERING.—J. R. B.

EXODUS (Gr. Ἔξοδος, in the Hebrew canon (וְאֵלֶּה שְׁמוֹת)), the second book of Moses, so called from the principal event recorded in it, namely, *the departure* of the Israelites from Egypt. With this book begins the proper history of that people, continuing it until their arrival at Sinai, and the erection of the sanctuary there. It transports us in the first instance to Egypt, and the quarter in

which the Israelites were domiciled in that country. We do not find in the Pentateuch a real history of the people of Israel during this period. Such a history, in the more strict acceptation of the term, has no place in an historical sketch of the kingdom of God, where the mere description of the situation and condition of the people is all that is requisite. From that description we learn satisfactorily how the people of the Lord were negatively prepared for the great object which God had decreed with regard to them. This is the important theme of the history of the Pentateuch during the whole long period of four hundred years. Exodus is very circumstantial in its account of the life of Moses, which, instead of partaking of the character of usual biography, manifests in all its details a decided aim of evincing how, by the miraculous dispensation of the Lord, Moses had been even from his earliest years prepared and reared to become the chosen instrument of God. In this book is developed, with particular clearness, the summons of Moses to his sacred office, which concludes the first important section of his life (Exod. i.-vi.). No human choice and no self-will, but an immediate call from Jehovah alone, could decide in so important an affair. Jehovah reveals himself to him by his covenant-name (יהוה), and vouchsafes him the power to work miracles such as no man before him had ever wrought. It was not the natural disposition and bent of his mind that induced Moses to accept the office, but solely his submission to the express will of God, his OBEDIENCE alone, that influenced him, the LAWGIVER, to undertake the mission. The external relation of Moses to his people is also clearly defined (comp. *ex. gr.* Exod. vi. 14, sq.). This furnishes the firm basis on which is founded his own as well as Aaron's personal authority, and the respect for his permanent regulations. A new section (vii.-xv.) then gives a very detailed account of the manner in which the Lord glorified himself in Israel, and released the people from the land of bondage. This forms a turning-point in the narrative—with it begins the real history of the people of God. Every day affords here an eternal demonstration of divine grace, justice, and majesty. The relation of the theocracy to heathenism, the representative of which is Egypt, is here illustrated by facts. The history contained in Exodus may very fairly be described as the history of the triumph of Israel, or rather of Israel's God, over the heathen power, which appears here in its innermost spirit of revolt against God. The world is conquered progressively and with increased force; and the passover manifests on the one hand the annihilation of worldly power, while on the other hand it is the celebration of the birth-day of the people of God. This section of the history then concludes with a triumphal song, celebrating the victory of Israel. In ch. xvi.-xviii. we find the introduction to the second principal part of this book, in which is sketched the manifestation of God in the midst of Israel, as well as the promulgation of the law itself, in its original and fundamental features. This preparatory section thus furnishes us with additional proof of the special care of God for his people; how he provided their food and water, and how he protected them from the assaults of their foes. In ch. xv. 22, sq., not all, but only the remarkable resting-places are mentioned, where Jehovah took special care of his people. In the account (xviii.) of the civil regulations framed by the advice of Jethro, a strong line of demarcation is drawn between the changeable institutions of man and the divine legislation which began then to be established, and which thenceforth claims by far the greatest part of the work. At the commencement of the legislation is a brief summary of the laws, with the decalogue at their head (xix.-xxiii.). The decalogue is the true fundamental law, bearing within itself the germ of the entire legislation. The other legal definitions are only further developments of the decalogue. These definitions manifest the power and extent of the law itself, showing what an abundance of new regulations result from the simple and few words of the decalogue. Upon this basis the covenant is concluded with the Israelites, in which God reveals himself in agreement with the understanding and the exigencies of the people. Not until this covenant was completed did it become possible for the Israelites to enter into a communion with God, confirmed and consecrated by laws and offerings, and thereby to receive further revelations from him (ch. xxiv.). Whatsoever after this, in the twenty-fifth and in the following chapters, is communicated to the people, concerns the dwelling of God in the midst of Israel. By this dwelling of God among Israel it is intended to show, that the communion is permanent on the part of God, and that on the part of the people it is possible to persevere in communion with God. Consequently there follows the description of the sanctuary, the character of which is symbolical. The sacred symbols are, however, not so much expressed in formal declarations, as contained in the whole tenor of the descriptions. The sybolics begin with the central point, the holy of holies, which unites in itself the impeaching law and the redeeming symbol of divine mercy, and thus sets forth the reconciliation of God with the people. This is followed by the description of the sanctuary, representing those blessings which through the holy of holies were communicated to the subjects of the theocracy, and serving as a perpetual monument of Israel's exalted destiny, pointing at the same time to the means of attaining it. Last comes the description of the fore-court, symbolising the participation of the people in those blessings, and their sanctified approach to the Lord. The description then proceeds from the sanctuary to the persons officiating in it, the priests, characterised both by their various costumes (xxviii.), and the manner of their inauguration (xxix.). Then follows, as a matter of course, the description of the service in that sanctuary and by those priests, but merely in its fundamental features, confining itself simply to the burnt and incense offerings, indicating by the former the preparatory inferior service, and by the latter the complete and higher office of the sacerdotal function. But, by contributing to the means of establishing public worship, the whole nation shares in it; and therefore the description of the officiating persons very properly concludes with the people (xxx.). As a suitable sequel to the former follows the description of the use and nature of the implements requisite for the service of the priests, such as the brass laver for sacred ablutions, the preparation of the perfume and anointing oil (xxx. 17-38). These regulations being made, men endowed with the Spirit of God

were also to be appointed for making the sacred tabernacle and all its furniture (xxxi. 1-2). The description of the sanctuary, priesthood, and mode of worship, is next followed by that of the sacred times and periods (xxxi. 12, sq.). Of the sacred times there is here only appointed the Sabbath, in which the other regulations are contained as in their germ. God having delivered to Moses the tables of the law, the construction and arrangement of the tabernacle might thus at once have been begun, had its further progress not been interrupted by an act of idolatry on the part of the people, and their punishment for that offence, which form the subject of the narrative in ch. xxxii.-xxxiv. Contrary and in opposition to all that had been done by Jehovah for and in the presence of Israel, the subjective formidable apostacy of the latter manifests itself in a most melancholy manner, as an ominously significant prophetic fact, which is incessautly repeated in the history of subsequent generations. The narrative of it is therefore closely connected with the foregoing accounts—Jehovah's mercy and gracious faithfulness on the one hand, and Israel's barefaced ingratitude on the other, being intimately connected. This connection forms the leading idea of the whole history of the theocracy. It is not till after the narrative of this momentous event that the account of the construction and completion of the tabernacle can proceed (xxxv.-xl.), which account becomes more circumstantial in proportion as the subject itself is of greater importance. Above all, it is faithfully shown that all was done according to the commands of Jehovah.

In the descriptive history of Exodus a fixed plan, in conformity with the principles above stated, is consistently and visibly carried through the whole of the book, thus giving us the surest guarantee for the unity of both the book and its author. In vain have several modern critics attempted to discover here also sundry sources and manifold original documents, or even fragments, but loosely connected with each other (comp. *ex. gr.* De Wette, *Introd. to the Old Testament*, § 151). Such an assumption proves in this case in particular to be nothing more than a last resource of argument against the Mosaical composition of the book. De Wette has of late been induced, in favour of this hypothesis, to declare that in some portions of Exodus the source is uncertain, and that there took place a mixture of both sources, the Mosaical and the non-Mosaical (comp. PENTATEUCH). Nor are other modern critics more successful in their attempts to show in this book traces of a post-Mosaical origin. Among the passages quoted in support of that assertion is xxiii. 9, the law contained in which seems to imply a later state of the people during their settled abode in Palestine. Regulations about strangers were, however, of importance during their abode in the desert, especially since a number of Egyptians had joined the Israelites, and stood to them in the relation of strangers. Chap. xvi. 36, also, is quoted in favour of the above opinion, because the *omer* is designated therein as the tenth part of an *ephah*, implying that changes had in later times been made in the Hebrew measures. But they forget that the Hebrew word עמר does not at all indicate a definite measure, but merely a vessel, the size of which it was therefore necessary to specify by giving its exact measurement. In vi. 26, 27, also, they think they recognise the hand of a later author, who refers to Moses and Aaron, and describes their character. The least attention, however, to the preceding genealogy, and the descriptive style of the Pentateuch in general, must soon convince them that even a contemporary writer might have spoken in the way which Moses does in these passages.

For neological criticism it was of the utmost importance to stamp this book as a later production, the miracles contained in its first part but too manifestly clashing with the principles in which that criticism takes its starting-point. Its votaries therefore have endeavoured to show that those miracles were but mythological fictions which had been gradually developed in process of time, so that the very composition of the book itself must necessarily have been of a later date. Neither do we wonder at such attempts and efforts, since the very essence and central point of the accounts of the miracles given in that book are altogether at variance with the principles of rationalism and its criticism, which can by no means admit the rise and formation of a people under such miraculous circumstances, such peculiar belief, and, in a religious point of view, such an independent existence, at the side of all the other nations of antiquity. Indeed, the spiritual substance of the whole, the divine idea which pervades and combines all its details, is in itself such a miracle, such a peculiar and wondrous phenomenon, as to lend natural support and undeniable confirmation to the isolated and physical wonders themselves; so that it is impossible to deny the latter without creating a second and new wonder, an unnatural course in the Jewish history. Nor is that part of the book which contains the miracles deficient in numerous historical proofs in verification of them. As the events of this history are laid in Egypt and Arabia, we have ample opportunity of testing the accuracy of the Mosaical accounts, and surely we find nowhere the least transgression against Egyptian institutions and customs; on the contrary, it is most evident that the author had a thorough knowledge of the Egyptian institutions and the spirit that pervaded them. Exodus contains a mass of incidents and detailed descriptions which have gained new force from the modern discoveries and researches in the field of Egyptian antiquities (comp. Hengstenberg, *Die Buches Mosis und Ægypten*, Berlin, 1841). The description of the passage of the Israelites through the desert also evinces such a thorough familiarity with the localities as to excite the utmost respect of scrupulous and scientific travellers of our own time for the authenticity of the Pentateuch (comp. *ex. gr.* Raumer, *Der Zug der Israeliten aus Ægypten nach Canaan*, Leips. 1837). Nor is the passover-festival, its rise and nature, less confirmatory of the incidents connected with it, if we have not recourse to the desperate expedient—as rationalistic criticism really does—of ascribing to that festival a quite different signification originally, namely, a purely physical one, an opinion which brings its advocates in conflict with the whole of the Israelitish history. The arrangements of the tabernacle, described in the second part of Exodus, likewise throw a favourable light on the historical authenticity of the preceding events; and the

least tenable of all the objections against it are, that the architectural arrangements of the tabernacle were too artificial, and the materials and richness too costly and precious for the condition and position of the Jews at that early period, &c. But the critics seem to have overlooked the fact that the Israelites of that period were a people who had come out from Egypt, a people possessing wealth, Egyptian culture and arts, which we admire even now, in the works which have descended to us from ancient Egypt; so that it cannot seem strange to see the Hebrews in possession of the materials or artistical knowledge requisite for the construction of the tabernacle. Moreover, the establishment of a TENT as a sanctuary for the Hebrews can only be explained from their abode in the desert, being in perfect unison with their then roving and nomadic life; and it is therefore a decided mistake in those critics who give to the sacred tent a later date than the Mosaical; while other critics (such as De Wette, Von Bohlen, Vatke) proceed much more consistently with their views, by considering the narrative of the construction of a sacred tabernacle to be a mere fiction in Exodus, introduced for the purpose of ascribing to the temple of Solomon a higher antiquity and authority. However, independently of the circumstance that the temple necessarily presupposes the existence of a far older analogous sanctuary, the whole process of such a forced hypothesis is but calculated to strike out a portion from the Jewish history on purely arbitrary grounds. The extremely simple and sober style and views throughout the whole narrative afford a sure guarantee for its authenticity and originality. Not a vestige of a poetical hand can be discovered in Exod. xviii.; not even the most sceptical critics can deny that we tread here on purely historical ground. The same may fairly be maintained of ch. xx.-xxiii. How is it then possible that one and the same book should contain so strange a mixture of truth and fiction as its opponents assert to be found in it? The most striking proofs against such an assumption are, in particular, the accounts, such as in Exod. xxxii. sq., where the most vehement complaints are made against the Israelites, where the high-priest of the covenant-people participates most shamefully in the idolatry of his people. All these incidents are described in plain and clear terms, without the least vestige of later embellishments and false extolling of former ages. The Pentateuch, some critics assert, is written for the interest and in favour of the hierarchy; but can there be more anti-hierarchical details than are found in that book? The whole representation indicates the strictest impartiality and truth. On the literature of Exodus, see PENTATEUCH.—H. A. C. H.

EXORCISM AND EXORCIST (ἐξορκιστής, Acts xix. 13). The belief in demoniacal possessions, which may be traced in almost every nation, has always been attended by the professed ability, on the part of some individuals, to release the unhappy victims from their calamity. In Greece men of no less distinction than both Epicurus (Diog. Laer. x. 4) and Æschines, were sons of women who lived by this art; and both were bitterly reproached, the one by the Stoics, and the other by his great rival orator Demosthenes (*De Cor.*), for having assisted their parents in these practices. The allusions to the practice of exorcism among the Jews, contained both in their own authors and in the New Testament, are too well known to render quotations necessary. In some instances this power was considered as a divine gift; in others it was thought to be acquired by investigations into the nature of demons and the qualities of natural productions, as herbs, stones, &c., and of drugs compounded of them; by the use of certain forms of adjurations, invocations, ceremonies, and other observances. Indeed the various forms of exorcism, alluded to in authors of all nations, are innumerable, varying from the bloody human sacrifice down to the fumes of brimstone, &c. &c. The power of expelling demons Josephus places among the endowments of Solomon, and relates that he *left behind him* the manner of using exorcisms by which they drive away demons (for the pretended fragments of these books see Fabric. *Cod. Pseud. Vet. Test.* p. 1051). He declares that he had seen a man, named Eleazar, releasing people that were demoniacal, in the presence of Vespasian, his sons, captains, and the whole multitude of his soldiers. He describes the manner of cure thus: 'He put a ring that had a *root* of one of those sorts mentioned by Solomon to the nostrils of the demoniac; after which he drew out the demon through his nostrils, and when the man fell down he adjured him to return no more, making still mention of Solomon and reciting the incantations he composed.' He further adds, that when Eleazar would persuade and demonstrate to the spectators that he had such a power, he set a cup or basin full of water a little way off, and commanded the demon as he went out of the man to overturn it, and thereby to let the spectators know he had left the man (*Antiq.* viii. 2. § 5). He also describes the mode of obtaining the root Baaras, which, he says, 'if it be only brought to sick persons, it quickly drives away the demons,' under circumstances which, for their strangeness, may vie with any prescription in the whole science of exorcism (*De Bell. Jud.* vii. 6. § 3). Among all the references to exorcism, as practised by the Jews, in the New Testament (Matt. xii. 27; Mark ix. 38; Luke ix. 49, 50), we find only one instance which affords any clue to the means employed (Acts xix. 13); from which passage it appears that certain professed exorcists took upon them to call over a demoniac the name of the Lord Jesus, saying, 'We adjure you by Jesus whom Paul preacheth.' Their proceeding seems to have been in conformity with the well-known opinions of the Jews in those days, that miracles might be wrought by invoking the names of the Deity, or angels, or patriarchs, &c., as we learn from Justin Martyr, Irenæus, Origen, &c., and Lucian (*Frag.* p. 141). The epithet applied to these exorcists (περιερχομένων, Vulg. *de circumeuntibus Judæis*) indicates that they were travelling mountebanks, who, beside skill in medicine, pretended to the knowledge of magic. It is evident that the opinion we form of exorcism will be materially affected by our views of demoniacal possessions [DEMON]. The *neutral course* we have pursued in regard to both these subjects will be completed upon observing, that the office of the exorcist is not mentioned by Paul in his enumeration of the miraculous gifts (1 Cor. xii. 9), though it was a power which he possessed himself, and which the Saviour had promised

(Mark xvi. 17; Matt. x. 8). Mosheim says that the particular order of exorcists did not exist till the close of the third century, and he ascribes its introduction to the prevalent fancies of the Gnostics (*Cen.* iii. 11, c.4). Fairness also induces us to notice Jahn's remark upon the *silence* of *St. John* himself, in his Gospel, on the subject of possessions, although he introduces the *Jews* as speaking in the customary way respecting demons and demoniacal possessions, and although he often speaks of the sick who were healed by the Saviour; coupled with the fact that John wrote his Gospel in Asia Minor, where *medical science* was very flourishing, and where it was generally known that the diseases attributed to demons were merely natural diseases (Jahn, *Archäol.*, large German ed. pt. i. vol. ii. 232, pp. 477-480; see also Lomeirus, *De Vet. Gent. Lustra.*; Bekker, *Le Monde enchanté*; Whitby's note on Matt. xii. 27).—J. F. D.

EXPIATION. [ATONEMENT; SACRIFICE.]

EXPIATION, DAY OF. [ATONEMENT, DAY OF.]

EYE (עַיִן). In most languages this important organ is used by figurative application, as the symbol of a large number of objects and ideas. In the East such applications of the word 'eye' have always been uncommonly numerous; and they were so among the Hebrews. It may be serviceable to distinguish the following uses of the word, few of which are common in this country, unless so far as they have become so through the translation of the Bible.

1. *A fountain.* This use of the word has already been indicated [AIN]. It probably originated from the eye being regarded as the fountain of tears.

2. *Colour*, as in the phrase 'and the eye (colour) of the woman was as the eye (colour) of bdellium' (Num. xi. 7). This originated perhaps in the eye being the part of the body which exhibits different colours in different persons.

3. *The surface*, as 'the surface (eye) of the land' (Exod. x. 5, 15; Num. xxii. 5, 11): the last is the passage which affords most sanction to the notion that עין *ain* means in some places 'face.' This is the sense which our own and other versions give to 'eye to eye' (Num. xiv. 14, &c.), translated 'face to face.' The phrases are indeed equivalent in meaning; but we are not thence to conclude that the Hebrews meant 'face' when they said 'eye,' but that they chose the opposition of the eyes, instead of that of the faces, to express the general meaning. Hence, therefore, we may object to the extension of the signification in such passages as 1 Sam. xvi. 12, where 'beautiful eyes' יפה עינים is rendered 'fair countenance.'

4. It is also alleged that 'between (or about) the eyes' means the forehead, in Exod. xiii. 9, 16, and the forepart of the head, in Deut. vi. 8; but the passages are sufficiently intelligible if understood to denote what they literally express; and with reference to the last it may be remarked that there is hair about the eyes as well as on the head, the removal of which might as well be interdicted as an act of lamentation.

5. In Cant. iv. 9, 'eye' seems to be used poetically for 'look,' as is usual in most languages; 'Thou hast stolen my heart with one of thy looks' (eyes).

6. In Prov. xxiii. 31, the term 'eye' is applied to the beads or bubbles of wine, when poured out, but our version preserves the sense of 'colour.'

To these some other phrases, requiring notice and explanation, may be added:

'Before the eyes' of any one, meaning in his presence; or, as we should say, 'before his face' (Gen. xxiii. 11, 18; Exod. iv. 30).

'In the eyes' of any one, means what appears to be so or so in his individual judgment or opinion; and is equivalent to 'seeming' or 'appearing' (Gen. xix. 8; xxix. 20; 2 Sam. x. iii).

'To set the eyes' upon any one, is usually to regard him with favour (Gen. xliv. 21; Job xxiv. 23; Jer. xxxix. 12); but it occurs in a bad sense, as of looking with anger, in Amos ix. 8. But anger is more usually expressed by the contrary action of turning the eyes away.

As many of the passions, such as envy, pride, pity, desire, are expressed by the eye; so, in the Scriptural style, they are often ascribed to that organ. Hence such phrases as 'evil eye' (Matt. xx. 15); 'bountiful eye' (Prov. xxii. 9); 'haughty eyes' (Prov. vi. 17); 'wanton eyes' (Isa. iii. 16); 'eyes full of adultery' (2 Pet. ii. 14); 'the lust of the eyes' (1 John ii. 16). This last phrase is applied by some to lasciviousness, by others to covetousness; but it is best to take the expression in the most extensive sense, as denoting a craving for the gay vanities of this life (Comp. Ezek. xxiv. 25). In the same chapter of Ezekiel (ver. 16), 'the desire of thy eyes' is put not for the prophet's wife directly, as often understood, but for whatever is one's greatest solace and delight; which in this case was the prophet's wife—but which in another case might have been something else.

In Zech. iv. 10, the angels of the Lord are called 'his eyes,' as being the executioners of his judgments, and watching and attending for his glory. From some such association of ideas, the favourite ministers of state in the Persian monarchy were called 'the king's eyes.' So, in Num. x. 31, 'to be instead of eyes' is equivalent to being a prince, to rule and guide the people. This occurs also in the Greek poets, as in Pindar (*Olymp.* ii. 10), where 'the eye of Sicilia' is given as a title to one of the chief men in Sicily, showing his power. In like manner, in the same poet, 'the eye of the army' stands for a good commander (*Olymp.* vi. 16).

The expression in Psalm cxxiii. 2, 'As the eyes of servants look unto the hands of their masters,' has suggested a number of curious illustrations from Oriental history and customs, tending to show that masters, especially when in the presence of others, are in the habit of communicating to their servants orders and intimations by certain motions of their hands, which, although scarcely noticeable by other persons present, are clearly understood and promptly acted upon by the attendants. This custom keeps them with their attention bent upon the hand of their master, watching its slightest motions.

The celebrated passage 'Why beholdest thou the mote that is in thy brother's eye, and considerest not the beam that is in thine own eye' (Matt. vii. 3), has occasioned much waste of ex

planation. It seems much better to understand it as a hyperbolical proverbial expression, than to contend that as δοκὸς cannot literally mean 'a beam,' it must here signify something else, a disease, a thorn, &c. (see Doddridge and Campbell, *in loc.*). As a proverbial phrase, parallels have been produced abundantly from the Rabbins, from the fathers, and from the classics.

Respecting blinding the eyes as a punishment, or political disqualification, see PUNISHMENT.

'PAINTING THE EYES,' or rather the eyelids, is more than once alluded to in Scripture, although this scarcely appears in the Authorized Version, as our translators, unaware of the custom, usually render 'eye' by 'face,' although 'eye' is still preserved in the margin. So Jezebel 'painted her eyes,' literally, 'put her eyes in paint,' before she showed herself publicly (2 Kings ix. 30). This action is forcibly expressed by Jeremiah (iv. 30), 'though thou rentest thine eyes with painting.' Ezekiel (xxiii. 40) also represents this as a part of high dress—'For whom thou didst wash thyself, *paintedst thy eyes*, and deckedst thyself with ornaments.' The custom is also, very possibly, alluded to in Prov. vi. 25—'Lust not after her beauty in thine heart, neither let her take thee *with her eyelids*.' It certainly is the general impression in Western Asia that this embellishment adds much to the languishing expression and seducement of the eyes, although Europeans find some difficulty in appreciating the beauty which the Orientals find in this adornment.

285.

The following description of the process is from Mr. Lane's excellent work on the *Modern Egyptians* (i. 41-43): 'The eyes, with very few exceptions, are black, large, and of a long almond form, with long and beautiful lashes and an exquisitely soft, bewitching expression: eyes more beautiful can hardly be conceived: their charming effect is much heightened by the concealment of the other features (however pleasing the latter may be), and is rendered still more striking by a practice universal among the females of the higher and middle classes, and very common among those of the lower orders, which is that of blackening the edge of the eyelids, both above and below the eyes, with a black powder called *kohhl*. This is a collyrium, commonly composed of the smoke-black which is produced by burning a kind of *libán*—an aromatic resin—a species of frankincense, used, I am told, in preference to the better kind of frankincense, as being cheaper, and equally good for the purpose. Kohhl is also prepared of the smoke-black produced from burning the shells of almonds. These two kinds, though believed to be beneficial to the eyes, are used merely for ornament; but there are several kinds used for their real or supposed medical properties; particularly the powder of several kinds of lead ore; to which are often added sarcocolla, long pepper, sugar-candy, fine dust of a Venetian sequin, and sometimes powdered pearls. Antimony, it is said, was formerly used for painting the edges of the eyelids. The kohhl is applied with a small probe, of wood, ivory, or silver, tapering towards the end, but blunt: this is moistened, sometimes with rose-water, then dipped in the powder, and drawn along the edges of the eyelids: it is called *mir'wed;* and the glass vessel in which the kohhl is kept, *mook'hhol'ah*. The custom of thus ornamenting the eyes prevailed among both sexes in Egypt in very ancient times: this is shown by the sculptures and paintings in the temples and tombs of this country; and kohhl-vessels, with the probes, and even with the remains of the black powder, have often been found in the ancient tombs. I have two in my possession. But, in many cases, the ancient mode of ornamenting with the kohhl was a little different from the modern. I have, however, seen this ancient mode practised in the present day in the neighbourhood of Cairo; though I only remember to have noticed it in two instances. The same custom existed among the Greek ladies, and among the Jewish women in early times.'

Sir J. G. Wilkinson alludes to this passage in Mr. Lane's book, and admits that the lengthened form of the ancient Egyptian eye, represented in the paintings, was probably produced by this means. 'Such (he adds) is the effect described by Juvenal (*Sat.* ii. 93), Pliny (*Ep.* vi. 2), and other writers who notice the custom among the Romans. At Rome it was considered disgraceful for men to adopt it, as at present in the East, except medicinally,* but if we may judge from the similarity of the eyes of men and women in the paintings at Thebes, it appears to have been used by both sexes among the ancient Egyptians. Many of the kohl-bottles have been found in the tombs, together with the bodkin used for applying the moistened powder. They are of various materials, usually of stone, wood or pottery; sometimes composed of two, sometimes of three or four separate cells, apparently containing each a mixture, differing slightly in its quality and hue from the other three. Many were simple round tubes, vases, or small boxes; some were ornamented with the figure of an ape or monster, supposed to assist in holding the bottle between his arms, while the lady dipped into it the pin with which she painted her eyes; and others were in imitation of a column made of stone, or rich porcelain of the choicest manufacture' (*Ancient Egyptians*, iii. 382).

EZEKIEL (יְחֶזְקֵאל = יְחַזֵּק אֵל, [*whom*] *God will strengthen*, Gesen. *Thes.*, or יֶחֱזַק אֵל, *God will prevail*, Rosenm. *Schol.;* Sept. Ἰεζεκιήλ), one of the greater prophets, whose writings, both in the Hebrew and Alexandrian canons, are placed next to those of Jeremiah. He was the son of Busi the priest (ch. i. 3), and, according to tradition, was a native of Sarera (ἐκ γῆς

* This is not altogether correct. In Persia it is as common among the men as the women.—J.K.

Σαρηρδ, Carpzov, *Introd.*, pt. iii. p. 200). Of his early history we have no authentic information. We first find him in the country of Mesopotamia, 'by the river Chebar' (ch. i. 1), now *Khabûr*, a stream of considerable length flowing into the Euphrates near Circesium, *Kirkesia* (Rosenmüller's *Bibl. Geog. of Central Asia* in *Bibl. Cabinet*, vol. ii. p. 180). On this river Nebuchadnezzar founded a Jewish colony from the captives whom he brought from Jerusalem when he besieged it in the eighth year of king Jehoiachim (2 Kings xxv. 14). This colony (or at least a part of it) was settled at a place called Tel-Abib, which has been thought by some to answer to the Thallaba of D'Anville (Rosenm., *Bibl. Geog.*, vol. ii. p. 188); and it seems to have been here that the prophet fixed his residence. Josephus (*Antiq.* x. 6. § 3) states, that he was a youth (παῖς ὤν) when carried away captive; but, as Hävernick (*Commentar über Ezechiel*, Erlangen, 1843, p. viii.) justly remarks, the matured character of a priest which appears in his writings, and his intimate acquaintance with the temple service, render such a supposition highly improbable. He received his commission as a prophet in the fifth year of his captivity (B.C. 594). Many critics suppose (from ch. i. 1) that this event took place in the 30th year of his age. Thus Carpzov (p. 201) understands the expression. There is, however, little reason to think that this is the epoch intended. The more probable opinion seems to be that the reckoning is from the commencement of the reign of Nabopolassar, the father of Nebuchadnezzar (Scaliger, *De Emendatione Temporum*, Lug. Bat. 1598, p. 374; Rosenm. *Schol. in Ezech.*; Eichhorn, *Einleitung in d. A. T.*, vol. iii. p. 188, 3rd edit.; Winer, *Bibl. Realwörterbuch*, art. 'Ezech.'). Others (as Ussher, Hävernick, pp. 12, 13) take the era to be that of the finding the book of the law in the 18th year of Josiah, which is nearly synchronous with the former. The question is not of much importance in a chronological point of view, since the date is sufficiently fixed by the reference he makes to the year of the captivity. Ezekiel is remarkably silent respecting his personal history; the only event which he records (and that merely in its connection with his prophetic office) is the death of his wife in the ninth year of the captivity (ch. xxiv. 18). He continued to exercise the prophetic office during a period of at least twenty-two years, that is, to the 27th year of the captivity (ch. xxix. 17); and it appears probable that he remained with the captives by the river Chebar during the whole of his life. That he exercised a very commanding influence over the people is manifest from the numerous intimations we have of the elders coming to inquire of him what message God had sent through him (ch. viii. 1; xiv. 1; xx. 1; xxxiii. 31, 32, &c.). Carpzov (pp. 203, 4) relates several traditions respecting his death and sepulchre, principally from the treatise *De Vitis Prophet.*, falsely attributed to Epiphanius. It is there said that he was killed at Babylon by the chief of the people (ὁ ἡγούμενος τοῦ λαοῦ) on account of his having reproved him for idolatry; that he was buried in the field of Maur (ἐν ἀγρῷ Μαοὺρ) in the tomb of Shem and Arphaxad, and that his sepulchre was still in existence. Such traditions are obviously of very little value.

Ezekiel was contemporary with Jeremiah and Daniel. The former had sustained the prophetic office during a period of thirty-four years before Ezekiel's first predictions, and continued to prophesy for six or seven years after. It appears probable that the call of Ezekiel to the prophetic office was connected with the communication of Jeremiah's predictions to Babylon (Jer. li. 59), which took place the year preceding the first revelation to Ezekiel (Hävernick, p. ix). The greater part of Daniel's predictions are of a later date than those of Ezekiel; but it appears that his piety and wisdom had become proverbial even in the early part of Ezekiel's ministry (ch. xiv. 14, 16; xxviii. 3).

Most critics have remarked the vigour and surpassing energy which are manifest in the character of Ezekiel. The whole of his writings show how admirably he was fitted, as well by natural disposition as by spiritual endowment, to oppose the 'rebellious house,' the 'people of stubborn front and hard heart,' to whom he was sent. The figurative representations which abound throughout his writings, whether drawn out into lengthened allegory, or expressing matters of fact by means of symbols, or clothing truths in the garb of enigma, all testify by their definiteness the vigour of his conceptions. Things seen in vision are described with all the minuteness of detail and *sharpness* of outline which belong to real existences. But this characteristic is shown most remarkably in the entire subordination of his whole life to the great work to which he was called. We never meet with him as an ordinary man; he always acts and thinks and feels as a prophet. This energy of mind developed in the one direction of the prophetic office is strikingly displayed in the account he gives of the death of his wife (ch. xxiv. 15-18). It is the only memorable event of his personal history which he records, and it is mentioned merely in reference to his soul-absorbing work. There is something inexpressibly touching as well as characteristic in this brief narrative—the 'desire of his eyes' taken away with a stroke—the command not to mourn—and the simple statement, 'so I spake unto the people in the morning, and at even my wife died; and I did in the morning as I was commanded.' That he possessed the common sympathies and affections of humanity is manifest from the beautiful touch of tenderness with which the narrative is introduced. We may even judge that a mind so earnest as his would be more than usually alive to the feelings of affection when once they had obtained a place in his heart. He then, who could thus completely subordinate the strongest interests of his individual life to the great work of his prophetic office, may well command our admiration, and be looked upon as (to use Hävernick's expression) 'a truly gigantic phenomenon.' It is interesting to contrast Ezekiel in this respect with his contemporary Jeremiah, whose personal history is continually presented to us in the course of his writings; and the contrast serves to show that the peculiarity we are noticing in Ezekiel belongs to his individual character, and was not necessarily connected with the gift of prophecy.

That Ezekiel was a poet of no mean order is acknowledged by almost all critics. Lowth (*De sacra Poësi Hebræorum*, ed. J. D. Michaelis, Götting. 1770, p. 431) thus sums up his account of him: 'In cæteris a plerisque vatibus fortasse

superatus; sed in eo genere ad quod unice videtur a natura comparatus, nimirum vi, impetu, pondere, granditate, nemo ex omni scriptorum numero eum unquam æquavit.' Michaelis and Dathe are the only critics of any eminence (as far as we know) who think slightingly of his poetical genius. The former (to whom Dathe assents) remarks, 'Mihi in Ezekiele non sublimitas laudanda, nedum Isaiana, videtur, ut potius in exornandis amplificandisque imaginibus plus artis et luxuriei eum habere dixerim, quam cum impetu et sublimitate poëmatis consistere potest. Perpetuus aliqua ex parte imitator est, et tamen novus ac suus, non grandis, sed ingeniosus' (*Ib.* p. 427). The question is altogether one of taste, and has, we imagine, been decided by common consent against Michaelis. He remarks more truly that Ezekiel lived at a period when the Hebrew language was declining in purity, when the *silver* age was succeeding to the *golden* one. It is, indeed, to the matter rather than the language of Ezekiel that we are to look for evidence of poetic genius. His style is often simply didactic, and he abounds in peculiarities of expression, Aramaisms, and grammatical anomalies, which, while they give individuality to his writings, plainly evince the decline of the language in which he wrote. An extended account of such peculiarities is given by Eichhorn (*Einleitung in das A. T.* vol. iii. p. 196) and Gesenius (*Geschichte der Heb. Sprache u. Schrift*, p. 35).

The genuineness of the writings of Ezekiel has been the subject of very little dispute. According to Jewish tradition doubts were entertained as to the canonicity of the book on the ground of its containing some apparent contradictions to the law, as well as because of the obscurity of many of its visions. These, however, were removed, it is said, by Rabbi Hananias, who wrote a commentary on the book, in which all these difficulties were satisfactorily solved (*Mischna*, ed. Surenhusius, *Præf. ad Part.* iv. מסכת עדיות; Carpzov, *Introd.* pt. iii. p. 215); but still, on account of their obscurity, the visions at the beginning and close of the book were forbidden to be read by those who were under thirty years of age (Carpzov, p. 212). Some continental critics of the last century have impugned the canonicity of the last nine chapters, and have attributed them to some Samaritan or Hebrew who had returned in later times to the land of Judæa (Oeder, *Freye Untersuchung über einige Bücher des A. T.*, Hal. Sax. 1771; Vogel, in his remarks on the above; and Corrodi, *Beleuchtung des Jüdisch. und Christl. Bibelkanons*, pt. i. p. 105, quoted by Rosenmuller, *Schol. in Ez.* ad c. xl.). These objections have been fully answered by Eichhorn (*Einleitung*, vol iii. p. 203), Jahn (*Introd. in Lib. Sac. V. F.*, p. 356), and others. Jahn has also taken notice of and answered some objections raised by an anonymous writer in the *Monthly Magazine*, 1798, to the canonicity of c. xxv.-xxxii., xxxv., xxxvi., xxxviii., xxxix. A translation of Jahn's arguments will be found in Horne's *Introd.* vol. iv. p. 222. These and similar objections have so little weight or probability that we shall content ourselves with quoting the general remark of Gesenius in reference to the whole of Ezekiel's writings: 'This book belongs to that not very numerous class which, from beginning to end, maintains by means of favourite expressions and peculiar phrases such a oneness of tone as by that circumstance alone to prevent any suspicion that separate portions of it are not genuine' (*Geschichte der Heb. Spr.* p. 35). The canonicity of the book of Ezekiel in general is satisfactorily established by Jewish and Christian authorities. There is, indeed, no explicit reference to it, or quotation from it, in the New Testament. Eichhorn (*Einleit.* p. 218) mentions the following passages as having apparently a reference to this book: Rom. ii. 24; comp. Ezek. xxxvi. 21: Rom. x. 5; Gal. iii. 12; comp. Ezek. xx. 11: 2 Pet. iii. 4; comp. Ezek. xii. 22; but none of these are quotations. The closing visions of Ezekiel are clearly referred to, though not quoted, in the last chapters of the Apocalypse. The prophet Ezekiel is distinctly referred to by the son of Sirach, Ἰεζεκιὴλ ὃς εἶδεν ὅρασιν δόξης, ἣν ὑπέδειξεν αὐτῷ ἐπὶ ἅρματος χερουβίμ (Ecclus. xlix. 8), and by Josephus (*Antiq.* x. 5. § 1; 6. § 3; 7. § 2; 8. § 2). The book of Ezekiel is also mentioned as forming part of the canon in the catalogues of Melito (Eusebius, *Hist. Eccles.* iv. 26), Origen (apud Euseb. *l. c.* vi. 25), Jerome (*Prologus Galeatus*), and the Talmud (Eichhorn, vol. iii. p. 218; vol. i. pp. 126-137). One of the passages of Josephus to which we have referred has occasioned much controversy and many conjectures, because he *seems* to affirm that Ezekiel had written two books of prophecies. Having spoken of Jeremiah and his predictions of the Babylonian captivity, Josephus adds, *οὐ μόνον δὲ οὗτος προεθέσπισε ταῦτα τοῖς ὄχλοις, ἀλλὰ καὶ ὁ προφήτης Ἰεζεκίηλος· ὃς πρῶτος περὶ τούτων δύο βιβλία γράψας κατέλιπεν* (*Antiq.* x. 5. § 1). According to the ordinary and, indeed, as it would seem, necessary interpretation of this passage, Ezekiel was the *first* who wrote *two books* respecting the Babylonian captivity. The question, then, arises, Has one of his books been lost, or are the two now joined into one? The former supposition has been maintained by some in order to account for certain professed quotations from the prophet Ezekiel of passages which are not found in his writings at present. Thus Clemens Romanus (1 *Ep. ad Cor.* c. 8) refers to such a passage, which is given more at length by Clemens Alexand. (*Pædagog.* i. 10). Thus, again, Tertullian (*De carne Christi*, c. 23, p. 394, ed. Semler) says 'Legimus *apud Ezechielem* de vacca illa quæ peperit et non peperit.' Other instances may be seen in Fabricius (*Codex Pseudepigraphus V. T.* ed. 2da. p. 1118), and quoted from him by Carpzov (*Introd.* pt. iii. p. 208). Both these critics, however, agree that the most probable explanation of such references is that they were derived from Jewish tradition. The latter hypothesis, that our present book was originally two, the second containing the last nine chapters, has received the support of very many critics (see Le Moyne, *Varia Sacra*, t. ii. p. 332; Carpzov, *Introd.* p. 208). This view, however, is not without serious difficulties. There is no evidence that the book, as at present existing, was ever considered two; and the testimony of Josephus himself, that only twenty-two books were received as sacred (*Contr. Apion.* i. 8), appears quite opposed to such a supposition, since in whatever way the division of the Old Testament into twenty-two books is made there cannot be two

out of the number left for Ezekiel. Eichhorn (*Einleitung*, vol. iii. p. 146) maintains that it is Jeremiah of whom Josephus speaks, a position to which we should at once assent if we could with him consider the words ὃς πρῶτος as equivalent to ὁ δὲ πρῶτος. If this is what Josephus meant, we must suppose some corruption of his text.

The central point of Ezekiel's predictions is the destruction of Jerusalem. Previously to this catastrophe his chief object is to call to repentance those who were living in careless security; to warn them against indulging in blind confidence, that by the help of the Egyptians (Ezek. xvii. 15-17; comp. Jer. xxxvii. 7) the Babylonian yoke would be shaken off; and to assure them that the destruction of their city and temple was inevitable and fast approaching. After this event his principal care is to console the captives by promises of future deliverance and return to their own land, and to encourage them by assurances of future blessings. His predictions against foreign nations stand between these two great divisions, and were for the most part uttered during the interval of suspense between the divine intimation that Nebuchadnezzar was besieging Jerusalem (ch. xxiv. 2), and the arrival of the news that he had taken it (ch. xxxiii. 21). The predictions are evidently arranged on a plan corresponding with these the chief subjects of them, and the time of their utterance is so frequently noted that there is little difficulty in ascertaining their chronological order. This order is followed throughout, except in the middle portion relating to foreign nations, where it is in some instances departed from to secure greater unity of subject (*e. g.* ch. xxix. 17). The want of exact chronological order in this portion of the book, has led to various hypotheses respecting the manner in which the collection of the separate predictions was originally made. Jahn (*Introd.* p. 356) supposes that the predictions against foreign nations were placed in their present position by some transcriber in the order in which they happened to come into his hands, and that he through forgetfulness omitted chaps. xxxv., xxxviii., and xxxix. Eichhorn (*Einleit.* vol. iii. p. 193) thinks it probable that the predictions were written on several greater or smaller rolls, which were put together in their present form without sufficient regard to chronological accuracy. Bertholdt (*Einleit.* v. iv. p. 1487, quoted by Hävernick) supposes that the collector of the whole book found two smaller collections already in existence (ch. xxv.-xxxii. and xxxiii. 21-xxxix.), and that he arranged the other predictions chronologically. All such hypotheses belong, as Hävernick remarks, to a former age of criticism.

The arrangement, by whomsoever made, is very evidently designed, and it seems on many accounts most probable that it was made by Ezekiel himself. This is maintained by Hävernick on the following grounds: 1. The arrangement proceeds throughout on a plan corresponding with the subjects of the predictions. In those against foreign nations chronological is united with material order, whilst in those which relate to Israel the order of time is strictly followed. 2. The predictions stand in such connection with each other that every part has reference to what has preceded it. 3. Historical notices are occasionally appended to the predictions, which would scarcely be done by a transcriber: *e. g.* the notice respecting himself in chaps. xi., xxiv., xxv., and the close of chap. xix., which Hävernick translates 'This is a lamentation and was for a lamentation.' The whole book is divided by Hävernick into nine sections, as follows:—

1. Ezekiel's call to the prophetic office (ch. i.-iii. 15).

2. Series of symbolical representations and particular predictions foretelling the approaching destruction of Judah and Jerusalem (ch. iii. 16-vii.).

3. Series of visions presented to the prophet a year and two months later than the former, in which he is shown the temple polluted by the worship of Adonis—the consequent judgment on the inhabitants of Jerusalem and on the priests,—and closing with promises of happier times and a purer worship (ch. viii.-xi.).

4. A series of reproofs and warnings directed especially against the particular errors and prejudices then prevalent amongst his contemporaries (ch. xii.-xix.).

5. Another series of warnings delivered about a year later, announcing the coming judgments to be yet nearer (ch. xx.-xxiii.).

6. Predictions uttered two years and five months later, when Jerusalem was besieged, announcing to the captives that very day as the commencement of the siege (comp. 2 Kings xxv. 1), and assuring them of its complete overthrow (ch. xxiv.).

7. Predictions against foreign nations (ch. xxv.-xxxii.).

8. After the destruction of Jerusalem a prophetic representation of the triumph of Israel and of the kingdom of God on earth (ch. xxxiii.-xxxix.).

9. Symbolic representation of Messianic times, and of the establishment and prosperity of the kingdom of God (ch. xl.-xlviii.).

The latter part of the book has always been regarded as very obscure. It will be seen by the brief notices of the contents of the sections which we have given above, that Hävernick considers the whole to relate to Messianic times. The predictions respecting Gog (ch. xxxviii., xxxix.) have been referred by some to Antiochus Epiphanes; by others to Cambyses, to the Chaldæans, the Scythians, the Turks, &c. Mr. Granville Penn has interpreted them of Napoleon and the French (*The Prophecy of Ezekiel concerning Gogue*, &c., 1815). The description of the temple (ch. xl.-xliii.) has been thought by many to contain an account of what Solomon's temple was; by others, of what the second temple should be. The difficulties of all these hypotheses seem to be insuperable. We have only space to say that we fully accord with the view of Hävernick, and are glad to take this opportunity of recommending his *Commentary* to the notice of English scholars. We do this the more readily because we believe his book (published only this year, 1843) is very little known at present in England. To him we are greatly indebted for the materials of the present article, and only regret that we could not obtain his work soon enough to make a more extended use of it.—F. W. G.

EZIONGEBER (עֶצְיוֹן גֶּבֶר; Sept. Γασίων Γάβερ; and Vulg. *Asiongaber*), a very ancient city lying not far from Elath, on the eastern arm

of the Red Sea. It is first mentioned in Num. xxxiii. 35, as one of the stations where the Hebrews halted in their journeyings through the desert (Deut. ii. 8). From its harbour it was that Solomon (1 Kings ix. 26) sent the fleet which he had there built to the land of Ophir, whence they fetched four hundred and twenty talents of gold. Here, also, Jehoshaphat (1 Kings xxii. 47; 2 Chron. xx. 35) built a fleet 'to go to Ophir,' but because he had joined himself with Ahaziah, 'king of Israel, who did wickedly,' 'the ships were broken that they were not able to go to Tarshish.' Josephus (*Antiq.* viii. 6. 4) says that Eziongeber was also called Berenice, and that it lay not far from Ailath. It is probably the same with the once populous city Assyan (Burckhardt, ii. 831). Robinson (*Biblical Researches*, i. 250) says, 'no trace of Eziongeber seems now to remain, unless it be in the name of a small wady with brackish water, el-Ghudyan opening into el-Arabah from the western mountain, some distance north of Akabah. However different the names el-Ghudyan and Ezion may be in appearance, yet the letters in Arabic and Hebrew all correspond' [ELATH].—J. R. B.

EZRA. We shall bring the statements of this article under the following heads:—

I. NAME.
II. PARENTAGE.
III. DOINGS. 1. Historical; 2. Doubtful.
IV. WRITINGS. 1. Canonical; 2. Apocryphal.

I. *Name.*—עֶזְרָא *Ezra* means *help;* Sept. Ἔσδρας. The form of the name is Chaldaic or Aramaic; and it is equivalent in meaning to the Hebrew name עזר, from the root עזר; Arab. عزر, he *surrounded, protected, helped.*

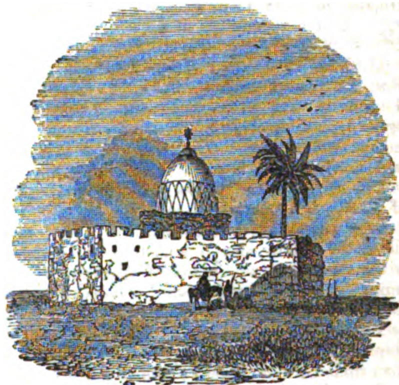
II. *Parentage.*—The celebrated Ezra was a Jewish scribe (סֹפֵר) and priest (כֹּהֵן), who, about the year B.C. 458, led the second expedition of Jews back from the Babylonian exile into Palestine. This Ezra ought to be distinguished from the Ezra who went up as one of the chiefs of the priests and Levites under Zerubbabel (Neh. xii. 1, 12, 33).

Ezra was a lineal descendant from Phinehas, the son of Aaron. He is stated in Scripture to be the son of Seraiah, the son of Azariah; which Seraiah was slain at Riblah by order of Nebuchadnezzar, having been brought thither a captive by Nebuzaradan. But, as 130 years elapsed between the death of Seraiah and the departure of Ezra from Babylon, and we read that a grandson of Seraiah was the high priest who accompanied Zerubbabel on the first return to Jerusalem, seventy years before Ezra returned thither, we may suppose that by the term *son* here, as in some other places, the relationship of grandson, or of a still more remote direct descendant, is intended. In addition to the information given in the books of Ezra and Nehemiah, that Ezra was a 'scribe,' a 'ready scribe of the law of Moses,' 'a scribe of the words of the Commandments of the Lord and of his statutes to Israel,' 'a scribe of the law of the God of Heaven,' and 'a priest,' we are told by Josephus that he was high-priest of the Jews who were left in Babylon; that he was particularly conversant with the laws of Moses, and was held in universal esteem on account of his righteousness and virtue.

III. *Doings of Ezra.*—The rebuilding of the temple of Jerusalem, which had been decreed by Cyrus in the year B.C. 536, was, after much powerful and vexatious opposition, completed in the reign and by the permission of Darius Hystaspis, in the year B.C. 515.

In the year B.C. 457 Ezra was sent by 'Artaxerxes Longimanus and his counsellors to inquire concerning Judah and Jerusalem, according to the law of his God which was in his hand; and to carry the silver and gold which the king and his counsellors freely offered unto the God of Israel.' Permission was also granted to him to take with him all the silver and the gold which he could find in all the province of Babylon, together with the free-will offerings which the people and priests offered for the house of God at Jerusalem. Of this treasure he was directed to employ as much as was requisite in the purchase of offerings according to the law of Moses, and the surplus he was to lay out according to his discretion for the maintenance of the externals of religion. Ezra was also charged to convey vessels for the house of God in Jerusalem; and, lest these gifts should be insufficient, he was empowered to take from the king's treasure-house as much as should be wanted to supply everything needful for the house of the Lord. At the same time that this commission was given to Ezra, Artaxerxes Longimanus issued a decree to the keepers of the king's treasure beyond the river, to assist Ezra in everything in which he needed help, and to supply him liberally with money, corn, wine, oil, and salt. It was further enacted that it should not be lawful to impose tribute upon any priest, Levite, or other person concerned in ministration in the house of God. Ezra was commissioned to appoint 'according to the wisdom of God which was in his hand,' magistrates and judges to judge all the people beyond the river, that knew the laws of his God; and was enjoined to teach them to those who knew them not. The reason of the interest for the worship of God at this time evinced by Artaxerxes, appears to have been a fear of the divine displeasure, for we read in the conclusion of the decree to the treasurers beyond the river, 'Whatsoever is commanded by the God of Heaven, let it be diligently done for the house of the God of Heaven; FOR WHY SHOULD THERE BE WRATH AGAINST THE REALM OF THE KING AND HIS SONS?' We are also told (Ezra, vii. 6) that the king granted Ezra all his request; and Josephus informs us that Ezra, being desirous of going to Jerusalem, requested the king to grant him recommendatory letters to the governor of Syria. We may therefore suppose that the dread which Artaxerxes entertained of the divine judgments was the consequence of the exposition to him by Ezra of the history of the Jewish people. Some writers suppose that this favour shown to the Jews was consequent upon the marriage of Esther with Ahasuerus; but this could not be, even if we should grant, what is unlikely, that the Artaxerxes of the book of Ezra and the Ahasuerus of the book of Esther were the same person, because Ezra set out for Jerusalem in the *first* month in the seventh year of the reign of Artaxerxes, and Esther was not taken into the King's house until the *tenth* month in the seventh year of the reign of Ahasuerus, and did not declare her connection with the Jewish people, and obtain favour

for them until after the plot of Haman, in the twelfth year of Ahasuerus.



Ezra assembled the Jews who accompanied him on the banks of the river Ahava, where they halted three days in tents. Here Ezra proclaimed a fast, as an act of humiliation before God and a season of prayer for divine direction and safe conduct; for, on setting out, he 'was ashamed to require a band of soldiers and horsemen to help them against the enemy by the way,' because he had asserted to the king that the hand of his God is upon all them that seek him for good. Ezra next committed the care of the treasures which he carried with him to twelve of the chief priests, assisted by ten of their brethren, appointing these to take charge of the treasures by the way, and deliver them safely in the house of the Lord at Jerusalem. On the twelfth day from their first setting out Ezra and his companions left the river Ahava, and arrived safely at Jerusalem in the fifth month, having been delivered from the hand of the enemy and of such as lay in wait by the way. Three days after their arrival the treasures were weighed and delivered into the custody of some Levites. The returning exiles offered burnt-offerings to the Lord. They delivered also the king's commissions to the viceroys and governors, and gave needful help to the people and the ministers of the Temple. When Ezra had discharged the various trusts committed to him, the princes of the Jews came to him and complained that the Jewish people generally who had returned from the captivity, and also the priests and Levites, but especially the rulers and princes, had not kept themselves separate from the people of the land, but had done according to the abominations of the remnant of the nations whom their forefathers had driven out, and married their daughters, and allowed their children to intermarry with them. On hearing this Ezra was deeply afflicted; and, according to the Jewish custom, he rent his mantle and tore the hair of his head and beard. There gathered round him all those who still feared God, and dreaded his wrath for the transgression of those whom he had brought back from captivity. Having waited till the time of the evening sacrifice, Ezra rose up, and, having again rent his hair and his garments, made public prayer and confession of sin. The assembled people wept bitterly, and Shechaniah, one of the sons of Elam, came forward to propose a general covenant to put away the foreign wives and their children. Ezra then arose and administered an oath to the people that they would do accordingly. Proclamation was also made that all those who had returned from captivity should within three days gather themselves together unto Jerusalem, under pain of excommunication and forfeiture of their goods. The people assembled at the time appointed, trembling on account of their sin and of the heavy rain that fell. Ezra addressed them, declaring to them their sin, and exhorting them to amend their lives by dissolving their illegal connections. The people acknowledged the justice of his rebukes, and promised obedience. They then requested that, as the rain fell heavily, and the number of transgressors was great, he would appoint times at which they might severally come to be examined respecting this matter, accompanied by the judges and elders of every city. A commission was therefore formed, consisting of Ezra and some others, to investigate the extent of the evil. This investigation occupied three months.

In Neh. viii. we read that, on the occasion of the celebration of the feast of the seventh month, subsequently to Nehemiah's numbering the people, Ezra was requested to bring the book of the law of Moses; and that he read therein standing upon a pulpit of wood, which raised him above all the people.

Josephus relates the affecting scene which occurred on the reading of the law by Ezra. The account given by Josephus agrees with that of Nehemiah in all leading particulars, except that Josephus places the date and occasion twelve years afterwards.

Josephus tells us that Ezra died soon after this celebration of the Feast of Tabernacles, and was buried at Jerusalem with great magnificence. According to some Jewish chroniclers he died in the year in which Alexander came to Jerusalem, on the tenth day of the month Tebeth (that is, the lunation in December), in the same year in which took place the death of the prophets Haggai, Zechariah, and Malachi, and in which prophecy became extinct. According to other traditions Ezra returned to Babylon and died there at the age of 120 years.

The Talmudic statement is that he died at Zamzumu, a town on the Tigris, while on his road from Jerusalem to Susa, whither he was going to converse with Artaxerxes about the affairs of the Jews. A tomb said to be his is shown on the Tigris, about twenty miles above its junction with

286. [Tomb of Ezra.]

the Euphrates. An interesting description and wood-cut of this tomb are subjoined to the notes on the book of Ezra in the 'Pictorial Bible.'

Some traditions assert that Ezra was, about A.M. 3113, the president of the כנסת הגדולה, *Synagoga Magna*, and the father of all Mishnic doctors. In piety and meekness he was like unto Moses (*Iuchasin*, p. 13. See *Zemach David*). When he went from Babylon to Jerusalem, he took with him all persons whose descent was either illegitimate or unknown; so that the Jews left in Babylon should be נקי כסולת, *pure like flour* (*Kiddushin*, c. 4, 1, *Gem.*). Ezra is said to have introduced the present square Hebrew character, and, in conjunction with some other elders, to

have made the masora, the punctuation, and accentuation of the whole Bible (Abarbanel, *Præfat. ad Nachalath Avoth;* Elias, *Præf.* 3 *Masor.*).

Ezra is also said to have vigorously resisted the sect of the Sadducees, which sprang up in his days; and therefore to have put the words מן העולם עד עולם, *à sæculo in sæculum*, at the head of all prayers, as a symbol by which the orthodox could be distinguished (*Bab. Berachoth*, fol. 54).

Since the people, during the Babylonian captivity or exile, had become accustomed to the Aramaic language, and scarcely understood Hebrew, Ezra established the office of turgoman, תורגמן, *dragoman*, or interpreter, who stood near the public reader in the synagogue, and translated every verse after it was read (*Megillah*, fol. 74).

Ezra ordained that the year of jubilee should be reckoned from the seventh year after the rebuilding of the temple (Maimon. *Hal. Jobel.* cap. 10).

Ezra is considered to be the author of the canon, and worthy to have been the lawgiver, if Moses had not preceded him (*Bab. Sanhed.* c. ii. f. 21; compare the article CANON). He is even said to have re-written the whole of the Old Testament from memory, the copies of which had perished by neglect. But we must abstain from recounting all the traditional amplifications of the doings of Ezra, since, if all were to be received, it would be difficult to say what he did not do, so strong has been the inclination to connect important facts with the person of Ezra (compare 2 Esdras, xiv.; Irenæus, *Adv. Hæres.* iii. 25; Clem. Alex. *Strom.* i. p. 142; Augustin. *De Mirabil. Script.* ii. 23; Hieron. *ad Halrid.* p. 212; Vall. Buxtorf, *Tiberias*, p. 88, sqq.; Bertholdt, *Einleit.* i. 69, sqq.; De Wette, *Einleit.* p. 17, sq.; Sauer, *Diss. canonem Vet. Test.* etc. Altorf, 1792, 4to.; *Sanhedrin*, fol. xxi. 1; Rau, *De Synag. Magna*, pp. 31, 89; Hartmann, *Verbindung des Alten und Neuen Testamentes*, pp. 114, sqq. Arabian fables about Ezra are mentioned in Hottinger's *Thes. Philol.* p. 113, and in Herbelot, *Bibl. Orientale*, p. 697, etc.).

IV. *Writings.*—We now turn to the writings of Ezra. The *canonical writings* of Ezra are, besides the book which bears his name, most likely the two books of the Chronicles. 'Esram libros Paralipomenon lucubrasse Ebræorum omnium est fama consentiens' (Huetius, *Dem. Evang.* iv. 14, p. 341). But as the reasons for ascribing the books of Chronicles to the authorship of Ezra have already been investigated in the article CHRONICLES, we confine ourselves here to the book of Ezra. Some authors have ascribed the books of Nehemiah and Esther likewise to Ezra, although they differ in style. [ESTHER; NEHEMIAH.]

Contents.—The book of Ezra contains ἀπομνημονεύματα, *memorabilia*, or records of events occurring about the termination of the Babylonian exile. It comprises accounts of the favours bestowed upon the Jews by Persian kings; of the rebuilding of the temple; of the mission of Ezra to Jerusalem, and his regulations and reforms. Such records forming the subject of the book of Ezra, we must not be surprised that its parts are not so intimately connected with each other as we might have expected if the author had set forth his intention to furnish a complete history of his times.

The events narrated in the book of Ezra are spread over a period of about 79 years, under the reigns of

	Years.	Months.
Cyrus	7	0
Cambyses	7	5
Magus, or Pseudo-Smerdis .	0	7
Darius Hystaspis	36	0
Xerxes	21	0
Artaxerxes (in the eighth year of whose reign the records of Ezra cease)	8	0
	80	0

The beginning of the book of Ezra agrees verbatim with the conclusion of the second book of Chronicles, and terminates abruptly with the statement of the divorces effected by his authority, by which the marriages of Israelites with foreign women were dissolved.

Since the book of Ezra has no marked conclusion, it was, even in early times, considered to form part of the book of Nehemiah, the contents of which are of a similar description. As, however, the book of Ezra is a collection of detached ἀπομνημονεύματα, or records of remarkable events occurring at the conclusion of the exile and in the times immediately following it, attempting no display of the art of book-making, the mere want of an artificial conclusion cannot be considered a sufficient reason for regarding it as the first portion of Nehemiah. It is, however, likely that the similarity of the contents of the books of Ezra and Nehemiah was the cause of their being placed together in the Hebrew Bible.

The arrangement of the facts in the book of Ezra is chronological. The book may be divided into two portions. The *first* consists of chapters i.-vi., and contains the history of the returning exiles and of their rebuilding of the temple, and comprises the period from the first year of Cyrus, B.C. 536, to the sixth year of Darius Hystaspis, B.C. 515. In the first six chapters the use of the third person predominates in the narrative, except in passages where, by συνέκδοχη, occurs אמרנא, *Heb.* אמרנו, WE *said*, or where the narrative contains abstracts from documents to which Ezra had access. In these abstracts the Aramaic or Chaldee language of the original documents has been preserved from ch. iv. 8, to vi. 18, and vii. 12-26. These portions exist in Kennicott's *Cod.* 240, in a collateral Hebrew translation, reprinted in Kennicott's edition of the Hebrew Bible, and separately in *Chaldaicorum Danielis et Esræ capitum interpretatio Hebraica. Primus ex codice antiquo illam ed.* B. Kennicott. *In usus eruditorum seorsim excudi curavit, et commentationem de indole et usu hujus translationis præmisit* Ludovicus Schulze, Halæ, 1782, 8vo.

An argument has been raised against the opinion that Ezra was the author of the whole book that bears his name, from the use of the first person plural in the 4th verse of the 5th chapter, which would seem to imply that the narrator was present on the occasion described; but, setting aside other replies to this argument, it appears that the word *we* refers to Tatnai and his companions, and not at all to the Jews.

The *second* portion contains the personal history of the migration of Ezra to Palestine,

in the seventh year of Artaxerxes. This latter portion, embracing chapters vii.-x., is an autobiography of Ezra during about twelve or thirteen months, in the seventh and eighth years of the reign of Artaxerxes Longimanus. Ezra speaks from ch. vii. 27, to ch. ix. 15, in the first person. 'There is an essential difference between public events which a man recollects, though only as in a dream, to have heard of at the time when they occurred, and those which preceded his birth. The former we think of with reference to ourselves; the latter are foreign to us. The epoch and duration of the former we measure by our own life; the latter belong to a period for which our imagination has no scale. Life and definiteness are imparted to all that we hear or read with respect to the events of our own life' (Niebuhr, *On the Distinction between Annals and History*). These remarks, which Niebuhr made in reference to Tacitus, are, in a great measure, applicable also to Ezra, and account for several of those differences between the various parts of his book, which have so much startled some modern biblical scholars, that they have presumptuously undertaken to show the precise seams or sutures by means of which various fragments of different authors were brought together. In this attempt they have been especially guided by the change of the third to the first person, for which change we account by the above remarks of Niebuhr.

Instances of similar change of person are so frequent in ancient authors, that rhetoricians have introduced it among the rhetorical figures, under the name of *enallage personarum*. The prophetical writings of the Old Testament furnish examples of such ἐνάλλαγη. For instance, Ezek. i. 1-3; Zech. i. 1; vi. 1; vii. 1, 4, 8; Jer. xx. 1, sq. compared with v. 7, sq. xxi. 1; xxviii. 1-5; xxxii. 1-8; Hos. i. 2-3; iii. 1. So also in Habakkuk, Daniel, &c. The frequency of this ἐνάλλαγη, especially in the prophetical parts of the Old Testament, arises from either the more objective or more subjective tendency of the style, which of course varies in harmony with the contents of the chapter. We may observe this ἐνάλλαγη even in our own writings, from which we are certainly taught by modern scholastic usage to eradicate it, although it would, if preserved, frequently give greater freshness to our communications. We have made these remarks in order to show the perfect futility of the chief argument adduced by modern writers against the original unity of the book of Ezra; some of whom, on account of the *enallagè personarum*, assert that ch. vii. 1-26 was written by an author different from that of the portion immediately following, up to ch. ix. 15; and that, again, the subsequent portion to the end of the book was indited by a still different writer. We pass over other still more futile arguments against the authenticity of the book, and express our opinion that even Hävernick does not rightly set forth the truth of the matter when, in his *Einleitung*, he says that this ἐνάλλαγη arose from Ezra's imitation of the prophetic usage, and when he approvingly quotes Schirmer's *Observationes exegeticæ et criticæ in librum Esdræ*, vol. ii. p. 8 (Vratislaviæ, 1830): 'initio autem narrationis rerum a se gestarum Esdra certe consulto tertia usus est persona, rationem dicendi stilumque prophetarum elatiorem videlicet imitaturus. Universe non alienum videtur, sed facillime potius animum subit, Esdram quodammodo prophetarum imitatorem qualem seipsum ostendit, agnoscere.' There was certainly as little IMITATION of the prophets in the *enallage personarum* of Ezra, as there is IMITATION of the prophets if we change from the first to the third person in our own communications. 'Ενάλλαγη never arises from imitation, but only from the more subjective or more objective turn of our mind, and from that vivacity of style which renders it incumbent upon the reader rather than upon the writer to supply that ויאמר, which, as in Jonah ii. 3, forms the transition from the use of the *third* to the adoption of the *first* person.

We have spoken thus far of the canonical book of Ezra; there are, however, four books that have received this name, viz. the book noticed above, the only one which was received into the Hebrew canon under that name, the book of Nehemiah, and the two apocryphal books of Esdras, concerning which see ESDRAS.—C. H. F. B.

EZRACH (אֶזְרָח). This word occurs only once in Scripture, namely, in Ps. xxxvii. 35: 'I have seen the wicked in great power, spreading himself like a green *bay-tree*' (*ezrach*). Commentators and translators have differed respecting the meaning of this word, some supposing it to indicate a specific tree, as the laurel; and others, supported by the Septuagint and Vulgate, the cedar of Lebanon. It is by some considered to mean an evergreen tree, and by others, a green tree that grows in its native soil, or that has not suffered by transplanting, as such a tree spreads itself luxuriously. Others, again, as the unknown author of the sixth Greek edition, who is quoted by Celsius (i. p. 194), consider the word as referring to the 'indigenous man:' 'Vidi impium et impudentem, in ferocia sua gloriantem, et dicentem: sum instar indigenæ, ambulanti in justitia;' and this opinion is adopted by Celsius himself.

Celsius states that recent interpreters have adopted the laurel or bay-tree for no other reason than because—

——— viret semper laurus, nec fronde caduca
Carpitur.

Sir Thomas Browne, indeed, says, 'as the sense of the text is sufficiently answered by this, we are unwilling to exclude that noble plant from the honour of having its name in Scripture.' Isidore de Barrière, on the contrary, concludes that the laurel is not mentioned in Scripture because 'non debuit cœlestis scriptura contaminari mentione illius arboris, quam in tanto pretio haberent gentiles, ad fabulas et fictiones poeticas adhiberent,' &c. This, Celsius justly observes, is a very insufficient reason, as the abuse of a thing should not prevent its proper use; and if such a principle had been acted on, we should not have found in Scripture mention of any trees or plants employed by the Gentiles in their superstitious ceremonies. He might have added, as examples, the vine, the olive, and the cedar, which, for such a reason, might have all been excluded.

The cause why the laurel is not more frequently mentioned in Scripture, is, probably, because it was never very common in Palestine; as otherwise, from its pleasing appearance, grateful shade, and the agreeable odour of its leaves, it could hardly have failed to attract attention.

Though Celsius and others have remarked that, if *ezrach* does indeed signify a tree, it must be some one distinct from the laurel, and one 'quæ in Judæa frequens fuerit, et altitudine, frondiumque umbra, atque amœnitate præcelluerit cæteris,'

287. [Bay-tree. Laurus nobilis.]

yet no evidence is adduced by any of the above authors in behalf of the bay-tree, as that intended in the passage referred to. It appears to us that the Hebrew word must have been derived from the Arabic عشرق *ashruk*, which is described in Arabic works on Materia Medica as a tree having leaves like the *ghar*, that is, the bay-tree or *laurus nobilis* of botanists. If *ezrach*, therefore, was originally the same word as *ashruk*, then it would indicate some tree resembling the bay-tree, rather than the bay-tree itself; but, until that can be discovered, the latter is, upon the whole, well suited to stand as its representative.

The laurel or bay-tree, *laurus nobilis* of botanists, is well known to the Asiatics by its Arabic name of غار *ghar*, under which it is mentioned by Serapion and Avicenna, who quote chiefly Dioscorides and Galen, thus indicating that they had not much original information of their own respecting a tree which is probably not indigenous in the countries in which they wrote. The leaves and berries of the laurel, as well as the bark and the root, were employed in medicine: the berries continue, even in the present day, to be exported to India, where we found them in the bazaars, under the name of *hub-al-ghar* (*Illust. Him. Bot.* p. 326), being still esteemed as a stimulant medicinal, though not possessed of any properties superior to those of the laurels of more southern latitudes. The Arabs give *zafnee* and *zaknee* as the Greek names of the *ghar*-tree. These are corruptions, no doubt, of δάφνη, the name by which the bay-tree was known to the Greeks. It does not appear to occur in Palestine, as travellers, such as Rauwolf and Belon, do not mention it. Hasselquist expressly states that he had not met with it in Judæa or Galilee, but had rested himself very comfortably under its shade near the mountains beyond White Cape, on the road from Acre to Sidon. In the neighbourhood of Antioch bay-trees were formerly very abundant, especially at the village and grove of Daphne, famous for the temple of Apollo and its licentious rites. Though the cypress-grove and the consecrated bay-trees have disappeared from the immediate vicinity of Antioch, Dr. Pococke states that they are in great abundance at some little distance. Capts. Irby and Mangles describe the beauty of the scenery on the banks of the Orontes as surpassing anything they expected to see in Syria, and the luxuriant variety of the foliage as prodigious. The laurel, laurestinus, bay-tree, fig-tree, wild vine, plane-tree, English sycamore, arbutus, both common and Andrachne, dwarf oak, &c. were scattered in all directions. Capt. M. Kinneir describes a delightful spot, called Babyle, about seven miles from Antioch, which he was disposed to consider the ancient Daphne. A number of fountains boil up from amongst the rocks, and flow in different channels through a meadow, shaded with luxuriant bay-trees, walnut-trees, and groves of myrtle. The bay-tree is well known to be common in the south of Europe, as in Spain, Italy, Greece, and the Levant. It is usually from 20 to 30 feet in height, often having a bushy appearance, from throwing up so many suckers; but in England it has attained a height of 60 feet, which is not unusual in warmer climates. It is unnecessary to allude further to the celebrity which it attained among the ancients—a celebrity which has not yet passed away, the laurel-wreath being still the symbolical crown as well of warriors as of poets. Its ever green grateful appearance, its thick shade, and the agreeable spicy odour of its leaves, point it out as that which was most likely in the eye of the Psalmist.—J. F. R.

F.

FABLE. [PARABLE.]

FACE, in Scripture, is often used to denote *presence* in the general sense, and, when applied to the Almighty, denotes such a complete manifestation of the divine presence, by sound or sight, as was equivalent, in the vividness of the impression, to the seeing of a fellow-creature 'face to face.' The 'face of God' therefore denotes in Scripture any thing or manner by which God is wont to manifest himself to man. Thus, when it is said that Adam and Eve hid themselves from 'the face of Jehovah,' we understand that they hid themselves from his presence, however manifested; for פנים *panim*, not only signifies *presence*, as well as (literally) *face*, but is the very word for *presence*, however manifested. There is no other word to denote presence in the Hebrew language. Whenever 'presence' occurs in our translation, the word in the original is the same which is rendered 'face' in other places. This is very proper; and the respective terms 'face' and 'presence' are usually applied in the Authorized Version with much propriety and discretion; the latter term being employed wherever the effect of the word 'face' might have seemed harsh or unseemly.

It was a very ancient and common opinion that our mortal frame could not survive the more sensible manifestations of the divine pre-

sence, or 'see God face to face and live' (Gen. xxxii. 30). Hence, in this passage, the gratitude and astonishment of Jacob, that he still lived after God had manifested himself to him more sensibly than by dreams and visions. This impression was confirmed to Moses, who was told, 'Thou canst not see my face: no man can see my face and live' (Exod. xxxiii. 20); which clearly signifies that no one can in this present state of being endure the view of that glory which belongs to Him. The ancient heathen entertained the same notion, which is remarkably expressed in the celebrated mythological story of Semele, who, having prevailed on the reluctant Jove to appear to her in his heavenly splendour, was struck dead by the lightnings of his presence (1 Cor. xiii. 12; 1 John iii. 2; Rev. xxii. 4).

It is to be borne in mind that God is usually represented to us in Scripture under a human form; and it is indeed difficult for even more spiritualized minds than those of the Hebrews to conceive of Him apart from the form and attributes of the highest nature actually known to us. The Scripture sanctions this concession to the weakness of our intellect, and hence arise the anthropomorphous phrases which speak of the face, the eyes, the arm of God. The appearances of the angels in the Old Testament times were generally in the human form (Judg. xiii. 6, &c.); and from this cause alone it would have been natural, in the imagination, to transfer the form of the messengers to Him by whom they were sent [ANTHROPOMORPHISM].

FAIR HAVENS (Καλοὶ Λιμένες), a harbour or roadstead of Crete, the unsafeness of which to winter in occasioned that attempt to make for Phenice, on the other side of the island, which led to the eventual loss of the vessel in which Paul sailed for Rome (Acts xxvii. 8). As the name of Kalos Limenas is still preserved, there is no difficulty in fixing the situation to a small bay a little to the north-east of Cape Leon, the present Cape Matala.

FALLOW DEER. [AIL.]

FAMINE (רָעָב). Considering the early period in the history of the world to which the Biblical records, especially the oldest of them, refer; and considering also how small a proportion to the world at large, or even to the inhabited part of it, the population bore in the primitive ages, we should not antecedently expect to find frequent mention of famines. Yet does it appear, from the testimony of these records, that mankind suffered greatly from dearth of food in the earliest periods of which we have any account; and the Scriptural history in this, as in other particulars, will be found interesting and valuable to the economist and philosopher, as well as to the divine. In truth famine appears to depend, not on the extent of cultivable or of cultivated land, nor on the proportion which such land bears to the actual population—though, doubtless, both these elements enter into the influences which determine the question of abundance or scarcity—but rather on human forethought and thrift so applied, as, in the actual circumstances, whatever they are, to make a suitable provision in all cases against such contingencies as may occasion dearth. In the almost entire absence of this forethought, barbarous and half-civilized nations have been found, scanty though the population may be in relation to the tracts of land over which they roam, to be most frequently on the verge of destitution, and not seldom to suffer the greatest privations from dearth and famine. Vain is the almost unlimited opportunity which Nature spreads around them for the supply of their animal necessities, since they want either the intelligence and skill which are necessary to turn these opportunities to account, or the moral qualities which would spare something from actual abundance in order to provide against coming wants.

Since the Bible gives its unquestionable evidence to show that dearth was by no means an unfrequent or an inconsiderable evil in the early ages, it supplies a very cogent proof, in answer to those who maintain either that the world is worse or no better than it was in ancient times, that, at least in those moral qualities on which man's physical well-being depends, mankind have made unquestionable advances. Indeed if any large portion of the earth now suffer from famine, the cause may be looked for not so much in the want of forethought and savingness as in the operation of passions and prejudices arising from misconceived self-interest, which prevent the free interchange of the bounties of divine Providence,—passions and prejudices which characterize not mankind at large, but only certain small portions of society, and which, in consequence, how powerful soever they may for a time be, have not the vitality of vices of character that belong to a semi-barbarous age, and must, in a day like the present, soon disappear before the generous and dissolving ardour of enlightened Christian love.

The first mention of a famine which occurs in Scripture is in Gen. xii. 10, where we read that so early as the days of the patriarch Abraham 'there was a famine in the land,' which is described as so grievous, as to compel the father of the faithful to quit Canaan. The country to which he resorted was, as we might expect, the land of Egypt, the early and lasting fertility of which is a well-known historical fact. In Gen. xxvi. 1, this famine is designated as 'the first,' that is, the first known, or of which there was any record. The same passage informs us of another famine, which afflicted 'the land' in the days of Isaac, who seems to have contemplated a descent into Egypt; but who, being instructed of God, removed to a part of Arabia Petræa (Gen. xxvi. 17) named Gerar, a city of the Philistines, whose monarch's name was Abimelech.

Even Egypt, however, was not exempt from the desolations of famine (Gen. xli. 30). The ordinary cause of dearth in Egypt is connected with the annual overflow of the Nile. If the rise of the waters is in any year below a certain standard, the country affords scanty supplies of food, and may for the greater part remain a desert. But more than local causes must have been in operation in the case before us; for we are told that 'the famine was sore in all lands,' that 'the famine was over all the face of the earth.' By the foresight and wisdom of Joseph, however, provision against the evil had been made in Egypt, while other countries were left to suffer the unmitigated consequences of their neglect. The provision made by Joseph must have been of a most abundant nature, since the period during which the dearth lasted was no less than seven years, and the people of other parts sought and

received supplies in Egypt—'all countries came into Egypt to buy corn.' Among other lands, Canaan suffered from the famine; which was the immediate occasion of Jacob's sending his sons down into Egypt, of the discovery which they made of their lost brother, and of the settlement in that land of the descendants of Abraham: an event of the highest consequence in the sequel, and serving to illustrate the benignity and wisdom of divine Providence in the evils with which, under its influence, the world is afflicted.

This famine was made by Joseph the occasion of one of the greatest social revolutions which history records. The details may be found in the book of Genesis; and it is enough to say here that, as the special administrator of the affairs of the country, Joseph got into his hands all the property of the kingdom, including the land (excepting that which belonged to the priests), and gave the same back to the people as tenants at will, on condition of their paying to the king 'the fifth,' probably, of the annual produce.

From these statements it appears that three successive generations were in these early days visited by famine. The Scriptural narrative (the details of which may be easily ascertained by the help of a Concordance) shows that in after ages famines were, in ancient times, more frequent than they are now; and this justifies the use which is made of so terrible a scourge by the sacred writers, and especially the prophets and our Lord himself, in the highly figurative language which they employ in their righteous endeavours to turn wicked men and wicked nations from the evil of their ways (Ezek. vi. 11; Matt. xxiv. 7). In Amos viii. 11, sq., a heavier woe than even the want of bread is appropriately spoken of under the appellation of a famine: 'Behold, the days come, saith the Lord God, that I will send a famine in the land; not a famine of bread nor a thirst for water, but of hearing the word of the Lord: and they shall wander from sea to sea, and from the north even to the east, they shall run to and fro to seek the word of the Lord, and shall not find it: in that day shall the fair virgins and the young men faint for thirst.' The ensuing verse shows that idolatry was the moving cause of this heavy punishment.—J. R. B.

FASTS (צום; Anglo-Saxon *fæstan*, jejunare, found in our present English *break-fast*) properly denote an entire or partial abstinence from food. In the early ages of the world, when the spontaneous productions of nature and the spoils of the chace formed man's chief aliment, fasting from time to time was compulsory, in consequence of the uncertainty of obtaining food when wanted. It would be easy for superstitious ignorance to interpret this compulsion into an expression of the divine will, and so to sanction the observance of fasting as a religious duty. The transition would be the easier at a time and in countries when the office of physician was united in the same person with that of priest; for in hot climates occasional abstinence is not without its advantages on the health; and an abstinence which the state of the body required, but which the appetite shunned or refused, the authority of the priest and the sanctions of religion would exact at once with ease and certainty. In the earlier stages of civilization no idea is more prevalent and operative than that the Deity is propitiated by voluntary sufferings on the part of his creatures. Hence ensued all kinds of bodily mortifications, and even the sacrifice of life itself. Nay, 'the fruit of the body'—the dear pledges of mutual affection, the best earthly gift from the Heavenly Father—children, were sacrificed in expiation of 'the sin of the soul.' Human enjoyments were held to be displeasing in the sight of God. The notion that the gods were jealous of man's happiness runs through the entire texture of Greek and Roman mythology; and the development of this falsehood, as presented in Greek tragedy, has given birth to some of the finest productions of the human mind. But what more pleasurable than food to man, especially to the semi-barbarian? The denial of such a pleasure must then be well-pleasing to the Divinity; the rather because on occasions of family bereavement, of national disaster, or any great calamity, the appetite is naturally affected under the influence of grief, and is made to loathe the food which in its ordinary condition it finds most grateful. A connection between sorrow and fasting would thus be established which would carry with it a sort of divine sanction in being natural and inevitable in its origin. Accordingly, abstinence which seemed imposed by Providence, if not in expiation of guilt, yet as an accompaniment of sorrow, easily became regarded as a religious duty, when voluntarily prolonged or assumed, and grew to be considered as an efficacious means for appeasing the divine wrath and restoring prosperity and peace.

No wonder that under influences so strong as these the observance of religious fasts established itself in the world at a very early period, and is found to have prevailed in most of the nations of antiquity.

In such a religion as Moses was commissioned by the creator of the world to offer to the chosen people, it was not likely that an observance which, such as fasts, seems to have had its origin in false and heathen conceptions, should hold a very prominent position, or be invested with much importance. There is but one fast enjoined by the great Hebrew lawgiver. And this injunction we are disposed to place among those things which Moses allowed rather than originated, bore with rather than approved, in consideration of the force of established custom, and from a wise fear of defeating his own good ends by attempting too much. The manner in which this observance is spoken of in Scripture (Lev. xvi. 29; xxiii. 27) seems to imply that it was no new institution that the lawgiver was establishing, but merely an old and well-known practice, to which he gave a modified sanction. Had it been otherwise, had the law been a new one, details would have been both needed and given, as is customary with Moses in his injunctions. Instead of that the children of Israel are required in general terms to 'afflict their souls.' But this language is not only vague, it is figurative, and could have no definite meaning unless to persons with whom afflicting the soul was in general use. This fact is established by the consideration that the words convey no definite ideas to the English reader unless when explained in the light of Hebrew antiquity. There seems, however, no reason to doubt that 'to afflict the soul (ענה נפשו, in the Septuagint, ταπεινοῦν τὴν ψυχήν) bore with it the

meaning of fasting. To a mere English reader the phrase seems to comprise all kinds of voluntary mortifications, but 'soul' in Hebrew not seldom denotes the 'appetite' (Prov. xxvii. 7). Accordingly the words regard immediately abstinence from food, and most probably (so far as they go) nothing more.

The sole fast required by Moses was on the great day of annual atonement. This observance seems always to have retained some prominence as 'the fast' (Acts xxvii. 9). But what the observance of the enjoined duty involved we are nowhere expressly informed, and can approximate to a knowledge of precise details only so far as later practices among the Jews may be considered as affording a faithful picture of this divinely sanctioned ordinance. In these remarks the opinion is implied that 'the fast,' whatever importance it may have subsequently acquired, was originally only an incident, not to say an accident, in the great solemnity of the annual atonement. Other general fasts, however, were in course of ages introduced, which were celebrated at fixed times every successive year. In the reign of Zedekiah Nebuchadnezzar besieged and captured Jerusalem, which calamity led to the establishment of a fast on the seventeenth day of the fourth month (Thammuz, July), (Jer. lii. 6, 7; Zech. viii. 19). In the last passage other fasts are enumerated, namely, 'the fast of the fifth, and the fast of the seventh, and the fast of the tenth.' That of the fifth month (Ab, August) was held on the ninth day, in mournful commemoration of the burning of the city by 'Nebuzar-adan, a servant of the king of Babylon,' who 'burnt the house of the Lord, and the king's house, and all the houses of Jerusalem, and every great man's house' (2 Kings xxv. 8, sq.; Jer. lii. 12; Zech. vii. 3-5; viii. 19). The fast of the seventh month (Tishri, October) was established to bewail the murder of Gedaliah at Mizpah (Jer. xli. 1, sq.; 2 Kings xxv. 25). That of the tenth month (Tebeth, January) was held on the tenth day to commemorate the commencement of the siege of Jerusalem on the part of Nebuchadnezzar (2 Kings xxv. 1; Zech. viii. 19; see also Hieron. *ad Zech.* c. viii., and *Hieros. Taanith*, 68; Reland, p. 471).

On particular and signal occasions extraordinary fasts were appointed. Thus when Naboth was condemned for blasphemy because he would not give up the inheritance of his fathers to Ahab, Jezebel, as a part of her plan for gratifying the evil desires of her royal husband, ordered a fast to be proclaimed (1 Kings xxi. 9; comp. Jer. xxxvi. 9; 2 Chron. xx. 3). So in Judges xx. 26, the children of Israel 'came unto the house of God and wept, and sat there before the Lord and fasted until even, and offered burnt-offerings and peace-offerings before the Lord,' when they had suffered a calamitous defeat at the hands of the Benjamites. Other instances of fasting on occasion of loss in battle may be found in 1 Sam. xxxi. 11-13; Baruch i. 5. In Joel i. ii. a fast is enjoined with a view to turn away the wrath of God as displayed in the terrible consequences of the invasion of the land of Judæa by an army of devastating locusts (Credner's *Joel*). The notion also prevailed that a special fast might have the effect of averting the divine displeasure and securing the divine co-operation in any great undertaking (Jonah iii. 5; 1 Sam. vii. 5, 6, 8, 10, 12; 1 Macc. iii. 47; 2 Macc. xiii. 12; Judith iv. 11; vi. 19). Local fasts were at a later period sometimes held in order to avert calamity or procure a favour from heaven: and the Sanhedrim ordered general fasts when the nation was threatened with any great evil, such as drought or famine (Joseph. *Vit.* § 56; *Taanith*, i. 5), as was usual with the Romans in their supplications (Liv. iii. 7; x. 23; Smith's *Dict. of Greek and Roman Antiq.*).

There were also private fasts, though the Mosaic law did not require them. They were held in connection with individual or family incidents, and agreed in aim and tendency with fasts of a general and public nature. Examples may be found in 1 Sam. i. 7; xx. 34; 1 Kings xxi. 9; Ez. x. 6; Neh. i. 4. After the exile private fasts became very frequent (Lightfoot, p. 318), awaiting the call of no special occasion, but entering as a regular part of the current religious worship (Suet. *Aug*. 76; Tacit. *Hist.* v. 4. 3). In Judith viii. 6, we read that Judith fasted all the days of her widowhood, 'save the eves of the sabbaths, and the sabbaths, and the eves of the new moons, and the new moons, and the feasts and the solemn days of the house of Israel.' And in Tobit xii. prayer is declared to be good with fasting; see also Luke ii. 37; Matt. ix. 14. The parable of the Pharisee and Publican (Luke xviii. 9; comp. Matt. ix. 14) shows how much the Pharisees were given to voluntary and private fasts—'I fast twice a week.' The first was on the fifth day of the week, on which Moses ascended to the top of Mount Sinai; the second was on the second day, on which he came down (*Taanith*, ii. 9; *Hieros. Megillah*, 75. 1). The Essenes and the Therapeutæ also were much given to such observances (Philo, *Vit. Contempl.* p. 613; Euseb. *Præp. Evan.* ix. 3). Fasts were considered as a useful exercise in preparing the mind for special religious impressions. Thus Dan. x. 2, sq., 'In those days I Daniel was mourning three full weeks. I ate no pleasant bread, neither came flesh nor wine in my mouth. Then I lifted up my eyes and looked, and behold a certain man,' &c. (see also Acts xiii. 3; xiv. 23). From Matt. xvii. 21, 'Howbeit this kind (of demons) goeth not out but by prayer and fasting,' it would appear that the practice under consideration was considered in the days of Christ to act in certain special cases as an exorcism. Fasting was accompanied by the ordinary signs of grief among the Israelites, as may be seen in 1 Macc. iii. 47, 'Then they fasted that day and put on sackcloth, and cast ashes upon their heads and rent their clothes.' The fast ordinarily lasted from evening to evening, but was not observed on the sabbath or on festival days (Joseph. *Antiq.* iii. 10. 3; Judith viii. 6; *Mischn. Taanith*, ii. 10). The abstinence was either partial or total. In the case of the latter food was entirely foregone, but this ordinarily took place only in fasts of short duration; and abstinence from food in eastern climes is more easy and less detrimental (if not in some cases positively useful) than keeping from food would be with us in these cold, damp, northern regions (Esther iv. 16). In the case of partial abstinence the time was longer, the denial in degree less. When Daniel (x. 2) was 'mourning full three weeks,' he ate no '*plea-*

sent bread, neither came *flesh* nor *wine* in my mouth.' There does not appear to have been any fixed and recognised periods during which these fasts endured. From one day to forty days fasts were observed. The latter period appears to have been regarded with feelings of peculiar sanctity, owing doubtless to certain events in Jewish history. Thus Moses 'was with the Lord on Mount Sinai forty days and forty nights, he did neither eat bread nor drink water' (Exod. xxxiv. 28). So Elijah (1 Kings xix. 8) 'arose and did eat and drink, and went in the strength of that meat forty days and forty nights unto Horeb the mount of God.' The same was the number of days that our Lord fasted in the desert in connection with his temptation (Matt. iv. 1-11; Mark i. 12, 13; Luke iv. 1-13). In the latter case the abstinence appears to have been entire, for Luke expressly declares he ate nothing—*καὶ οὐκ ἔφαγεν οὐδέν*. It does not appear to be a necessary inference from the other passages that Moses and Elijah wholly abstained from food during the said forty days. In Dan. i. 10-16, a passage is found which shows that abstaining from meat and wine did not imply total abstinence, for Daniel and his friends had 'pulse to eat and water to drink' (Wetstein, p. 270; De Wette, *Kritik der Mos. Ges.* p. 245).

We have already seen how qualified the sanction was which Moses gave to the observance of fasting as a religious duty. In the same spirit which actuated him, the prophets bore testimony against the lamentable abuses to which the practice was turned in the lapse of time and with the increase of social corruption (Isa. lviii. 4, sq.; Jer. xiv. 12; Zech. vii. 5). Continuing the same species of influence and perfecting that spirituality in religion which Moses began, our Lord rebuked the Pharisees sternly for their outward and hypocritical pretences in the fasts which they observed (Matt. vi. 16, sq.), and actually abstained from appointing any fast whatever as a part of his own religion. In Matt. ix. 14, the question of the reason of this avoidance is expressly put—'Why do we (the disciples of John) and the Pharisees fast oft, but thy disciples fast not?' The answer involves an entire disapproval of fasting in the Christian Church—'Can the children of the bride-chamber fast?' It is true that a period is alluded to when these children 'shall fast;' but the general scope of the passage, taken in connection with the fact that Christ's disciples fasted not, and with the other fact, that while John (Matt. xi. 18, 19) 'came neither eating nor drinking,' the son of man 'came eating and drinking,' clearly shows that our Lord, as he signified his disapproval of religious fasting, so by the assertion that a time would come when, being deprived of the (personal presence of the) bridegroom, his disciples would fast, meant to intimate the approach of a period of general mourning, and employed the term 'fast' derivatively to signify rather sorrow of mind than any corporeal self-denial (Neander, *Leben Jesu*, pp. 231, 305). From the passages in question this at least is clear, that Jesus ascribed to fasts no essential worth, nor required any such observance from his followers. Whether and how far he *allowed* fasting as a means of religious improvement, is a question which our space does not permit us to discuss. That the early Christians observed the ordinary fasts which the public practice of their day sanctioned, is clear from more than one passage in the New Testament Scriptures (Acts xiii. 2; xiv. 23; 2 Cor. vi. 5); but in this they probably did nothing more than yield obedience, as in general they thought themselves bound to do, to the law of their fathers so long as the Mosaic institutions remained entire. And though the great body of the Christian Church held themselves free from all ritual and ceremonial observances when God in his providence had brought Judaism to a termination in the rasure of the holy city and the closing of the temple, yet the practice of fasting thus originated might have easily and unobservedly been transmitted from year to year and from age to age, and that the rather because so large a portion of the disciples being Jews (to say nothing of the influence of the Ebionites in the primitive church), thousands must have been accustomed to fasting from the earliest days of their existence, either in their own practice or the practice of their fathers, relatives, and associates.

Those who wish to prosecute the study of this religious observance among other nations, may consult Meiner, *Gesch. der Relig.* ii. 139; Lakemacher, *Antiq. Græc. Sacr.* p. 626; Wachsmuth, *Hellen. Alterthum.* ii. 237; Böttiger, *Kunstmythol.* i. 132.—J. R. B.

FAT. In Lev. iii. there are minute details of the parts of victims which were to be specially appropriated to the altar. Among these all the internal *fat* is minutely specified, particularly the fat of the kidneys; and of external parts the tail of the sheep, which, in the common species of Western Asia, is a mass of fat (iii. 4, 9, 10, 15): and the whole concludes with 'All the fat is the Lord's; ye shall eat neither fat nor blood' (iii. 17). The reason assigned, namely, that the fat was consecrated to the altar, could only apply with respect to that of animals used in sacrifice, which were also usually employed for food. Accordingly, in Lev. vii. 2, we read, 'Ye shall eat no manner of fat of ox, or of sheep, or of goat,' which would seem to imply that the fat of *other* animals might be eaten; although it would appear that the Jews interpret the prohibition absolutely, as may be inferred from the fact that they rarely eat any other flesh than that of the animals thus indicated. One point seems to have been very generally overlooked, which is, that not fat absolutely but particular fat parts only are interdicted. They might eat the fat involved in the muscular tissue—in short, fat meat; and we know that animals were actually fattened for food (1 Kings iv. 23; Jer. xlvi. 21; Luke xv. 23). This was, however, not a usual practice; and even at this day in the East, domestic cattle seldom undergo any preparatory feeding or fattening before being killed. Hence there is little fat in the carcase, except that belonging to the parts specified in the prohibition, which is all more or less of the nature of suet.

Various reasons have been assigned for this somewhat remarkable restriction. The secondary cause, that the fat was consecrated to the altar, and therefore was to be abstained from, is not all; for it is usually considered that it was thus consecrated to give a religious sanction to a prohibition expedient on other grounds. The remark of Maimonides (*More Nevochim*), 'that men are generally fond of it,' affords no satisfactory reason, unless it

were a principle of the law to forbid to men the things which they liked. The alleged fact of this general partiality might also be disputed: but the remark has point when the special reference to the fat rump of the Syrian sheep is considered, for that is highly prized. It affords a delicate marrowy fat, and is much used in pillaus and other messes which require to be lubricated by animal juices. The reason assigned by Michaelis, that the prohibition was designed to encourage the substitution of olive-oil for animal fat, and hence to promote agriculture among the Hebrews, and turn them from the habits of nomade life, is ingenious, but somewhat far-fetched. The truth probably is, that this suet or suet-like fat is not particularly wholesome or digestible in warm climates, if anywhere, and is particularly unsuitable for persons subject to cutaneous diseases, as the Israelites appear to have been at the time of their leaving Egypt.

'*Fatness*,' in Scripture, expresses plumpness or exuberance, whether in men, animals, or vegetables; and is hence often applied metaphorically to any kind of abundance, as to large possessions, or to excessive fertility in the earth.

FATHER. This word, besides its obvious and primary sense, bears, in Scripture, a number of other applications, most of which have, through the use of the Bible, become more or less common in all Christian countries.

1. The term Father is very often applied to God himself (Gen. xliv. 19, 20; Exod. iv. 22; Deut. xxxii. 6; 2 Sam. vii. 44; Ps. lxxxix. 27, 28; Isa. lxiii. 16; lxiv. 8). Professor Lee states that it is only applied to God as having adopted the chosen people as his children; and he denies, with some harshness, that it is applied to him in the general sense as the Creator, and thence the Father, of all mankind (*Lex. s. v.* אב). Nevertheless, he admits that man's creation is occasionally mentioned in connection with this use of the word; and this, coupled with the clearer intimations of the New Testament, leaves little room to question that it is the intention of the sacred record to set God before us as the Father of all men, in the general sense of creator and preserver of all men, but more especially of believers, whether Jews or Christians. Indeed the analogy of language would point to this, seeing that in the Old Testament, and in all the Syro-Arabian dialects, the originator of anything is constantly called its father. To the same effect is also a passage in Josephus's paraphrase of the law (Deut. xxi. 18-21), respecting rebellious sons, καὶ αὐτὸς (Θεὸς) πατὴρ τοῦ παντὸς ἀνθρώπων γένους, 'because he (God) is himself the father of the whole human race' (*Antiq.* iv. 8. 24).

Without doubt, however, God is in a more especial and intimate manner, even as by covenant, the Father of the Jews (Jer. xxxi. 9; Isa. lxiii. 63. 16; lxiv. 8; John viii. 41; v. 45; 2 Cor. vi. 18); and also of Christians, or rather of all pious and believing persons, who are called 'sons of God' (John i. 12; Rom. viii. 16, etc.). Thus Jesus, in speaking to his disciples, calls God their Father (Matt. vi. 4, 8, 15, 18; x. 20, 29; xiii. 43, etc.). The Apostles, also, for themselves and other Christians, call him 'Father' (Rom. i. 7; 1 Cor. i. 3; 2 Cor. i. 2; Gal. i. 4; and many other places).

2. *Father* is applied to any ancestor near or remote, or to ancestors ('fathers') in general. The progenitor, or founder, or *patriarch* of a tribe or nation, was also pre-eminently its father, as Abraham of the Jews. Examples of this abound. See, for instance, Deut. i. 11; 1 Kings viii. 12; Matt. iii. 9; xxiii. 30; Mark xi. 10; Luke i. 32, 73; vi. 23, 26; John vii. 22, &c.

3. *Father* is also applied as a title of respect to any head, chief, ruler, or elder, and especially to kings, prophets, and priests (Judg. xvii. 10; xviii. 19; 1 Sam. x. 12; 2 Kings ii. 12; v. 13; vi. 21; xiii. 14; Prov. iv. 1; Matt. xxiii. 9; Acts vii. 2; xxii. 1; 1 Cor. iv. 15, etc.).

4. The author, source, or beginner of anything is also called the Father of the same, or of those who follow him. Thus Jabal is called 'the father of those who dwell in tents, and have cattle;' and Jubal, 'the father of all such as handle the harp and the organ' (Gen. iv. 21, 22; comp. Job xxxviii. 28; John viii. 44; Rom. iv. 12). This use of the word is exceedingly common in the East to this day, especially as applied in the formation of proper names, in which, also, the most curious Hebrew examples of this usage occur [AB].

The authority of a father was very great in patriarchal times; and although the power of life and death was virtually taken from the parent by the law of Moses, which required him to bring his cause of complaint to the public tribunals (Deut. xxi. 18-21), all the more real powers of the paternal character were not only left unimpaired, but were made in a great degree the basis of the judicial polity which that law established. The children and even the grandchildren continued under the roof of the father and grandfather; they laboured on his account, and were the most submissive of his servants. The property of the soil, the power of judgment, the civil rights, belonged to him only, and his sons were merely his instruments and assistants. If a family be compared to a body, then the father was the head, and the sons the members, moving at his will and in his service. There were exceptions, doubtless; but this was the rule, and, with some modifications, it is still the rule throughout the East.

Filial duty and obedience were, indeed, in the eyes of the Jewish legislator, of such high importance that great care was taken that the paternal authority should not be weakened by the withdrawal of a power so liable to fatal and barbarous abuse as that of capital punishment. Any outrage against a parent—a blow, a curse, or incorrigible profligacy—was made a capital crime (Exod. xxi. 13, 17; Lev. xx. 9). If the offence was public it was taken up by the witnesses as a crime against Jehovah, and the culprit was brought before the magistrates, whether the parent consented or not; and if the offence was hidden within the paternal walls, it devolved on the parents to denounce him and to require his punishment.

It is a beautiful circumstance in the law of Moses that this filial respect is exacted for the mother as well as for the father. The threats and promises of the legislator distinguish not the one from the other; and the fifth commandment associates the father and mother in a precisely equal claim to honour from their children. The development of this interesting feature of the Mosaical law belongs, however, to another head [WOMEN]. See Cellerier, *Esprit de la Législation Mosaïque*, ii. 69, 122-129.

FEASTS. This word comes to us immediately

from the French *fête*, which is an abbreviated form of the Latin *festum*—'Festus dies,' holyday or holiday. In the Greek we find ἑστιᾷν, the original of *festum;* ἑστιᾷν itself is from the noun ἑστία (Latin *Vesta*), a hearth; so that the root-idea of the word is to be found in what we should term the pleasures of the table, the exercise of hospitality. But in all ages eating, drinking, and hospitality, have been connected with religious observances; while the meeting of friends, the enjoyments of the palate, and the exercise of the devotional affections, would conspire to make a festive holiday. In process of time some one of these elements would, in particular cases, be dropped. Thus the French word *fête* now scarcely comprises the idea of eating and drinking, and certainly involves very little of a religious nature, while with us *feast* denotes, at least in ordinary usage, scarcely any thing else than the pleasures which accompany the entertainments of hospitality. At an earlier period of our language, however, it retained much more of its original import, and is frequently used to indicate that which is now mostly conveyed by the word *festival*. In the common translation of the Scriptures it is repeatedly used in this manner; and accordingly we read in theological works of 'the *feast* of Passover,' 'the *feast* of Pentecost,' 'the *feast* of Lots,' &c. But as the word feast is now generally, if not exclusively, applied, in ordinary usage, to hospitable entertainments, we think we consult precision and perspicuity by speaking under the present head solely of such events, leaving the religious institutions of the Jews, sometimes so denominated, to be treated of under the now more appropriate term Festival.

To what an early date the practices of hospitality are referable may be seen in Gen. xix. 3, where we find Lot inviting the two angels—'Turn in, I pray you, into your servant's house and tarry all night, and wash your feet; and he pressed upon them greatly, and they entered into his house; and he made them a feast:' which was obviously of a religious nature, since it is added, 'and did bake *unleavened* bread, and they did eat' (Judg. vi. 19; and Winer, *Handwörterbuch*, s. v. Sauerteig). It was usual not only thus to receive persons with choice viands, but also to dismiss them in a similar manner; accordingly Laban, when he had overtaken the fleeing Jacob, complains (Gen. xxxi. 27), 'Wherefore didst thou steal away from me and didst not tell me, that I might have sent thee away with mirth, and with songs, and with tabret, and with harp?' See also 2 Sam. iii. 20; 2 Kings vi. 23; Job viii. 20; 1 Macc. xvi. 15. This practice explains the reason why the prodigal, on his return, was welcomed by a feast (Luke xv. 23). Occasions of domestic joy were hailed with feasting; thus, in Gen. xxi. 8, Abraham 'made a great feast the same day that Isaac was weaned.' Birth-days were thus celebrated (Gen. xl. 20), 'Pharaoh, on his birth-day, made a feast unto all his servants' (Job i. 4; Matt. xiv. 6; comp. Herod. i. 133). Marriage-feasts were also common. Samson (Judg. xiv. 10) on such an occasion 'made a feast,' and it is added, 'for so used the young men to do.' So Laban, when he gave his daughter Leah to Jacob (Gen. xxix. 22), 'gathered together all the men of the place, and made a feast.' These festive occasions seem originally to have answered the important purpose of serving as evidence and attestation of the events which they celebrated, on which account relatives and neighbours were invited to be present (Ruth iv. 10; John ii. 1). Those processes in rural occupations by which the Divine bounties are gathered into the hands of man, have in all ages been made seasons of festivity; accordingly, in 2 Sam. xiii. 23, Absalom invites all the king's sons, and even David himself, to a sheep-shearing feast, on which occasion the guests became 'merry with wine' (1 Sam. xxv. 2, sq.). The vintage was also celebrated with festive eating and drinking (Judg. ix. 27). Feasting at funerals existed among the Jews (2 Sam. iii. 33). In Jer. xvi. 7, among other funeral customs mention is made of 'the cup of consolation, to drink for their father or their mother,' which brings to mind the indulgence in spirituous liquors to which our ancestors were given, at interments, and which has not yet entirely disappeared in Lancashire, nor, probably, in Ireland (Carleton's *Irish Peasantry; England in the Nineteenth Century*, vol. ii.). To what an extent expense was sometimes carried on these occasions, may be learned from Josephus (*De Bell. Jud.* iv. 1. 1), who, having remarked that Archelaus 'mourned for his father seven days, and had given a very expensive funeral feast to the multitude,' states, 'which custom is the occasion of poverty to many of the Jews,' adding, 'because they are forced to feast the multitude, for if any one omits it he is not esteemed a holy person.'

As among heathen nations, so also among the Hebrews, feasting made a part of the observances which took place on occasion of animal sacrifices. In Deut. xii. 6, 7, after the Israelites are enjoined to bring to the place chosen of God, their burnt-offerings, tithes, heave-offerings, vows, freewill-offerings, and the firstlings of their herds and flocks, they are told 'there shall ye eat before the Lord your God, and ye shall rejoice in all ye put your hand unto, ye and your households, wherein the Lord thy God hath blessed thee' (1 Sam. ix. 19; xvi. 3, 5; 2 Sam. vi. 19). These sacrificial meals were enjoyed in connection with peace-offerings, whether eucharistic or votive. The kidneys, and all the inward fat, and the tail of the lamb, were burnt in the daily sacrifice; the breast and right shoulder fell to the priest; and the rest was to be eaten by the offerer and his friends, on the same day if the offering were eucharistic, on that and the next day if it were votive (Lev. iii. 1-17; vii. 11-21; 29-36; xix. 5-8; xxii. 29, 30). To the feast at the second tithe of the produce of the land, which was to be made every year and eaten at the annual festivals before Jehovah, not only friends but strangers, widows, orphans, and Levites, were to be invited as well as the slaves. If the tabernacles were so distant as to make it inconvenient to carry thither the tithe, it was to be turned into money, which was to be spent at the place at which the festivals were held in providing feasts (Deut. xiv. 22-27; xii. 14; Tobit i. 6). Charitable entertainments were also provided, at the end of three years, from the tithe of the increase. The Levite, the stranger, the fatherless and the widow were to be present (Deut. xii. 17-19; xiv. 28, 29; xxvi. 12-15). At the feast of Pentecost the command is very express (Deut. xvi. 11), 'Thou shalt rejoice before the Lord thy God, thou, and thy son, and thy daughter, and thy man-servant, and thy maid-servant, and the Levite that is within thy

gates, and the stranger, and the fatherless, and the widow, that are among you.' Accordingly Tobit (ii. 1, 2) affirms, 'Now when I was come home again, in the feast of Pentecost, when I saw abundance of meat, I said to my son, go and bring what poor man soever thou shalt find out of our brethren, who is mindful of the Lord.' The Israelites were forbidden to partake of food offered in sacrifice to idols (Exod. xxxiv. 15), lest they should be thereby enticed into idolatry or appear to give a sanction to idolatrous observances (1 Cor. x. 28) [AGAPE].—J. R. B.

FELIX (Φῆλιξ), a Roman procurator of Judæa, before whom Paul so 'reasoned of righteousness, temperance, and judgment to come,' that the judge trembled, saying, 'Go thy way for this time; when I have a convenient season I will call for thee' (Acts xxiv. 25). The context states that Felix had expected a bribe from Paul; and, in order to procure this bribe, he appears to have had several interviews with the Apostle. The depravity which such an expectation implies is in agreement with the idea which the historical fragments preserved respecting Felix would lead the student to form of the man.

The year in which Felix entered on his office cannot be strictly determined. From the words of Josephus (*Antiq.* xx. 7. 1), it appears that his appointment took place before the twelfth year of the Emperor Claudius. Eusebius fixes the time of his actually undertaking his duties in the eleventh year of that monarch.

Felix was a remarkable instance of the elevation to distinguished station of persons born and bred in the lowest condition. Originally a slave, he rose to little less than kingly power. For some unknown, but probably not very creditable services, he was manumitted by Claudius Cæsar (Sueton. *Claud.* 28; Tacit. *Hist.* v. 9); on which account he is said to have taken the prænomen of Claudius. In Tacitus, however (*loc. cit.*), he is surnamed Antonius, probably because he was also a freedman of Antonia, the emperor's mother. He was a brother of Pallas, who had also been set free by Antonia, and had great influence with Claudius; speaking of whom, in conjunction with another freedman, namely, Narcissus, the imperial private secretary, Suetonius (*Claud.* 28) says that the emperor was eager in heaping upon them the highest honours that a subject could enjoy, and suffered them to carry on a system of plunder and gain to such an extent, that, on complaining of the poverty of his exchequer, some one had the boldness to remark that he would abound in wealth if he were taken into partnership by his two favourite freedmen.

The character which the ancients have left of Felix is of a very dark complexion. Suetonius speaks of the military honours which the emperor loaded him with, and specifies his appointment as governor of the province of Judæa (*Claud.* 28); adding an innuendo, which loses nothing by its brevity, namely, that he was the husband of three queens or royal ladies (trium reginarum maritum). Tacitus, in his *History* (v. 9), declares that, during his governorship in Judæa, he indulged in all kinds of cruelty and lust, exercising regal power with the disposition of a slave; and, in his *Annals* (xii. 54), he represents Felix as considering himself licensed to commit any crime, relying on the influence which he possessed at court. The country was ready for rebellion, and the unsuitable remedies which Felix applied served only to inflame the passions and to incite to crime. The contempt which he and Cumanus (who, according to Tacitus, governed Galilee while Felix ruled Samaria; but see Joseph. *Antiq.* xx. 7. 1) excited in the minds of the people, encouraged them to give free scope to the passions which arose from the old enmity between the Jews and Samaritans, while the two wily and base procurators were enriched by booty as if it had been spoils of war. This so far was a pleasant game to these men, but in the prosecution of it Roman soldiers lost their life, and, but for the intervention of Quadratus, governor of Syria, a rebellion would have been inevitable. A court martial was held to inquire into the causes of this disaffection, when Felix, one of the accused, was seen by the injured Jews among the judges, and even seated on the judgment-seat, placed there by the president, Quadratus, expressly to outface and deter the accusers and witnesses. Josephus (*Antiq.* xx. 8. 5) reports that under Felix the affairs of the country grew worse and worse. The land was filled with robbers and impostors who deluded the multitude. Felix used his power to repress these disorders to little purpose, since his own example gave no sanction to justice. Thus, having got one Dineas, leader of a band of assassins, into his hands, by a promise of impunity, he sent him to Rome to receive his punishment. Having a grudge against Jonathan, the high-priest, who had expostulated with him on his misrule, he made use of Doras, an intimate friend of Jonathan, in order to get him assassinated by a gang of villains, who joined the crowds that were going up to the temple worship,—a crime which led subsequently to countless evils, by the encouragement which it gave to the Sicarii, or leagued assassins of the day, to whose excesses Josephus ascribes, under Providence, the overthrow of the Jewish state. Among other crimes, some of these villains misled the people under the promise of performing miracles, and were punished by Felix. An Egyptian impostor, who escaped himself, was the occasion of the loss of life to four hundred followers, and of the loss of liberty to two hundred more, thus severely dealt with by Felix (Joseph. *Antiq.* xx. 8. 6; *De Bell. Jud.* ii. 13. 5; comp. Acts xxi. 38). A serious misunderstanding having arisen between the Jewish and the Syrian inhabitants of Cæsarea, Felix employed his troops, and slew and plundered till prevailed on to desist. His cruelty in this affair brought on him, after he was superseded by Festus, an accusation at Rome, which, however, he was enabled to render nugatory by the influence which his brother Pallas had, and exercised to the utmost, with the emperor Nero. Josephus, in his Life (§ iii.), reports that 'at the time when Felix was procurator of Judæa there were certain priests of my acquaintance, and very excellent persons they were, whom, on a small and trifling occasion, he had put into bonds and sent to Rome to plead their cause before Cæsar.'

While in his office, being inflamed by a passion for the beautiful Drusilla, a daughter of King Herod Agrippa, who was married to Azizus, king of Emesa, he employed one Simon, a magician, to use his arts in order to persuade her to forsake her husband and marry him, promising that if she would comply with his suit he would make

her a happy woman. Drusilla, partly impelled by a desire to avoid the envy of her sister, Berenice, was prevailed on to transgress the laws of her forefathers, and consented to a union with Felix. In this marriage a son was born, who was named Agrippa: both mother and son perished in an eruption of Mount Vesuvius, which took place in the days of Titus Cæsar (Joseph. *Antiq.* xx. 7. 2). With this adulteress was Felix seated when Paul reasoned before the judge, as already stated (Acts xxiv. 24). Another Drusilla is mentioned by Tacitus as being the wife (the *first* wife) of Felix. This woman was niece of Cleopatra and Antony. By this marriage Felix was connected with Claudius. Of his third wife nothing is known.

Paul, being apprehended in Jerusalem, was sent by a letter from Claudius Lysias to Felix at Cæsarea, where he was at first confined in Herod's judgment-hall till his accusers came. They arrived. Tertullus appeared as their spokesman, and had the audacity, in order to conciliate the good will of Felix, to express gratitude on the part of the Jews, 'seeing that by thee we enjoy great quietness, and that very worthy deeds are done unto this nation by thy providence' (Acts xxiii. xxiv.). Paul pleaded his cause in a worthy speech; and Felix, consigning the Apostle to the custody of a centurion, ordered that he should have such liberty as the circumstances admitted, with permission that his acquaintance might see him and minister to his wants. This imprisonment the Apostle suffered for a period of two years, being left bound when Felix gave place to Festus, as that unjust judge 'was willing,' not to do what was right, but 'to show the Jews a pleasure' (C. W. F. Walch, *Diss. de Felice Jud. procur.* Jen. 1747).—J. R. B.

FERRET. [Lizard.]

FESTIVALS (מוֹעֲדִים). The Hebrew festivals were occasions of public religious observances, recurring at certain set and somewhat distant intervals. In general they may be divided into two kinds:—1. Those of divine institution; 2. Those of human origin. Those which owe their existence to the authority of God are, the seventh day of the week, or the Sabbath; the Passover; Pentecost; the Feast of Trumpets; the Day of Atonement; the Feast of Tabernacles; the New Moon. Festivals which arose under purely human influences are, the Feast of Lots, or Purim; the Death of Holofernes; the Dedication; the Sacred Fire; the Death of Nicanor.

Reserving details for separate articles on such of these as shall seem to require and justify a distinct treatment, we confine ourselves here to a general outline, with some remarks on the origin and tendency of the chief festivals.

We have inserted the Sabbath for the sake of completeness, and, with the same view, we proceed to set down a few brief particulars respecting the daily service, so that we may at once present a general outline of the temple worship.

At the daily service two lambs of the first year were to be offered at the door of the tabernacle; one in the morning, the other in the evening, a continual burnt-offering. With each lamb was to be offered one-tenth of an ephah of flour, mingled with one-fourth of a hin of fresh oil, for a meat-offering, and one-fourth of a hin of wine for a drink-offering. Frankincense was to be placed on the meat-offering, a handful of which, with the frankincense, was to be burnt, and the remainder was to be eaten by the priest in the holy place, without leaven. The priests were to offer daily the tenth of an ephah of fine flour, half in the morning and half in the evening, for themselves. The high-priest was to dress the lamps in the tabernacle every morning, and light them every evening; and at the same time burn incense on the altar of incense. The people provided oil for the lamps which were to burn from evening to morning: the ashes were removed by a priest, dressed in his linen garment and his linen drawers, and then carried by him out of the camp, in his common dress. Great stress was laid on the regular observance of these requirements (Num. xxviii. 1-8; Exod. xxix. 38-42; Lev. vi. 8-23; Exod. xxx. 7-9; xxvii. 20; Lev. xxiv. 1-4; Num. viii. 2).

Labour was to last not longer than six days. The seventh was a Sabbath, a day of rest, of holy convocation, on which no one, not even strangers or cattle, was allowed to do any servile work. The offender was liable to stoning.

On the Sabbath two lambs of the first year, without blemish, were to be offered for a burnt-offering, morning and evening, with two-tenths of an ephah of flour, mingled with oil, for a meat-offering, and one-half of a hin of wine for a drink-offering, thus doubling the offering for ordinary days. Twelve cakes of fine flour were to be placed every Sabbath upon the table in the tabernacle, in two piles, and pure frankincense laid on the uppermost of each pile. These were to be furnished by the people; two were offered to Jehovah, the rest were eaten by the priests in the holy place (Exod. xxxi. 12; Lev. xxiii. 1; xxvi. 2; Exod. xix. 3-30; xx. 8-11; xxiii. 12; Deut. v. 12-15; Lev. xxiii. 3; xxiv. 5-9; Num. xv. 35; xxviii. 9).

At the *New Moon* festival, in the beginning of the month, in addition to the daily sacrifice, two heifers, one ram, and seven lambs of the first year, were to be offered as burnt-offerings, with three-tenths of an ephah of flour, mingled with oil, for each heifer; two-tenths of an ephah of flour, mingled with oil, for the ram; and one-tenth of an ephah of flour, mingled with oil, for every lamb; and a drink-offering of half of a hin of wine for a heifer, one-third of a hin for the ram, and one-fourth of a hin for every lamb. One kid of the goats was also to be offered as a sin-offering.

The first day of the *seventh month* was to be a Sabbath, a holy convocation, accompanied by the *blowing of trumpets*. In addition to the daily and monthly sacrifices, one ram and seven lambs were to be offered as burnt-offerings, with their respective meat-offerings, as at the usual New Moon festival (Num. xxviii. 11-15; xxix. 1-6; Lev. xxiii. 23-25).

Three times in the year—at the Feast of Unleavened Bread, in the month Abib; at the Feast of Harvest, or of Weeks; and at the Feast of Ingathering, or of Tabernacles—all the males were to appear before Jehovah, at the place which he should choose. None were to come empty-handed, but every one was to give according as Jehovah had blessed him; and there before Jehovah was every one to rejoice with his family, the Levite, the stranger, the fatherless, and the widow (Exod. xxxiii. 14-17; xxxiv. 22-24; Deut. xvi. 16, 17).

The first of these three great festivals, that of Unleavened Bread, called also the Passover, was kept in the month Abib, in commemoration of the rescue of the Israelites by Jehovah out of Egypt, which took place in that month. The ceremonies that were connected with it will be detailed under the head PASSOVER. Every one who was ritually clean, and not on a journey, and yet omitted to keep the Passover, was to be cut off from the people. Any one who was disabled for the observance, either by uncleanness or being on a journey, was to keep the Passover on the fourteenth day of the next month. In order to make the season more remarkable, it was ordained that henceforward the month in which it took place should be reckoned the first of the national religious year (Exod. xii. 2). From this time, accordingly, the year began in the month Abib, or Nisan (March—April), while the civil year continued to be reckoned from Tishri (September—October) (Exod. xii. 3, 14, 27; 43-49; Lev. xxiii. 5; Num. xxviii. 16; Deut. xvi. 1-7). The Passover lasted one week, including two Sabbaths (De Wette, *Archäol.* p. 214). The first day and the last were holy, that is, devoted to the observances in the public temple, and to rest from all labour (Exod. xii. 16; Lev. xxiii. 6; Num. xxviii. 18; Deut. xvi. 8).

On the day after the Sabbath, on the Feast of Passover, a sheaf of the first fruits of the barley harvest was to be brought to the priest to be waved before Jehovah, accompanied by a burnt-offering. Till this sheaf was presented, neither bread nor parched corn, nor full ripe ears of the harvest, could be eaten (Exod. xii. 15-20; xiii. 6-10; Lev. xxiii. 6-8; Deut. xvi. 2-8; Num. xxviii. 17-25).

The Feast of Pentecost or of Weeks was kept to Jehovah at the end of seven weeks from the day of the Festival of Unleavened Bread, on which the sheaf was presented. On the morrow after the seventh complete week, or on the fiftieth day, two wave loaves were presented as first fruits of the wheat-harvest, together with a burnt-offering, a sin-offering, and a peace-offering, &c. The day was a holy convocation, in which no servile work was done. The festival lasted but one day. It is said to have been designed to commemorate the giving of the law on Mount Sinai (Brown's *Antiquities of the Jews*, vol. i. p. 494; Deut. xvi. 9-11; Lev. xiii. 15-21; Num. xxviii. 26-31; xv. 17-21).

The Feast of In-gathering or of Tabernacles began on the fifteenth day of the seventh month, and continued eight days, the first and last being Sabbaths. During the feast all native Israelites dwelt in booths made of the shoots of beautiful trees, palm-branches, boughs of thick-leaved trees, and of the willows of the brook, when they rejoiced with their families, with the Levite, the stranger, the fatherless, and the widow, before Jehovah. Various offerings were made. At the end of every seven years, in the year of release, at the Feast of Tabernacles, the law was required to be read by the priests in the hearing of all the Israelites (Deut. xvi. 13-15; xxxi. 10-13; Lev. xxiii. 39-43; 33-36; Num. xxix. 12-38, 40).

The Feast of Tabernacles was appointed partly to be an occasion of annual thanksgiving after the in-gathering of the harvest (Exod. xxxiv. 22; Lev. xxiii. 39; Deut. xvi. 13), and partly to remind the Israelites that their fathers had lived in tents in the wilderness (Lev. xxiii. 40-43). This feast took place in the end of the year, September or October.

The tenth day of the seventh month was the Day of Atonement—a day of abstinence, a day of holy convocation, in which all were to afflict themselves. Special offerings were made [ATONEMENT] (Lev. xxiii. 26-32; xvi. 1, 34; Num. xxix. 7-11; Exod. xxx. 10).

Brown, in his *Antiquities* (vol. i. p. 520), remarks that the time of the year in which the three great festivals were observed was during the dry season of Judæa. The latter rains fell before the Passover, the former rains after the Feast of Tabernacles; so that the country was in the best state for travelling at the time of these festivals.

On these solemn occasions food came partly from hospitality (a splendid instance of which may be found in 2 Chron. xxxv. 7-9), partly from the feasts which accompanied the sacrifices in the temple, and partly also from provision expressly made by the travellers themselves. It appears that the pilgrims to Mecca carry with them every kind of food that they need, except flesh, which they procure in the city itself. Lodging, too, was afforded by friends, or found in tents erected for the purpose in and around Jerusalem (Helon's *Pilgrimage*; Brown's *Antiquities*).

The three great festivals have corresponding events (but of far greater importance) in the new dispensation. The Feast of Tabernacles was the time when our Saviour was born; he was crucified at the Passover; while at Pentecost the effusion of the Holy Spirit took place.

Brown (*Antiquities*, vol. i. p. 522) has spoken of the defenceless state in which the country lay when all the males were gathered together at Jerusalem. What was to prevent an enemy from devastating the land, and slaying women and children? He refers the protection of the country to the express interposition of God, citing 'the promise,' as found in Exod. xxxiv. 23, 24. He adds, 'During the whole period between Moses and Christ we never read of an enemy invading the land at the time of the three festivals. The first instance on record was thirty-three years after they had withdrawn from themselves the divine protection by imbruing their hands in the Saviour's blood, when Cestius, the Roman general, slew fifty of the people of Lydda, while all the rest were gone up to the Feast of Tabernacles, A.D. 66 (Joseph. *De Bell. Jud.* ii. 19).

The objection, however, which this writer thus meets is founded on the assumption that the law was strictly, uniformly, and lastingly obeyed. But the requirement that all males should appear three times a year before Jehovah is not without some practical difficulty. During the sojourn in the wilderness its observance would not only be easy, but highly useful in preventing the dispersion of individuals or numbers from the main body—an influence the more needful because many persons would, doubtless, stray from time to time in search of pasture. In subsequent and more settled times it must have been a serious inconvenience for all the males of the nation to leave their families unprotected and their business neglected for so many days every year as would be necessary in going to and from Jerusalem. It is true that the seasons of the festivals were well fixed and distributed for the convenience of an

agricultural people—the Passover taking place just before barley-harvest; Pentecost immediately after the same; and Tabernacles after the wheat-harvest; while in winter, when travelling was very difficult, there was no festival. Yet to have to visit Jerusalem thrice in seven months was a serious thing, especially in later times, when Israelites were scattered far abroad. Even if the expense was, as Winer thinks (*Handwörterbuch*), a small consideration, yet the interruption to domestic life and the pursuits of business must have been very great; nor would it be an exaggeration to say that the observance was an impossibility to the Jews, for instance, who were in Babylon, Egypt, Italy, Macedonia, Asia Minor, &c. How far the law was rigorously enforced or strictly obeyed at any time after the settlement in Palestine, it would not be easy to say. Palfrey (*Lectures on the Jewish Scrip.* vol. i. p. 199) supposes that 'a man might well be said to have virtually executed this duty who appeared before the Lord (not in person, but) with his offering, sent by the hand of a friend, as a suitor is said in our common speech to appear in a court of justice, when he is represented there by his attorney;' a conjecture which, to our mind, savours too much of modern ideas and usages. That some relaxation took place, at least in 'the latter days,' appears from John vii. 8, in which more or less of what is voluntary is obviously connected in the mind and practice of our Lord with 'the feast,' though, it must be allowed that the passage is an evidence of the general observance, not to say the universal obligation, in his days, of at least the Feast of Tabernacles.

If, however, there was in practice some abatement from the strict requirements of the law, yet obviously time enough was saved from labour by the strong hand of religion, to secure to the labourer a degree of most desirable and enviable rest. Not, indeed, that all the days set apart were emancipated from labour. At the Feast of Tabernacles, for instance, labour is interdicted only on the first and the last day. So on other occasions business and pleasure were pursued in connection with religious observances. But if all males appeared before Jehovah, even only once a year, they must, in going and returning, as well as in being present at the festival, have spent no small portion of time in abstinence from their ordinary pursuits, and could not have failed to derive singular advantages alike to their bodies and their minds.

The rest and recreation would be the more pleasant, salutary, and beneficial, because of the joyous nature of the religious services in which they were, for the greater part, engaged. These solemn festivals were not only commemorations of great national events, but they were occasions for the reunion of friends, for the enjoyment of hospitality, and for the interchange of kindness. The feasts which accompanied the sacrifices opened the heart of the entire family to joy, and gave a welcome which bore a religious sanction, even to the stranger, the fatherless, and the widow (Michaelis, *Mos. Recht*, art. 199).

How much, too, would these gatherings tend to foster and sustain a spirit of nationality! By intercourse the feelings of tribe and clan would be worn away; men from different parts became acquainted with and attached to each other; partial interests were found to be more imaginary than real; while the predominant idea of a common faith and a common rallying-place at Jerusalem, could not fail to fuse into one strong and overpowering emotion of national and brotherly love, all the higher, nay, even the lower feelings, of each Hebrew heart.

'If,' says Michaelis (*Mos. Recht*, art. 198, Smith's Transl.), 'any of the tribes happened to be jealous of each other or involved in civil war, their meeting together in one place for the purposes of religion and sociality, had a tendency to prevent their being totally alienated; and even though this had happened, it gave them an opportunity of re-uniting.' He adds that 'the separation of the ten tribes from the tribes of Judah under Rehoboam and Jeroboam could never have been permanent, had not the latter abrogated one part of the law of Moses relative to festivals. In order to perpetuate the separation, he prohibited the annual pilgrimages to Jerusalem, and appointed two places for divine service within his own territories' (1 Kings xii. 27-30). 'He also,' adds Michaelis, 'transferred the celebration of the feast of Tabernacles, and probably the other two festivals likewise, to a different season from that appointed by Moses' (1 Kings xii. 33).

Another effect of these festivals Michaelis has found in the furtherance of internal commerce. They would give rise to something resembling our modern fairs. Among the Mahometans similar festivals have had this effect.

In Article 199, the same learned writer treats of the important influence which the festivals had on the Calendar, and the correction of its errors.

These festivals, in their origin, had an obvious connection with agriculture. Passover saw the harvest upon the soil; at Pentecost it was ripe; and Tabernacles was the festival of gratitude for the fruitage and vintage (Michaelis, art. 197). The first was a natural pause after the labours of the field were completed; the second, after the first-fruits were gathered; and the third, a time of rejoicing in the feeling that the Divine bounty had crowned the year with its goodness. Spring, summer, and autumn, which have moved all nations of men with peculiar and characteristic emotions, had each its natural language and symbols in the great Israelitish festivals, a regard to which may well be supposed to have had an influence in the mind of the legislator, as well as in the consuetudinary practices of the people. How far a merely natural influence prevailed in these observances, how far Moses found consuetudinary usages, which, in establishing these festivals, he adopted with such modifications and sanctions as he judged best, and had at his command, it is at this period impossible to determine, and no great aid, probably, can be derived in the case from the practices of other nations; but the reader who wishes to investigate the subject in this view may consult a recent work entitled *De Feriarum Hebrœarum origine ac ratione*, auctore H. Ewald; Gottingæ, 1841; and Creuzer, *Symbol.* ii. 597.

The Feast of Purim or of Lots originated in the gratitude of the Jews in escaping the plot of Haman, designed for their destruction. It took its name from the lots which were cast before Haman by the astrologers, who knew his hatred against Mordecai and his wish to destroy his

family and nation (Esther iii. 7; ix. 2, 5). The feast was suggested by Esther and Mordecai, and was celebrated on the 13th, 14th and 15th days of the twelfth month (Adar). The 13th was a fast, being the day on which the Jews were to have been destroyed; and the 14th and 15th were a feast held in commemoration of their deliverance. The fast is called the Fast of Esther, and the feast still holds the name of Purim. Prideaux (*Connex.*; Brown, *Antiq.* i. 575) styles it the Bacchanalia of the Jews.

The slaughter of Holofernes by the hand of Judith, the consequent defeat of the Assyrians, and the liberation of the Jews, were commemorated by the institution of a festival (Judith xiv. xv).

The Feast of Dedication was appointed by Judas Maccabæus, on occasion of the purification of the temple, and reconstruction of the altar, after they had been polluted by Antiochus Epiphanes. The hatred of this monarch towards the Jews had been manifested in various ways: he forbade their children to be circumcised, restrained them in the exercise of their religion, killed many who disobeyed his mandates, burnt the books of the law, set up idolatry, carried off the altar of incense, the shewbread-table, and the golden candlestick, with the other vessels and treasures of the temple; and went to such extremes as to sacrifice a sow upon the altar of burnt-offerings, build a heathen altar on the top of that sacred pile, and with broth of swine's flesh to sprinkle the courts and the temple (1 Macc. i.; 2 Macc. v.; Prideaux, *sub* A.C. 167-8, 170).

The new dedication took place on the 25th day of the ninth month, called Chisleu, in the year before Christ 170. This would be in December. The day was chosen as being that on which Antiochus, three years before, had polluted the altar by heathen sacrifices.

The joy of the Israelites must have been great on the occasion, and well may they have prolonged the observance of it for eight days. A general illumination formed a part of the festival, whence it obtained the name of the Feast of Lights.

In John x. 22 this festival is alluded to when our Lord is said to have been present at the Feast of Dedication. The historian marks the time by stating 'it was winter.'

The festival 'of the Fire' was instituted by Nehemiah to commemorate the miraculous rekindling of the altar-fire. The circumstances are narrated in 2 Macc. i. 18.

The defeat by Judas Maccabæus of the Greeks when the Jews 'smote off Nicanor's head and his right hand which he stretched out so proudly,' caused the people to 'rejoice greatly, and they kept that day a day of great gladness; moreover, they ordained to keep yearly this day, being the thirteenth day of Adar'—February or March (1 Macc. vii. 47).

Some other minor fasts and festivals may be found noticed in Brown's *Antiquities*, i. 586; and in Simon's *Dictionnaire de la Bible*, art. 'Fêtes.'—J. R. B.

FESTUS. Porcius Festus was the successor of Felix as the Roman governor of Judæa, to the duties of which office he was appointed by the emperor Nero (Joseph. *Antiq.* xx. 8. 9; *De Bell. Jud.* ii. 1. 1) in the first year of his reign (Winer, *Handwörterbuch*, in voc.). One of his first official acts was hearing the case of the apostle Paul, who had been left in prison by his predecessor. He was at least not a thoroughly corrupt judge; for when the Jewish hierarchy begged him to send for Paul to Jerusalem, and thus afford an opportunity for his being assassinated on the road, he gave a refusal, promising to investigate the facts at Cæsarea, where Paul was in custody, alleging to them, 'it is not the manner of the Romans to deliver any man to die before that he which is accused have the accusers face to face, and have licence to answer for himself concerning the crime laid against him' (Acts xxv. 16). On reaching Cæsarea he sent for Paul, heard what he had to say, and, finding that the matters which 'his accusers had against him' were 'questions of their own superstition, and of one Jesus which was dead, whom Paul affirmed to be alive,' he asked the apostle whether he was willing to go to Jerusalem, and there be tried, since Festus did not feel himself skilled in such an affair. Paul, doubtless because he was unwilling to put himself into the hands of his implacable enemies, requested 'to be reserved unto the hearing of Augustus,' and was in consequence kept in custody till Festus had an opportunity to send him to Cæsar. Agrippa, however, with his wife Bernice, having come to salute Festus on his new appointment, expressed a desire to see and 'hear the man.' Accordingly Paul was brought before Festus, Agrippa, and Bernice, made a famous speech, and was declared innocent. But having appealed to Cæsar, he was sent to Rome.

Festus, on coming into Judæa, found the country infested with robbers, who plundered the villages and set them on fire; the Sicarii also were numerous. Many of both classes were captured, and put to death by Festus. He also sent forces, both of horse and foot, to fall upon those that had been seduced by a certain impostor, who promised them deliverance and freedom from the miseries they were under if they would but follow him as far as the wilderness. These troops destroyed both the impostor and his dupes.

King Agrippa had built himself a splendid dining-room, which was so placed that, as he reclined at his meals, he commanded a view of what was done in the Temple. The priests, being displeased, erected a wall so as to exclude the monarch's eye. On which Festus took part with Agrippa against the priests, and ordered the wall to be pulled down. The priests appealed to Nero, who suffered the wall to remain, being influenced by his wife Poppæa, 'who was a religious woman' (Joseph. *Antiq.* xx. 8. 11). Festus died shortly afterwards. The manner in which Josephus speaks is favourable to his character as a governor (*De Bell. Jud.* iv. 14. 1.)—J. R. B.

FIG-TREE. [TEENAH.]

FIGURES. [TYPES.]

FIR. [BEROSH.]

FIRE. Besides the ordinary senses of the word 'fire,' which need no explanation, there are other uses of it in Scripture which require to be discriminated. The destructive energies of this element and the torment which it inflicts, rendered it a fit symbol of—1. Whatever does damage and consumes (Prov. xvi. 27; Isa. ix. 18);—2. Of severe trials, vexations, and misfor-

tunes (Zech. xii. 9; 1 Cor. iii. 13, 15; 1 Pet. i. 7);—3. Of the punishments beyond the grave (Matt. v. 22; Mark ix. 44; Rev. xiv. 10; xxi. 8) [HELL].

'Fire from heaven,' 'fire of the Lord,' usually denotes lightning in the Old Testament; but, when connected with sacrifices, the 'fire of the Lord' is often to be understood as the fire of the altar, and sometimes the holocaust itself (Exod. xxix. 18; Lev. i. 9; ii. 3; iii. 5, 9; Num. xxviii. 6; 1 Sam. ii. 28; Isa. xx. 16; Mal. i. 10).

The uses of fire among the Hebrews were various:—

1. The domestic use, for cooking, roasting, and baking [BREAD; FOOD].

2. In winter they warmed themselves and their apartments by 'a fire of coals' (Jer. xxxvi. 22, 23; Luke xxii. 30). In the rooms it would seem that a brazier with charcoal was usually employed, as is still the case in western Asia, although the ovens and fire-places used in baking bread might have been, and doubtless were, as now, often employed to keep rooms properly warm [BREAD; COAL].

3. The religious use of fire was for consuming the victims on the altar of burnt-offerings, and in burning the incense on the golden altar: hence the remarkable phrase in Isa. xxxi. 9—'the Lord, whose fire is in Zion, and his furnace in Jerusalem.'

4. In time of war torches were often carried by the soldiers; which explains the use of torches in the attack of Gideon upon the camp of the Midianites (Judg. vii. 6). This military use of torches was very general among ancient nations, and is alluded to by many of their writers (Statius, *Theb.* iv. 5. 7; Stobæus, *Serm.* p. 194; Michaelis, in *Symbol. Liter. Bremens.* iii. 254).

5. Burning criminals alive does not appear to have been known to the Hebrews; but as an additional disgrace the bodies were in particular cases burnt after death had been inflicted (Josh. vii. 25; compare verse 15); and it is in this sense that the allusions to burning as a punishment are to be understood, except when the reference is to a foreign usage, as in Dan. iii. 22, 24, sq.

6. In time of war towns were often destroyed by fire. This, as a war usage, belongs to all times and nations; but among the Hebrews there were some particular notions connected with it, as an act of strong abhorrence, or of devotement to abiding desolation. The principal instances historically commemorated are the destruction by fire of Jericho (Josh. vi. 24); Ai (Josh. viii. 19); Hazor (Josh. xi. 11); Laish (Judg. xviii. 27); the towns of the Benjamites (Judg. xx. 48); Ziklag, by the Amalekites (1 Sam. xxx. 1); Jazer, by Pharaoh (1 Kings ix. 16); and the temple and palaces of Jerusalem by Nebuchadnezzar (2 Kings xxv. 9). Even the war-chariots of the Canaanites were burnt by the Israelites, probably on the principle of precluding the possibility of recovery, by the enemy, of instruments of strength for which they had themselves no use. The frequency with which towns were fired in ancient warfare is shown by the very numerous threats by the prophets that the towns of Israel should be burned by their foreign enemies. Some great towns, not of Israel, are particularly named; and it would be an interesting task to trace, as far as the materials exist, the fulfilment of these prophecies in those more marked examples. Among the places thus threatened we find Damascus (Isa. xliii. 12, 13), Gaza, Tyre, Teman (Amos i. 7, 10, 11). The temples and idols of a conquered town or people were very often burned by the victors, and this was enjoined as a duty to the Israelites (Deut. vii. 5, 25; xii. 13; xiii. 6; Isa. liii. 12, 13).

There were some special regulations respecting the use of fire among the Israelites. The most remarkable of these was the prohibition to light a fire on the Sabbath (Exod. xxxiii. 3). As the primary design of this law appears to have been to prevent the proper privileges of the Sabbath-day from being lost to any one through the care and time required in cooking victuals (Exod. xvi. 23), it is doubted whether the use of fire for warmth on the Sabbath-day was included in this interdiction. In practice, it would appear that the fire was never lighted or kept up for cooking on the Sabbath-day, and that consequently there were no fires in the houses during the Sabbaths of the greater part of the year; but it may be collected that, in winter, fires for warming apartments were kept up from the previous day. Michaelis is very much mistaken with respect to the climate of Palestine, in supposing that the inhabitants could, without much discomfort, dispense with fires for warmth during winter (*Mosäisches Recht*, iv. 195). The modern Jews, although there is no cooking in their houses, have fires on the Sabbath-day, which are attended to by a Christian servant; or a charwoman is hired to attend to the fires of several houses, which she visits repeatedly during the day.

Another law required the damage done by a conflagration in the fields to be made good by the party through whose incaution it had been kindled (Exod. xxii. 6). This was a most useful and necessary law in a country where the warmth and drought of summer soon render the herbage and underwood highly combustible, so that a fire once kindled often spreads most extensively, and produces disastrous consequences (Judg. ix. 15; xv. 5). This law was calculated to teach caution in the use of fire to the herdsmen in the fields, who were the parties most concerned. And it is to be remembered that the herdsmen were generally substantial persons, and had their assistant shepherds, for whose imprudence they were made responsible. Still no inference is to be drawn from this law with regard to fires breaking out in towns, the circumstances being so very different.

In the sacerdotal services no fire but that of the altar of burnt-offerings could lawfully be used. That fire was originally kindled supernaturally, and was ever after kept up. From it the fire used in the censers for burning incense was always taken; and for neglecting this and using common fire, Nadab and Abihu were struck dead by 'fire from heaven' (Lev. x. 8, sq.; Num. iii. 4, 26, 61).

Respecting 'passing through the fire,' see MOLOCH; and for the 'pillar of fire,' see EXODUS.

FIRMAMENT is the translation given in the Authorized Version and the Vulgate for the Hebrew רקיע *rakeeah* (Gen. i. 6), which is more fully defined by רקיע השמים (Gen. i. 14, 15, 17), that which is distended, expanded—the expanse of heaven, *i. e.* the visible arch or vault of heaven resting on the earth.

With some old astronomers the *firmament* is the orb of the fixed stars, or the highest of all the heavens. But in Scripture, and in common language, it is used for the middle regions, the space or expanse appearing like an arch immediately above us in the heavens. Many of the ancients, and of the moderns also, account the firmament a fluid substance; but those who gave it the name of 'firmament' must have regarded it as solid, and so we would infer from Gen. i. 6, where it forms the division between water and water.

Plato, in his *Timæus*, makes mention of the visible heaven under the notion of *τάσις* (from *τείνω, to extend*), not unlike the Hebrew derivation.

The Hebrews seem to have considered the *firmament* as transparent, like a crystal or sapphire (Ezek. i. 22; Dan. xii. 3; Exod. xxiv. 10; Rev. iv. 6), thus making it different from the brazen or iron heaven of Homer.

In the Ptolemaic astronomy, the *firmament* is called the eighth heaven or sphere, with respect to the seven spheres of the planets, which it surrounds. It is supposed to have two motions, a diurnal motion imparted to it by the *primum mobile*, from east to west, about the poles of the ecliptic, and another opposite motion from west to east; which last is completed, according to Tycho, in 25,412 years; according to Ptolemy, in 36,000; and according to Copernicus, in 25,800; in which time the fixed stars return to the same points in which they were at the beginning. This period is called the *Platonic*, or *Great Year* [ASTRONOMY].—E. M.

FIRST-BORN. The privileges of the first-born son, among the Hebrews, are indicated under BIRTHRIGHT.

FIRST-FRUITS. There are various regulations in the law of Moses respecting first-fruits, which would be of much interest to us could we, in every case, discern the precise object in view. No doubt the leading object, as far as regards the offering of the first-fruits to God, was, that all the after-fruits and after-gatherings might be consecrated in and through them; and it was not less the dictate of a natural impulse that the first-fruits should be offered to God in testimony of thankfulness for his bounties. Hence we find some analogous custom among most nations in which material offerings were used. There are, however, some particulars in the Mosaical regulations which these considerations do not adequately explain.

1. FIRST-FRUITS OF FRUIT-TREES. It was directed that the first-fruits of every tree whose fruit was used for food, should, for the first three years of bearing, be counted 'uncircumcised,' and regarded as unclean (Lev. xix. 23, 24). It was unlawful to sell them, to eat them, or to make any benefit of them. It was only in the fourth year of bearing that they were accounted 'holy,' and the fruit of that year was made an offering of first-fruits, and was either given to the priests (Num. xviii. 12, 13), or, as the Jews themselves understand, was eaten by the owners of it 'before the Lord, at Jerusalem,' as was the case with second tithe. After the fourth year all fruits of trees were available for use by the owner. As the general principle of the law was, that only that which was perfect should be used for offerings, it is an obvious inference that the fruits of trees were considered imperfect until the fourth year; and if so, the law may have had the ulterior object of excluding from use crude, immature, and therefore unwholesome fruits. Michaelis (iii. 267-8), indeed, finds a benefit to the trees themselves in this regulation: 'The economical object of the law is very striking. Every gardener will teach us not to let fruit-trees bear in their earliest years, but to pluck off the blossoms; and for this reason, that they will thus thrive the better, and bear more abundantly afterwards, since, if we may not taste the fruit the first three years, we shall be the more disposed to pinch off the blossoms, and the son will learn to do this of his father. The very expression "to regard them as uncircumcised," suggests the propriety of pinching them off; I do not say *cutting* them off, because it is generally the hand and not a knife that is employed in the operation.'

2. FIRST-FRUITS OF THE YEARLY INCREASE. Of these there were two kinds—1. *The first-fruits in the sheaf* (Lev. xxiii. 10). 2. *The first-fruits in the two wave-loaves* (Lev. xxiii. 17). These two bounded the harvest, that in the sheaf being offered at the beginning of the harvest, upon the 15th of the month Nisan; the other at the end of the harvest, on the Feast of Pentecost. These two are both called תנופות *tenuphoth*, 'shake or wave-offerings.' 3. *The first of the dough*, being the twenty-fourth part thereof, which was given to the priests (Num. xv. 20); and this kind of offering was not neglected even after the return from Babylon (Neh. x. 37). 4. *The first-fruits of the threshing-floor*. These two last are called תרומות *terumoth*, or 'heave-offerings;' the one, the 'heave-offering of the threshing-floor,' the other 'the heave-offering of the dough.' The words *tenuphoth* and *terumoth* both signify 'shake-offering,' 'heave-offering,' or 'wave-offering;' but with the difference that the *terumoth* was offered by a waving of elevation, moving the oblation upward and downward, to signify, as we are told, that Jehovah was the God both of the heaven and earth; but the *tenuphoth* was offered by waving of agitation, to and fro, from the right hand to the left, from east to west, from north to south; which is alleged to have been in the way of an acknowledgment that Jehovah was the Lord of the whole world (See Godwyn's *Moses and Aaron*, vi. 2. pp. 214, 215; also, Lewis's *Origines*, i. 143-146).

The oblation of the first-fruits of the threshing-floor was distinguished by the Jewish writers into two sorts. The *first* of these was the first-fruits of seven things only, namely, wheat, barley, grapes, figs, pomegranates, olives, and dates. These the Talmudists distinguish by the name of *Bikkurim*, which signifies 'the choicest part,' or, what was first ripe. The treatise or section bearing that title in the Talmud contains all the regulations by which practical effect was given, or sought to be given, to the law. It is there stated that the owner was at liberty to bring in what quantity he pleased as first-fruits; but in gathering, he always bound about with rushes the portions he designed for the priests, and said, 'Let this be for the first-fruits.' The *second* sort consisted of corn, wine, oil, and whatever other produce was fit for the support of human life. Under this class of first-fruits was included the first of the fleece, by which the priests were provided with clothes, as by the other offerings with food. The hair of goats, which are

shorn in the East, was included under this denomination.

The first-fruits were brought up to Jerusalem with great pomp and ceremony. All the people of a given district assembled on an appointed day in one of the towns, and lodged in the streets. On the following morning the chief of the party gave the signal for departure in the words, 'Arise, let us go to Zion, to the house of the Lord our God!' An ox, destined for a thank-offering, went before them, with gilded horns, and an olive crown upon his head; and a pipe was also played before them as they marched on, laden with the finest products of their land. When they drew nigh to Jerusalem they 'crowned their first-fruits,' that is, they adorned the baskets with flowers, and arranged their offerings so as to make the most advantageous and imposing display on entering the city. On coming nearer, the chief men, high officers, and treasurer of the temple, came forth to meet them and receive them with honour; and as they went by, all the workmen of the city stood up and saluted them, saying, 'O, our brethren, inhabitants of the city N——, ye are welcome.' The pipe still played till the party came to the mount of the temple; every one then, however high or noble, took his own basket upon his shoulder, and went forward till he came to the court of the temple. The Levites then sang, 'I will extol thee, O Lord, because thou hast exalted me, and hast not made mine enemies to rejoice over me.' The offerer, having the basket still upon his shoulder, then began to recite the passage, 'I profess this day,' &c. (Deut. xxvi. 3-10); and when he came to the part, 'A Syrian ready to perish was my father,' he took down the basket from his shoulder and paused, while the priest waved the offering before the altar; the rest of the passage was then recited; after which the offerer placed the basket of offerings before the altar, worshipped God, and went out. It was usual with those who were liberally disposed to hang turtle-doves or pigeons about their baskets, and these formed part of the offering. As each offering was left in the basket, that receptacle formed, in fact, a beneficial, though not a ceremonial part of the offering, and the Talmudists tell us of princes who, for that reason, presented their offerings in baskets of gold. The first-fruits became the property of the course of priests which was in actual service. The party who brought them was obliged to spend the night following his offering in Jerusalem, but was at liberty to return home the ensuing morning.

It is obvious that this and some other of the apparently onerous obligations of the law, cannot be properly appreciated or understood when regarded in the 'dry light' of abstract duties or exactions. They were surrounded by engaging and picturesque associations, calculated to make their observance a matter of pride and pleasure to all the parties concerned.

FISH (דג *dag*; Gr. ἰχθύς, Gen. ix. 2; Num. xi. 22; Jonah ii. 1, 10; Matt. vii. 10; xiv. 17; xv. 34; Luke v. 6; John xxi. 6, 8, 11). Fishes, strictly so called, that is, oviparous, vertebrated, cold-blooded animals, breathing water by means of gills or branchiæ, and generally provided with fins, are not unfrequently mentioned in the Bible, but never specifically. In the Mosaic law (Lev. xi. 9-12), the species proper for food are distinguished by having scales and fins, while those without scales are held to be unclean, and therefore rejected. The law may have given rise to some casuistry, as many fishes have scales, which, though imperceptible when first caught, are very apparent after the skin is in the least dried. The species which were known to the Hebrews, or at least to those who dwelt on the coast, may have been very numerous, because the usual current of the Mediterranean sets in, with a great depth of water, at the Straits of Gibraltar, and passes eastward on the African side until the shoals of the Delta of the Nile begin to turn it towards the north: it continues in that direction along the Syrian shores, and falls into a broken course only when turning westward on the Cyprian and Cretan coasts. Every spring, with the sun's return towards the north, innumerable troops of littoral species, having passed the winter in the offings of Western Africa, return northward for spawning, or are impelled in that direction by other unknown laws. A small part only ascends along the Atlantic coast of Spain and Portugal towards the British Channel, while the main bodies pass chiefly into the Mediterranean, follow the general current, and do not break into more scattered families until they have swept round the shores of Palestine. The Pelagian, or truly deep sea fishes, in common with the indigenous species, remain the whole year, or come about midsummer, and follow an uncertain course more in the centre and towards the deepest waters. Off Nice alone Risso (*Ichthyol. de Nice*) found and described 315 species; and there is every reason to believe that the coasts of Tyre and Sidon would produce at least as great a number. The name of the latter place, indeed, is derived from the Phœnician word fish, and it is the oldest fishing-establishment for commercial purposes known in history. Industry and security alone are wanting to make the same locality again a flourishing place in this respect. The Hebrews had a more imperfect acquaintance with the species found in the Red Sea, whither, to a certain extent, the majority of fishes found in the Indian Ocean resort. Beside these, in Egypt they had anciently eaten those of the Nile; subsequently those of the lake of Tiberias and of the rivers falling into the Jordan; and they may have been acquainted with species of other lakes, of the Orontes, and even of the Euphrates. The supply, however, of this article of food, which the Jewish people appear to have consumed largely, came chiefly from the Mediterranean; and we have the authority of Neh. xiii. 16, for the fact, that Phœnicians of Tyre actually resided in Jerusalem as dealers in fish; which must have led to an exchange of that commodity for corn and cattle. Those which might be eaten, because they had scales and fins, were among the most nutritious and common, probably such as still abound on the coast; being genera of *Percidæ*, *Sciænidæ*, and other families. It is difficult to select the most interesting of these, and to point them out with other names than are absolutely scientific, because many are unknown on our coasts, and others have names indeed, but nearly all repetitions of such as occur in England, without being of the same species. The best catalogue hitherto attempted is in Kitto's *Palestine*, vol. i.; to which numerous additions might be made, but that it appears preferable to give here only a general outline, with some exceptions as to the most

important species. Taking the Cuvierian system for our guide, we have of the *Percidæ*, or perch tribes, both in the seas and rivers of Palestine and Egypt, several species of perch (*Perca*) properly so called; *Lates calcarifer*, or perch of the Nile, once held sacred at Latopolis; Basse (*Labrax*), of which the *L. Lupus* ascends the fresh water of rivers, and anciently brought an incredible price at Rome, if caught in the Tiber above a certain bridge, and weighed somewhat heavy. It frequents the whole circle of the Mediterranean and Black Sea. *Sillago sihama* of the Red Sea, known by the Oriental Frankish name of *leeche*, transferred from the Mediterranean side, where it is bestowed upon two species of the cod-fish family, because all these species are of exquisite flavour; though it may be doubted whether these, like many others having very small scales, were considered admissible in the Hebrew market. A proportion of the eight or ten species of Merrow (*Serranus*) and Barbers (*Anthias*) may have been held similarly objectionable. The *Sphyræna*, or barracuta of the Mediterranean; surmullets (*Mullus*), several species of gurnard (*Trigla*), and of flying gurnard (*Dactylopterus*), frequent the seas of Palestine. But Sciænoid and Sparoid genera offer the greatest number of species, and are particularly abundant in all parts of the Mediterranean, coming in troops at certain seasons. They are edible, and mostly resplendent with large scales. *Sciæna umbra* (*Aquila?*), or great sea-bream, sometimes near seven feet long; *Corvina sciæna nigra*, *Umbrina cirrhosa*, &c. The Sparoids of the Levant contain several species of *Sargus* (sheepsheads), *Chrysophris* (giltheads), *Pagrus*, or rosy Sparus; *Pagellus*, among which the celebrated *Pag. Mormyrus* runs up the Nile; *Dentex mahsena* and *D. harak* of the Red Sea; several species of *Boops* and *Gerres*, or rock-fish; *Gerres oyena*, &c.

Next we have the great tribe of *Scomberidæ*, or mackerels, with numerous genera, and still more abundant species, frequenting the Mediterranean in prodigious numbers, and mostly excellent for the table; but, being often without perceptible scales, they may have been of questionable use to the Hebrews. All the species resort to the deep seas, and foremost of them is the genus *Thynnus*, our tunny, a name that may be derived from the Hebrew or Phœnician תַּן *than* [WHALE]. It is abundant at certain seasons in the offing of every part of the Mediterranean, but is most successfully pursued in the western part and about Sicily, and is frequently seen on the coasts of Candia and Cyprus. The three or four species which enter or remain in the seas of the Levant, commonly called Bonnetos and Albicores, are all observed to delight in moving against the current. Of this family, but less frequent, is the great sword-fish (*Xiphias*), oftenest seen to the eastward of Sicily. The genus *Scomber* (mackerel, properly so called) offers two or three, and of the Scad (*Caranx*) at least six species. Both are very numerous in their seasons. Among them *Caranx petaurista* (skipjack) is often seen dancing on the calm surface of deep water, and even in shore about Tyre and Sidon; but *Seriola speciosa* belongs to the Red Sea. Omitting species of the *Auxis*, *Sarda*, *Cibium*, and *Naucrates*, or pilot-fish, found in every sea, we may name *Vomer Alexandrinus*, Gimel-el-Bahr, or camel-fish of the Arabs; *Stromateus fiatola*, most common on the Barbary and Syrian shores; the genus *Coryphæna* (dolphin of seamen), whereof *Cor. Hippurus* is often noticed chasing the flying-fish (*Exocætus*) off Cyprus; and there are several other subgenera belonging to this family in every part of the Levantine seas.

Passing without notice a great number of less important genera, we come to the Mugiloid family (*Mugilidæ*). The sea-mullets (*Mugil*, properly so called) afford at least five species, and among these the real *Mugil Cephalus* is one found all round the coast of Africa, from the Red Sea to Alexandria, and is valuable in every part of the Mediterranean. There are besides several others in both seas. Many species of other families exist on the coast of Palestine, but are of no general importance, excepting, perhaps, one of the genus *Lophius*, or sea-devil (fishing-frog, or angler), reaching in the Mediterranean to five feet in length; and another species in the Red and Eastern seas, little less: both are hideous monsters in appearance, with the mouth of sufficient width to swallow their own bulk. They have tentacula or filiform appendages on the head; and in hot seas they crawl over rocks and in the sands partially above water. It seems that one of this genus, the Kapa Moramola of Malabar, is typical of Vishnou in his avatar of Matsya, when he is fabled, under the form of a fish, to have drawn the ark of Noah by the filaments on his head to the mountain of Naubundana, the Ararat of Hindu legends. The idol is still worshipped by the name of Jugger-nat, or Somnauth, in the likeness of a Lophius, almost obliterated in the carving so that it resembles a human fist, having a wide mouth at the knuckles, with a nose and eyes on the back. Such was the image which Mahmoud, sultan of Ghizni, shattered in 1025, and found to be a receptacle of riches. That of Poor-Bunda bears the same shape; and the figure at the black pagoda of Juggernauth still retains some traits of the primitive legend, though deformed by others still more absurd; but they serve to trace one of the many pagan reminiscences of the patriarch Noah, and form another version of the Philistine Dagon.

Among other families of fishes not yet adverted to, the labroid (*Labridæ*, Wrasse of Pennant) abounds in genera and species; as also the *Scarus* (parrot-fish), whereof two species at least frequent the seas of Alexandria, Crete, and Cyprus. *Scarus viridis* and *Scarus Cretensis*, one of which, no doubt, was the green specimen which Dr. Clarke did not recognise at Jaffa when shown him by an Arab: the Cretan species was once considered of sufficient importance among Roman epicures to cause an officer of high rank to be sent with a squadron of vessels for the sole purpose of obtaining and conveying a certain number of living fish to stock the Tyrrhenian sea. Genera of carps (*Cyprinidæ*) are particularly abundant in the fresh waters of Asia. It was from thence Europe and England obtained them. Among these the orfe is still deemed sacred at Orfah (Ur of Scripture?), where numbers are kept in the piscina of the mosque dedicated to Abraham. Of pikes (*Esocidæ*) are found chiefly marine genera, such as gar-fish (*Belone*), mackerel-jack (*Scomber Esox*), and Balaboo (*Hemiramphus*), to which may be added flying fish (*Exocætus*), all frequenting the Syrian coast. After these may be ranged the

genus *Mormyrus*, whereof the species, amounting to six or seven, are almost exclusively tenants of the Nile and the lake of Tiberias, and held among the most palatable fish which the fresh waters produce. One species, *Mormyrus Oxyrinchus*, was worshipped by the idolatrous Egyptians.

Cat or Sheat-fish (*Siluridæ*), with from two to eight barbels at the mouth, are a family of numerous genera, all of which, excepting the *Loricariæ*, are destitute of a scaly covering, and are consequently unclean to the Hebrews; and some species are said to be poisonous or electrical. Several of them were held by the ancient Gentile nations, and by some of the modern, in high estimation, such as the black fish (*Simak-el-aswad*) of Aleppo, probably *Silurus Clarias Gronovii*, the *shilbe* of the Nile, and several others. Of salmons (*Salmonidæ*) *Myletes dentex*, or *Hasselquisti*, belongs to the best edible fishes of the Nile; and *Clupeidæ* (herrings), beside a specie of shad (*Alosa*), offer several delicate sardines (*Eugraulis*), abundant on the coast of Africa; and the fierce bechir (*Polypterus*) of the Nile is praised for the table. Next follow the cod or gadoid species (*Gadidæ*), already partially noticed, being, besides several others, such as *Merluccius Lepidion*, present about Tyre. *Pleuronectes*, or flat-fish, found off the Egyptian coasts, and eel-shaped genera, bred abundantly in the lakes of the Delta. Finally, there are the cartilaginous orders, where we find the file-fish (genus *Balistes*), having a species (*B. Vetula*) in the waters of the Nile; and true chondropterygians, containing the sharks, numerous in genera and species, both in the Mediterranean and Red Sea. We notice only *Carcharius Lamia*, the white or raging shark, often found of enormous size off Alexandria, and always attended by several pilot-fish (*Naucrates*), and the saw-fish (*Pristis Antiquorum*), most dreaded by the pearl-fishers in the Persian Gulf, and which has been seen in the Red Sea pursuing its prey even into the surf, with such force and velocity that, on one occasion, half of a fish cut asunder by the saw flew on shore at the feet of an officer while employed in the surveying service. On rays we shall only add that most of the genera are represented by species in either sea, and in particular the sting rays (*Trigon*), and electric rays (*Torpedo*), with which we close our general review of the class, although many interesting remarks might be subjoined, all tending to clear up existing misconceptions respecting fishes in general—such as that cetaceans, or the whale tribe, belong to them; and the misapplication of the term when tortoises and oysters are denominated fish; for the error is general, and the Arabs even include lizards in the appellation.

Though the Egyptian priesthood abstained from their use, all the other castes dwelling in the valley of the Nile chiefly subsisted on the fish of the river, while they capriciously abhorred those of the sea. There was a caste of fishermen; and allusion to the artificial reservoirs and fish-ponds of Egypt occurs in the Prophets (Isa. xix. 8-10).

But the Hebrews could draw only a small supply from the lake of Tiberias and the affluents of the Jordan. On the coast the great sea-fisheries were in the slack waters, within the dominion of the Phœnicians, who must have sent the supply into the interior in a cured or salted state; although the fact involves the question how far in that condition, coming out of Pagan hands, consumption by a Hebrew was strictly lawful: perhaps it may be presumed that national wants had sufficient influence to modify the law. The art of curing fish was well understood in Egypt, and unquestionably in Phœnicia, since that industrious nation had early establishments for the purpose at the Golden Horn or Byzantium, at Portus Symbolorum in Tauric Chersonesus, and even at Calpe (Bisepharat?), in the present bay of Gibraltar. With regard to the controversy respecting the prophet Jonah having been swallowed by a huge sea-monster [Whale], it may be observed that great cetaceans occur in the Mediterranean, as well as great sharks, and that, in a case where the miraculous intervention of Almighty power is manifest, learned trifling about the presence of a mysticete, or the dimensions of its gullet, is out of place.

The form of a fish (*Notius Poseidon*) was, from remote ages, a type of protective dominion, which the symbolizing spirit of the ancients caused to pass into Christianity; as appears from Eusebius (*Life of Constantine*), and St. Augustine (*De Civitate Dei*). On the walls of the oldest catacombs of Rome the representation of the ΙΧΘΥΣ is frequently discernible, and always interpreted as an emblem of the Saviour.

Bochart's conclusions (*De pisce Tobiæ*, p. 748), respecting the fish which assailed Tobit, are totally inadmissible. *Silurus Glanis* is not a fish known in South Western Asia; but it may be worth noticing that the *Seesar* of the Indus is a crocodile, probably of the genus *Gavial*, which grows to a great size, is eaten, and has a gall-bladder, still used to cure obstinate wounds and defluctions. Whether any great saurian now ascends the Euphrates or Tigris may be a question; but as these animals in the East are ranked with fish, and pass from fresh water into salt, they are probably still found along the whole southern coast of Persia, and may anciently have frequented the rivers in question. We notice these particulars as they answer the conditions of Tobit's fish more completely than any other hitherto pointed out.—
C. H. S.

FITCHES. [Ketsach.]

FLAG. [Achu.]

FLAGON (אֲשִׁישָׁה; Sept. λάγανον). The word thus rendered in the English Bibles (2 Sam. vi. 19; 1 Chron. xvi. 3; Hos. iii. 1; Cant. ii. 5) means rather a *cake*, especially of dried figs or raisins, pressed into a particular form [Fruits].

FLAX. [Pishteh.]

FLEA (פַּרְעֹשׁ, *pulex irritans*, Class *aptera*, Linn.; *siphonaptera*, Latr.; *aphanaptera*, Kirby) occurs only 1 Sam. xxiv. 14; xxvi. 20, where David thus addresses his persecutor Saul at the cave of Adullam: 'After whom is the king of Israel come out? after whom dost thou pursue?—after a flea;' 'The king of Israel is come out to seek a flea!' In both these passages our translation omits the force of the word אֶחָד, which is found in the Hebrew of each: thus, 'to pursue after, to seek *one* or a *single* flea.' In the former passage the Septuagint preserves it—ψύλλου ἑνός; in the latter it omits all mention of the flea, and reads *καθὼς καταδιώκει ὁ νυκτικόραξ ἐν τοῖς ὄρεσι*, 'as the owl hunteth on the mountains.' But another Greek version in the *Hexapla* reads

ψύλλον ἕνα. The Vulgate preserves the word in both passages, *pulicem unum*. David's allusion to the flea displays great address. It is an appeal founded upon the immense disparity between Saul as the king of Israel, and himself as the poor contemptible object of the monarch's laborious pursuit. Hunting a flea is a comparison, in other ancient writings, for much labour expended to secure a worthless result.

Although this insect has been used as a *popular* emblem for insignificance, yet, when considered by itself, it has high claims upon the attention of the naturalist. Even to the naked eye there is something pleasing in its appearance, and elegant in its postures; but it is indebted to the *microscope* for our acquaintance with the flexible, highly polished, and ever clean suit of armour in which it is encased *cap-a-pie*, its finely-arched neck, large beautiful eye, antennæ, muscular jointed legs, its piercer and sucker—forming one most complicated instrument—the two long, hooked, sharp claws, in which its legs severally terminate. The agility of the flea places it at the head of all the leaping insects, when its strength is considered in relation to its size, it being able to leap, unaided by wings, 200 times its own length. It was certainly with misplaced wit that Aristophanes (*Nub.* 145) endeavoured to ridicule Socrates for having measured ψύλλαν ὁπόσους ἅλλοιτο τοὺς αὑτῆς πόδας, 'how many of its own lengths, at one spring, a flea can hop.' Such is the happy change in the state of science that philosophers have since done this with impunity: they have also traced the interesting career of this insect from the round smooth egg deposited on the creatures that can afford food to the larva, falling down through the hair to the skin; the shining pearl-coloured active larva, feeding on the scurfy surface of the cuticle, rolling itself into a ball when disturbed; the cocoon or silken bag which it spins around itself; and its re-appearance as a perfect insect. It is more than likely that the flea, besides participating in the happiness of all animated nature, and supplying a link in the universal chain of being, as well as serving the incidental use of chastising uncleanliness, may also, along with many other tribes of insects, serve the purpose of the *scavenger*, in clearing away some source of disease (see Cuvier's *Animal Kingdom*, Lond. 1834, art. *Pulex*). Linnæus has assigned a personal service to mankind to some *other* insects, with which popular associations are even less pleasing, but which unerringly appear where the habits of mankind render their presence needful. Owing to the habits of the lower orders, fleas abound so profusely in Syria, especially during the spring, in the streets and dusty bazaars, that persons of condition always change their long dresses upon returning home. There is a popular saying in Palestine that 'the king of the fleas keeps his court at Tiberias;' though many other places in that region might dispute the distinction with that town (Kitto's *Physical History of Palestine*, p. 421).—J. F. D.

FLESH (בָּשָׂר). This word bears a variety of significations in Scripture:—

1. It is applied, generally, to the whole animated creation, whether man or beast; or, to all beings whose material substance is flesh (Gen. vi. 13, 17, 19; vii. 15, &c.

2. But it is more particularly applied to 'mankind'; and is, in fact, the only Hebrew word which answers to that term (Gen. vi. 12; Ps. xlv. 3; cxlv. 21; Isa. xl. 5, 6). In this sense it is used somewhat figuratively to denote that evil principle which is opposed to the spirit, and to God, and which it is necessary to correct and subdue (Gen. vi. 5; Job x. 4; Isa. xxxi. 3; Matt. xvi. 17; Gal. i. 16, &c.).

3. The word 'flesh' is opposed to נֶפֶשׁ *nephesh*, 'soul,' or 'spirit,' just as we oppose *body* and soul (Job xiv. 22; Prov. xiv. 30; Isa. x. 18).

4. The ordinary senses of the word, namely, the flesh of men or beasts (Gen. xli. 2, 19; Job xxxi. 23, 25), and flesh as used for food (Exod. xvi. 12; Lev. vii. 19), are both sufficiently obvious; and with respect to the latter see FOOD.

5. The word 'flesh' is also used as a modest general term for the secret parts, in such passages as Gen. xvii. 11; Exod. xxviii. 42; Lev. xx. 2; Ezek. xxiii. 20; 2 Peter ii. 7, 8, 10; Jude vii. In Prov. v. 11 the 'flesh of the intemperate' is described as being consumed by infamous diseases.

FLOCKS. [PASTURAGE.]
FLOOD. [DELUGE.]
FLOUR. [BREAD; MILL; OFFERINGS.]
FLOWERS. [PLANTS.]
FLUTE. [MUSIC.]

FLY. This word is used in the English Version to represent the two Hebrew words עָרֹב and זְבוּב. 1. עָרֹב occurs Exod. viii. 21, 22, 24, 29, 31; Ps. lxxviii. 45, and cv. 21; all which passages relate to the plague of flies inflicted upon Pharaoh and his people. In the Sept. it is uniformly rendered κυνόμυια, or the dog-fly. In Exodus Jerome renders it by the following phrases and words, omne genus muscarum, muscæ diversi generis, muscæ hujusmodi, musca gravissima, and musca. In the Psalms he renders it cynomyia. It seems most probable that a *single species only* is intended, whatever it may be, from the way in which it is introduced, 'I will send אֶת־הֶעָרֹב, the *arob*,' compared with verses 29, 31, 'there remained not אֶחָד one,' that is, one *arob*, οὐδεμία, nec una quidem. The words, the *arob*, may be substituted for 'swarms of flies,' throughout the narrative, with only an apparent exception in the 24th verse; but there, the words עָרֹב כָּבֵד, &c. may be rendered, the *arob* came numerously or grievously, (Sept. παραγένετο ἡ κυνόμυια πλῆθος, 'the dog-fly arrived, a multitude'); since instances of a similar use of the word כָּבֵד occur Gen. l. 9; Exod. ix. 3; x. 14, &c., where it appears to be used like the word *gravis* by the Romans. It has, however, been much debated what particular species is meant. Nothing can be gathered from the references to it in the Hebrew, farther than that it was 'upon Pharaoh, and upon the Egyptians,' that it filled their houses, covered the ground, corrupted or destroyed the land (Query, the inhabitants, Gen. vi. 12), and devoured their persons. (See also Wis. xvi. 9.) The rendering of the Septuagint, κυνόμυια, is entitled to much consideration. It is evidently compounded of κύων, a dog, and μυῖα, a fly; and because both the one and the other of these creatures come uninvited, on some occasions, and though driven away, as often return, so the word formed of the union of the two, is used by ancient authors, to indicate *consummate im-*

prudence. Thus Homer represents Mars as applying the epithet to Minerva, for instigating the gods to quarrel (*Il.* xxi. 394). It is also referred to, as an insect, by Ælian, who, in describing the myops, tabanus, or horse-fly, says, it is similar to what is called the κυνόμυια (*Hist. Anim.* iv. 51). Philo, in his *Life of Moses* (i. 23, p. 401, ed. Mangey), expressly describes it as a biting insidious creature, which comes like a dart, with great noise, and rushing with great impetuosity on the skin, sticks to it most tenaciously. It seems likely that Jerome, in translating Exodus, derived the word from ערב, 'to mingle,' and understood by it a mixture of noxious creatures, as did Josephus, Aquila, and all the ancient translators. The diversity of Jerome's renderings in Exodus, however, betokens his uncertainty, and in the Psalms he has adopted that of the Septuagint. More modern writers, reasoning on other senses of the Hebrew word, and which are very numerous, have proposed several different insects. Thus, one of the meanings of ערב is 'to darken,' and Mouffet observes that the name cynomyia agrees with no kind of flies better than with those *black*, large, compressed flies, which boldly beset cattle, and not only obtain ichor, as other flies, but also suck out blood from beneath, and occasion great pain. He observes that they have no proboscis, but, instead of it, have double sets of teeth, like wasps, which they infix deeply in the skin; and adds that they greatly infest *the ears of dogs* (*Theat. Insect.* cxi.). Pliny describes an insect of this kind (*Hist. Nat.* xi. 40). So also Columella (vii. 13). See Pliny by Grandsagne and Cuvier, Parisiis, 1828, vol. ii. p. 461, note. Others have proposed the blatta Orientalis or Ægyptia of Linnæus, as answering considerably to the characteristics of voracity, intrusion into houses, &c. &c. (Forskal, *Descrip. Animal.*, Præf. p. 22). The miracle involved in the plague of flies consisted, partly at least, in the creature being brought against the Egyptians in so great an abundance during *winter*. The particular species is, however, at present undetermined. 2. זבוב is probably the *generic* word for fly. It occurs Eccles. x. 1, and Isa. vii. 18, Sept. μυῖα, musca. It enters into composition in the word בעל זבוב, fly-Baal, *i. e.* the god Baal (2 Kings i. 2, 3, 16), an oracular deity of the Ekronites [BAALZEBUB]. The phrase hissing, or rather *histing*, for the fly (Isa. vii. 18) is explained in the article BEE. (Bochart, a Rosenmüller; Rosenmüller, in loc.; Michaelis, *Suppl. ad Hebraic. Lex.* No. 1962; Oedmann's *Verm. Sammlungen*, H. ii. p. 150; Winer, *Bibl. Handwört.*)—J. F. D.

FOLD. [PASTURAGE.]

FOOD. The necessary act of taking food was, at a very early period of the world's history, connected immediately with religion. If regard was had to the source whence came the means of subsistence, it was natural that there should be some distinct recognition of that great and bountiful Being who gave rain from heaven, and fruitful seasons, filling men's hearts with joy and gladness (Acts xiv. 17). If scope was given to the feelings which bind man to man, and lead him to eat and drink in communion with his brethren, the additional pleasure hence experienced, and a due respect for the laws of hospitality, would awaken in the heart the religious sympathies; and the sanctions of religion would soon come to cement bonds which convenience had originated, and to raise and hallow enjoyments which were designed and fitted for the preservation of the species. Man, too, has in all ages been led to set apart and offer to the Divinity a portion at least of what in each case was esteemed of highest value. But food is of all things the most valuable, since it is our life. In the grosser anthropomorphitic systems of religion, the gods would also be considered as being gratified by food-offerings; if, indeed, some sort of ambrosia and nectar were not needed by them. Then those who served at the altar seemed to have a right to live by the altar (1 Cor. ix. 13); priests would therefore encourage, not without a corresponding approval on the part of the worshipper, such offerings and such appropriations to themselves as would at least supply the recurring wants of nature. And if we look at the final cause of this connection between the act of eating and the services of religion, we shall find a yet deeper reason, as well as a more powerful one, for their being occasionally united. Eating implies not only personal but social gratifications, if not of a very high order, yet of a very intense degree; and the appeal of religion to man while in the enjoyment of these pleasures is likely to be welcomed, heard, and obeyed. The social and the religious affections are thus aroused, made deep and intense, and then permanently blended together. The pleasing feelings which arise from the gratifications of the palate, and the enjoyments, if not endearments, of social intercourse, are thus, at least in part, transferred to religion, with which, by the natural workings of the heart, they become permanently and indissolubly associated.

How wise, then, was the provision which connected eating with the observances of the Mosaic religion. Especially when any signal event was to be commemorated, what could be so effectual as a ceremonial involving eating and drinking? The paschal lamb, for instance, and the unleavened bread, spoke in pleasing tones and by striking emblems, to each successive generation, of the great historical fact of which they were designed to be the perpetual memento. In like manner 'the Lord's Supper' (1 Cor. xi. 20), the breaking of bread from house to house (Acts ii. 46), and the ἀγάπαι, or love-feasts, 'feasts of charity' (Jude 12), were all, especially the first, both wisely designed and admirably fitted to bring into play, in connection with religion, the better feelings of humanity, to maintain in everlasting remembrance the events which they symbolized, to make eating and drinking an act of religion, and to make religion a pleasure. Strange, indeed, would it have been if Christianity, proceeding as it did from Him who knew well what was in man, and therefore knew well the powers by which man is swayed, and being, as it is, so wonderfully adapted to meet and supply our wants, had not made, on behalf of its great purposes, an appeal to that appetite and to those wants and pleasures which are not least among the great moving powers of both individual and social existence.

The productions of a country, at an early period of the world, necessarily determined its food. Palestine abounded with grain and various kinds of vegetables, as well as with animals of different

species. Such, accordingly, in general, was the sustenance which its inhabitants took.

The use of fire, and the state of the arts of life in a country, must also have important influence on its cookery; in other words, will go far to determine the state in which the natural productions of the earth will be eaten. If the grain is to become bread, a long and by no means easy process has to be gone through. Skill in preparing food is therefore held in high repute; so that, as in Homer, princes slay the cattle, and poetry details the process by which the carcass is made ready for being eaten (*Iliad*, i. 457).

Bread formed 'the staff of life' to the ancient Hebrews even more than to ourselves; but the modes of preparing it have been noticed under other heads [BREAD; MILL].

On a remarkable occasion a calf, tender and good, is taken, slain, dressed (roasted, most probably, Judg. vi. 19; Gen. xxvii. 7; 1 Sam. ii. 13; Exod. xii. 8, 9; boiling was not known till long afterwards), and set before the guests, while the entertainer (Abraham) respectfully stood at their side, doubtless to render any desirable service. The sauce or accompaniments on this occasion were butter and milk. From ch. xix. 3, it may be inferred that the bread was unleavened.

The cases, however, to which reference has been made were of a special nature; and from them, as well as from what is recorded touching Isaac and Esau and Jacob, it appears that flesh meat was reserved as food for guests, or as a dainty for the sick; lentils, pulse, onions, grain, honey, and milk being the ordinary fare.

The agreeable, and perhaps in part the salubrious qualities of salt, were very early known and recognised: in Lev. ii. 13, it is expressly enjoined, 'Every oblation of thy meat-offering shalt thou season with salt; with all thine offerings shalt thou offer salt.'

Locusts were a permitted (Lev. xi. 22) and a very common food. At the present day they are gathered by the Bedouins in the beginning of April, and being roasted on plates of iron, or dried in the sun, are kept in large bags, and, when needed, eaten strewed with salt by handfuls.

Of four-footed animals and birds, the favourite food were sheep, goats, oxen, and doves. There are few traces of the eating of fish, at least in Palestine (Num. xi. 5; Lev. xi. 9-22). In the last passage a distinction is made between certain fish which might be eaten, and others which were forbidden. 'These shall ye eat of all that are in the waters: whatsoever hath fins and scales in the waters, in the seas, and in the rivers, them shall ye eat; and all that have not fins and scales, they shall be an abomination unto you.'

The distinction of clean and unclean animals, and of animals which might and those which might not be eaten, is found to have existed to a great extent in ancient Egypt. Among fish the oxyrinchus, the phagrus, and the lepidotus, were sacred, and might not even be touched. The inhabitants of Oxyrinchus objected to eat any fish caught by a hook, lest it should have been defiled by the blood of one they held so sacred. The phagrus was the eel; and the reason of its sanctity, like that of the oxyrinchus, was probably owing to its unwholesome qualities; the most effectual method of forbidding its use being to assign it a place among the sacred animals of the country.

Neither the hippopotamus nor the crocodile appears to have been eaten by the ancient Egyptians. Some of the Egyptians considered the crocodile sacred, while others made war upon it (Herod. ii. 69). In some places it was treated with the most marked respect, fed, attended, adorned, and after death embalmed. But the people of Apollinopolis, Tentyris, Heracleopolis, and other places, held the animal in abhorrence: how far they carried their dislike may be seen in Juvenal (*Sat.* xv.); though something, probably, must be deducted from the account, in consideration of poetic licence.

Cats as well as dogs were held in high esteem by the ancient Egyptians. The former especially were objects of superstitious regard. When a cat died in a house a natural death, a general mourning throughout the family ensued; and to kill one of these revered animals was a capital offence.

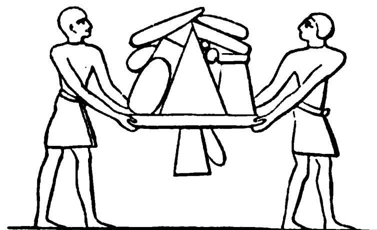
Though it appears that swine frequently formed part of the stock of an Egyptian farm-yard, yet was the animal unclean and an abomination in the estimation of the Egyptians. Herodotus tells us (ii. 47) that if any one but touched a pig in passing, he was compelled to bathe himself and wash his garments; and those of the natives who were swineherds were a degraded caste, with whom others would not intermarry. It appears, however, from the historian's narrative, that, at the time when they sacrificed swine to the moon and to Bacchus, the Egyptians were wont to eat of their flesh, though on other occasions they scrupulously abstained from it.

Usages, if not laws, of a similar tendency, have existed among all nations. In our own country such usages are found. We abstain from some animals, we devour others. Often it would be very difficult to assign any reason, still more difficult to assign a sufficient reason. The cat is spared, the rabbit eaten. The beetle children torture, but value and preserve the lady-cow. A Frenchman delights in a frog, but, in common with an Englishman, loathes the idea of a rat. Caprice, custom, and casual associations, have often more to do in this matter than any definite or intelligible reason.

The Mosaic laws which regulated the use of animal food may be found in Lev. xi. and Deut. xiv. The grounds of many of these regulations may be ascertained with a greater or less degree of probability, provided the student is well acquainted with the mind and spirit of Hebrew antiquity. Considerations drawn from idolatrous usages, regard to health, the furtherance of agriculture, and established customs and tastes, had in each case an influence in the promulgation of these laws.

In the earliest times water was the common drink. That wine of an intoxicating tendency was drunk at a very early period appears from what happened to Noah (Gen. ix. 20), who seems to have made as well as drunk wine. Bread and wine are spoken of in Gen. xiv. 18, as offered for refreshment to Abraham by Melchizedek, king of Salem. Water was sometimes put to the wine; at others a strong drink was made by mixing with the wine aromatic herbs (Ps. lxxv. 9; Isa. v. 22), or a decoction derived from them; myrrh was

used for this purpose. Date-wine was in use, and probably the Egyptian or malt-wine, (ζῦθος, οἶνος κρίθινος (Herod. ii. 77). Jerome (*Opp.* iv. 364, ed. Bened.) says that 'drink, called Sicera by the Hebrews (שכר), is every kind which can inebriate, or that which is made from grain, or of the juice of apples, or when the honey-comb is made (decoquuntur) into a sweet and barbarous beverage, or the fruit of the palm expressed into a liquor, and when water receives a colour and a consistency from prepared herbs.' 'The common people' (Mark xii. 37) drank an acrid sort of wine, which is rendered vinegar in our English Version (Ruth ii. 14; Matt. xxvii. 48). The Orientals frequently used wine in excess, so as to occasion intoxication, whence are drawn many striking figures in Holy Writ (Is. v. 11; xxviii. 1; xlix. 26; Jer. viii. 14; ix. 14; xvi. 48; Deut. xxxii. 42; Ps. lxxviii. 65). That indulgence in wine was practised in very ancient days is manifest from there being in the court of Pharaoh, at the time of Joseph, state-officers, who had charge of the wine, and served the monarch with it when he drank (Gen. xl. 1, 11; comp. Neh. i. 11; 1 Kings x. 5; 2 Chron. ix. 4).



For drinking-vessels there were used the cup and the bowl (Jer. xxxv. 5; Amos vi. 6; Exod. xxv. 33; Num. vii. 13, 84). The cup was generally of brass covered with tin, in form resembling a lily, sometimes circular. It is still used by

288. [Wine-cups. Persepolis.]

travellers, and may be seen in both shapes in the ruins of Persepolis (1 Kings vii. 26). The bowl (Exod xxv. 33) assumed a variety of shapes, and bears many names. Some of these 'chargers' appear, from the presents made by the princes of Israel (Num. vii.), to have been of large size and great splendour; some were silver, some gold (1 Kings x. 21).

In Eastern climes the chief meal, or what we term dinner, is, in consequence of the heat of the middle period of the day, deferred till towards evening, a slight repast being taken before noon

289. [Egyptian Table with Dishes.]

(Adam, *Rom. Antiq.* p. 377, ed. Major; Potter, ii. 625; Chardin, iv.; Jahn, i. 2). But from Gen. xliii. 16, 25, it appears to have been the custom to dine at noon in the days of the patriarchs. The same seems to have been the case in Palestine at a later period (1 Kings xx. 16; comp. Acts x. 10; Luke xi. 37). Convivialities, however, were postponed till evening, and sometimes protracted to the following morning (Isa. v. 11; Mark vi. 21; Luke xiv. 24). The meal was preceded by washing of hands (Luke xi. 38; Mark vii. 2), which the mode of eating rendered necessary; and by an invocation of the divine blessing (1 Sam. ix. 13), termed in Samuel ברכה, and in Greek εὐλογία, εὐχαριστία, blessing, giving of thanks

290. [Modern Syrians at Meat.]

(Luke ix. 16; John vi. 11). Similar customs prevailed among the Greeks and Romans. Jahn (*Bib. Antiq.* p. 68) has given the short prayer, as preserved in the Talmud, which the Jews used, as follows: 'Blessed be thou, O Lord our God, King of the world, who hast produced this food (or this drink) from the earth (or the vine)' (Matt. xiv. 19; xv. 36; xxvi. 27).

The Hebrews, like the Greeks and Romans in their earlier history, ate sitting (Gen. xxvii. 19; Judg. xix. 6; 1 Sam. xx. 25). A carpet was spread, on which the meal was partaken. At a later period, however, particularly when Palestine came under the influence of Roman manners, the Jews reclined on cushions or couches (Esth. i. 6; Amos vi. 4; Luke vii. 37; ἀνεκλίθη, not 'sat,' as in the common translation, but 'reclined'). The custom of giving preference in point of seat or position to guests of high consideration appears from 1 Sam. ix. 22, to have been of ancient date (Amos iii. 12). In the time of Christ (Luke xiv. 8) the Pharisees, always eager for distinction, coveted the place of honour at meals and feasts. Women were not admitted to eat with the men, but had their meals supplied in their own private apartment (Esth. i. 6-9). In Babylon and Persia, however, females mingled with males on festive occasions (Dan. v. 2). In general the manner of eating was similar to what it is in the East at the present day. Special care was taken of favoured persons (Gen. xliii. 34; 1 Sam. i. 4; ix. 22; John xiii. 26). Neither knives, forks, nor spoons were employed for eating. The food was conveyed from the dish to the mouth by the right hand. The parties sat with their legs bent under them round a dish placed in the centre, and either took the flesh meat with their fingers from the dish, or dipped bits of their bread into the savoury mess, and conveyed them

to their mouths. In Ruth ii. 14, Boaz says to Ruth, 'Dip thy morsel in the vinegar;' which explains the language of our Lord, John xiii. 26, 'He it is to whom I shall give a sop when I have dipped it.' This presenting of food to a person is still customary, and was designed originally as a mark of distinction, the choice morsels being selected by the head of the family for the purpose. Drink was handed to each one of the guests in cups or goblets, and, at a very ancient period, in a separate cup to each person. Hence the word cup is used as equivalent to what we term a man's lot or destiny (Ps. xi. 6; lxxv. 8; Isa. li. 22; Matt. xxvi. 39).—J. R. B.

FOOL. The fool of Scripture is not an idiot, but an absurd person; not one who does not reason at all, but one who reasons wrong; also any one whose conduct is not regulated by the dictates of reason and religion. Foolishness, therefore, is not a privative condition, but a condition of wrong action in the intellectual or sentient being, or in both (2 Sam. xiii. 12, 13; Ps. xxxviii. 5). In the Proverbs, however, 'foolishness' appears to be sometimes used for lack of understanding, although more generally for perverseness of will.

FOOT. Of the various senses in which the word 'foot' is used in Scripture, the following are the most remarkable. Such phrases as the 'slipping' of the foot, the 'stumbling' of the foot, 'from head to foot' (to express the entire body), and 'foot-steps' (to express tendencies, as when we say of one that he walks in another's footsteps), require no explanation, being common to most languages. The extreme modesty of the Hebrew language, which has perhaps seldom been sufficiently appreciated, dictated the use of the word 'feet,' to express the parts and the acts which it is not allowed to name. Hence such phrases as the 'hair of the feet,' the 'water of the feet,' 'between the feet,' 'to open the feet,' 'to cover the feet,' all of which are sufficiently intelligible, except perhaps the last, which certainly does not mean 'going to sleep' as some interpreters suggest, but 'to dismiss the refuse of nature.'

'To be under any one's feet' denotes the subjection of a subject to his sovereign, or of a servant to his master (Ps. viii. 6; comp. Heb. ii. 8; 1 Cor. xv. 26); and was, doubtless, derived from the symbolical action of conquerors, who set their feet upon the neck or body of the chiefs whom they had vanquished, in token of their triumph. This custom is expressly mentioned in Scripture (Josh. x. 23), and is figured on the monuments of Egypt, Persia, and Rome. See an instance in the cut No. 256.

In like manner, 'to be at any one's feet,' is used for being at the service of any one, following him, or willingly receiving his instructions (Judg. iv. 10). The last passage, in which Paul is described as being brought up 'at the feet of Gamaliel,' will appear still clearer, if we understand that, as the Jewish writers allege, pupils actually did sit on the floor before, and therefore at the feet of, the doctors of the law, who themselves were raised on an elevated seat.

'Lameness of feet' generally denotes affliction or calamity, as in Ps. xxxv. 15; xxxviii. 18; Jer. xx. 10; Micah iv. 6, 7; Zech. iii. 9.

'To set one's foot' in a place signifies to take possession of it, as in Deut. i. 36; xi. 24, and elsewhere.

'To water with the feet' (Deut. xi. 10) implies that the soil was watered with as much ease as a garden, in which the small channels for irrigation may be turned, &c. with the foot [GARDEN].

An elegant phrase, borrowed from the feet, occurs in Gal. ii. 14, where St. Paul says, 'When I saw that they walked not uprightly'—literally, 'not with a straight foot,' or 'did not foot it straightly.'

Nakedness of feet expressed mourning (Ezek. xxiv. 17). This must mean appearing abroad with naked feet; for there is reason to think that the Jews never used their sandals or shoes within doors. The modern Orientals consider it disrespectful to enter a room without taking off the outer covering of their feet. It is with them equivalent to uncovering the head among Europeans. The practice of feet-washing implies a similar usage among the Hebrews [FEET, WASHING OF]. Uncovering the feet was also a mark of adoration. Moses put off his sandals to approach the burning where the presence of God was manifested (Exod. iii. 5). Among the modern Orientals it would be regarded the height of profanation to enter a place of worship with covered feet. The Egyptian priests officiated barefoot; and most commentators are of opinion that the Aaronite priests served with bare feet in the tabernacle, as, according to all the Jewish writers, they did afterwards in the temple, and as the frequent washings of their feet enjoined by the law seem to imply [SANDALS].

The passage, 'How beautiful upon the mountains are the feet of him that bringeth glad tidings, that publisheth peace' (Isa. lii. 7), appears to signify that, although the feet of messengers and travellers are usually rendered disagreeable by the soil and dust of the way, yet the feet of these blessed messengers seemed, notwithstanding, even beautiful, on account of the glad tidings which they bore.

Respecting the 'washing of feet,' see ABLUTION and WASHING.

FOREHEAD. Marks upon the forehead, for the purpose of distinguishing the holy from the profane, are mentioned in Ezek. xi. 4, and again in Rev. vii. 3. These passages may be explained by reference to the customs of other nations. Thus the Rev. J. Maurice, speaking of the rites which must be performed by the Hindoos before they can enter the great pagoda, says, 'an indispensable ceremony takes place, which can only be performed by the hand of a Brahmin; and that is, the impressing of their foreheads with the *tiluk*, or mark of different colours, as they may belong either to the sect of Veeshnu or Seeva. If the temple be that of Veeshnu, their foreheads are marked with a longitudinal line, and the colour used is vermilion. If it be the temple of Seeva, they are marked with a parallel line, and the colour used is turmeric of saffron. But these two grand sects being again sub-divided into numerous classes, both the size and the shape of the *tiluk* are varied in proportion to their superior or inferior rank. In regard to the *tiluk* I must observe, that it was a custom of very ancient date in Asia, to mark their servants. It is alluded to in these words of Ezekiel, where the Almighty commands his angels to 'Go through the midst

of the city, and set a mark on the foreheads of the men who sigh for the abominations committed in the midst thereof' (ix. 4).

291.

The classical idolaters used to consecrate themselves to particular deities on the same principle. The marks used on these occasions were various. Sometimes they contained the name of the god; sometimes his particular ensign, as the thunderbolt of Jupiter, the trident of Neptune, the ivy of Bacchus, &c.; or else they marked themselves with some mystical number whereby the god was described. Thus, the sun, who was signified by the number 608, is said to have been represented by the two numeral letters XH.

If this analogy be admitted, the mark on the forehead may be taken to be derived from the analogous custom among the heathen of bearing on their forehead the mark of the gods whose votaries they were. Some, however, would rather understand the allusion to refer to the custom of marking cattle, and even slaves, with the sign of ownership [STIGMATA].

There has been much speculation respecting the mark itself. It was a Jewish notion that it was the letter ת, because that was the first letter of the Hebrew word תורה 'the law,' as if it pointed out those who were obedient to the sacred code; or because it was the first letter of the word תחיה, 'thou shalt live.' It is indeed alleged that the angel had orders to write this mysterious letter with ink upon the foreheads of the righteous, and with blood upon the foreheads of the wicked; in the one case signifying, 'thou shalt live,' and in the other, 'thou shalt die.' The early Christian commentators readily adopted the notion that the mark was the letter ת, but alleged that its form was that of a cross in the old Samaritan alphabet, which was used in the time of Ezekiel. Indeed both Jerome and Origen distinctly allege that the letter still bore that form in their time: and although the letter does not retain that form in the present Samaritan alphabet, there is certainly evidence of its being represented on old coins by the character ┬; and another proof arises from the fact of its being represented by T in the Greek alphabet, which is derived from the Phoenician. It having been thus settled that the character marked on the forehead was the letter ת in its ancient cruciform shape, it was easy to reach the conclusion that the mark on the forehead denoted salvation by the cross of Christ.

This is very ingenious; but there is no proof that the mark was the letter ת, or any letter at all. The word employed is תו *tav*, and means simply a mark or sign (not a letter), and is so rendered in the Septuagint, the Targum, and by the best Jewish commentators. The *name* of the letter ת is, however, probably from this word, and in this fact we have perhaps the source of the conjecture. It is, however, a curious circumstance that the analogous Arabic word توي denotes a mark in the form of a cross, which was branded on the flanks or necks of horses and camels (Freytag's *Lex. Arab.* s. v.). See Hävernick's *Commentar. über Ezekiel*, and Gill's *Exposition*, on Ezek. ix. 4.

FORESKIN, the prepuce, which was taken off in circumcision [CIRCUMCISION].

FOREST. Tracts of wood-land are mentioned by travellers in Palestine, but rarely what we should call a forest. The word translated by 'forest' is יער, which does not necessarily mean more than 'wood-land.' There are, however, abundant intimations in Scripture that the country was in ancient times much more wooded than at present, and in parts densely so. The localities more particularly mentioned as woods or forests are—

1. *The forest of cedars on Mount Lebanon* (1 Kings vii. 2; 2 Kings xix. 23; Hos. xiv. 5, 6), which must have been much more extensive formerly than at present; although, on the assumption that the *eres* of Scripture (ארז) is the *pinus cedrus*, or so-called 'cedar of Lebanon,' its growth is by no means confined, among those mountains, to the famous clump of ancient trees which has alone engaged the attention of travellers [EREZ]. The American missionaries and others, travelling by unfrequented routes, have found woods of less ancient cedar-trees in other places.

The name of '*House of the Forest of Lebanon*' is given in Scripture (1 Kings vii. 2; x. 27) to a palace which was built by Solomon in, or not far from, Jerusalem, and which is supposed to have been so called on account of the quantity of cedar-trees employed in its construction; or, perhaps, because the numerous pillars of cedar-wood suggested the idea of a forest of cedar-trees.

2. *The forest of oaks*, on the mountains of Bashan. The trees of this region have been already noticed under ALLON and BASHAN.

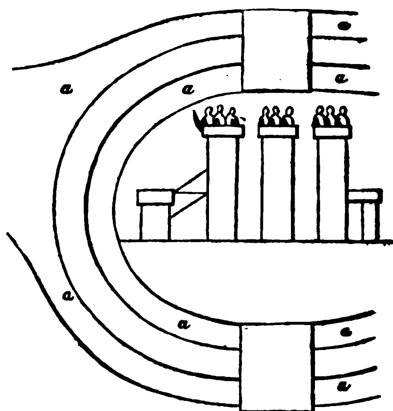
3. *The forest or wood of Ephraim*, already noticed under EPHRAIM, 4.

4. *The forest of Hareth*, in the south of Judah, to which David withdrew to avoid the fury of Saul (1 Sam. xxii. 5). The precise situation is unknown.

FOREST is used symbolically to denote a city, kingdom, polity, or the like (Ezek. xiv. 26). Devoted kingdoms are also represented under the image of a forest, which God threatens to burn or cut down. See Isa. x. 17, 18, 19, 34, where the briers and thorns denote the common people; 'the glory of the forest' are the nobles and those

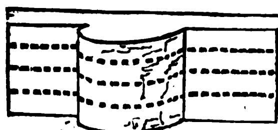
of highest rank and importance. See also Isa. xxxii. 19; xxxvii. 24: Jer. xxi. 14; xxii. 7; xlvi. 23; Zech. xi. 2. (Wemyss's *Clavis Symbolica.*)

FORNICATION. In Scripture this word occurs more frequently in its symbolical than in its ordinary sense.

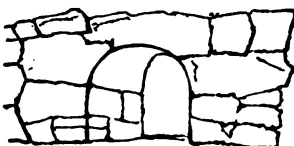


In the Prophets woman is often made the symbol of the church or nation of the Jews, which is regarded as affianced to Jehovah by the covenant on Mount Sinai. In Ezek. xvi. there is a long description of that people under the symbol of a female child, growing up to the stature of a woman, and then wedded to Jehovah by entering into covenant with him. Therefore when the Israelites acted contrary to that covenant, by forsaking God and following idols, they were very properly represented by the symbol of a harlot or adulteress, offering herself to all comers (Isa. i. 2; Jer. ii. 20; Ezek. xvi.; Hos i. 2; iii. 11). And thus fornication, or adultery (which is fornication in a married state), became, and is used as, the symbol of idolatry itself (Jer. iii. 8, 9; Ezek. xvi. 26, 29; xxiii. 37). See Wemyss's *Clavis Symb.*, art. 'Woman.'

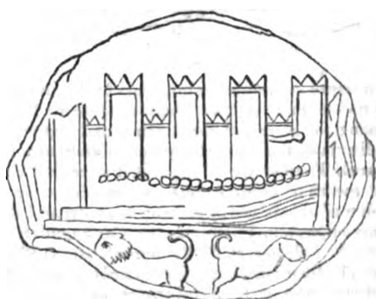
FORTIFICATIONS. 'FENCED CITIES.' Inventions for the defence of men in social life are older than history. The walls, towers, and



292.

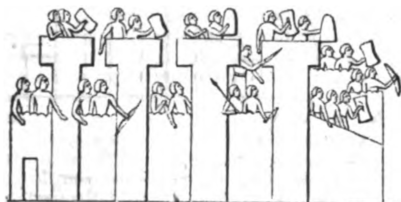


gates represented on Egyptian monuments, though dating back to a period of fifteen centuries before the Christian era, bear evidence of an advanced state of fortifications—of walls built of squared stones, or of squared timber judiciously placed on the summit of scarped rocks, or within the circumference of one or two wet ditches, and furnished on the summit with regular battlements to protect the defenders. All these are of later invention than the accumulation of unhewn or rudely chipped uncemented stones, piled on each other in the form of walls, in the so-called Cyclopean, Pelasgian, Etruscan, and Celtic styles, where there are no ditches, or towers, or other gateways than mere openings occasionally left between the enormous blocks employed in the work. As the three first styles occur in Etruria they show the progressive advance of military architecture, and may be considered as more primitive, though perhaps posterior to the era when the progress of Israel, under the guidance of Joshua, expelled several Canaanitish tribes, whose system of civilization, in common with that of the rest of Western Asia, bore an Egyptian type, and whose towers and battlements were remarkably high, or rather were erected in very elevated situations. When, therefore, the Israelites entered Palestine, we may assume that the 'fenced cities' they had to attack were, according to their degree of antiquity, fortified with more or less of art, but all with huge stones in the lower walls, like the Etruscan. Indeed, Asia Minor, Armenia, Syria, and even Jerusalem, still bear



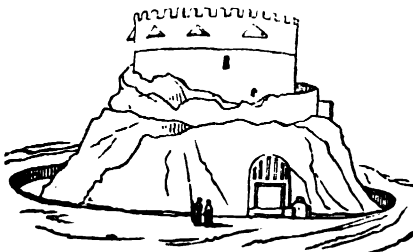
293. [a. Wet ditches.]

marks of this most ancient system, notwithstanding that this region, the connecting link between Asia and Africa, between the trade of the East and the West, and between the religious feelings of the whole earth, has been the common battle-field of all the great nations of antiquity, and of modern times, where ruin and desolation, oftentimes repeated, have been spread over every habitable place. Stones from six to fifty feet in length, with suitable proportions, can still be detected in many walls of the cities of those regions, wherever



294.

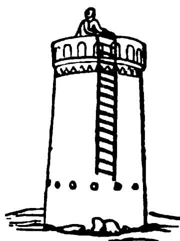
295.



quarries existed, from Nineveh, where beneath the surface there still remain ruins and walls of huge

stones, sculptured with bas-reliefs, originally painted, to Babylon, and Bassorah, where bricks, sun-dried or baked, and stamped with letters, are yet found, as well as in all the plains of the rivers where that material alone could be easily procured. The wall, חומה *choma*, was sometimes double or triple (2 Chron. xxxii. 5), successively girding a rocky elevation; and 'building a city' originally meant the construction of the wall.

296.

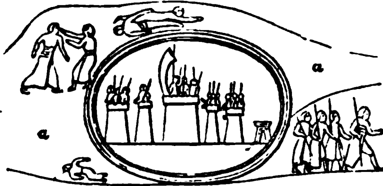


Before wall-towers, מגדלות *migdaloth*, were introduced, the gate of a city, originally single, formed a kind of citadel, and was the strongest part of all the defences: it was the armoury of the community, and the council-house of the authorities. 'Sitting in the gate' was, and still is, synonymous with the possession of power, and even now there is commonly in the fortified gate of a royal palace in the East, on the floor above the door-way, a council-room with a kind of balcony, whence the sovereign sometimes sees his people, and where he may sit in judgment. Hence the Turkish government is not unfrequently termed *the Porte*, and in this sense allusion to gates often occurs in the Scriptures. The tower, צריח *tsaroch*, was another fortification of the earliest date, being often the citadel or last retreat when a city was taken; or, standing alone in some naturally strong position, was intended to protect a frontier, command a pass, or to be a place of refuge and deposit

297.

of treasure in the mountains, when the plain should be no longer defensible. Some of these are figured among the Egyptian monuments, and in the west of England the round towers of Launceston, Restormel, Trematon, and Plympton show that similar means of defence were once employed by the Celtæ of this island, who may have derived their knowledge from Phœnician or Carthaginian traders. Watch-towers, מצפה *mizpah*, and טירה *terah*, טירות *teroth*, used by shepherds all over Asia, and even now built on eminences above some city in the plain, in order to keep a look-out upon the distant country, were already in use and occasionally converted into places of defence (2 Chron. xxvi. 10; xxvii. 4). The gateways were closed by ponderous folding doors, שער *shaer*, שערים *shaerim*, the valves or folds, דלתים *delethim*, being secured by wooden bars: both the doors and bars were in after times plated with metal. A ditch, חל חיל *hal*, where the nature of the locality required it, was dug in front of the rampart, and sometimes there was an inner wall, with a second ditch before it. As the experience of ages increased, huge 'counter forts,' double buttresses, or masses of solid stone and masonry (not bulwarks*) were built in particular parts to sustain the outer wall, and afford space on the summit to place military engines (2 Chron. xxvi. 15).

As there was no system of construction strictly so called, but simply an application of the means of defence to the localities, no uniformity of adaptation existed, and, therefore, we refer to No. 292 of our illustrations, representing some primeval fable of the rats besieging the cats in their strong tower, where regular hewn courses of stones in the walls show skill in structure, and the inclined jambs of the door, with double impost,



298.

experience in obviating a too great pressure from above. In the following cut (No. 299), taken from another Egyptian work, we have a series of towers, that in the middle being evidently the citadel or keep, and a gateway indicating that the wall is omitted, or is intended by the lines of the oval surrounding the whole. In No. 292 there is a scaling-ladder. In No. 299 we see a regular labarum, the most ancient example extant of this form of ensign, and the towers are manned with armed soldiers. In No. 293, another towered fortress, garrisoned with troops, is surrounded by a double ditch, and approached by bridges, both in front and rear. This representation refers to a city in Asia, attacked by one of the Egyptian conquering kings, anterior to the rise of the Assyrian and Babylonish power. No. 295 is taken from a seal, and is a symbol of Babylon, where the city, sustained by two lions, is shown standing on both sides of the Euphrates, having an outer wall; the inner rampart is flanked by numerous elevated and embattled towers. There is another, but less antique representation of Babylon, with its lions and towers, &c.; but the battlements are squared, not pointed, as in the first. Not very different from these double walls are those represented in the Egyptian painting copied in No. 296. The towers are here crowded with soldiers, some

* Bulwark, from the Dutch *bolwerk*, anciently called a mound, and in the sixteenth century always referable to bastion. Buttresses of the kind above mentioned still exist in the Celto-Roman walls at Pevensey in Sussex.

of whom, from the form of their shields, are obviously Egyptians. These are sufficient to give a

299.

general idea of cities fenced entirely by art; but in No. 297 we give the Tsaroch tower, taken from one still extant in Persia, showing a ditch and gateway below in the mound or rock, its double outer walls and inner keep, very like Launceston castle. This was the kind of citadel which defended passes, and in the mountains served for retreat in times of calamity, and for the security of the royal treasures; and it was on account of the confined space within, and the great elevation of the ramparts, that private houses frequently stood upon their summit, as was the case when the harlot Rahab received Joshua's spies in Jericho (Josh. ii. 1).—C. H. S.

FORTUNATUS (Φουρτουνάτος), a disciple of Corinth, of Roman birth or origin, as his name indicates, who visited Paul at Ephesus, and returned, along with Stephanus and Achaicus, in charge of that apostle's first Epistle to the Corinthian church; B.C. 59 (1 Cor. xvi. 17).

FOUNTAIN, a stream of 'living' or constantly running water, in opposition to standing or stagnant pools, whether it issues immediately from the ground or from the bottom of a well [AIN]. On the more remarkable natural fountains of Palestine, see SPRINGS; WATER.

From the value of such supplies of water in arid countries, fountains figure much in the poetry of the East as the natural images of perennial blessings of various kinds. In the Scriptures fountains are made the symbols of refreshment to the weary, and also denote the perpetuity and inexhaustible nature of the spiritual comforts which God imparts to his people, whether by the influences of the Spirit, or through the ordinances of public worship. There are also various texts in which children, or an extended posterity, are, by a beautifully apt image, described as a fountain, and the father or progenitor as the source or spring from which that fountain flows (Deut. xxxiii. 28; Ps. lxviii. 26; Prov. v. 16, 18; xiii. 14, &c.).

FOWL [BIRD; COCK].

FOX. [SHUAL.]

FRANKINCENSE [LEBONAH].

FROG. צְפַרְדֵּעַ *tsephardea*; Arab. *akurrak*; Gr. βάτραχος (Exod. liii. 2). Although the common frog is so well known that no description is needed to satisfy the reader, it may be necessary to mention that the only species recorded as existing in Palestine is the green (*Rana esculenta*), and that of all the authorities we have been able to consult, Dr. Richardson alone refers the species of Egypt to the green speckled grey frog (*Rana punctata*). But considering the immense extent of the Nile from south to north, and the amazing abundance of these animals which it contains in the state of spawn, tadpole, and complete frog, it is likely that the speckled is not the only species found in its waters, and that different species, if they do not occur in the same locality, are at least to be met with in different latitudes. Storks and other waders, together with a multitude of various enemies, somewhat restrain their increase, which, nevertheless, at the spawning season is so enormous that a bowl can scarcely be dipped into the water without immediately containing a number of tadpoles. The speckled species is found westward even to the north of France, but is not common in Europe, and does not appear to croak in concert on this side of the Mediterranean: most likely it is not noisy in Egypt, since M Sonnini, who wrote a detailed history of the Batrachians, and was personally well acquainted with the Nile, does not mention this species. It is lively, but no strong swimmer, the webs on the hinder toes extending only half their length: hence, perhaps, it is more a terrestrial animal than the common green frog, and, like the brown species, is given to roam on land in moist weather.

300.

Although it is very hazardous, in transactions of an absolutely miraculous nature, to attempt to point out the instruments that may have served to work out the purposes of the Almighty, we may conjecture that, in the plague of frogs, a species, the one perhaps we have just mentioned, was selected for its agility on land, and that, although the fact is not expressly mentioned, the awful visitation was rendered still more ominous by the presence of dark and rainy weather—an atmospheric condition never of long duration on the coast of Egypt, and gradually more and more rare up the course of the river. We have ourselves witnessed, during a storm of rain, frogs crowding into our cabin, in the low lands of Guiana, till they were packed up in the corners of the apartment, and continually falling back in their attempts to ascend above their fellows; and the door could not be opened without others entering more rapidly than those within could be expelled. Now, as the temples, palaces and cities of Egypt stood, in general, on the edge of the ever dry desert, and always above the level of the highest inundations, to be there visited by a continuation of immense number of frogs was assuredly a most distressing calamity; and as this phenomenon, in its ordinary occurrence within the tropics, is always accompanied by the storms of the monsoon or of the setting in of the rainy season, the dismay it must have caused may be judged of when we reflect that the plague occurred where rain seldom or never falls, where none of the houses are fitted to lead off the water, and that the animals appeared in localities where they had never before been found, and where, at all other times, the scorching sun would have destroyed

them in a few minutes. Nor was the selection of the frog as an instrument of God's displeasure without portentous meaning in the minds of the idolatrous Egyptians, who, considered that animal a type of Pthah—their creative power—and also an indication of man in embryo. The magicians, indeed, appeared to make frogs come up out of the waters; but we must not understand that to them was given also the power of producing the animals. The effect which they claimed as their own was a simple result of the continuation of the prodigy effected by Moses and Aaron; for that they had no real power is evident, not only from their inability to stop the present plague, the control which even Pharaoh discovered to be solely in the hands of Moses, but also the utter failure of their enchantments in that of lice, where their artifices were incompetent to impose upon the king and his people.—C. H. S.

FRONTLETS [PHYLACTERIES].

FRUITS. פְּרִי *peri*, fruit in general, vegetable or animal (Deut. vii. 13, *bis*; xxviii. 51, *bis*). It originated the English word 'fruit,' by the פ being sounded as *ph*, and subsequently converted into *f*. Under this head may perhaps be most appropriately noticed a classification of produce of great importance to a right understanding of the Bible, since the beauty and force of more than forty passages of the sacred record are impaired by inattention to it. We propose to show that the Hebrews had three generic terms designating three great classes of the fruits of the land, closely corresponding to what may be expressed in English as, 1. *Corn-fruit*, or field produce; 2. *Vintage-fruit*; 3. *Orchard-fruit*.

The term קַיִץ *kayits*, 'summer-fruits,' appears to denote those less important species of fruit which were adapted only to immediate consumption, or could not be easily or conveniently conserved for winter use (Jer. xl. 10, 12). *Kayits* may have been included as a species under the head of Orchard-fruit: it would seem to indicate either the existence of some contrasted term, as 'winter-fruits,' or to imply that the products of the class under which it ranked as a species were generally distinguished by their capability of being preserved throughout the year. It is conceived that the products denoted by the third of the generic terms now to be considered, were chiefly characterized by their capacity of being stored up and *preserved* like our own orchard-fruit; and thus their generic name might be inclusive of *kayits*, 'summer-fruits,' though mainly and originally referring to 'winter-fruits.' The three terms spoken of as being so frequently associated in the Scriptures, and expressive of a most comprehensive triad of blessings, are DAGAN, TIROSH, and YITZHAR.

1. דָּגָן *dagan*, 'fruit of the field,' or agricultural produce. Under this term the Hebrews classed almost every object of *field* culture [AGRICULTURE]. Dr. Jahn says, 'the word is of general signification, and comprehends in itself different kinds of grain and pulse, such as wheat, millet, spelt, wall-barley, barley, beans, lentils, meadow-cumin, pepper-wort, flax, cotton, various species of the cucumber, and perhaps rice' (*Bib. Antiq.* § 58). There is now no doubt among scholars that *dagan* comprehends the largest and most valuable species of vegetable produce; and therefore it will be allowed that the rendering of the word in the common version by '*corn*,' and sometimes by '*wheat*,' instead of '*every species of corn*' or field produce, tends to limit our conceptions of the Divine bounty, as well as to impair the beauty of the passages where it occurs. The same objection may be urged against the ordinary rendering of the associated terms, *tirosh* and *yitzhar*, as 'wine and oil.' Indeed, it is somewhat surprising that the almost universal acknowledgment of *dagan* as a very generic term has not, ere this, induced the learned to question the accuracy of this rendering of the sister terms, since it is neither usual nor natural, except by way of climax, to commingle very generic or abstract terms with names of specific articles, much less constantly to associate a general class of natural produce with particular articles of artificial preparation. In reading of 'a land of *every species of corn*,' we should naturally expect the declaration to continue consistently, 'of *grapes* and of *fruit*:' when, therefore, the transition is suddenly from growing 'corn of every kind' to specific and prepared products, '*wine*' and '*oil*,' a suspicion is raised as to the correctness of the rendering, which resolves itself into absolute certainty on consulting and comparing the passages of the Hebrew text. The infrequency of the mention of grapes and raisins, the natural or solid 'fruit of the vine,' in our version of the Scriptures, as compared with wine, the liquid preparation, has been a subject of remark. It is true that יַיִן *yayin* [WINE] is sometimes employed in the sense of *grapes* (as Cato and others of the Latins use *vinum*), and in this use of the word 'a land of corn and wine' really means, what Palestine was, 'a land of corn and grapes;' but this secondary and accommodated use of the term *yayin* does not supersede the necessity for a more generic word expressive of 'vintage-fruit,' viewed not merely as the *yielder* of wine, but as a valuable possession in itself.

2. תִּירוֹשׁ *tirosh*, 'the fruit of the vine' in its natural or its solid state, comprehending grapes, moist or dried, and the fruit in general, whether in the early cluster or the mature and ripened condition (Isa. lxv. 8, which is rendered by βότρυϊ, *grape*, in the Septuagint, refers to the young grape; while Judg. ix. 13, where 'the *vine* said, Shall I leave my *tirosh* (fruit) which cheereth God and man?' as evidently refers to the ripened produce which was placed on the altar as a first-fruit offering in grateful acknowledgment of the Divine goodness). 'Sometimes,' says Dr. Jahn, 'the grapes were dried in the sun and preserved in masses, which were called ענבים *gnenabhim*, אשישה *eshishah*, צמוקים *tzimmookim*, 1 Sam. xxv. 18; 2 Sam. xvi. 1; 1 Chron. xii. 40; Hos. iii. 1' (*Bib. Antiq.* § 69). *Tirosh* is derived from the verbal noun ירש *yarash*, 'to possess by inheritance' (whence Latin *hæres*, English *heir*), and was very naturally applied to designate the vintage-fruit, which, next to *dagan*, constituted one of the most valuable 'possessions' of the Jews.

It is also distinctly referred to as the *yielder* of wine, and therefore was not wine itself, but the raw material from which it was expressed or prepared. Dr. Conquest's amended translation of Micah vi. 15, is, 'Thou shalt sow, but thou shalt

not reap; thou shalt *tread* the olives, but thou shalt not anoint thee with oil (*shemen*, not *yitzhar*); and *the grape* (*tirosh*), but shalt not drink wine' (*yayin*). As the treading of the *olive* is represented as yielding *oil*, so is *tirosh* represented as that which, being trodden in the vat, should yield *wine*, which flowed out from an opening into the *lacus* or receptacle beneath. Archbishop Newcome, in his version of this text, has '*the grape of* the choice wine;' while Julius Bate, M.A. observes on this passage—'Hence it is plain that *tirosh* is what is pressed, *the grapes*' (*Critica Hebræa*, 1767).

Dr. Jahn applies *tirosh* to the *juice* which flows from the grape-vat into the lower receptacle, and says, it is also called *new* wine and γλεῦκος (Acts ii. 13). This view, however, will, on examination, be found erroneous, opposed by the clear evidence of the context in the great bulk of the passages where the word occurs, classed with corn, first-fruits, tithes, and other natural produce, and countenanced only by its association with an equivocal rendering in two places. Joel ii. 24, the first of these texts, 'the floors shall be full of wheat, and the vats shall overflow with *tirosh*,' cannot be understood of the *juice* of the grape, but must refer to the *fruit* itself. It is most certain that *grapes* were put into the vat, not wine. The wine flowed out through an orifice into the receiving vessel, as the grapes were being trodden. These vats were very large, and were the treader to be placed in one so full that the *juice* would overflow the brim, he would be incapable of treading the grapes, if not actually in danger of suffocation [VAT]. The text presents a striking contrast to the picture of drought and desolation described in the preceding chapter, and represents, not only that the people should be *satisfied* with *dagan*, *tirosh*, and *yitzhar* (ii. 19), but more than satisfied; for the floors usually devoted to threshing corn should be full of בר (the best species of corn already threshed), and the vats (vessels not designed as stores for fruit, and which are inconvenient for treading when overfilled) should be heaped up with vintage and winter fruit so full that it would roll off to the ground, since they could hold no more. In the same sense we frequently employ the word '*overflow*,' as, for example, 'The house was filled to overflowing.' A similar picture of plenty occurs in Prov. ii. 9, 10, where the grape-vats are to be filled even to bursting, which certainly cannot mean that the wine shall be wasted! Isa. lxii. 8, 9 is the second text favouring a liquid interpretation of *tirosh*. The latter verse is thus translated by Dr. Lowth—'They that reap the harvest shall eat it, and praise Jehovah; and they that *gather the vintage* shall *drink* it in my sacred courts.' He justly observes that this has reference to the Law of Moses (Deut. xii. 17, 18; Lev. xix. 23-25), which commands the Israelites to *eat* (*achal*) the tithe of their *dagan*, *tirosh*, and *yitzhar* before the Lord, and, when they have planted all manner of trees for food, to count the fruit as uncircumcised for three years, then in the fourth year all the fruit thereof shall be holy to praise the Lord, and in the fifth they shall *eat* (*achal*) the fruit. 'This,' says Dr. Lowth, 'clearly explains the force of the expressions, "Shall praise Jehovah, and shall *drink* it in my sacred courts."' The apparent opposition between the passages will be removed by understanding *shathah*, which primarily signifies 'to drink,' in its secondary sense of 'to suck.' It is thus appropriately rendered in the Prayer Book version of Ps. lxxv. 8. On a similar principle we modify the meaning of 'to eat,' when we speak of 'eating an orange;' thus too the Latins derived their generic word for fruits, *pomum*, from πῶμα, drink; and their name for the fruit of the service-tree from *sorbere*, 'to suck.' Dr. Lowth further adds, that 'five MSS. (one ancient) have יוכלוהו fully expressed, and so likewise ישתוהו is found in nineteen MSS., three of them ancient.' Supposing *yishtoohoo* to be the original reading, the alteration to *yowchloohoo* must have been made by the ancient copyist under the impression which appears also to have rested on Dr. Lowth's mind, that a mode of consuming the fruits of the vintage different from drinking, was here designed by the use of *shathah*. This view is confirmed by the use of the verb קבץ *kabhats* (the participle of which is translated, 'They that have brought it together'), which implies the collecting of scattered things into a heap.

Dr. Jahn's definition of *tirosh*, as the juice which flows from the trodden grapes, is also negatived by the fact that another word exactly expressive of the same thing, already exists, namely, עסיס *ausis*, from *ausas*, 'to tread down together.' Neither is it likely that it should be a generic name for wine, since such a term is found in יין *yayin*.

3. יצהר *yitzhar*, 'orchard-fruits,' especially winter or keeping fruits, as dates, figs, olives, pomegranates, citrons, nuts, &c. The etymology of *yitzhar* (whence perhaps the Saxon ortȝeard *ortgeard*, and the old English word *hortsyard*, now *orchard*) quite accords with the claim advanced for it, as denoting a large and valuable class of fruits. Lexiconists properly refer it to the root צהר *tzhar*, expressive of a bright, glowing, and shining appearance. The name of the class was obviously suggested by the bright and glowing hue presented by many of the species, as the olive, the citron, and the orange. The name for the olive, זית, sometimes called 'the splendour-tree,' originated in a similar way, the root being זו, 'bright,' 'splendid.' The name of another of the class, the orange, had a similar origin. The Latin *aurantium*, from *aurum*, 'gold,' by a slight change of spelling became the Italian *arancia*, whence, through the Provençal, the French *orange*. Through the Syro-Arabian channel we trace the Saracenic and Spanish name for the orange-flower, *azahar*, which probably sprang from some common stem with the Hebrew *tzahar*. Thus, too, *owrowth*, 'pot-herbs,' means '*shining things* of a greenish hue,' from אורת, 'light,' 'brightness;' whence also the Latin name for gold, *aurum*, the French *or*, and our word for shining metals, *ore*.

As we distinguish *dagan* from *hhittahh* (wheat), and *tirosh* from *ausis* and *yayin*, so must we *yitzhar* from שמן *shemen*, 'oil,' which are unfortunately confounded together in the common version. *Shemen*, beyond question, is the proper word for *oil*, not *yitzhar*: hence, being a specific thing, we find it in connection with a great variety of specific purposes, as sacrificial and holy uses, edibles, traffic, vessels, and used in

illustration of taste, smoothness, plumpness, insinuation, condition, fertility, and luxury. *Yitzhar*, as to the mode of its use, presents a complete contrast to *shemen*. It is not, even in a single passage, employed either by way of comparison, or in illustration of any particular quality common to it with other specific articles. In one passage only is it joined with זית *zayith*, 'olive,' the oil of which it has been erroneously supposed to signify; and even here (2 Kings xviii. 32) it retains as an adjective the generic sense of the noun, '*preserving*-fruit.' It should be read, 'a land of *preserving*-olives (*zayith yitzhar*) and dates (*debhash*).' Cato has a similar expression, *oleam conditivam*, 'preserving-olive-tree' (*De Re Rust.* vi.). It may be observed that the Latin terms *malum* and *pomum* had an extended meaning very analogous to the Hebrew *yitzhar*. Thus Varro asks, 'Non arboribus consita Italia est, ut tota *pomarium* videatur?' 'Is not Italy so planted with fruit-trees as to seem one entire *pomarium?*' *i. e.* orchard (*De Re Rustica*, i. 2).

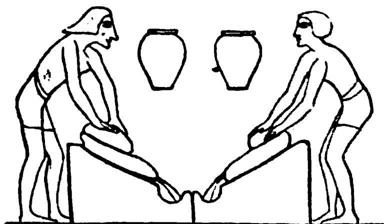
Thus the triad of terms we have been considering would comprehend every vegetable substance of necessity and luxury commonly consumed by the Hebrews, of which first-fruits were presented or tithes paid; and this view of their meaning will also explain why the injunctions concerning offerings and tithes were sufficiently expressed by these terms alone (Num. xviii. 12; Deut. xiv. 23). Had *dagan* in these texts been restricted to *wheat*, no obligation would thereby have been imposed to present the first-fruits or the tithes of barley and other grain: had *tirosh* signified *grape-juice*, then this law could have been easily evaded by drying the fruit as raisins, or preserving it in other ways; and had *yitzhar* signified *oil*, it would have been difficult at all, and from these texts impossible, to educe the obligation to pay tithes or present first-fruits of a large and most valuable class of products, as dates, citrons, pomegranates, &c. But these texts are the most definite we can find in relation to the subject, and are evidently designed to be very comprehensive; and, consequently, as tithes *were* paid of all those fruits, the practice must interpret these expressions as including, 1st. Fruits of the field or land; 2nd. Fruits of the vintage; and, 3rd. Fruits of the orchard, including both summer and preserving fruits.

In conclusion, we will briefly recapitulate the results of our examination of the Scripture passages referring to *Dagan*, *Tirosh*, and *Yitzhar*, and exhibit their relative positions:—

a. They are found mutually associated in nineteen places. *Dagan* occurs with *tirosh* alone eleven times; with *yayin* only once, and there (Lam. ii. 12) yayin is used for grapes. *Tirosh* occurs thirty-eight times; in thirty places it is associated with the confessedly generic word *dagan*; in twenty-one with *yitzhar;* and it is found only six times without either *dagan* or *yitzhar*.

b. Tirosh occurs seven times with *rayshyth* or *biccowr*, 'first-fruits;' ten times with *teroobhah*, 'offerings,' or *magnasayr*, 'tithes,' which were mainly the first of gathered fruits and grain in their natural state.

c. Tirosh is connected with *yayin* in three passages only; twice by way of climax merely (Hos. iv. 11; Is. xxiv. 7-10), and once (Mic. vi. 15) as the yielder of wine, not wine itself.



d. Tirosh is not directly united with *shemen* (oil) in a single place.

e. The three terms are constantly and closely connected with expressions indicating increase of vegetable produce, or the spontaneous growth of the fruits of the earth, or the increase of objects of culture, especially the fruits of the field and the vineyard: they also occur in connection with terms expressive of fruital or animal produce, sometimes with the vine, olive, fig, or palm tree, but scarcely ever with their specific fruit, or with particular articles of diet; still more rarely are they connected with terms evincing the process of preparing or preserving them, or the vehicle or mode of their consumption. In all these respects they present a complete contrast to terms denoting specific products or artificial preparations, as *zayith* (olive), *shemen* (oil), *yayin* (wine), or *lehhem* (food or bread).

f. In the very rare instances in which they do occur in connection with specific articles or circumstances, *special* reasons obviously exist for the fact, confirmatory of the view advanced as to their generic signification. The exceptions prove the rule.

g. Lastly, though the three terms are employed throughout a period of one thousand years (Num. xviii. 12, B.C. 1489, to Neh. xiii. 12, B.C. 409) by a series of fourteen authors, the bulk of whom also use *yayin* and *shemen*, occasionally in conjunction, yet not in one instance have they crossed *tirosh* with *shemen*, or *yayin* with *yitzhar*. On the contrary, the triad of generic terms have been cautiously and correctly discriminated from words merely denoting some of their species, or artificial preparations from them.—F. R. L.

FULLER. At the transfiguration our Saviour's robes are said to have been white, 'so as no fuller on earth could white them' (Mark ix. 3). Elsewhere we read of 'fullers' soap' (Mal. iii. 2), and of 'the fullers' field' (2 Kings xviii. 17). Of the processes followed in the art of cleaning cloth and the various kinds of stuff among the Jews we have no direct knowledge. In an early part of the operation they seem to have trod the cloths with their feet, as the Hebrew *Ain Rogel*, or En-rogel, literally Foot-fountain, has been rendered, on Rabbinical authority, 'Fullers' fountain,' on the ground that the fullers trod the cloths there with their feet. A subsequent operation was

301.

probably that of rubbing the cloth on an inclined plane, in a mode which is figured in the Egyptian paintings, and still preserved in the East.

FULLERS' FOUNTAIN [EN-ROGEL].

FULLERS' SOAP [BORITH].

FUNERALS [BURIAL; MOURNING].

G.

GAAL (גַּעַל, *miscarriage;* Sept. Γαάλ), son of Ebed. He went to Shechem with his brothers when the inhabitants became discontented with Abimelech, and so engaged their confidence that they placed him at their head. At the festival at which the Shechemites offered the first-fruits of their vintage in the temple of Baal, Gaal, by apparently drunken bravadoes, roused the valour of the people, and strove yet more to kindle their wrath against the absent Abimelech. It would seem as if the natives had been in some way intimately connected with, or descended from, the original inhabitants; for Gaal endeavoured to awaken their attachment to the ancient family of Hamor, the father of Shechem, which ruled the place in the time of Abraham (Gen. xxxiv. 2, 6), and which seems to have been at this time represented by Gaal and his brothers. Although deprived of Shechem, the family appears to have maintained itself in some power in the neighbourhood; which induced the Shechemites to look to Gaal when they became tired of Abimelech. Whether he succeeded in awakening among them a kind feeling towards the descendants of the ancient masters of the place, does not appear; but eventually they went out under his command, and assisted doubtless by his men, to intercept and give battle to Abimelech, when he appeared before the town. He, however, fled before Abimelech, and his retreat into Shechem being cut off by Zebul, the commandant of that place, he went to his home, and we hear of him no more. The account of this attempt is interesting, chiefly from the slight glimpse it affords of the position, at this period, of what had been one of the reigning families of the land before its invasion by the Israelites (Judg. ix. 26-48) B.C. 1026.

GABBATHA occurs John xix. 13, where the Evangelist states that Pontius Pilate, alarmed at last in his attempts to save Jesus, by the artful insinuation of the Jews, 'If thou let this man go, thou art not Cæsar's friend,' went into the prætorium again, and brought Jesus out to them, and sat down once more upon the βῆμα or tribunal, in a place called Λιθόστρωτον, but in the Hebrew Gabbatha. The Greek word, signifying literally *stone-paved*, is an adjective, and is generally used as such by the Greek writers; but they also sometimes use it substantively for a stone pavement, when ἔδαφος may be understood. In the Septuagint it answers to רִצְפָה (2 Chron. vii. 3; Esther i. 6). Jerome reads, 'Sedit pro tribunali in loco qui dicitur Lithostrotos.' The Greek word, as well as the Latin, is frequently used to denote a pavement formed of ornamental stones of various colours, commonly called a *tesselated* or *mosaic pavement*. The partiality of the Romans for this kind of pavement is well known. It is stated by Pliny (*Hist. Nat.* xxxvi. 64) that, after the time of Sylla, the Romans decorated their houses with such pavements. They also introduced them into the provinces. Suetonius relates that Julius Cæsar, in his military expeditions, took with him the materials of tesselated pavements, ready prepared, that, wherever he encamped, they might be laid down in the prætorium (Casaubon, *ad Sueton.* p. 38, &c., edit. 1605). From these facts it has been inferred by many eminent writers, that the τόπος λιθόστρωτος, or place where Pilate's tribunal was set on this occasion, was covered by a tesselated pavement, which, as a piece of Roman magnificence, was appended to the prætorium at Jerusalem. The emphatic manner in which St. John speaks of it agrees with this conjecture. It further appears from his narrative that it was *outside* the prætorium; for Pilate is said to have 'come out' to the Jews, who, for ceremonial reasons, did not go into it, on this as well as on other occasions (John xviii. 28, 29, 38; xix. 4, 13). Besides which, the Roman governors, although they tried causes, and conferred with their council (Acts xxv. 12), *within* the prætorium, always pronounced sentence in the open air. May not then this tesselated pavement, on which the tribunal was now placed, have been inlaid on some part of the terrace, &c. running along one side of the prætorium, and overlooking the area where the Jews were assembled, or upon a landing-place of the stairs, immediately before the grand entrance?

It has been conjectured that the pavement in question was no other than the one referred to in 2 Chron. vii. 3, and by Josephus, *De Bell. Jud.* vi. 1. 8, as in *the outer court of the temple;* but though it appears that Pilate sometimes sat upon his tribunal in different places, as, for instance, in the open market-place (*De Bell. Jud.* ii. 9. 3), yet the supposition that he would, on this occasion, when the Jews were pressing for a speedy judgment, and when he was overcome with alarm, *adjourn* the whole assembly, consisting of rulers of every grade, as well as the populace, to *any* other place, is very unlikely; and the supposition that such place was any part of the temple is encumbered with additional difficulties. The word Gabbatha remains to be considered. It is not certain that St. John intends Λιθόστρωτος as a translation or interpretation of Gabbatha: he may simply mean that the same place was called by these two names in Greek and Hebrew respectively. Yet it may be said that the names אבדון and Ἀπολλύων, which he introduces in a similar way (Rev. ix. 11), are synonymous; and if the word Gabbatha be derived from גב, 'a surface,' it may correspond to the idea of a pavement; but if, as is usual, it be derived from גבה, 'to be high or elevated,' it may refer chiefly to the *terrace*, or uppermost landing of the stairs, &c., which might have been inlaid with a tesselated pavement. Schleusner understands an elevated mosaic pavement, on which the βῆμα was placed, before the prætorium. The most natural inference from St. John's statement is, that the word Gabbatha is 'Hebrew;' but it has been contended that the writers of the New Testament used this word, by way of accommodation, to denote the language (*Syriac*, or *Syro-Chaldaic*, it is said) which was commonly spoken in Judæa in their time, and that, when St. John *says* Ἑβραϊστί, he *means* in the Syro-Chaldaic; but into the extensive controversy respecting the vernacular language of the Jews at Jerusalem, in the time of our Saviour, this is not the place to enter. It may suffice for the present purpose to remark, that the ancient Syriac *version*, instead of Gabbatha, reads Gepiptha, *Dissert. De Λιθοστρώτῳ*, a Conrad Iken, Bremæ, 1735; Lightfoot's *Works*, vol. ii. pp. 614, 615, Lond 1684; Faberanhüel, p. 318, f.;

GABRIEL (גַּבְרִיאֵל, *the mighty one* [or *hero*] *of God*), the heavenly messenger who was sent to Daniel to explain the vision of the ram and the he-goat (Dan. vii.), and to communicate the prediction of the Seventy Weeks (Dan. ix. 21-27). Under the new dispensation he was employed to announce the birth of John the Baptist to his father Zechariah (Luke i. 11), and that of the Messiah to the Virgin Mary (Luke i. 26). Both by Jewish and Christian writers, Gabriel has been denominated an archangel. The Scriptures, however, affirm nothing positively respecting his rank, though the importance of the commissions on which he was employed, and his own words 'I am Gabriel, that stand in the presence of God' (Luke i. 19), are rather in favour of the notion of his superior dignity. But the reserve of the Inspired Volume on such points strikingly distinguishes its angelology from that of the Jews and Mohammedans, and, we may add, of the Fathers and some later Christian writers. In all the solemn glimpses of the other world which it gives, a great moral purpose is kept in view. Whatever is divulged tends to elevate and refine: nothing is said to gratify a prurient curiosity.

In the Book of Enoch, 'the four great archangels, Michael, Raphael, Gabriel, and Uriel,' are described as reporting the corrupt state of mankind to the Creator, and receiving their several commissions. To Gabriel he says, 'Go, Gabriel, against the giants, the spurious ones, the sons of fornication, and destroy the sons of the watchers from among the sons of men' (*Greek Fragment of the Book of Enoch*, preserved by Syncellus in Scaliger's notes on the *Chronicon* of Eusebius, Amstel. 1658, p. 404). In the rabbinical writings Gabriel is represented as standing in front of the divine throne, near the standard of the tribe of Judah (Buxtorf, *Lex. Talmud.* s. v. אוריאל). The rabbins also say that he is the Prince of Fire, and appointed to preside over the ripening of fruit; that he was the only one of the angels who understood Chaldee and Syriac, and taught Joseph the seventy languages spoken at the dispersion of Babel; that he and Michael destroyed the host of Sennacherib, and set fire to the Temple at Jerusalem (Eisenmenger's *Entdecktes Judenthum*, th. ii. ss. 365, 379, 380, 383).

By the Mohammedans Gabriel is regarded with profound veneration. To him, it is affirmed, a copy of the whole Koran was committed, which he imparted in successive portions to Mohammed. He is styled in the Koran, the Spirit of Truth, and the Holy Spirit. In his hands will be placed the scales in which the actions of men will be weighed at the last day (Sale's *Koran*; D'Herbelot's *Bibliothèque Orientale*).—J. E. R.

GAD (גָּד). 1. A son of Jacob by his concubine Zilpah (Gen. xxx. 10, sq.), and who became the progenitor of one of the twelve tribes. The sons of Gad are enumerated in Gen. xlvi. 16, sq., and Num. i. 4, sq. At the time of the conquest of Canaan, the tribe of Gad counted 45,650 warriors (Num. i. 24): the position of their camp in the desert is given Num. ii. 14, and the names of their chiefs, vii. 10, sq.

As a reward for their having formed the vanguard in war of the army of the tribes collectively, they were allowed to appropriate to their exclusive use some pastoral districts beyond the Jordan (Num. xxxii. 17, sq.).

The inheritance of this tribe, called the *land of Gad* (1 Sam. xiii. 7; Jer. xlix. 1), was situated beyond the Jordan in Gilead, north of Reuben, and separated on the east from Ammon by the river Jabbok. According to 1 Chron. v. 11, the Gadites had extended their possessions on the east as far as Salcah, though the latter had been allotted by Moses to Manasseh (Deut. iii. 10, 13): a proof how difficult it is to draw a strong line of demarcation between the possessions of pastoral tribes. The territory of Gad forms a part of the present Belka (Burckhardt, *Syria*, ii. 598).

In Josh. xiii. 25, the land of Gad is called 'half the land of the children of Ammon:' not because the latter were then in possession of it, but probably because the part west of the Jabbok had formerly borne that name (comp. Judg. xi. 13).

The principal cities of Gad pass by the general appellation of the Cities of Gilead (Josh. xiii. 25).

The Gadites were a warlike people, and were compelled to be continually armed and on the alert against the inroads of the surrounding Arabian hordes (comp. Gen. xlix. 19; Deut. xxxiii. 20: 1 Chron. v. 19, sq.).—E. M.

2. GAD, a prophet contemporary with David, and probably a pupil of Samuel, who early attached himself to the son of Jesse (1 Sam. xxii. 5). Instances of his prophetic intercourse with David occur in 2 Sam xxiv. 11, sq.; 1 Chron. xxi. 9, sq.; xxix. 25. Gad wrote a history of the reign of David, to which the author of the 2nd book of Samuel seems to refer for further information respecting that reign (1 Chron. xxix. 29), B.C. 1062-1017.

GAD (גַּד; Sept. δαιμόνιον, or, according to the reading of Jerome and of some MSS., τύχῃ) is mentioned in Isa. lxv. 11. The word admits of two different significations. If it be derived from גדד in the sense of *to cut*, it may mean *a lot*, and, by a combination with the Arabic جد, which means *to be new*, *to occur*, *to be fortunate*, may be legitimately taken to denote *fortune*. Indeed, some find this 'fortune,' although not as an idol, in Gen. xxx. 11, where the Sept. has rendered the Kethib בגד by ἐν τύχῃ, which is approved by Selden, and especially by Tuch, who does not even wish to change the punctuation, but ascribes the Qametz to the influence of the pause (*Comment. über die Genesis*, ad loc.). This is the sense in which Gesenius, Hitzig, and Ewald have taken *Gad* in their respective versions of Isaiah. All render the clause, 'who spread a table to Fortune.' This view, which is the general one, makes Fortune in this passage to be an object of idolatrous worship. There is great disagreement, however, as to the power of nature which this name was intended to denote; and, from the scanty data, there is little else than mere opinion on the subject. The majority, among whom are some of the chief rabbinical commentators, as well as Gesenius, Münter, and Ewald, consider Gad to be the form under which the planet Jupiter was worshipped as the greater star of good fortune (see especially Gesenius, *Comment. über der Iesaia*, ad loc.). Others,

among whom is Vitringa, suppose Gad to have represented the Sun; and Movers, the latest writer of any eminence on Syro-Arabian idolatry, takes it to have been the planet Venus (*Die Phönizier*, i. 650).

On the other hand, if *Gad* be derived from גדד in the sense of *to press, to crowd*, it may mean *a troop, a heap* (to which sense there is an allusion in Gen. xlix. 19); and Hoheisel, as cited in Rosenmüller's *Scholia*, ad loc., as well as Deyling, in his *Observat. Miscell.* p. 673, have each attempted a mode by which the passage might be explained, if *Gad* and *Meni* were taken in the sense of *troop* and *number*.—J. N.

GAD (גַּד) occurs in two places in Scripture, in both of which it is translated *coriander*, viz. Exod. xvi. 31, 'And it (manna) was like coriander (*gad*) seed, white; and the taste of it was like wafers made of honey;' Num. xi. 7, 'And the manna was as coriander seed, and the colour thereof as the colour of bdellium.' The manna which fell in the desert, and on which the Israelites were fed during their sojourn there, is usually described, from a collation of the different passages in which it is mentioned, as white, round, and like *gad*, which last has almost universally been considered to mean 'coriander' seed, though some prefer other seeds.

302. [Coriandrum sativum.]

The chief, and indeed only proof of *gad* signifying the coriander, has been adduced by Celsius (*Hierobot.* vol. ii. p. 81): 'Γοίδ, quod Africanis *coriandrum* est, ut docet auctor ignotus sed utilissimus, qui Dioscoridem synonymis exoticis auxit et illustravit. Αἰγύπτιοι, inquit, ὄχιον, Ἀφροὶ γοίδ: coriandrum Ægyptii *ochion* appellant, Afri *goid*.' This passage Sprengel incorporates with the text of Dioscorides, as well as the other synonyms, which are supposed by others, as above, to be additions by another but unknown ancient author. Rosenmüller, referring to this passage, observes: 'the Africans, *i.e.* Carthaginians, whose language, the Punic, was cognate with the Hebrew, called the coriander Γοίδ, which word is not at all different from the Hebrew *gad*.' Celsius states that the coriander is frequently mentioned in the Talmud. It was known to and used medicinally by Hippocrates: it is mentioned by Theophrastus, as well as Dioscorides, under the name of κόριον or κορίαννον; and the Arabs, in their works on *Materia Medica*, give *korion* as the Greek synonym of coriander, which they call كزبرة *kuzeereh*, the Persians *kushneez*, and the natives of India *dhunya*. It is known throughout all these countries, in all of which it is cultivated, being universally employed as a grateful spice, and as one of the ingredients of currie-powder. It is also common in Egypt. 'Ubique,' says Prosper Alpinus, 'in viridariis coriandrum provenit copiosissimum, quod omnes *Cusbarà* appellant. Herbæque virentis usus in cibo est apud omnes Ægyptios familiarissimus. Etenim ferculum non parant sine foliis coriandri' (*De Plantis Ægypti*, c. xlii. p. 61). Pliny also, long before, mentioned 'coriandrum in Ægypto præcipuum.' It is now very common in the south of Europe, and also in this country, being cultivated, especially in Essex, on account of its seeds, which are required by confectioners, druggists, and distillers, in large quantities: in gardens it is reared on account of its leaves, which are used in soups and salads. The coriander is an umbelliferous plant, the *Coriandrum sativum* of botanists. The fruit, commonly called seeds, is globular, greyish-coloured, about the size of peppercorn, having its surface marked with fine striæ. Both its taste and smell are agreeable, depending on the presence of a volatile oil, which is separated by distillation.—J. F. R.

GADARA was the chief city or metropolis of Peræa, lying in the district termed Gadaritis, some small distance from the southern extremity of the sea of Galilee, sixty stadia from Tiberias, to the south of the river Hieromax, and also of the Scheriat-al-Mandhur (Joseph. *Antiq.* xiii. 13. 3; Polyb. v. 71. 3; Joseph. *De Bell. Jud.* iv. 8. 3; Plin. *Hist. Nat.* v. 15). It was fortified, and stood on a hill of limestone. Its inhabitants were mostly heathens. Josephus says of it, in conjunction with Gaza and Hippos, 'they were Grecian cities' (*Antiq.* xvii. 11. 4). After the place had been destroyed in the domestic quarrels of the Jews, it was rebuilt by Pompey, in order to gratify Demetrius of Gadara, one of his freedmen (Joseph. *De Bell. Jud.* i. 7. 7). Augustus added Gadara, with other places, to the kingdom of Herod (Joseph. *Antiq.* xv. 7. 2); from which, on the death of that prince, it was sundered, and joined to the province of Syria (Joseph. *De Bell. Jud.* ii. 6. 3). Stephen of Byzantium reckoned it a part of Cœle-Syria, and Pliny (*Hist. Nat.* v. 16) a part of the Decapolis. At a later period it was the seat of an episcopal see in Palæstina Secunda, whose bishops are named in the councils of Nice and Ephesus (Reland, *Palæst.* pp. 176, 215, 223, 226).

Most modern authorities (Winer, *Handwörterb.*, Raumer in his *Palästina*, Burckhardt, Seetzen) find Gadara in the present village of Om-keis. Buckingham, however, identifies Om-keis with Gamala (*Trav. in Palest.*); though it may be added that his facts, if not his reasonings, lead to a conclusion in favour of the general opinion. Accordingly, taking Om-keis to be the ancient Gadara, we may avail ourselves in this article of

the descriptions of its ruins and scenery which Buckingham has given.

Limestone is a species of rock in which caverns of greater or less dimensions are easily and often naturally formed. Accordingly the hills on which Gadara was placed were full of caverns, which were used for tombs. Buckingham speaks of several grottoes, which formed the necropolis of the city, on the eastern brow of the hill. The first two examined by him were plain chambers hewn down so as to present a perpendicular front. The third tomb had a stone door, as perfect as on the day of its being first hung. The last was an excavated chamber, seven feet in height, twelve paces long, and ten broad; within it was a smaller room. Other tombs were discovered by Buckingham as he ascended the hill. He entered one in which were ten sepulchres, ranged along the inner wall of the chamber in a line, being pierced inward for their greatest length, and divided by a thin partition left in the rock, in each of which was cut a small niche for a lamp. Still more tombs were found, some containing sarcophagi, some without them; all, however, displaying more or less of architectural ornament.

On reaching the summit of the hill, Buckingham was rewarded by a very fine view. Though the country is stony and bare, and the hills destitute of wood and verdure, 'it was impossible,' he says, 'not to admire the commanding view and the grandeur, as well as the extent of the scene.' On the N.E. flowed the Nahr-el-Hami, the ancient Hieromax, coming westward, through high cliffs on its northern bank, and a bed of verdant shrubs on its southern, and bending its way, by the hot springs and ruins of the Roman bath on its edge, to increase the waters of the Jordan. On the N.W., in a deep hollow surrounded by lofty hills, was the still sea of Galilee or lake of Gennesareth, on the southern bank of which stood the small village of Samuk, and on the western the town of Tiberias, still preserving nearly its ancient name. From this lake the Jordan was seen to issue and wind its southern course through a desert plain.

The city formed nearly a square. The upper part of it stood on a level spot, and appears to have been walled all round, the acclivities of the hill being on all sides exceedingly steep. The eastern gate of entrance has its portals still remaining. Among the ruins Buckingham found a theatre, an Ionic temple, a second theatre, besides traces and remnants of streets and houses. The prevalent orders of architecture are the Ionic and the Corinthian.

Burckhardt also found near Gadara warm sulphurous springs. They were termed Thermæ Heliæ, and were reckoned inferior only to those of Baiæ (Euseb. *Onomast.*). According to Epiphanius (*Adv. Hæres.* i. 131) a yearly festival was held at these baths (Reland, p. 775). For coins, see Eckhel (*Doctr. Num.* iii. p. 348). The caverns in the rocks are also mentioned by Epiphanius (*l. c.*) in terms which seem to show that they were in his day used for dwellings as well as for tombs.

Gadara is the scene of the miracle recorded in Matt. viii. 28; Mark v. 1; Luke viii. 26. Buckingham's remarks on this event are well worth quoting:—'The accounts given of the habitation of the demoniac from whom the legion of devils was cast out here struck us very forcibly, while we ourselves were wandering among rugged mountains, and surrounded by tombs still used as dwellings by individuals and whole families. A finer subject for a masterly expression of the passions of madness in all their violence, contrasted with the serenity of virtue and benevolence in him who went about doing good, could hardly be chosen for the pencil of an artist; and a faithful delineation of the rugged and wild majesty of the mountain-scenery here on the one hand, with the still calm of the waters of the lake on the other, would give an additional charm to the picture.' One of the ancient tombs was, when our traveller saw it, used as a carpenter's shop, the occupier of it being employed in constructing a rude plough. A perfect sarcophagus remained within, which was used by the family as a provision-chest.

The text of the original narratives which record the cure of the Gadarene demoniac, or demoniacs, has more than its share of difficulty in regard to the name of the locality where the event took place. Mark and Luke indeed agree in describing it as 'the country of the Gadarenes,' but Matthew calls it 'the country of the Gergesenes.' One various reading gives 'of the Gerasenes,' another 'of the Gadarenes.' But Gerasa [GERASA] lay at a wide distance from the lake of Galilee, and possibly the difficulty which hence arose was that which led Origen to conjecture that the reading should be 'of the Gergesenes,' for with Origen this reading took its rise (Rosenmüller, ii. 2. 22; Reland, pp. 774, 806). Indeed to him the place as well as the name owes its existence. Gergesa is found in some maps, but the best authorities omit it (Kiepperts *Atlas*); for it is not found either in the Bible or Josephus, and Scholz has substituted in his text Γαδαρηνῶν for Γεργεσηνῶν. These remarks and emendations remove the difficulty presented in the *textus receptus* and the common version.—J. R. B.

GALATIA (Γαλατία, ἡ Γαλατικὴ χώρα), a province of Asia Minor, bounded on the north by Bithynia and Paphlagonia, on the south by Lycaonia, on the east by Pontus and Cappadocia, and on the west by Phrygia and Bithynia. It derived its name from the Gallic or Keltic tribes who, about 280 years B.C., made an irruption into Macedonia and Thrace. At the invitation of Nicomedes, king of Bithynia, they passed over the Hellespont to assist that prince against his brother Ziboeta. Having accomplished this object, they were unwilling to retrace their steps; and strengthened by the accession of fresh hordes from Europe, they overran Bithynia and the neighbouring countries, and supported themselves by predatory excursions, or by imposts exacted from the native chiefs. After the lapse of forty years, Attalus I., king of Pergamus, succeeded in checking their nomadic habits, and confined them to a fixed territory. Of the three principal tribes, the Trocmi (Τρόκμοι) settled in the eastern part of Galatia near the banks of the Halys; the Tectosages (Τεκτόσαγες) in the country round Ancyra; and the Tolistobogii (Τολιστοβόγιοι) in the south-western parts near Pessinus. They retained their independence till the year B.C. 189, when they were brought under the power of Rome by the consul Cn. Manlius (Livy, xxxviii.; Polybius, xxii. 24), though still governed by their own princes. In the year B.C. 25 Galatia became a

Roman province. Under the successors of Augustus the boundaries of Galatia were so much enlarged that it reached from the shores of the Euxine to the Pisidian Taurus. In the time of Constantine a new division was made, which reduced it to its ancient limits; and by Theodosius I. or Valens it was separated into *Galatia Prima*, the northern part, occupied by the Trocmi and Tectosages, and *Galatia Secunda* or *Salutaris*: Ancyra was the capital of the former, and Pessinus of the latter.

From the intermixture of Gauls and Greeks Galatia was also called Gallo-Græcia (Γαλλογραικία, Strabo, xii. 5), and its inhabitants Gallo-Græci. But even in Jerome's time they had not lost their native language: 'Galatas excepto sermone Græco, quo omnis Oriens loquitur, propriam linguam eandem pæne habere quam Treviros, nec referre si aliqua inde corruperint,' &c. (*Prol. ad Comment. in Ep. ad Gal.*; De Wette's *Lehrbuch*, p. 231).

The Gospel was introduced into this province by the Apostle Paul. His first visit is recorded in Acts xvi. 6, and his second in Acts xviii. 23. (*Penny Cyclopædia*, arts. 'Celtæ' and 'Galatia;' Mannert's *Geographie der Griechen und Römer*, vi. 3, ch. 4; Merleker's *Lehrbuch der Historisch-comparativen Geographie*, iv. 1, p. 284.)—J. E. R.

GALATIANS, EPISTLE TO THE. The Pauline origin of this epistle is attested not only by the superscription which it bears (i. 1), but also by frequent allusions in the course of it to the great Apostle of the Gentiles (comp. i. 13-23; ii. 1-14), and by the unanimous testimony of the ancient church (Lardner, *Works*, vol. ii. 8vo.). It is corroborated also by the style, tone, and contents of the epistle, which are perfectly in keeping with those of the Apostle's other writings.

The parties to whom this epistle was addressed are described in the epistle itself as 'the churches of Galatia' (i. 2; comp. iii. 1). Into this district the Gospel was first introduced by Paul himself (Acts xvi. 6; Gal. i. 8; iv. 13, 19). Churches were then also probably formed; for on revisiting this district some time after his first visit it is mentioned that he 'strengthened the disciples' (Acts xviii. 23). These churches seem to have been composed principally of converts directly from Heathenism, but partly, also, of Jewish converts, both pure Jews and proselytes. Unhappily, the latter, not thoroughly emancipated from early opinions and prepossessions, or probably influenced by Judaizing teachers who had visited these churches, had been seized with a zealous desire to incorporate the rites and ceremonies of Judaism with the spiritual truths and simple ordinances of Christianity. So active had this party been in disseminating their views on this head through the churches of Galatia, that the majority at least of the members had been seduced to adopt them (i. 6; iii. 1, &c.) To this result it is probable that the previous religious conceptions of the Galatians contributed; for, accustomed to the worship of Cybele, which they had learned from their neighbours the Phrygians, and to the theosophistic doctrines with which that worship was associated, they would be the more readily induced to believe that the fulness of Christianity could alone be developed through the symbolical adumbrations of an elaborate ceremonial (Neander, *Apostol. Zeitalter*, s. 400, 2te Aufl.). From some passages in this epistle (*e. gr.* i. 11-24; ii. 1-21) it would appear also that insinuations had been disseminated among the Galatian churches to the effect that Paul was not a divinely-commissioned Apostle, but only a messenger of the church at Jerusalem; that Peter and he were at variance upon the subject of the relation of the Jewish rites to Christianity; and that Paul himself was not at all times so strenuously opposed to those rites as he had chosen to be among the Galatians. Of this state of things intelligence having been conveyed to the Apostle, he wrote this epistle for the purpose of vindicating his own pretensions and conduct, of counteracting the influence of these false views, and of recalling the Galatians to the simplicity of the Gospel which they had received. The importance of the case was probably the reason why the Apostle put himself to the great labour of writing this epistle with his own hand (vi. 11).

The epistle consists of *three* parts. In the *first* part (i.-ii.), after his usual salutations, Paul vindicates his own Apostolic authority and independence as a directly-commissioned ambassador of Christ to men, and especially to the Gentile portion of the race; asserting that the Gospel which he preached was the only Gospel of Christ,—expressing his surprise that the Galatians had allowed themselves to be so soon turned from him who had called them to a different Gospel,—denouncing all who had thus seduced them as troublers of the church, perverters of the doctrine of Christ, and deserving, even had they been angels from heaven, to be placed under an anathema instead of being followed,—maintaining the divine origin of his Apostolic commission, which he illustrates by the history of his conversion and early conduct in the service of Christ,—and declaring that, so far from being inferior to the other Apostles, he had ever treated with them on equal terms, and been welcomed by them as an equal. Having in the close of this part of the epistle been led to refer to his zeal for the great doctrine of salvation by the grace of God through faith in Christ, he enters at large, in the *second* part (iii.-iv.), upon the illustration and defence of this cardinal truth of Christianity. He appeals to the former experience of the Galatians as to the way in which they had received the Spirit, to the case of Abraham, and to the testimony of Scripture in support of his position that it is by faith and not by the works of the law that men are accepted of God (iii. 1-9). He proceeds to remind them that the law has brought a curse upon men because of sin, a curse which it has no power to remove, and from which the sinner can be redeemed only through the substitutionary work of Christ, by whose means the blessing of Abraham comes upon the Gentiles. And lest any should object that the law being of more recent origin than the covenant must supersede it, he shows that this cannot be the case, but that the covenant must be perpetual, whilst the law is to be regarded only in the light of a temporary and intercalary arrangement, the design of which was to forward the fulfilment of the promise in Christ (10-29). The relation of the Jewish church to the Christian is then illustrated by the case of an heir under tutors and governors as contrasted with the case of the same person when he is of age and has become master of all; and the Galatians are exhorted not willingly to

descend from the important and dignified position of sons to that of mere servants in God's house—an exhortation which is illustrated and enforced by an allegorical comparison of the Jewish church to Ishmael, the son of Hagar, and of the Christian to Isaac, the son of Sarah, and the Child of Promise (iv. 1-31). The *third* part of the Epistle (v.-vi.) is chiefly hortatory and admonitory; it sets forth the necessity of steadfast adherence to the liberty of the Gospel in connection with obedience to the moral law as a rule of duty, the importance of mutual forbearance and love among Christians, and the desirableness of maintaining a firm adherence to the doctrine of Christ and Him crucified. The epistle concludes with benedictions and prayers.

Respecting the time when and the place where this epistle was written, great diversity of opinion prevails. Marcion held this to be the earliest of Paul's epistles (Epiphanius, *Adv. Hæres.* xlii. 9); and Tertullian is generally supposed to favour the same opinion, from his speaking of Paul's zeal against Judaism displayed in this epistle as characteristic of his being yet a neophyte (*Adv. Marc.* i. 20); though, to us, it does not appear that in this passage Tertullian is referring at all to the *writing* of this epistle, but only to Paul's personal intercourse with Peter and other of the Apostles mentioned by him in the epistle (ii. 9-14). Michaelis also has given his suffrage in favour of a date earlier than that of the Apostle's second visit to Galatia, and very shortly after that of his first. Koppe's view (*Nov. Test.* vol. vi. p. 7) is the same, though he supposes the Apostle to have preached in Galatia *before* the visit mentioned by Luke in Acts xvi. 6, and which is usually reckoned his first visit to that district. Others, again, such as Mill (*Proleg. in Nov. Test.* p. 4), Calovius (*Biblia Illust.* t. iv. p. 529), and, more recently, Schrader (*Der Ap. Paulus*, th. i. s. 226), place the date of this epistle at a late period of the Apostle's life: the last, indeed, advocates the date assigned in the Greek MSS. and in the Syriac and Arabic versions, which announce that it was 'written from Rome' during the Apostle's imprisonment there. The majority, however, concur in a medium view between these extremes, and fix the date of this epistle at some time shortly after the Apostle's second visit to Galatia. This opinion appears to us to be the only one that has any decided support from the epistle itself. From the Apostle's abrupt exclamation in ch. i. 6, 'I marvel that ye are *so soon* removed from him that called you,' &c., it seems just to infer that he wrote this epistle not very long after he had left Galatia. It is true, as has been urged, that οὕτω ταχέως in this verse may mean 'so *quickly*' as well as 'so *soon*;' but the abruptness of the Apostle's statement appears to us rather to favour the latter rendering: for, as a complaint of the *quickness* of their change respected the *manner* in which it had been made, and as the Apostle could be aware of that only by report, and as it was a matter on which there might be a difference of opinion between him and them, it would seem necessary that the *grounds* of such a charge should be stated; whereas if the complaint merely related to the shortness of time during which, after the Apostle had been among them, they had remained steadfast in the faith, a mere allusion to it was sufficient, as it was a matter not admitting of any diversity of opinion. We infer, then, from this expression that this epistle was written not long after Paul had been in Galatia. The question, however, still remains, which of the two visits of Paul to Galatia mentioned in the Acts was it after which this epistle was written? In reply to this Michaelis and some others maintain that it was the *first*; but in coming to this conclusion they appear to have unaccountably overlooked the Apostle's phraseology (iv. 13), where he speaks of circumstances connected with his preaching the Gospel among the Galatians, τὸ πρότερον, *the former time*, an expression which clearly indicates that at the period this epistle was written, Paul had been at least *twice* in Galatia.* On these grounds it is probable that the Apostle wrote and despatched this epistle not long after he had left Galatia for the second time, and, perhaps, whilst he was residing at Ephesus (comp. Acts xviii. 23; xix. 1, sqq.). The reasons which Michaelis urges for an earlier date are of no weight. He appeals, in the first place, to ch. i. 2, and asks whether Paul would have used the vague expression, 'all the brethren,' without naming them, had it not been that the parties in question were those by whom he had been accompanied on his first visit to Galatia, viz. Silas and Timothy, and, 'perhaps, some others.' The answer to this obviously is, that had Paul referred in this expression to these individuals, who were known to the Galatians, he was much more likely, on that very account to have named them than otherwise; and besides, the expression 'all the brethren that are with me' is much more naturally understood of a considerable number of persons, such as the elders of the church at Ephesus, than of *two* persons, and, '*perhaps*, some others.' Again, he urges the fact that, about the time of Paul's first visit to Galatia, Asia Minor was full of zealots for the law, and that consequently it is easier to account for the seduction of the Galatians at this period than at a later. But the passage to which Michaelis refers in support of this assertion (Acts xv. 1) simply informs us that certain Judaizing teachers visited Antioch, and gives us no information whatever as to the time when such zealots entered Asia Minor. In fine, he lays great stress on the circumstance that Paul in recapitulating the history of his own life in the first and second chapters brings the narrative down only to the period of the conference at Jerusalem, the reason of which is to be found, he thinks, in the fact that this epistle was written so soon after that event that nothing of moment had subsequently occurred in the Apostle's history. But even admitting that the period referred to in this second chapter was that of the conference mentioned Acts xv. (though this is much doubted by many writers of note), the reason assigned by Michaelis for Paul's carrying the narrative of his life no further than this cannot be admitted: for it over-

* Prof. Stuart says, in bar of this conclusion, that 'πρότερον means only a time *antecedent* to that in which he (Paul) wrote.' (*Notes to Fosdick's Translation of Hug's Introd.* p. 748.) But, in making this remark, the learned professor has not observed that Paul's expression is not simply πρότερον, but τὸ πρότερον, which makes all the difference between the rendering 'in time *past*' and the rendering '*the former* time.' The latter alone is proper here.

looks the design of the Apostle in furnishing that narrative, which was not certainly to deliver himself of a piece of mere autobiographical detail; but to show from certain leading incidents in his early Apostolic life how from the first he had claimed and exercised an independent Apostolic authority, and how his rights in this respect had been admitted by the pillars of the church, Peter, James, and John. For this purpose it was not necessary that the narrative should be brought down to a lower date than the period when Paul went forth as the Apostle of the Gentiles, formally recognised as such by the other Apostles of Christ. This fact, then, is as little in favour of Michaelis's theory as any of the other arguments which he has adduced.

Of commentaries on this epistle the most important are the following: Borger, *Interpretatio Ep. Pauli ad Galatas*, 8vo. Lugd. Bat. 1807; Winer, *Pauli Ep. ad Gal. perpetua Annot. illustravit*, 8vo. ed. tertia, Lipsiæ, 1829; Rückert, *Commentar üb. d. Brief Pauli an d. Gal.*, 8vo., Leipzig, 1833; Usteri, *Commentar üb. d. Br. Pauli an d. Gal.* 8vo. Zürich, 1833; Hermann, *De Pauli Epist. ad Gal. tribus primis capitibus*, 4to. Lips. 1832.—W. L. A.

GALBANUM. [CHALBANEH.]

GALILEE (Γαλιλαία), the Greek form of the name given to one of the three principal divisions of Palestine, the other two being Judæa and Samaria. This name of the region was very ancient. It occurs in the Hebrew forms of *Galil* and *Galilah*, Josh. xx. 7; xxi. 3; 1 Kings ix. 11; 2 Kings xv. 29; and in Isa. viii. 23 we have גליל הגוים 'Galilee of the nations' (Γαλιλαία ἀλλοφύλων, 1 Macc. v. 15; Matt. iv. 15).

Galilee was the northernmost of the three divisions, and was divided into Upper and Lower. The former district had Mount Lebanon and the countries of Tyre and Sidon on the north; the Mediterranean Sea on the west; Abilene, Ituræa, and the country of Decapolis on the east; and Lower Galilee on the south. This was the portion of Galilee which was distinctively called 'Galilee of the nations,' or of the 'Gentiles,' from its having a more mixed population, *i. e.* less purely Jewish, than the others. Cæsarea Philippi was its principal city. Lower Galilee had Upper Galilee on the north, the Mediterranean on the west, the Sea of Galilee or Lake of Gennesareth on the east, and Samaria on the south. Its principal towns were Tiberias, Chorazin, Bethsaida, Nazareth, Cana, Capernaum, Nain, Cæsarea of Palestine, and Ptolemais. This is the district which was of all others the most honoured with the presence of our Saviour. Here he lived entirely until he was thirty years of age; and although, after the commencement of his ministry, he frequently visited the other provinces, it was here that he chiefly resided. Here also he made his first appearance to the apostles after his resurrection; for they were all of them natives of this region, and had returned hither after the sad events at Jerusalem (Matt. xxviii. 7).

Hence the disciples of Christ were called 'Galileans.' They were easily recognised as such; for the Galileans spoke a dialect of the vernacular Syriac different from that of Judæa, and which was of course accounted rude and impure, as all provincial dialects are considered to be, in comparison with that of the metropolis. It was this which occasioned the detection of St. Peter as one of Christ's disciples (Mark xiv. 70). The Galilean dialect (as we learn from Buxtorf, Lightfoot, and others), was of a broad and rustic tone, which affected the pronunciation not only of letters but of words. It partook much of the Samaritan and Syriac idiom; but, in the instance of Peter, it must have been the tone which bewrayed him, the words being seemingly too few for that effect.

The Galileans are mentioned by Josephus (*Antiq.* xvii. 10. 2; *De Bell. Jud.* ii. 10. 6; iii. 3. 2) as a turbulent and rebellious people, ready on all occasions to rise against the Roman authority. This character of them explains what is said in Luke xiii. 1, with regard to 'the Galileans whose blood Pilate had mingled with their sacrifices.' Josephus, indeed, does not mention any Galileans slain in the Temple by Pilate; but the character which he gives that people sufficiently corroborates the statement. The tumults to which he alludes were, as we know, chiefly raised at the great festivals, when sacrifices were slain in great abundance; and on all such occasions the Galileans were much more active than the men of Judæa and Jerusalem, as is proved by the history of Archelaus (Joseph. *Antiq.* xvii. 9. 10); which case, indeed, furnishes an answer to those who deny that the Galileans attended the feasts with the rest of the Jews.

The seditious character of the Galileans also explains why Pilate, when sitting in judgment upon Jesus, caught at the word Galilee when used by the chief priests, and asked if he were a Galilean (Luke xxiii. 6). To be known to belong to that country was of itself sufficient to prejudice Pilate against him, and to give some countenance to the charges, unsupported by impartial evidence, which were preferred against him, and which Pilate himself had, just before, virtually declared to be false.

GALILEE, SEA OF. [SEA.]

GALL occurs in its *primary* and *proper* meaning, as denoting the substance secreted in the gall-bladder of animals, commonly called bile, in the following passages: Job xvi. 13, 'He poureth out my gall,' מררתי; Sept. τὴν χολήν μου; Vulg. *viscera mea*. The metaphors in this verse are taken from the practice of huntsmen, who first surround the beast, then shoot it, and next take out the entrails. The meaning, as given by Bp. Heath, is, 'he entirely destroyeth me.' Job xx. 14 (describing the remorse of a wicked man), מרורת פתנים, 'the gall of adders' (which according to the ancients is the seat of their poison, Plin. *Hist. Nat.* ii. 37); Sept. χολὴ ἀσπίδος; Vulg. *fel aspidum*. Job xx. 25, where, to describe the certainty of a wicked man's destruction, it is said, 'the glittering sword cometh out of his gall,' ממררתו; Sept. διαίταις αὐτοῦ, *his vitals*; Vulg. *amaritudine sua*. In the story of Tobit the *gall* of a fish is said to have been used to cure his father's blindness (Tobit vi. 8; xi. 10, 13). Pliny refers to the use of the same substance for diseases of the eye, 'ad oculorum medicamenta utile habetur' (*Hist. Nat.* xxviii. 10); also speaking of the fish *callionymus*, he says, 'Fel cicatrices sanat, et carnes oculorum superfluas consumit' (xxxii. 4. 7). Galen and other writers praise the use of the liver of the *silurus* in cases of dimness of sight. For the other senses of gall, see ROSH.—J. F. D.

GALLIO (Γαλλίων). Junius Annæus Gallio, elder brother of Seneca the philosopher. His name was originally M. Ann. Novatus, but changed to Jun. Ann. Gallio in consequence of his adoption by Jun. Gallio the rhetorician ('pater Gallio,' Quintil. *Inst. Orat.* iii. 1. § 21; ix. 2. § 91). Seneca dedicated to him his treatise *De Vita Beata*, and in the preface to the fourth book of his *Naturales Quæstiones* describes him as a man universally beloved ('nemo mortalium uni tam dulcis est, quam hic omnibus'); and who, while exempt from all other vices, especially abhorred flattery ('inexpugnabilem virum adversus insidias, quas nemo non in sinum recipit'). According to Eusebius, he committed suicide before the death of Seneca ('Junius Gallio, frater Senecæ, egregius declamator, propria se manu interfecit,' *Thesaurus Temporum*, &c., p. 161, Amstel. 1658); but Tacitus speaks of him as alive after that event (*Annal.* xv. 73), and Dion Cassius states that he was put to death by order of Nero. He was *Proconsul* (ἀνθυπατεύοντος, Tex. rec. ἀνθυπάτου ὄντος, Tischendorf) *of Achaia* (Acts xviii. 12) under the Emperor Claudius, when Paul first visited Corinth, and nobly refused to abet the persecution raised by the Jews against the Apostle. Dr. Lardner has noticed the strict accuracy of Luke in giving him this designation, which is obscured in the Auth. Vers. by the use of the term *deputy* (*Credibility*, part i. book i. ch. i.; *Works*, i. 34).—J. E. R.

GAMALIEL (גַּמְלִיאֵל, *God is my rewarder*), a member of the Sanhedrim in the early times of Christianity, who, by his favourable interference, saved the Apostles from an ignominious death (Acts v. 34). He was the teacher of the Apostle Paul before the conversion of the latter (Acts xxii. 3). He bears in the Talmud the surname of הזקן *hazoken*, 'the old man,' and is represented as the son of Rabbi Simeon, and grandson of the famous Hillel: he is said to have occupied a seat, if not the presidency, in the Sanhedrim during the reigns of Tiberius, Caligula, and Claudius, and to have died eighteen years after the destruction of Jerusalem.

There are idle traditions about his having been converted to Christianity by Peter and John (Phot. *Cod.* clxxi. p. 199); but they are altogether irreconcilable with the esteem and respect in which he was held even in later times by the Jewish Rabbins, by whom his opinions are frequently quoted as an all-silencing authority on points of religious law. Neither does his interference in behalf of the Apostles at all prove—as some would have it—that he secretly approved their doctrines. He was a dispassionate judge, and reasoned in that affair with the tact of worldly wisdom and experience, urging that religious opinions usually gain strength by opposition and persecution (Acts v. 36, 37), while, if not noticed at all, they are sure not to leave any lasting impression on the minds of the people, if devoid of truth (ver. 38); and that it is vain to contend against them, if true (ver. 39) That he was more enlightened and tolerant than his colleagues and contemporaries, is evident from the very fact that he allowed his zealous pupil Saul to turn his mind to Greek literature, which, in a great measure, qualified him afterwards to become *the* Apostle of the Gentiles; while by the Jewish Palestine laws, after the Maccabæan wars, even the Greek *language* was prohibited to be taught to the Hebrew youth (Mishna, סוטה *Sotah*, ix. 14).

Another proof of the high respect in which Gamaliel stood with the Jews long after his death, is afforded by an anecdote told in the Talmud respecting his tomb, to the effect that Onkelos (the celebrated Chaldæan translator of the Old Testament) spent seventy pounds of incense at his grave in honour of his memory (יוחסין *Youchsin*, 59).—E. M.

GAMES. If by the word are intended mere secular amusements, which are the natural expression of vigorous health and joyous feeling, fitted, if not designed, to promote health, hilarity, and friendly feeling, as well as to aid in the development of the corporeal frame, we must look to other quarters of the globe, rather than to Palestine, for their origin and encouragement. The Hebrew temperament was too deep, too earnest, too full of religious emotion, to give rise to games having a national and permanent character. Whatever of amusement, or rather of recreation, the descendants of Abraham possessed, partook of that religious complexion which was natural to them; or rather the predominant religiousness of their souls gave its own hue, as to all their engagements, so to their recreations. The influence of religion pervaded their entire being; so that whatever of recreation they needed or enjoyed is for the most part found blended with religious exercises. Hence their great national festivals served at once for the devout service of Almighty God, and the recreation and refreshment of their own minds and bodies.

Games, however, are so natural to man, especially in the period of childhood, that no nation has been or can be entirely without them. Accordingly a few traces are found in the early Hebrew history of at least private and childish diversions. The heat of the climate too in Syria would indispose the mature to more bodily exertion than the duties of life imposed, while the gravity which is characteristic of the Oriental character might seem compromised by anything so light as sports. Dignified ease therefore corresponds with the idea which we form of Oriental recreation. The father of the family sits at the door of his tent, or reclines on the housetop, or appears at the city gate, and there tranquilly enjoys repose, broken by conversation, under the light and amid the warmth of the bright and breezy heavens, in the cool of the retiring day, or before the sun has assumed his burning ardours (Deut. xvi. 14; Lam. v. 14). Even among the active Egyptians, whose games have been figured on their mural tablets, we find little which suggests a comparison with the vigorous contests of the Grecian games. One of the most remarkable is the following (No. 302), showing what appears to be play with the single-stick.

Zechariah (viii. 5) alludes to the sportiveness of children in the streets as a sign and consequence of that peace and prosperity which are so free from alarm that the young take their usual games, and are allowed entire liberty by their parents:—'and the streets of the city shall be full of boys and girls playing in the streets thereof' (comp. Jer. xxx. 19). An interesting passage illustrative of these street-amusements is found in Matt. xi. 16:—'This generation is like

unto children sitting in the markets and calling unto their fellows, We have piped unto you and ye have not danced, we have mourned unto you and ye have not lamented.'

303.

That the elegant amusement of playing with tamed and trained birds was not unusual may be learnt from Job xli. 5:—'Wilt thou play with him (leviathan) as with a bird?' Commenting on Zech. xii. 3, Jerome mentions an amusement of the young, which we have seen practised in more than one part of the north of England. 'It is customary,' he says, 'in the cities of Palestine, and has been so from ancient times, to place up and down large stones to serve for exercise for the young, who, according in each case to their degree of strength, lift these stones, some as high as their knees, others to their middle, others above their heads, the hands being kept horizontal and joined under the stone.'

Music, song, and dancing were recreations reserved mostly for the young or for festive occasions. From Lam. v. 16, 'the crown is fallen from our head' (see the entire passage on the subject of games), it might be inferred that, as among the Greeks and Latins, chaplets of flowers were sometimes worn during festivity. To the amusements just mentioned frequent allusions are found in holy writ, among which may be given Ps. xxx. 11; Jer. xxxi. 13; Luke xv. 25. In Isaiah xxx. 29, a passage is found which serves to show how much of festivity and mirth was mingled with religious observances; the journey on festival occasions up to Jerusalem was enlivened by music, if not by dancing:—'Ye shall have a song as in the night when a holy solemnity is kept; and gladness of heart, as when one goeth with a pipe to come into the mountain of the Lord, to the Mighty One of Israel.' A passage occurs in 2 Sam. ii. 14, which may indicate the practice among the ancient Israelites of games somewhat similar to the jousts and tournaments of the middle ages. On the subject of dancing see Michaelis (*Mos. Recht*, art. 197). No trace is found in Hebrew antiquity of any of the ordinary games of skill or hazard which are so numerous in the western world.

The Grecian influence which made itself felt after the Exile led to a great change in the manners and customs of the Hebrew nation. They were soon an almost different people from what we find them in the days of their national independence and primitive simplicity. In Macc. i. 14, we find evidence that the Grecian games were introduced; and that a gymnasium was built under Antiochus Epiphanes:—'They built a place of exercise at Jerusalem, according to the custom of the heathen.' Compare 2 Macc. iv. 12, 13, 14, where special mention is made of the prevalence of 'Greek fashions,' and 'the game of Discus;' though, as appears clearly from the last passage (v. 17), these practices were considered contrary to the Mosaic institutions, and were hateful to pious Israelites. The Herodian princes had theatres and amphitheatres built in Jerusalem and other cities of Palestine, in which were held splendid games, sometimes in honour of their Roman masters. We cite a remarkable passage to this effect from Josephus (*Antiq.* xv. 8. 1):—'Herod revolted from the laws of his country, and corrupted the ancient constitution by introducing foreign practices, while those religious observances which used to lead the multitude to piety were neglected. He appointed solemn games to be celebrated every fifth year in honour of Cæsar, and built a theatre at Jerusalem, as also a very great amphitheatre in the plain—both costly works, but contrary to Jewish customs. He also called men together out of every nation: wrestlers and others, who strove for prizes in these games, were invited by the hope of reward and the glory of victory. The most eminent were got together, for the rewards were very great, not only to those that performed their exercise naked, but to musicians also. He moreover offered no small rewards to those who ran for prizes in chariot-races, when they were drawn by two, three, or four pairs of horses. He made also great preparation of wild beasts, and even of lions in great abundance, and of such other beasts as were either of uncommon strength or rarely seen. These fought one with another, or men condemned to death fought with them. Above all the rest the trophies gave most displeasure to the Jews, who imagined them to be images.' (See also *Antiq.* xvi. 5. 1; xix. 7. 4; xix. 8. 2; Eichhorn, *De Judæor. re scenica*, in the *Comment. Goetting. Rec.*) The drama does not appear to have been introduced, but Jews were in foreign countries actors of plays (Joseph. *Vita*, § 3). The passage already cited (see the original) is full of evidence how distasteful these heathenish games were to the more sound-minded part of the nation.

These facts make it the less surprising that allusions should be found in the New Testament writings to the Grecian games, on which we think it desirable to supply somewhat detailed information, in order to serve as illustrations of Scriptural language.

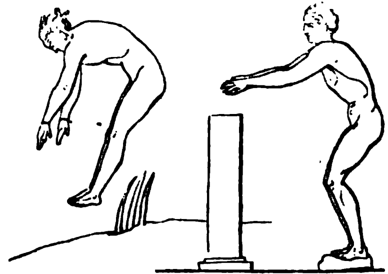
The fact that, as we have seen, the games of the amphitheatre were celebrated even in Jerusalem, serves to make it very likely that Paul, in 1 Cor. xv. 32; iv. 9, alludes to these detestable practices, though it is not probable that the apostle was himself actually exposed to the fury of the raging animals. Contrary to the opinion of some writers, the reference to these combats appears to us very clear, though it was only metaphorically that Paul 'fought with beasts at Ephesus.'

The word which the Apostle (1 Cor. xv. 32) uses is emphatic and descriptive, ἐθηριομάχησα. The θηριομαχία or beast-fight (*venatio* in Latin) constituted among the Romans a part of the amusements of the circus or amphitheatre. It consisted in the combat of human beings with animals. The persons destined to this barbarous kind of amusement were termed θηριομάχοι,

bestiarii. They were generally of two classes—1. Voluntary, that is, persons who fought either for amusement or for pay: these were clothed and provided with offensive and defensive weapons.

304.

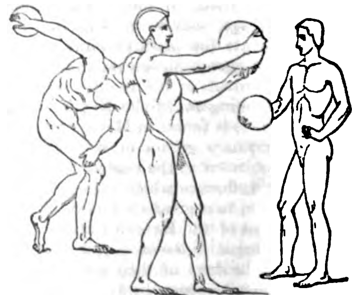
2. Condemned persons, who were mostly exposed to the fury of the animals unclothed, unarmed, and sometimes bound (Cic. *Pro Sext.* 64; *Ep. ad Quint. Frat.* ii. 6; Senec. *De Benef.* ii. 19; Tertull. *Apol.* 9). As none but the vilest of men were in general devoted to these beast-fights, no punishment could be more condign and cruel than what was frequently inflicted on the primitive Christians, when they were hurried away, 'to the lions' (as the phrase was), merely for their fidelity to conscience and to Christ, its Lord. Ephesus appears to have had some unenviable distinction in these brutal exhibitions (Schleusner, *in voc.*), so that there is a peculiar propriety in the language of the Apostle.



Of these beast-fights the Romans were passionately fond. The number of animals which appear to have been from time to time engaged in them, is such as to excite in the reader's mind both pity and aversion. Sylla, during his prætorship, sent into the arena no fewer than 100 lions, which were butchered by beings wearing the human shape. Pompey caused the destruction in this way of 600 lions. On the same occasion there perished nearly twenty elephants. These numbers, however, are small compared with the butchery which took place in later periods. Under Titus 5000 wild and 4000 tame animals, and in the reign of Trajan 11,000 animals, are said to have been destroyed.

The New Testament, in several places, contains references to the celebrated Grecian Games, though it may be allowed that some commentators have imagined allusions where none were designed. As might, from his heathen learning, be expected, it is Paul who chiefly supplies the passages in question. In Gal. ii. 2, 'Lest by any means I should run in vain;' v. 7, 'Ye did run well, who did hinder you?' Phil. ii. 16, 'That I may rejoice in the day of Christ that I have not run in vain nor laboured in vain;' Heb. xii. 1, 'Run with patience the race set before us;' xii. 4, 'Ye have not resisted unto blood, striving against sin' (ἀνταγωνιζόμενοι); Phil. iii. 14, 'I press toward the mark for the prize;' 2 Tim. ii. 5, 'If a man strive he is not crowned except he strive lawfully.' The most signal passage, however, is found in 1 Cor. ix. 24-27, 'Know ye not that they which run in a race run all, but one receiveth the prize? So run that ye may obtain. And every man that striveth for the mastery is temperate in all things. Now they do it to obtain a corruptible crown; but we an incorruptible. I therefore so run, not as uncertainly; so fight I, not as one that beateth the air; but I keep under my body, and bring it into subjection, lest that by any means, when I have preached to others, I myself should be a castaway.' In the Old Testament two passages contain a clear reference to games; Ps. xix. 5, 'Rejoiceth as a strong man to run a race;' Eccl. ix. 11, 'I said that the race is not to the swift.'

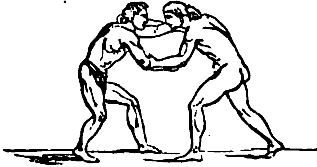
These Scriptural allusions are the more appropriate, because the Grecian games were in their origin and in their best days intimately connected with religion. Games in Greece were very numerous. They are traceable by tradition back to the earliest periods of Grecian civilization. Indeed, much of the obscurity which rests on their origin is a consequence and a sign of their high and even mythic antiquity.



Four of these games stood far above the rest, bearing the appellation of ἱεροί, 'sacred,' and deriving their support from the great Hellenic family at large, though each one had special honour in its own locality: these four were the Olympic, Pythian, Nemean, and Isthmian. The first were held in the highest honour. The victors at the Olympic games were accounted the noblest and happiest of mortals, and every means was taken that could show the respect in which they were held. These games were celebrated every five years at Olympia, in Elis, on the west side of the Peloponnesus. Hence the epoch called the Olympiads.

The gymnastic exercises were laid down in a well-planned systematic series, beginning with the easier (κοῦφα), and proceeding on to the more

305.



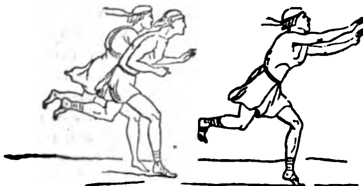
difficult (βαρέα). Some of these were specially fitted to give strength, others agility; some educated the hands, others the feet. Among the

306.

lighter exercises was reckoned running (δρόμος), leaping (ἅλμα), quoiting (δίσκος), hurling the

javelin (ἀκόντιον). When skill had been obtained in these, and the consequent strength, then followed a severer course of discipline. This was two-fold—1, simple; 2, compound. The simple consisted of wrestling (πάλη), boxing (πυγμή):

307.



the compound we find in the Pentathlon (the five contests), and the Pankration (or general trial of

308.

strength). The Pentathlon was made up of the union of leaping, running, quoiting, wrestling, and hurling the spear; the Pankration consisted of wrestling and boxing. It is not necessary here to speak in detail of the distinctions which Galen makes between the ordinary motions of the body and those which were required in these exercises, since the names themselves are sufficient to make manifest how manifold, severe, long, and difficult the bodily discipline was, and the inference is easy and unavoidable that the effect on the bodily frame must have been of the most decided and lasting kind.

Racing may be traced back to the earliest periods of Grecian antiquity, and may be regarded as the first friendly contest in which men engaged. Accordingly the Olympic and Pythian, probably also the other games, opened with foot-races. Foot-racing, perfected by systematic practice, was divided into different kinds. If you ran merely to the end of the course (στάδιον), it was called stadium; if you went thither and back, you ran the double course

309.

(δίαυλος). The longest course was the δόλιχος, which required extraordinary speed and power of endurance. What it involved the ancients have left in no small uncertainty. It is sometimes given as seven times over the stadium; at others, twelve times; at others again, twenty; and even the number of four and twenty times is mentioned. These lengths will give some idea of the severity of the trial, and serve to illustrate the meaning of the Apostle when he speaks of running with patience the race set before him (ὑπομονή, *patience, sustained effort*). Indeed, one Ladas, a victor at the Olympic games, in the δόλιχος or long race, was so exhausted by his efforts that, immediately on gaining the honour and being crowned, he yielded up his breath: a fact which also serves to throw light on Scriptural language, as showing with what intense eagerness these aspirants (δολιχοδρόμοι, long-runners) strove for perishing chaplets (φθαρτὸν στέφανον). In the preparatory discipline every thing was done which could conduce to swiftness and strength. The exercises were performed with the body naked and well oiled. Minute directions were established in order to prevent foul play (κακοτεχνία, κακούργια) of any kind, so that all the competitors might start and run on terms of entire equality—illustrating the words of Paul on the necessity of running lawfully. The contest was generally most severe; to reach the goal sooner by one foot was enough to decide the victory. How true and graphic then the descriptions given by Paul: it was, as the Apostle states, ἐν σταδίῳ, in the race-course, that the contests took place; every one striving for the victory was temperate in all things; nay more, he kept under his body and brought it into subjection. A passage is found in the *Enchiridion* of Epictetus, which shows with what propriety the terms which the Apostle employs were chosen by him: 'You wish to conquer at the Olympic games? so also do I; for it is honourable; but bethink yourself what this attempt implies, and then begin the undertaking. You must subject yourself to a determinate course; must submit to dietetic discipline (ἀναγκοτροφεῖν); must pursue the established exercises at fixed hours in heat and cold; must abstain from all delicacies in meat and drink; yield yourself unreservedly to the control of the presiding physician, and even endure flogging.'

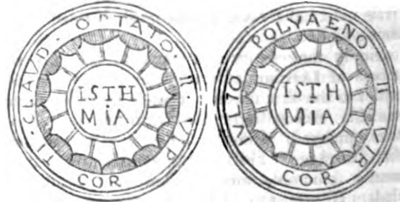
It may well be supposed that the competitors employed all their ability, and displayed the greatest eagerness to gain the prize. The nearer, too, they approached to the goal, the more did they increase their efforts. Sometimes the victory depended on a final spring; happy he that retained power enough to leap first to the goal. The spectators, also, used every encouragement in their power, these favouring one competitor, those another:—

'Verbaque dicentum, nunc, nunc incumbere tempus,
Hippomene, propera. Nunc viribus utere totis.'

All these remarks go to show how wisely Paul acted in selecting the figure, and how carefully he has preserved the imagery which belongs to it. A word employed in the Common Version, 1 Cor. ix. 27, 'Lest when I have *preached* to others I myself should be a castaway'—namely, *preached*, mars the figure. The original is κηρύξας—'acted the part of herald,' whose business it was to call the competitors to the contest and proclaim their victory, functions which Paul spent his life in performing.

Paul speaks in the same connection of running not as uncertainly, of fighting not as one who beateth the air; alluding to the preludial exercises, trials of individual and of comparative strength, which took place in the course of training. These runnings and boxings had no immediate aim nor result, and implied no real competitor; hence the propriety of the terms which the sacred writer employs. Statius (*Theb.* vi. 587) has given a lively picture of some of the practices by which the runners endeavoured to give suppleness and agility to their limbs:

tunc rite citatos
Explorant, acuuntque gradus, variasque per artes
Exstimulant docto languentia membra tumultu.
Poplite nunc flexo sidunt, nunc lubrica forti
Pectora collidunt plausu; nunc ignea tollunt
Crura, brevemque fugam necopino fine reponunt.

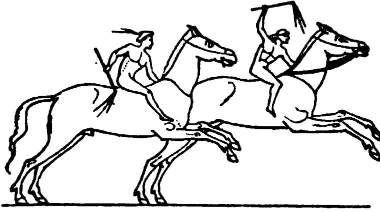


After the herald had called the competitors into the lists, they sometimes tried their strength and exercised their frames, by running out and back on the course. Virgil (*Æn.* iv. 370) represents Dares as displaying the size and flexibility of his arms prior to his combat with Eryx:

Ostenditque humeros latos, alternaque jactat
Brachia protendens, et verberat ictibus auras,

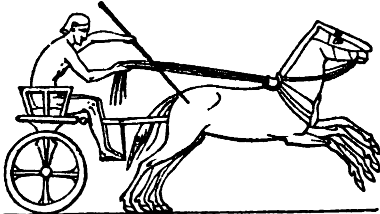
where, in *verberat ictibus auras*, we have even a verbal agreement with the Apostle's phraseology. (Compare *Æn.* v. 4, 46.) Among the proprieties of language for which the passage in 1 Cor. ix. is distinguished, may be placed the term which Paul employs to describe the prize. It is the specific word used in the case, namely *βραβεῖον*: this was the customary term, the employment of which was rendered proper from the name of the officers, *βραβευταί*, who gave the conqueror his crown. The entire passage indeed is singularly happy in its phraseology, thereby adding confirmation to the grounds on which the authority of the Epistle rests. We cannot, however, think one word well rendered in our English version, *ἀδόκιμος*, 'castaway;' or, if this be a good rendering, the Apostle has at least failed in strict verbal propriety; for who were they in connection with the games who were, or were termed, castaway? *Δοκιμασία* was the term employed to describe the severe scrutiny which candidates for office underwent at Athens. Persons who were found unfit were termed *ἀδόκιμοι*, and as this verdict was a declaration of civic and social incapacity, not to say of moral turpitude, the word came to mean 'dishonoured.' This, or the word *rejected*, seems the proper rendering in the last verse of the ninth chap. of 1 Corinthians. The Apostle's fear evidently was, lest, after having put others on this noble undertaking, he himself should be at last found unfit to engage therein; for the allusion seems to be derived from the preparatory exercises of which he is immediately speaking, and not from the issue of the contest; and at the end of these preparatory exercises, a very severe examination had to be undergone by such as wished to 'run the race.' This interpretation may perhaps serve to set the Apostle's humility in a strong light; since he expresses his fear lest he should not be even admitted to enter the lists for 'the glorious prize.' If, however, any one prefers referring the word to the final issue of the contest of life, then the same meaning remains, and the Apostle says, that, after all his striving, he may lose the crown, proving at last unequal to the achievement of the victory.

In writing to the Christians at Corinth there was a special propriety, on the part of the Apostle, in making allusions to the public games. Corinth was the place where one of the four Greek national games was celebrated, namely, the Isthmian. These games were so called from being held on the isthmus which joins northern with southern Greece—a spot of land most celebrated in Grecian history, alike in martial and commercial matters. No spot could well be chosen for such a purpose better than this isthmus, which lay in the very centre of Grecian civilization. In the narrowest part of this tongue of land, between Lechæum and Schœnus, stood the famous temple, sacred to the Isthmian Neptune. It was shaded by a pine grove. Here began the Isthmian games. Here also was a splendid theatre, and a race-course adorned with white marble. Other distinguished works of art adorned and hallowed the vicinity.



If we attempt to trace these games to their origin we are lost in the mists which envelope the mythical periods of the Greek national life. They were obviously connected with the worship of Neptune; the wide diffusion of which tended greatly to secure for the Isthmian games the great celebrity which they enjoyed, calling, as they did, competitors and spectators from all parts. The Persian war gave a new impulse to the Isthmian games. The Peloponnesian war, on the contrary —as being a contest of Greek against Greek— dimmed their glory, and abated their influence. Even when, at a later period, Corinth became a Roman colony, the games, so far from losing their importance, were exhibited under the Cæsars with an increased celebrity, so that Paul, in the picture which he drew, was writing to the eye of the Corinthian Christians. And, if corroboration of the credibility of the first letter were needed, we might find all we could wish in antiquities yet in existence; for a coin of Marcus Aurelius, and another of Commodus (and indeed others of a

310.



later period), bear each one the inscription of ISTHMIA, *the Isthmian Games*. The Corinthians appear to have been inordinately fond of these amusements. They were held every three years. They comprised three leading divisions—musical, gymnastical, and equestrian contests. In the first the tyrant Nero carried off a crown, by destroying his too highly-gifted antagonist. The gymnastic contests were the same as those of which we have already spoken. A few words, however, may here be introduced as to the horse-racing, which has not been hitherto described. Generally the same kinds prevailed as at the Olympic and Pythian games. Chariot-races seem to have been practised in the earliest heroic times, since chariots were as

early as this used in battle, and the notices which have come down to us refer this kind of sport to the early period now indicated. It stood pre-

311.

eminently before other games. The skill and outlay which it required prevented any but persons of distinction—the wealthy, governors, princes, and kings—from engaging in its enjoyments. The Homeric competitors made use in their games of their two-horsed war-chariots, which they occupied each one alone, and drove themselves, though in battle it was not unusual for the reins to be entrusted to a charioteer. In the heroic ages these contests opened the games. To them belonged the highest prizes. In the Olympic games horse and chariot racing gradually branched out into different kinds. So much importance was attached to these games that historians have recorded the exact time when particular kinds were first introduced, and immortal poets sung the

312.

praises alike of the victors and their horses. The four-horsed chariot-race (ἅρμα τέθριππον) took its origin in the twenty-fifth Olympiad. In the ninety-third Olympiad was held the first contest with two-horsed chariots. Foals were now made use of, as well as horses. For a time mules also were employed. Other varieties, mostly designed for a display of skill and splendour, came and went as fashion dictated. The number of chariots that might appear on the course at once cannot be accurately determined. Pindar (*Pyth.* v. 46) praises Arkesilas of Cyrene for having calmly brought off his chariot uninjured, in a contest where no fewer than forty took part. The course had to be gone over twelve times. The urgency of the drivers, the speed and exhaustion of the horses, may easily be imagined. The greatest skill was needed in turning the pillar which marked the extremity of the course, especially when the contending chariots were numerous. How to avoid the danger of collision, how to turn as near the pillar as possible, so as to save ground, were points of the greatest consequence, as Sophocles in his *Electra* intimates (West's Trans.).

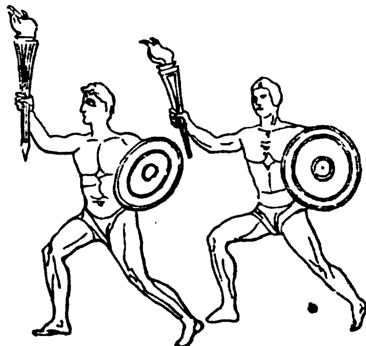
Th' Athenian, with consummate art,
His course obliquely veered, and steering wide
With steady rein, the wild commotion pass'd
Of tumbling chariots and tumultuous steeds.

At the Olympic games the prize was simply a chaplet made of wild olive. The crowns were laid on a tripod, and placed in the middle of the course, so as to be seen of all. On the same table there were also exposed to view palm-branches, one of which was given into the hand of each conqueror at the same time with the chaplet. The victors, having been summoned by proclamation, were presented with the ensigns of victory, and conducted along the stadium, preceded by a herald, who proclaimed their honours, and announced their name, parentage, and country.

The real reward, however, was in the fame which ensued. A chaplet won in the chariot-races at Olympia was the highest of earthly honours. What congratulations from friends; how was the public eye directed to the fortunate conqueror; what honour had he conferred on his native city, and for what office was such an one unfit! What intense and deep delight must his bosom have been filled with when the full acclaim of assembled Greece fell upon his ear, coming in loud salutations and applauses from every part of the crowded course! Then came the more private attentions of individual friends. One brought a chaplet of flowers; another bound his head with ribbons. Afterwards came the triumphal sacrifice made to the twelve gods, accompanied by sumptuous feasting. The poet now began his office, gaining, in some cases, both for himself and the happy victor, an unexpected immortality. Music also lent her aid, and his name was sung wherever the noble accents of the Greek tongue asserted their supremacy. In order to perpetuate the memory of these great men, their names and achievements were entered into a public register, which was under the care of suitable officers. A no less privilege was that of having a statue of themselves placed either at the expense of their country or their friends, in the sacred grove of Jupiter. A perhaps still greater honour awaited the victor on his return home. The conquerors at the Isthmian games were wont to be received in their chariots, superbly attired, amid thronging and jubilant multitudes.

One or two other privileges belonged to these victors, such as immunity from public offices, and a certain yearly stipend. If to all this be added the strict scrutiny which competitors were obliged to undergo (in the best ages), so that none could enter the lists but such as were of pure Greek blood, and incorrupt in life, none but such as had undergone the required disciplinary training, and (in the case of the chariot and horse-races) none but those who could afford to possess and train horses in a country in which, as in Greece, horses, particularly in the earlier ages, were very scarce and dear; it will be seen that the distinction of the prize was not over-rated, when it was compared with a Roman triumph, nor that the description of Horace is too highly coloured—

palmaque nobilis
Terrarum dominos evehit ad Deos.



At the Isthmian games the prize was parsley during the mythic periods. In later ages the victor was crowned with a chaplet of pine leaves. Parsley, however, appears to have been also employed. If the conqueror had come off victorious

in the three great divisions—music, gymnastics, and racing—he was in the Pythian, as well as in the other sacred games, presented also with a palm-branch. The names of about seventy persons are preserved who gained honours at the Isthmian games, among which occurs that of the emperor Nero, who is recorded to have gained the victory in the character of harper and that of herald.

Let it not be thought that the use which especially Paul makes of the Grecian games is unbecoming the lofty subject of religion. Such an idea can be entertained by none but those who have the most superficial notions on the subject, and who possess no acquaintance with the spirit of classical antiquity. A full vindication of the propriety of these allusions would require a detailed exposition of the good which the games conferred on the Greek communities. One or two points only can be spoken of.

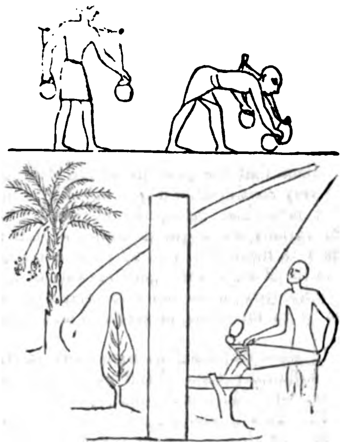
These games, taken in connection with the early and long training by which they were preceded, and of which they were both the natural result and reward, were a grand educational system, bearing primarily indeed in favour of the physical development, but also tending directly and powerfully to advance the highest intellectual and moral culture. The exercises through which the child, the youth, and the man were stage by stage conducted, each in succession becoming more difficult and more complex, as the bodily powers came into play and acquired vigour, were admirably adapted to give that union of strength and beauty in which physical perfection consists, and in which the Greek nations probably surpassed every other known people. But the vigour and energy which ensued imply health and hilarity; hence arise humane, kind, and generous dispositions; so that a good state of the body promoted moral soundness, and moral soundness, combined with bodily vigour, guaranteed intellectual activity and mental power. The existence of these exercises and these games in each separate state secured the development and activity of those feelings which made his own country to each one dear and venerable; while a narrow and selfish patriotism was greatly prevented, and emotions which embraced the whole Hellenic race were enkindled and fostered by those general meetings which, from time to time, called together, especially at Olympia, all who were not aliens from the Greek commonwealth, marked out by the use of that noble instrument of speech, the Greek tongue.

It is impossible not to look with admiration on the wise and careful measures which were taken in order to make the gymnasia schools of order and of moral propriety as well as of physical beauty. Aware of the importance of the training, Solon took the business under his special care, laying down minute regulations as to time, place, and extent, so that nothing might be left to chance or caprice. Then the school, in general, had its president—gymnasiarch,—and each separate department a separate head; as in the case of the torch-race, which had its lamparchy, or government, charged with the office of making, in connection with it, all necessary arrangements. There were, however, two officers whose names and functions strikingly serve to show how greatly these Grecian institutions had a favourable influence on character: the first was the kosmetes, whose name comes from a word (κόσμος) signifying order and beauty, and whose office consisted

313. [Torch-race.]

in the special superintendence of every thing fitted to further these high qualities; the other officer was termed sophronistes; and his business was still more intimately conducive to inform the mind and give shape and pressure to the life, since, as his designation (from σώφρων) proves, he was required to guide the pupils to σωφροσύνη, a term for which we have no English equivalent, but which may perhaps be approximately rendered by 'sound-mindedness.' The elder Athenians were so solicitous to give a right direction to the influence of the gymnasium, the palæstra, and the stadium, that they annually elected ten sophronists (one out of each tribe), and the honour which was attached to the office may be learnt from the fact that, in some inscriptions, their name stands before that of the gymnasiarchs (heads of the gymnasia) themselves. The usual province of the sophronists extended beyond the limits of the exercise-grounds, for they exercised over the youth a general legal oversight. Even their play-hours were under the eye of the sophronist. When the young men joined in the solemn procession of the grand national Panathenæa they were under the guardianship of the sophronists. Were they present at the nocturnal festival held in honour of Hebe, they were still attended by and subject to their wise, experienced, and judicious sophronist. That something even of a sacred character belonged to these preparatory exercises appears from the fact that the kosmetes bore also the designation of ἱερεύς (priest), having charge of certain sacrifices.

Were there no other consideration in their favour, yet the severe examination to which candidates for admission to these contests were compelled to submit, would suffice to satisfy the reader that the tendency of the games was good, not less in a moral than a social point of view. Besides being questioned as to their condition—were they freemen or slaves?—and as to their blood—were they really Greeks?—they had also to satisfy their judges that their characters were free from all moral stain. In the public stadium the herald, laying his hand on the head of the candidate, inquired with a loud voice, 'Can any one accuse this man of any crime? Is he a robber or a slave? or wicked or depraved in his life?' If he successfully passed this ordeal the candi-



date was then conducted to the altar of Jupiter, the punisher of the perjured, where with solemn rites he was required to swear (if he could with truth and safety) that he had gone through the required preparatory course of discipline, and would abstain from every breach of the laws in the contest before him. On the subject here treated of see West's *Odes of Pindar*, 2nd edit.; Potter's *Antiquities of Greece*. By far the best work, however, is Krause's *Die Gymnastik und Agonistik der Hellenen*; and his *Die Pythien, Nemeen und Isthmien*, Leipzig, 1841.

J. R. B.

GARDEN. Several gardens are mentioned in the Scriptures, as the garden of Eden (Gen. ii. 8, 9, 10, 15), Ahab's garden of herbs (1 Kings xxi. 2), the royal garden near the fortress of Zion (2 Kings xxi. 18; xxv. 4), the royal garden of the Persian kings at Susa (Esther i. 5; vii. 7, 8), the garden of Joseph of Arimathea (John xix. 41), and the garden of Gethsemane (John xviii. 1). It is clear, from Josh. v. 2, and Lam. ii. 6, that gardens were generally hedged or walled, as indeed Josephus expressly states respecting the gardens near Jerusalem (*De Bell. Jud.* v. 7). In Neh. ii. 5, and John xx. 15, gardeners and keepers of gardens by occupation are indicated.

Gardens were planted not only with fragrant and beautiful plants, but with various fruit-bearing and other trees (Gen. ii. 9; Jer. xxix. 5; Amos ix. 14). Thus we find mention of nut-gardens (Cant. vi. 14), pomegranate-gardens (Cant. iv. 13), olive-gardens (Deut. viii. 8; 1 Chron. xxvii. 28), vine-gardens (Cant. iv. 2; viii. 8). Here, however, we are not to suppose that the gardens were exclusively occupied by these fruits, but that they were severally predominant in the gardens to which they gave name. The distinction, for instance, between a vine-garden and a vineyard would be, that, in the latter, the vine was cultivated solely for use, whereas in the former it was planted for solace and ornament, to cover walls, and to be trained in arbours and on trellises.

Gardens were, when possible, planted near streams, which afforded the means of easy irrigation. This explains such passages as Gen. ii. 9, sq., and Isa. i. 30. But streams were few in Palestine, at least such as afforded water in summer, when alone water was wanted for irrigation: hence rain-water, or water from the streams which dried up in summer, was in winter stored up in reservoirs, spacious enough to contain all the water likely to be needed during the dry season. In fact many of our own large nurseries are watered in the same manner from reservoirs of rain-water. The water was distributed through the garden in numerous small rills, which traversed it in all directions, and which were supplied either by a continued stream from the reservoir, or had water poured into them by the gardeners, in the manner shown in the Egyptian monuments. These rills being turned and directed by the foot, gave rise to the phrase 'watering by the foot,' as indicative of garden irrigation (Deut. xi. 10). The following representation (No. 313) very clearly shows the way in which water was raised, by a balanced lever, from the stream or reservoir, and poured into a trough, whence it flowed into the various canals for irrigation. This method is still in use. There is a curious account of ancient garden irrigation in Pliny (*Hist. Nat.* xix. 4), which the reader may consult with advantage.

314. [Watering Garden.]

Gardens were dedicated to various uses among the Hebrews, such as we still find prevailing in the East. One most essential difference between them and our own is that they are not attached to or in any way connected with the residence, but are situated in the suburbs. We have known gardens from half a mile to a mile distant from the houses of the persons to whom they belonged. It is manifest that all the gardens mentioned in Scripture were outside the several towns. This is, however, to be understood of regular gardens, for shrubs and flowers were often planted in the open courts of the dwelling-houses.

People repair to their suburban gardens to take the air, to walk, and to refresh and solace themselves in various ways. For their use there is

315. [Garden-houses.]

mostly in each garden a kind of summer-house or pavilion, fitted up with much neatness, gaily

painted, and furnished with seats, where the visitants may sit and enjoy themselves. Here sometimes banquets were and are still given, attended by singing and music (Isa. li. 3; lxv. 3). The custom of burying the dead in gardens is indicated in Gen. xxiii. 19, 20; 2 Kings xxi. 4; 1 Sam. xxv. 1; Mark xv. 46; and still occurs sometimes in the East, but is not very prevalent. We find it also among the Greeks (Heliodorus, *Æthiop.* i. 2, p. 35), and the Romans (Suetonius, *Galba*, 20).

It is evident that the gardens of the Hebrews were in a very considerable degree devoted to the culture of medicinal herbs, the preparation of which in various ways was a matter of much solicitude with them (Jer. viii. 22). This is still the case in the East, where vegetable simples are as much employed in medicine as they were in this country in the times of Gerarde and Culpepper.

It would seem that the Jews were much in the habit of performing their devotions in gardens (Gen. xxiv. 63; Matt. xvi. 30; John ii. 48; xviii. 1, 2). This interesting practice, however, was idolatrously abused; for the worship of idols in these shady seclusions was not of unfrequent occurrence, and is often mentioned in Scripture (1 Kings xiv. 23; 2 Kings xvi. 4; xvii. 10; 2 Chron. xviii. 4; Isa. lxv. 3; lxvi. 17; Jer. ii. 20; iii. 6; Ezek. xx. 28).

Such are the principal points of information concerning gardens which may be collected from Scripture, or which may be connected with the Scriptural intimations.

The Jews, in their ceremonial treatises, have frequent occasion to mention gardens, chiefly for the purpose of showing what plants or seeds might or might not be planted or sown together under the law against heterogeneous propagations (Lev. xix. 9; Deut. xxi. 9, 11). From this source some curious facts relating to the arrangements of gardens may be gleaned. The following are from the Mishnic treatise *Kilaim*, which is devoted to the general subject: 'Trees must not be grafted on trees of a different kind, nor one kind of shrub on another kind of shrub, nor yet trees on shrubs, nor shrubs on trees.' Rabbi Jehudah, however, sanctioned this last practice. 'Shrubs must not be planted in a sycamore-bush; rue must not be grafted on white cassia, because that would be a shrub on a tree; a scion of the fig-tree must not be planted among *chatzub* (supposed 'ivy'), to cool it; a vine branch must not be sunk (trained) into a melon bed, to instil its juices therein, because that is a tree on a plant; pumpkin-seed must not be set among mallow, in order that it may be preserved therein, as that is herb in herb.' 'In a garden bed that is six hands square five different kinds of seeds may be sown, namely, four kinds in the four corners of the bed, and a fifth in the centre. If the bed has a ridge (border), thirteen different kinds may be sown, three in each corner, and one in the middle of the bed.' 'All kinds of field-seeds must not be sown in a garden bed; but all kinds of herbs (garden-seed) may be sown therein.' 'A ridge (border) that had been one hand high, but is decreased in height, still remains good because it had been originally of lawful height.' This applies, of course, to the ridges by which different plants which might not lawfully mingle were separated. 'In a trench or dry kennel, one hand deep, three different kinds of seeds may be sown, namely, one kind on each side and one kind in the middle.'

It is very evident that where such careful distinctions and rules of separation existed, great attention must have been required to the means of dividing the different plants from each other. This was effected not only by ridges and trenches, but by light fences of cane. This appears from what follows: 'A partition of canes is considered a fence, provided the space between each cane is less than three hands wide, so that a young kid cannot pass through. If there is a breach in the fence to the extent of ten amoth, it is considered as a gate (entrance). Should a greater portion of the fence be broken down, it is unlawful to sow or plant towards the breach. If there are several breaches in the fence, should the portion still standing be greater than that broken down, it is permitted; but should the portion broken down be greater than that standing, it is forbidden.' These examples are selected only as specimens of the endless modes by which the later Jews sought to carry out with minute and impossible exactness the useful regulation of the Mosaical law. For that law various reasons have been given, on which we are not required to pronounce any judgment: but it appears to us that the economical grounds which may be collected from the effects which appear to result from the interdicted practices, are quite sufficient in themselves, whether others exist or not. Thus we find enumerated among the radical defects of Hindu husbandry—'the barbarous system of sowing two or three species of grain in one field....The mode of reaping is equally defective; if two or three species of grain are sown in the same field, the Indian husbandman treads down a great part of his crop in order to collect each kind separately; indeed, so fond is he of this method of proceeding that he pursues it even when the crop is all of one kind, that he may select what he deems the ripest' (Tennant's *Indian Recreations*, in *Edinb. Review*, iv. 320).

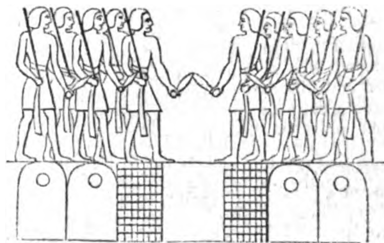
There is no reason to suppose that the gardens of the ancient Jews differed in any material respect from those which are still found in Palestine. Such difference as did exist was doubtless occasioned chiefly by the minute rules which were founded upon the law forbidding the intermixture of diverse plants and seeds. The gardens of the Holy Land have been mentioned by travellers in terms too vague and general to afford the basis of a satisfactory description. Dr. Olin seems to have paid most attention to them. Of the gardens near Shechem he says, 'Upon turning an angle in the steep gorge we found ourselves, as if by enchantment, in the midst of fruitful gardens filled with vegetables, flowers, and fruit-trees, and all in the highest perfection of luxuriance and beauty. Olives, vines, acacias, pomegranates, figs, mulberries, and several species of trees which I did not recognise, are crowded together in small enclosures, forming an impervious shade as well as an impenetrable thicket: and yet the capabilities of the soil seem not to be overburdened. Each separate tree and plant thrives to admiration, and seems rather to profit than suffer from the thick dark canopy of branches and foliage, which entirely excludes the sun's rays from the tangled huddle of trunks and roots. A beautiful mountain stream runs through the midst

of this forest of gardens, in a channel mostly artificial and sometimes covered; but the water often rises into small fountains, and forms several cascades' (*Travels in the East*, ii. 350). The orange and citron trees which abound in these gardens near Shechem (see Schubert, *Reise ins Morgenlande*, ii. 116) were probably those not recognised by Dr. Olin, from their not being in fruit at the time of his visit.

The mural paintings of the ancient Egyptians afford us much information respecting their gardens and processes of gardening. But the difference of climate, soil, and produce, in Egypt and Palestine, was too material to justify us in expecting much information from this source respecting the gardens of the Hebrews. As, however, some notions on this head must have been common to both countries, we subjoin the observations of Mr. Wathen on the gardens of Egypt (*Arts, &c. of Ancient Egypt*, p. 108).

'The ancient plans of gardens show that the Egyptians were not less fond than our ancestors of mathematical figures, straight walks, architectural decorations, and vegetable avenues; and that they as thoroughly entered into the idea of seclusion and safety suggested by enclosures within enclosures. It has been remarked that in some old English places there were almost as many walled compartments without, as apartments within doors; and the same may be said of Egyptian country-houses. This principle of seclusion, and an excessive love of uniform arrangement, are remarkably displayed in the plan of a large square garden given in Professor Rosellini's great work (*I Monumenti dell' Egitto*). Here—

"Grove nods at grove, each alley has a brother,
And half the platform just reflects the other."



This royal garden must have formed a most enviable retreat from "the intolerable day" of an Egyptian summer. The whole was shut in by an embattled wall. On one side a canal runs along just without the walls. In the centre of the enclosure is an oblong walled vineyard; the vines, planted in rows or avenues, are trailed above on trellis-work forming shady arched walks. The space on one side this central vineyard exactly corresponds to that on the other. In each there is a row of palms, an oblong tank with water-fowl, four flower-beds on a lawn, and an open summer-house on the margin overlooking the pool; an oblong walled compartment of trees; a second tank with water-fowl and flowers; and all along within the wall of circuit a row of trees of three kinds in regular alternations. At one end of the garden next the entrance is a building containing apparently one large room, perhaps for the royal entertainments; at the other end or back is a house of three stories, which commanded a view of the whole. This garden, with its sheltered walks, its groves and tanks of water, its seclusion and privacy, reminds us of the 'fair garden' of Joacim at Babylon, with its baths, its deep shady coverts, and its "privy gate," in the apocryphal story of Susannah.

'Obelisks and pylons, with flagstaffs and streamers, seem to have been occasionally introduced as garden decorations. In the parched climate of Egypt a large supply of water is absolutely necessary for a thriving vegetation; hence tanks and canals form a chief feature in these villa scenes. With rows of palms laden with fruit on their margin, they recall Jeremiah's poetical comparison of "the man that trusteth in the Lord" to "a tree planted by the waters, and that spreadeth out her roots by the river, and shall not see when heat cometh, but her leaf shall be green; and shall not be careful in the year of drought, neither shall cease from yielding fruit," contrasted with "the man who trusteth in man," who is "like the heath in the desert, and shall not see when good cometh; but shall inhabit the parched places in the wilderness, in a salt land and not inhabited" (Jer. xvii. 8).'

GARLIC. [SHOM.]

GATE, DOOR (שַׁעַר; Sept. πύλη), the entrance to enclosed grounds, buildings, dwelling-houses, towns, &c. Thus we find mentioned—1. *Gates of cities*, as of Jerusalem, its sheep-gate, fish-gate, &c. (Jer. xxxvii. 13; Neh. i. 3; ii. 3; v. 3); of Sodom (Gen. xix. 1); of Gaza (Judg. xvi. 3). 2. *Gates of royal palaces* (Neh. ii. 8). 3. *Gates of the Temple*. The temple of Ezekiel had two gates, one towards the north, the other towards the east; the latter closed (Ezek. xliv. 1, 2), the other must have been open. 4. *Gates of tombs* (Matt. xxvii. 60). 5. *Gates of prisons*. In Acts xii. 10, mention is made of the iron-gate of Peter's prison (xvi. 27). Prudentius (Περιστεφ. *Hymn.* v. 346) speaks of gatekeepers of prisons. 6. *Gates of caverns* (1 Kings xix. 13). 7. *Gates of camps* (Exod. xxxii. 26, 27; see Hebr. xiii. 12). The camps of the Romans had generally four gates; of which the first was called *porta prætoria*, the second *decumana*, the third *principalis*, the fourth *quintana* (Rosin. *Antiq. Rom.* x. 12). The camp of the Trojans is also described as having had gates (Virgil, *Æn.* ix. 724).

We do not know of what materials the enclosures and gates of the temporary camps of the Hebrews were formed. In Egyptian monuments such enclosures are indicated by lines of upright shields, with gates apparently of wicker, defended by a strong guard.

316. [Egyptian Camp-gate.]

GATES OF TOWNS.—As the gates of towns served the ancients as places of security [FORTIFICATIONS], a durable material was required for them, and accordingly we find mentioned—1. *Gates of iron and brass* (Ps. cvii. 16; Isa. xlv. 2; Acts xii. 10). It is probable that gates thus described were, in fact, only sheeted with plates of copper or iron (Faber, *Archæol.* p. 297); and it is probably in this sense we are to interpret the hundred brazen gates ascribed to the ancient Babylon. Thevenot (*Voyage*, p. 283) describes the six gates of Jerusalem as covered with iron: which is probably still the case with the four gates now open.

Other iron-covered gates are mentioned by travellers, such as some of the town gates of Algiers (Pitt's *Letter*, viii. p. 10), and of the towers of the so-called iron-bridge at Antioch (Pococke, vol. ii. pt. 1, p. 172). The principal gates of the great mosque at Damascus are covered with brass (Maundrell, p. 126). Gates of iron are also mentioned by Hesiod (*Theog.* 732), by Virgil (*Æn.* i. 482; vii. 609), and by Ovid (*Metam.* vii. 126).

2. *Gates of stone*, and of pearls, are mentioned in Isa. liv. 12, and Rev. xxi. 12, which, it has justly been supposed, refer to such doors, cut out of a single slab, as are occasionally discovered in ancient countries. At Essouan (Syene), in Upper Egypt, there is a granite gateway bearing the name of Alexander, the son of Alexander the Great (Wilkinson, iii. 403). The doors leading to the several chambers of the so-called 'Tombs of the Kings' near Jerusalem, were each formed of a single stone seven inches thick, sculptured so as to resemble four panels: the styles, muntins, and other parts were cut with great art, and exactly resembled those of a door made by a carpenter at the present day—the whole being completely smooth and polished, and most accurate in their proportions. The doors turned on pivots, of the same stone of which the rest of them were composed, which were inserted in corresponding sockets above and below, the lower tenon being of course short. This is one of the modes in which heavy doors of wood are now hung in the East. One of these doors was still hanging in Maundrell's time, and 'did not touch its lintel by at least three inches.' But all these doors are now thrown down and broken (Monconys, p. 308: Thevenot, p. 261; Pococke, ii. 21; Maundrell, *sub* March 28th; Wilde, ii. 299; Robinson, i. 530). Similar doors are described by Dr. Clarke (*Travels*, pt. ii. vol. i. p. 252) in the remarkable excavated sepulchres at Telmessus, on the southern coast of Asia Minor; and others were noticed by Irby and Mangles (*Travels*, p. 302) in the sepulchres near Bysan (Bethshan). There are stone doors to the houses in the Haouran beyond the Jordan (Burckhardt, p. 58); and the present writer has repeatedly seen in the north of Persia the street doors of superior houses composed of a single slab of a kind of slate. In the ancient sepulchre recently discovered, as described by Dr. Wilde (*Narrative*, ii. 343), the *outer* door is formed by a single slab, and moves on *horizontal* pivots that run into sockets cut in the pilasters at the top, in the manner of a swinging hinge.

3. *Gates of wood.* Of this kind were probably the gates of Gaza (Judg. xvi. 3). They had generally two valves, which, according to Faber's description (*Archæol.* p. 300), had sometimes smaller doors, or wickets, to afford a passage when the principal gate was closed—a fact which he applies to the illustration of Matt. vii. 13.

Gates were generally protected by some works against the surprises of enemies (Jer. xxxix. 4). Sometimes two gates were constructed one behind another, an outer and inner one; or there were turrets on both sides (2 Sam. xviii. 24, 33; see Faber's *Archæol.* p. 301). The gates of the ancients were generally secured with strong heavy bolts and locks of brass or iron (Deut. iii. 5; 1 Sam. xxiii. 7; 1 Kings iv. 13; 2 Chron. viii. 5; Jer. xlv. 2; xlix. 31; Ps. cxlvii. 13). This was probably done with a view to the safety of the town, and to prevent hostile inroads (Harmer's *Observations*, vol. i. p. 188). The keys of gates, as well as of doors, were generally of wood; and Thevenot observes that gates might be opened even with the finger put into the key-hole—from which Harmer elucidates the passage in the Song of Solomon, v. 4.

The gates of towns were kept open or shut according to circumstances: in time of war they were closed against the inroads of the enemy (Josh. ii. 5), but they were opened when the enemy had been conquered. On festive occasions they were also thrown wide open; to which Ps. xxiv. 7 alludes. This opening of the gates, as well as closing them, was done by means of keys. That near the gates towers were often constructed, serving for defence against attacks of the enemy, may be inferred from Deut. iii. 5; 2 Sam. xviii. 24; Judg. ix. 35, comp. with 52. So Juvenal (*Sat.* vi. 290) puts the towers of the gates for the gates themselves. Virgil (*Æn.* vi. 550) represents the infernal gate as having a tower. Enemies, therefore, in besieging towns were most anxious to obtain possession of the gates as quickly as possible (Deut. xxviii. 52; Judg. ix. 40; 2 Sam. x. 8; xi. 33; 1 Kings viii. 37; Job v. 4; Isa. xxii. 7; xxviii. 6); and generally

317. [Gate of Konieh.]

the town was conquered when its gates were occupied by the invading troops (Deut. xxviii. 57; Judg. v. 8). This observation is made also by several Greek and Roman authors (Herodian, *Histor.* i. 12, § 14; Virgil, *Æn.* ii. 802, sq.). In or near the gates, therefore, they placed watchmen, and a sufficiently strong guard, to keep an eye on the movements of the enemy, and to defend the works in case of need (Judg. xviii. 16; 2 Kings vii. 3; Neh. xiii. 22; see Herodian, *Histor.* iii. 2, § 21; Virgil, *Æn.* ii. 265, sq. 335).

We read that some portions of the law were to be written on the gates of towns, as well as on the doors of houses (Deut. vi. 9; xi. 20); and

if this is to be literally understood, it receives illustration from the practice of the Moslems in painting passages of the Koran on their public and private gates. Various artificial figures and inscriptions were engraved on their gates by the Romans (Virgil, *Georg.* iii. 26, sq.).

Criminals were punished without the gates (1 Kings xxi. 13; Acts vii. 59), which explains the passage in Heb. xiii. 12. The same custom existed among the Romans (see Plaut. *Milit. Glorios.* act ii. sc. iv. 6, 7). At Rome executions took place without the Porta Metia or Esquilina. As to the gate through which Christ was led, before his crucifixion, opinions differ; some taking it to have been the dung-gate (Lamy, *Apparat. Geograph.* c. 13. § 3, p. 321); others, following Hottinger (*Cipp. Hebr.* p. 16) and Godwyn, understand it of the gate of judgment. But for all that concerns the gates of Jerusalem, we must refer to the article Jerusalem.

Gates are often mentioned in Scripture as places at which were holden courts of justice, to administer the law and determine points in dispute: hence *judges in the gate* are spoken of (Gen. xix. 1; xxiii. 10, 18; xxxiv. 20; Deut. xvi. 18; xvii. 8; xxi. 19; xxv. 6, 7; Josh. xx. 4: Ruth iv. 1; 1 Sam. iv. 18; 2 Sam. xviii. 24; xix. 8; 1 Kings xxii. 10; Job xxix. 7; Prov. xxii. 22; xxiv. 7; Lament. v. 14; Amos v. 12; Zech. viii. 16). The reason of this custom is apparent; for the gates being places of great concourse and resort, the courts held at them were of easy access to all the people; witnesses and auditors to all transactions were easily secured (a matter of much importance in the absence or scanty use of written documents); and confidence in the integrity of the magistrate was ensured by the publicity of the proceedings. There was within the gate a particular place, where the judges sat on chairs, and this custom must be understood as referred to when we read that courts were held *under the gates*, as may be proved from 1 Kings xxii. 10; 2 Chron. xviii. 9. Apart from the holding of courts of justice, the gate served for reading the law, and for proclaiming ordinances, &c. (2 Chron. xxxii. 6; Neh. viii. 1, 3). We see from Prov. xxxi. 23; Lam. v. 14, that the inferior magistrates held a court in the gates, as well as the superior judges (Jer. xxxvi. 10); and even kings, at least occasionally, did the same (1 Kings xxii. 10 comp. with Ps. xxvii. 5). The gates at Jerusalem served the same purpose; but for the great number of its inhabitants, many places of justice were required. Thus we find that Nehemiah (iii. 32) calls a particular gate of this city the counsel-gate, or justice-gate; which seems to have had a preference, though not exclusive, since courts must have been holden in the other gates also. After the erection of the second temple, the celebrated great Sanhedrim, indeed, assembled in the so-called *conclave cæsuræ* of the temple; but we find that one of the Synedria of Jerusalem, consisting of twenty-three members, assembled in the east-gate, leading to the court of Israel, the other in the gate looking to the temple mount. The same custom prevails to the present day among other Oriental nations, as in the kingdom of Marocco, where courts of justice are holden in the gate of the capital town (Döpter, *Theatrum pœnarum*, p. 9, sq.). Respecting the Abyssinians and inhabitants of Hindostan, we are likewise assured that they employed their gates for courts of justice. Homer (*Iliad*, i. 198, sq.) states of the Trojans, that their elders assembled in the gates of the town to determine causes, and Virgil (*Æn.* i. 509, sq.) says the same. From Juvenal (*Satir.* iii. 11) it appears that with the Romans the porta Capena was used for this purpose (Gräv's *Thesaurus Antiq. Roman.* tom. x. p. 179). We may refer to J. D. Jacobi's *Dissert. de foro in portis*, Leipzig, 1714, where the custom of holding courts in the gates of towns is explained at large.

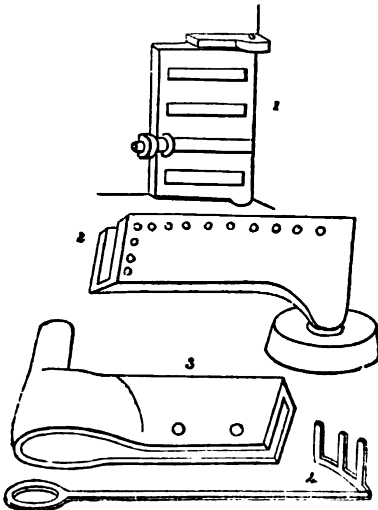
In Palestine gates were, moreover, the places where, sometimes at least, the priests delivered their sacred addresses and discourses to the people; and we find that the prophets often proclaimed their warnings and prophecies in the gates (Prov. i. 21; viii. 3; Isa. xxix. 21; Jer. xvii. 19, 20; xxvi. 10; xxxvi. 10).

Among the heathen gates were connected with sacrifices, which were offered in their immediate vicinity; in which respect the hills near the gates are mentioned (2 Kings xxiii. 8). In Acts xiv. 13, the gates of Lystra are referred to, near which sacrifice was offered; in which passage Camerarius, Dedien, and Heinsius take πυλῶνας to mean the town-gate.

The gate was, further, a public place of meeting and conversation, where the people assembled in large numbers to learn the news of the day, and by various talk to while away the too tedious hours (Ps. lxix. 13). It was probably with this view that Lot sat under the gate of Sodom (Gen. xix. 1); which is more probable than the Jewish notion that he sat there as one of the judges of the city.

Under the gates they used to sell various merchandises, provisions, victuals, *e. g.* at Samaria (2 Kings vii. 1); and for this purpose there were generally recesses in the space under them (see Herodian, vii. 6. § 6). The same is stated by Aristophanes (*Equit.* 1245, ed. Dind.) of the gates of the Greeks. But with respect to the markets at gates, the present writer would note what has often occurred to his own notice in different parts of the East, which is, that the commodities sold at the gates are almost exclusively country produce, animal or vegetable, for the supply of the city, and not manufactured goods, which are invariably sold in the bazaars in the heart of the town. The gate-markets also are only held for a few hours early in the morning.

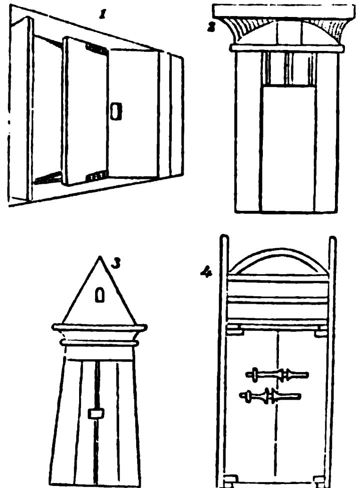
On an uproar having broken out at Jerusalem, the heads of the people met under the New-gate (Jer. xxix. 26), where they were sure to find insurgents. The town-gates were to the ancient Orientals what the coffee-houses, exchanges, markets, and courts of law, are in our large towns: and such is still the case in a great degree, although the introduction of coffee-houses has in this, and other respects, caused some alteration of Eastern manners. In capital towns the quidnuncs occasionally sat with the same views near the gate of the royal palace, where also the officers and messengers of the palace lounged about; and where persons having suits to offer, favours to beg, or wishing to recommend themselves to favourable notice, would wait day after day, in the hope of attracting the notice of the prince or great man at his entrance or coming forth (Esth. ii. 19, 21, iii. 2).



Gates are put figuratively for public places of

towns and palaces. The gates of a town are also put instead of the town itself (Gen. xii. 17; xxiv. 60; Deut. xii. 12; Ps. lxxxvii. 2).

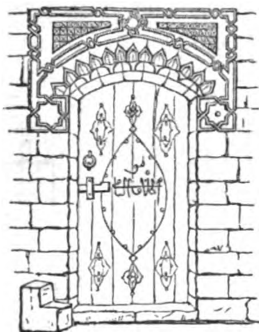
318. [Palace-Gate.]



The *gates of death*, and of *hell*, occur in Job xxxviii. 17; Ps. ix. 14; Micah ii. 13. Doors and gates of hell are chiefly introduced, Prov. v. 5; Isa. xxxviii. 10; Matt. xvi. 19; and the Jews go so far in their writings as to ascribe real gates to hell (Wagenseil, *Sota*, p. 220). Virgil (*Æn.* vi. 126) also speaks of infernal gates. The origin of this metaphorical expression is not difficult to explain; for it was very common to use the word gates as an image of large

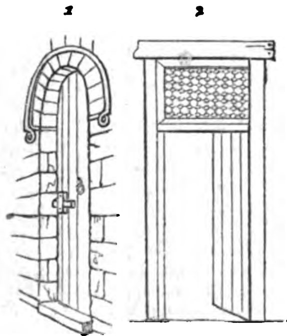
319.

empires (Ps. xxiv. 7); and in pagan authors the abode of departed souls is represented as the residence of Pluto (see Virgil, *Æn.* vi. 417, sq.). In the passage, then, Matt. xvi. 19, by 'gates of hell' must be understood all aggressions by the infernal empire upon the Christian church.



Among the ancient Egyptians doors were frequently stained so as to imitate foreign wood. They were either of one or two valves, turning on pins of metal, and were secured within by bars and bolts. Some of the bronze pins have been discovered in the tombs of Thebes, and two of them, after Wilkinson, are figured in No. 319, figs. 2, 3. They were fastened to the wood with nails of the same metal. The stone lintels and floor behind the threshold of the tombs and temples still exhibit the holes in which the pins turned, as well as those of the bolts and bars, and the recess for receiving the opening valves. The folding-doors had bolts in the centre, sometimes above as well as below; a bar was placed across from one wall to the other; and in many cases they were secured by wooden locks passing over the centre (No. 320, fig. 4) at the junction of the two folds. 'It is difficult (remarks Sir J. G. Wilkinson) to say if these last were opened by a key, or merely slided backward and forward like a bolt; but if they were really locks, they were probably upon the

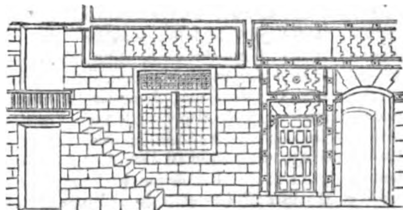
320.



principle of those now used in Egypt, which are of wood, and opened by a key furnished with several pins answering to a smaller number that fall down into the hollow movable tongue, into which the key is introduced when they open or fasten the lock.' For greater security they are also occasionally sealed with a mass of clay. This was also a custom of the ancient Egyptians, as appears from Herodotus (ii. 121); from tombs actually so closed at Thebes; and from the sculptures, as in No. 320, fig. 3, where the door is thus closed and sealed. To this custom there is an allusion in Job [Clay]. At a later period, when iron came into general use, keys were made of that metal, of the shape shown in No. 319, fig. 4. Of the kind thus indicated were probably the lock and key which fastened the summer-parlour of King Eglon (Judg. iii. 23, 25). In this

case Ehud locked the door, and took away the key; but when the servants became alarmed, they easily opened it with another key; which suggests that the lock, as in ancient Egypt or the modern East, was nothing more than a peculiarly constructed open bolt of wood, which the wooden or metal key was adapted to raise and thrust back. The forms of the Egyptian doors may be seen from the cuts. Fig. 1, No. 319, is from a curious ancient model, in the British Museum, of a small ancient Egyptian house, and may serve to show very clearly how the doors of small houses were formed, hung, and secured. The elegant cornice of the door, fig. 2, No. 320, will not escape observation; fig. 1 is a remarkable instance of a folding-door. The chief entrance to houses was through a pyramidal pylon on a projecting porch of columns, whose capitals were often ornamented with ribbons. Over the doorway was sometimes a brief hieroglyphical legend (Wathen, p. 101). This last circumstance reminds one of the writing on their doors recommended to the Israelites, as already noticed.

321.



A comparison of the ancient Egyptian doors with hose now used in the East will probably suggest no incorrect notion of the provision among the ancient Hebrews in this respect. A sort of intermediate idea arising from this comparison will be found to furnish very satisfactory illustrations of most of the passages of Scripture which relate to the subject. The present cuts require little explanation. No. 321 is a very

1 2

322.

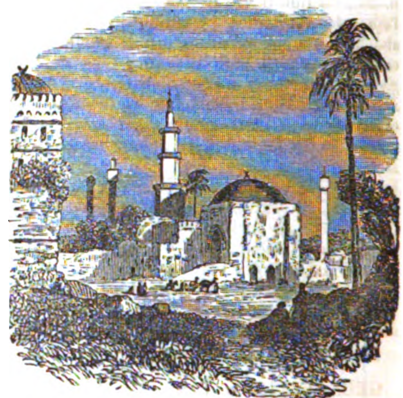
usual form of the street-door of a private house. The inscription on the central compartment is usually painted in white or black. It means, 'He (*i. e.* God) is the Creator, the Everlasting,' and brings strongly to mind the Hebrew custom to which we have more than once alluded. In No. 322 (fig. 2) is another street-door of a more simple character. Doors are generally unpainted throughout Western Asia and in Egypt. The other doors shown in the cuts belong to the internal front of the houses, and not to the external frontage or screen. Fig. 2, No. 322, has an open lattice over the door, and the elegant proportion of the whole entrance claims attention. No. 323 shows different forms of common doors,

323.

and the whole piece affords an interesting illustration of the basement of an Eastern house, with the stone steps leading to the gallery, into which all the state rooms and family rooms open. In conclusion, we introduce an engraving intended to illustrate the highly-enriched doorways used in ornamental buildings, such as garden-houses, summer-houses, &c.

324.

In the interior of houses it is not unusual to see curtains instead of doors, especially in summer. This helps to keep the apartment cool, and also enables servants to enter without noise. This custom originated in the use of tents. Accordingly we find that all the entrances of the tabernacle had curtains, although the framework was of wood (Exod. xxvi. 31-33, 36, 37); and even in the temple a curtain or 'vail' formed the separation between the Holy and the Most Holy place.



GATH (גַּת; Sept. Γέθ; Joseph. Γίττα or Γίττη), one of the five princely cities of the Philistines, of which mention is made in Josh. xiii. 3

It was one of the cities upon which the ark is said to have brought calamity (1 Sam. v. 8, 9), and which offered in connection therewith a trespass-offering, each one a golden emerod (1 Sam. vi. 17). Goliath, of the family of giants which Joshua spared (Josh. xi. 22), of which other members may be found mentioned in Scripture (1 Chron. xxi. 5-8; 2 Sam. xxi. 19-22), has rendered Gath a word familiar from our childhood; but it is not certain whether Goliath was a native or merely a resident of Gath (1 Sam. xvii. 4). To Achish, king of Gath, David fled for fear of Saul (1 Sam. xxi. 10; xxvii. 2-7; Ps. lvi.). At his own entreaty David received from Achish the city of Ziklag. David dwelt in the country of the Philistines 'a full year and four months.' David's connection with Gath throws light on the feelings which dictated the words (2 Sam. i. 20), 'Tell it (the death of "Saul and Jonathan his son") not in Gath.' Micah also (i. 10) says, 'declare it (the wound come unto Judah, ver. 9) not at Gath.' It was conquered by David, and fortified both by him and by Rehoboam (2 Sam. viii. 1; 1 Chron. xviii. 1; 2 Chron. xi. 8). From 2 Sam. xv. 18, it appears that David had a band (600 men) of Gittites in his service at the time of the rebellion of Absalom. Their devotedness to him under Ittai their leader forms a beautiful episode in the history of David's varied fortune (2 Sam. xv. 19, sq.). Shimei's visit to Gath and its fatal consequences to himself may be read in 1 Kings ii. 39-46. In the reign of Solomon mention is made of a king of Gath (1 Kings iv. 24), who was doubtless a tributary prince, but powerful enough to cause apprehension to Solomon, as appears from the punishment he inflicted on Shimei. Under Jehoash, Hazael, king of Syria, took Gath (2 Kings xii. 17); from his successor, Benhadad, the place was recovered (2 Kings xiii. 24). It must, however, have soon revolted; for Uzziah (2 Chron. xxvi. 6), finding it necessary to war against the Philistines, 'broke down the wall of Gath.' Probably the conquest was not of long duration. This constant withstanding of the power of Jerusalem shows that Gath was a place of great resources and high eminence—a conclusion which is confirmed by the language employed by the prophets (Amos vi. 2; Micah i. 10). 'Gath,' says Jerome (*on Micah* i.), 'is one of the five Philistine cities lying near the confines of Judah, on the road from Eleutheropolis to Gaza; now it is a very large village.' On Jerem. xxv. the same authority declares that Gath was not far from Azotus. Modern travellers give no description of the place (Reland, *Palæst.* p. 785, sq.).

There was a Gath-hepher belonging to the children of Zebulun (Josh. xix. 10, sq.), the birth-place of the prophet Jonah (2 Kings xiv. 25), lying not far from Sepphoris on the road to Tiberias. Another Gath (Gath-rimmon, Josh. xix. 45) lay in the territory of Dan. It was a Levite city (Josh. xxi. 24; 1 Chron. vi. 69). In the time of Eusebius it was a very large village, 'twelve miles from Diospolis, as you go hence to Eleutheropolis' (*Onomast.*). The Gath-rimmon mentioned in Josh. xxi. 25, as being in the tribe of Manasseh, Raumer (*Palästina*) supposes to be another Levite city; but Winer (*Handwörterbuch*), with more likelihood, ascribes its origin to a mistake of the transcriber, who took the word from the preceding verse. The Septuagint has *Βαιθσάν*.—J. R. B.

GAULONITIS. [GOLAN.]

GAZA (עַזָּה; Sept. Γάζα; Arabic, *Ghuzzeh*) lies on the road leading from Akabah to Hebron, which passes along nearly the whole length of the great Wady-el-Arabah. It is on the sea-coast, in lat. 31° 29′, long. 34° 29′ (Robinson), in the country of the Philistines (Josh. xv. 47). It is a very ancient place, as we find it mentioned in Gen. x. 19, where it is given as one of the border-cities of the Canaanites. In Deut. ii. 23, it is found as the place unto which the Avims dwelt. Joshua smote the Canaanites as

325.

far as Gaza (Josh. x. 41), but spared the Anakims (giants) that dwelt there (Josh. xi. 21, 22). In the division of the land, Gaza fell to the lot of Judah (Josh. xv. 47), and was taken by him with the coast thereof (Judg. i. 18), but its inhabitants were not exterminated (Judg. iii. 3). Gaza was one of the five Philistine cities which gave each a golden emerod as a trespass-offering to the Lord (1 Sam. vi. 17). Solomon's kingdom extended as far as Gaza (1 Kings iv. 24). But the place appears always as a Philistine city in Scripture (Judg. iii. 3; xvi. 1; 1 Sam. vi. 17; 2 Kings xviii. 8). Hezekiah smote the Philistines as far as Gaza (2 Kings xviii. 8). Gaza fell into the hands of the Egyptians, probably Pharaoh-Necho (Jer. xlvii. 1; comp. Herod. ii. 159). The prophets speak in severe terms against it (Jer. xxv. 20; xlvii. 5; Amos i. 6, 7; Zeph. ii. 4; Zech. ix. 5). After the destruction of Tyre it sustained a siege of two months against Alexander the Great (Joseph. *Antiq.* xi. 8. 4). Jonathan Maccabæus (1 Macc. xi. 61) destroyed its suburbs; Simon Maccabæus (1 Macc. xiii. 43) took the city itself, though not without extraordinary efforts. Alexander Jannæus spent a year in besieging it and punishing its inhabitants (*Antiq.* xiii. 13. 3). The place was rebuilt by Gabinius (*Antiq.* xiv. 5. 3). It was among the cities given by Augustus to Herod (*Antiq.* xv. 7. 3), after whose death it was united to the province of Syria (*Antiq.* xvii. 11. 4).

Gaza is celebrated for the exploit recorded of Samson (Judg. xvi. 1-3), who 'took the doors of the gate of the city, and the two posts, and went

away with them, bar and all, and put them on his shoulders, and carried them up to the top of a hill that is before Hebron.' The Philistines afterwards took Samson, and put out his eyes, and brought him to Gaza, and bound him with fetters of brass, and he did grind in the prison-house: he, however, pulled down the temple of Dagon, god of the Philistines, and slew, together with himself, 'all the lords of the Philistines,' besides men and women (Judg. xvi. 21-30). It was near Gaza—on the road from Jerusalem to that place—that Philip baptized the eunuch 'of great authority under Candace, queen of the Ethiopians' (Acts viii. 26, sq.).

Gaza lay some distance from the sea (Arrian, ii. 26), though it had a port on the sea, called Γάζα πρὸς θάλασσαν, 'Gaza on the sea,' called also Majuma (ὁ Μαιούμας), which Constantine called Constantia, from the name of his son, giving it, at the same time, municipal rights. Julian took away this name and ordered it to be called the port of Gaza. Subsequent emperors restored the name and the privileges of the place. It was afterwards called the sea-coast of Gaza. Further particulars may be read in Reland (*Palæstina*, p. 791, sq.), where mention is made, from Pausanias, of something like a parallel to the feat of Samson; and where, as well as in Kuinoel (*in loc.*), and in Winer (*Handwörterbuch, in voc.*), explanatory circumstances may be found of the words in Acts viii. 26—'Gaza, which is desert.'—J. R. B.

GAZELLE. [ANTELOPE.]

GEBA (גֶּבַע; Sept. Γαβαά). It is often stated that Geba and Gibeah were names of the same place. The two names are indeed only masculine and feminine forms of the same word, signifying 'hill;' but that they were two different places is evident from Josh. xviii. 24; comp. 28; 1 Sam. xiii. 2, comp. 3; Isa. x. 29. Geba belonged to the tribe of Benjamin (Josh. xviii. 24), and was assigned to the priests (Josh. xxi. 17; 1 Chron. vii. 40). The Philistines were smitten from Geba unto Gazer by David (2 Sam. v. 25); Asa rebuilt Geba and Mizpeh with the stones of Ramah (1 Kings xv. 22; 2 Chron. xvi. 6). 'From Geba (in the north) to Beersheba' (in the south) (2 Kings xxiii. 8), expressed the whole extent of the separate kingdom of Judah, just as 'from Dan to Beersheba' expressed the whole length of Palestine. It would seem, from the manner in which Geba (Gaba) and Ramah are coupled in Neh. vii. 30, that they were very near each other, but the site of Geba is now unknown.

1. GEBAL (גְּבָל; Sept. Γεβάλ), a district, or perhaps sovereignty, south of Judæa, in the land of Edom. Gebal signifies a mountain, and apparently belongs not to the most ancient times, as it does not occur when the Israelites were actually in this quarter, but is first found in Ps. lxxxiii. 8, which was probably written in the time of Jehoshaphat. The country south of the Dead Sea, and on the east of the Ghor, or great valley, bears the same name (Jebal or Djebal) at the present day (Burckhardt, p. 401, sq.), and is doubtless the same as the Gebal of Scripture, the Gebalitis (or rather Gobolitis) of Josephus, and the Gebalene of the Romans. Josephus says, indeed, that the sons of Eliphaz, son of Esau, settled in that part of Idumæa which was called Gebalitis, and that denominated from Amalek Amalekitis: 'For Idumæa (he adds) was the name of a large country, which in its several parts retained the names of its peculiar inhabitants' (*Antiq.* ii. 2. 1). We may therefore take Gebal as the name of the northernmost portion of Idumæa, which was nearest to Palestine.

2. GEBAL. [GIBLITES.]

GEDALIAH (גְּדַלְיָה, *God-educated;* Sept. Γοδολία), son of Ahikam, and appointed by Nebuchadnezzar governor of Judæa after the destruction of Jerusalem. He was probably of the number of those who quitted the city at the instance of the prophet, justly despairing of the successful defence of a place which God had abandoned. Gedaliah had inherited his father's respect for Jeremiah (Jer. xl. 5, sq.), and was moreover enjoined by Nebuzaradan to look to his safety and welfare. Gedaliah was in every way worthy of the difficult post he had to fill; and he adopted as the principle of his conduct that submission to existing circumstances which was requisite in one who believed that Judah had, according to the declared will of God, been justly doomed and punished for her iniquities, and who yet believed that His loving kindness had not utterly departed from her. He established the seat of his melancholy government at Mizpah in the tribe of Benjamin: and there the Jews, who had fled at the advance of the Chaldæan armies, or when the troops of Zedekiah were dispersed in the plains of Jericho, quitting their retreats, began to gather around him. Gedaliah wisely counselled them to submission and quietness; and he promised on that condition to ensure them the undisturbed enjoyment of their possessions, and of the produce of the ground. In this hope the labours of the field were resumed, and the extraordinary returns of that season secured as if specially given to repair the recent injuries of war. But this calm was of short duration. Among those who returned was a member of the royal family, named Ishmael, who had taken refuge with Baalis, king of the Ammonites. He appears to have been irritated at seeing one who was not of the house of David seated upon even the shadow of David's throne; and some of the friends of Gedaliah believed him to be in a plot with Baalis to take away his life. But the noble-minded governor refused to entertain such a suspicion, and rejected with horror the proposal of an over-zealous friend, who offered to assassinate Ishmael. The suspicion which he thus generously repelled was, however, correct. He was murdered in the midst of a repast by this very Ishmael, whom he had received as a friend. This event happened about two months after the destruction of Jerusalem, and by it the present ruin of Judæa seemed to be consummated, B.C. 588 (2 Kings xxv. 22-26; Jer. xxxix. 14; xl. 5; xli. 18).

GEDER (גֶּדֶר; Sept. Γαδέρ). This word signifies a *wall*, *enclosure*, or *fortified place*, and must be understood in this sense in the ensuing names. Geder itself was the name of an ancient town of the Canaanites, in the plain country of Judah (Josh. xii. 13), and was perhaps the same as Gederah.

GEDERAH (גְּדֵרָה; Sept. Γάδηρα), a city in the plain of Judah (Josh. xv. 36), probably the same with the preceding Geder, and with Beth-gader of 1 Chron. ii. 51. It seems to have belonged to the family of Caleb.

GEDEROTH (גְּדֵרוֹת; Sept. Γεδδώρ), a city in the plain country of Judah (Josh. xv. 41), and one of those which the Philistines took from king Ahaz (2 Chron. xxviii. 18).

GEDOR (גְּדוֹר; Sept. Γεδδώρ), an ancient city in the mountains of Judah (Josh. xv. 58), some of whose inhabitants joined David at Ziklag (1 Chron. xii. 7). It is doubtful whether this be the same Gedor in whose fertile valley the Simeonites found good pasture for their flocks (1 Chron. iv. 39). Dr. Robinson, travelling from Jerusalem to Gaza, came in sight of a place called Jedur, with ruins, on the brow of a mountain ridge, which he identifies with Gedor.

GEHAZI (גֵּיחֲזִי, *vision-valley*; Γιεζί), a servant of Elisha, whose entire confidence he enjoyed. His history is involved in that of his master [ELISHA]. He personally appears in reminding his master of the best mode of rewarding the kindness of the Shunamite (2 Kings iv. 14). He was present at the interview in which the Shunamite made known to the prophet that her son was dead, and was sent forward to lay Elisha's staff on the child's face, which he did without effect (2 Kings iv. 31). The most remarkable incident in his career is that which caused his ruin. When Elisha, with a noble disinterestedness, declined the rich gifts pressed upon him by the illustrious leper whom he had healed, Gehazi felt distressed that so favourable an opportunity of profiting by the gratitude of Naaman had been so wilfully thrown away. He therefore ran after the retiring chariots, and requested, in his master's name, a portion of the gifts which had before been refused, on the ground that visitors had just arrived for whom he was unable to provide. He asked a talent of silver and two dresses; and the grateful Syrian made him take two talents instead of one. Having deposited this spoil in a place of safety, he again appeared before Elisha, whose honour he had so seriously compromised. His master asked him where he had been? and on his answering, 'Thy servant went no whither,' the prophet put on the severities of a judge, and having denounced his crime, passed upon him the terrible doom, that the leprosy of which Naaman had been cured, should cleave to him and his for ever. 'And he went forth from his presence a leper as white as snow' (2 Kings v. 20 27). B.C. 894.

We afterwards find Gehazi recounting to king Joram the great deeds of Elisha, and, in the providence of God, it so happened that when he was relating the restoration to life of the Shunamite's son, the very woman with her son appeared before the king to claim her house and lands, which had been usurped while she had been absent abroad during the recent famine. Struck by the coincidence, the king immediately granted her application (2 Kings viii. 1-6).

Lepers were compelled to live apart outside the towns, and were not allowed to come too near to uninfected persons. Hence some difficulty has arisen with respect to Gehazi's interview with the king. Several answers occur. The interview may have taken place outside the town, in a garden or garden-house; and the king may have kept Gehazi at a distance, with the usual precautions which custom dictated. Some even suppose that the incident is misplaced, and actually occurred before Gehazi was smitten with leprosy. Others hasten to the opposite conclusion, and allege the probability that the leper had then repented of his crime, and had been restored to health by his master [LEPERS].

GEHENNA. [HINNOM, VALLEY OF.]

GEMARA. [TALMUD.]

GEMARIAH (גְּמַרְיָה, *God-perfected;* Sept. Γαμαρίας), the son of Shaphan, and a scribe of the temple in the time of Jehoiakim. Baruch read aloud the prophecies of Jeremiah to the people at the official chamber of Gemariah, which was attached to the new gate of the temple built by king Jotham (Jer. xxxvi. 10; comp. 2 Kings xv. 35). Gemariah's son Michaiah having reported this to his father, Baruch was invited to repeat the reading at the scribes' chamber in the palace, before Gemariah and other scribes and councillors, who gave an account of the matter to the king (Jer. xxxvi. 10-26). B.C. 607.

2. GEMARIAH, son of Hilkiah, who, with Elasah, son of Shaphan, was sent to Babylon by king Zedekiah with his tribute-money for Nebuchadnezzar. He also took charge of a letter from Jeremiah to the Jewish captives at Babylon, warning them against the false prophets who deluded them by promises of a speedy return to their own land (Jer. xxix. 3, 4). B.C. 599.

GEMS. [STONES, PRECIOUS.]

GENEALOGY (from the Greek γενεαλογία, compounded of γένος, *race*, and λόγος, *discourse*) signifies a list of ancestors set down both in their direct and collateral order.

We read of no nation which was more careful to frame and preserve its genealogical tables than Israel. Their sacred writings contain genealogies which extend through a period of more than 3500 years, from the creation of Adam to the captivity of Judah. Indeed, we find from the books of Ezra and Nehemiah that the same carefulness in this matter was observed *after* the captivity; for in Ezra ii. 62 it is expressly stated that some who had come up from Babylon had sought their register among those that were reckoned by genealogy, but were not found; therefore were they, as polluted, removed from the priesthood. The division of the whole Hebrew nation into tribes, and the allotment to each tribe of a specified portion of the land of Canaan as an inalienable possession, rendered it indispensable that they should keep genealogical tables. God had, however, a still higher object than that of giving stability to property in Israel, in leading successive generations of His people thus to keep an accurate list of their ancestry. That they should do this was especially required from the moment that the voice of prophecy declared that the promised Messiah should be of the seed of Abraham, of the posterity of Isaac, of the sons of Jacob, of the tribe of Judah, and of the family of David.

The Rabbins affirm that after the Captivity the Jews were most careful in keeping their pedigrees (*Babyl. Gemar. Gloss.* fol. xiv. 2). Josephus

(*De Vita sua*, p. 998, D) states that he traced his own descent from the tribe of Levi by *public registers*. And he informs us that, however dispersed and depressed his nation were, they never neglected to have exact genealogical tables prepared from the authentic documents which were kept at Jerusalem; and that in all their sufferings they were particularly careful to preserve those tables, and to have them renewed from time to time. Since, however, the period of their destruction as a nation by the Romans, all their tables of descent seem to be lost, and now they are utterly unable to trace the pedigree of any one Israelite who might lay claim to be their promised, and still expected, Messiah. Hence Christians assert, with a force that no reasonable and candid Jew can resist, that *Shiloh must have come.*

We find traces of the existence of the public tables of descent, to which Josephus refers, in the New Testament: the taxation spoken of by St. Luke ii. 2, 3, would clearly indicate this; for how could each one be able to go to his own city, unless he knew the specific tribe to which he belonged? Hence it was, we think, that St. Paul was able with confidence to appeal to the Hebrews concerning the lineage of Christ; 'for it is evident,' says he, 'that our Lord sprung out of Judah' (Heb. vii. 14; 2 Tim. ii. 8). To evince this beyond reasonable doubt, it pleased God to give us by his inspired servants, St. Matthew and St. Luke, the following genealogies:—

MATTHEW i. 2.

1 Abraham	1 Solomon	1 Jechonias, *i. e.* Jehoiachin.
2 Isaac	2 Roboam	2 Salathiel.
3 Jacob	3 Abia	3 Zorobabel.
4 Judas	4 Asa	4 Abiud.
5 Phares	5 Josaphat	5 Eliakim.
6 Esrom	6 Joram	6 Azor.
7 Aram	7 Ozias	7 Sadoc.
8 Aminadab	8 Joatham	8 Achim.
9 Naasson	9 Achaz	9 Eliud.
10 Salmon	10 Ezekias	10 Eleazar.
11 Booz	11 Manasses	11 Matthan.
12 Obed	12 Amon	12 Jacob.
13 Jesse	13 Josias	13 Joseph.
14 David	14 Jechonias, *i. e.* Jehoiakim or Eliakim	14 Jesus.

LUKE iii. 23.

GOD.			
1 Adam	1 Thara	1 Eliakim	1 Joanna.
2 Seth	2 Abraham	2 Jonan	2 Juda.
3 Enos	3 Isaac	3 Joseph	3 Joseph.
4 Cainan	4 Jacob	4 Juda	4 Semei.
5 Maleleel	5 Juda	5 Simeon	5 Mattathias.
6 Jared	6 Phares	6 Levi	6 Maath.
7 Enoch	7 Esrom	7 Matthat	7 Nagge.
8 Mathusala	8 Aram	8 Jorim	8 Esli.
9 Lamech	9 Aminadab	9 Eliezer	9 Naum.
10 Noe	10 Naasson	10 Jose	10 Amos.
11 Sem	11 Salmon	11 Er	11 Mattathias.
12 Arphaxad	12 Booz	12 Elmodan	12 Joseph.
13 Cainan	13 Obed	13 Cosam	13 Janna.
14 Sala	14 Jesse	14 Addi	14 Melchi.
15 Heber	15 David	15 Melchi	15 Levi.
16 Phalec	16 Nathan	16 Neri	16 Matthat.
17 Ragau	17 Mattatha	17 Salathiel	17 Heli.
18 Saruch	18 Menan	18 Zorobabel	18 Joseph.
19 Nachor	19 Melea	19 Rhesa	19 Jesus.

We do not find that there was any objection made to these genealogies, either by Jew or Gentile, during the first century. Had any difficulty on this head existed, we may reasonably suppose that the Jews, of all others, would have been but too ready to detect and expose it. We may therefore fairly conclude that, whatever difficulty meets us now in harmonizing our Lord's pedigree as given by the two Evangelists, it could have had no place in the first age of the Christian church. In subsequent ages, however, objections were and still are made to the genealogies of Matthew and Luke. We shall now consider them, 1st, as they apply to the Evangelists *individually;* and 2ndly, as compared one with the other.

1st. It is objected that Jechoniah was not the son of Josiah, but his grandson.—Answer: Matthew does not mean to say he was his son; for verses 11 and 12 are obviously intended to designate two different persons, viz. *Jehoiakim*, and his son *Jehoiachin*. That the former is the person meant in verse 11, is evident from the addition of 'his brethren.' Whose brethren? Not Jehoiachin's (or Jechonias), for he had none, but Jehoiakim's, viz. Jehoahaz and Zedekiah, the former of whom reigned before him (though a younger brother), and the latter after him (1 Chron. iii. 15, 16, 17). Admitting this, we see the consistency of the Evangelist as to the number of generations in the second and third series; whereas they who make Jechonias (verses 11, 12) to be the same person leave only

thirteen in the second series, if Jechonias be added to the third; or in the third, if he be placed to the second. If the objection had any truth, the Evangelist would be palpably inconsistent with himself! St. Jerome (*in Matthæum*, cap. i.) confirms this view:—'If Jechonias be included *in* the first tessarodecade there will not be fourteen generations: we may therefore assume that the first Jechonias meant *Joakim* and the latter Joachin—the one spelt with the letters k and m, the other with ch and n; which letters, in the course of time, by fault of transcribers, were confounded by Greeks and Latins.' Porphyry brought forward this objection against St. Matthew's genealogy, and we find the same Father, in his *Comment. on Daniel*, thus replying:—'In the Gospel of Matthew one generation seems to be wanting, for the second tessarodecade ends with Joakim, the son of Josiah, and the third begins with Joachin, the son of Joakim; Porphyry, ignorant of this, would exhibit his own skill in proving the falsity of the Evangelist St Matthew.'

2nd. It is objected that Matthew omits three kings, viz. Ahaziah, Joash, and Amaziah (comp. 1 Chron. iii. and 2 Kings viii.), from his second series. In reference to this objection it might suffice to say that Matthew, finding fourteen generations from Abraham to David inclusively, contracted, most likely in order to assist memory and give uniformity, the second, and possibly the last series. If we compare Ezra vii. 1-5, with 1 Chron. vi. 3-15, it will be seen that Ezra, in detailing, with apparent particularity, his own lineal descent from Aaron, calls Azariah, who was high-priest at the dedication of the First Temple, the son, not of Johanan his father, but of Meraioth, his ancestor at the distance of six generations. Doubtless the desire of abridgment led him to omit those names with which there were connected no very remarkable associations. Some of the early Fathers, however, give a different solution of this difficulty. Hilary (*in Matthæum*, cap. i.) says: 'Three generations are designedly passed over by Matthew; for Jaras is said to have begotten Ozias, when, in fact, he was the fourth from him, *i. e.* Jaras begat Ochazias from the Gentile family of Ahab, whose wife was Jezebel.' That the omission of the three kings was a punishment inflicted upon the house of guilty Joram, to the fourth generation, is the view yet more pointedly put forth by St. Jerome also, and by many of our own best commentators.

3rd. Moreover it is said that St. Matthew terms Zorobabel the son of Salathiel, whereas in 1 Chron. iii. 19, he is called the son of *Padaiah*. How is this? We answer that the Septuagint version of 1 Chron. iii. agrees with Matthew, and that this is the manner in which Zorobabel is designated in Ezra, Nehemiah, and Haggai. Josephus also calls him the son of Salathiel. Were he not the immediate son of Salathiel, but of *Padaiah*, yet is it suitable to the language of the Jewish nation, to count the grandson the son of the grandfather. Thus Laban is called the son of Nahor (Gen. xxix. 5), as being the son of Bethuel, who was, in fact, the son of Nahor (ch. xxiv. 47). If, according to another manner of rendering ver. 17 and 18, Salathiel and Padaiah were brothers, Zorobabel might have been, by the Levirate law, the natural son of the one and the legal son of the other.

4th. It is again asked, if it be, as Matthew states, that Salmon, son of Naasson, prince of Israel, had married so remarkable a person as Rahab, how then comes it that such a circumstance is not noticed in the book of Joshua? This objection will have no force if we remember that this book, full as it is in describing the partition of Canaan among the several tribes, is yet very silent concerning the exploits, and even names, of the subordinate leaders of Israel. There is nothing therefore surprising in the circumstance that it should pass over in total silence Salmon's marriage with Rahab. Had the matter in question been the espousal of Rahab by Joshua himself, the presumption against its truth would be very different. And indeed Kimchi, in his *Commentary on the Book of Joshua*, adduces a tradition to this effect, taken from the Babylonian Talmud. Every consideration, moreover, of a *chronological* character is in favour of the circumstance of the son of Naasson, born to him in the wilderness, being married to Rahab.

5th. But a far graver objection than that which is alleged against St. Matthew for having omitted names, is brought against St. Luke for having inserted that of *Cainan*, as son of Arphaxad—a name neither to be found in the Hebrew nor Samaritan text, nor yet in any of the Targums or versions, save the Septuagint. We may infer from the fact that neither Philo nor Josephus, who in other respects followed this version, receive this name as genuine, that it was not found in the earlier copies of the Septuagint. And it is clear, moreover, that Irenæus, Africanus, Eusebius, and Jerome, reject it as an interpolation. See on this subject Whitby's *Preface to the Reader*, and Lightfoot's *Harm.*; also Usher's *Dissertation on Cainan*, and Kidder's *Demonst. of Messiah*.

We are now to compare the Evangelists as to the points on which they *agree* and *differ*.

It does not appear that Celsus attacked the genealogies on the score of any *inconsistency* with each other. Not so the Emperor Julian; he made their discrepancies the specific ground of attack. Jerome (*in Matt.* i.) thus writes:—'Julianus Augustus in this place attacks the Evangelists on the ground of *discrepancy:* Matthew calls Joseph the son of Jacob, whereas Luke calls him the son of Heli! Had Julian been better acquainted with the modes of speech of the Jews, he would have seen that one Evangelist gives the natural and the other the legal pedigree of Joseph.'

The first solution of the apparent discrepancies of the Evangelists (and to which this ancient father obviously here alludes) is that of Africanus, which, he informs us (Euseb. *Hist. Eccles.* i. 7), he received from the relatives of our Lord, who, because of their consanguinity to him, were called Δεσπόσυνοι. It is to the effect that Matthan, the third in the list from Joseph, in Matthew's genealogy, and Melchi, the third in Luke's list, married successively the same woman, by whom the former begat Jacob, and the latter Heli. Heli dying without issue, his maternal brother took his widow to wife, by whom he had Joseph, who, according to law (Deut. xxv. 6), was registered by Luke as the son of Heli, though naturally the son of Jacob, as Matthew records him. This is the explanation which was generally admitted by Eusebius, Nazianzen, the writer of *Ad orthodoxos*, and others, *for ages.*

Grotius, however, availing himself of the tradition that Heli and Jacob were both sons of the same mother, but of different fathers (Matthan and Melchi), supposes that *Luke* traces the *natural* pedigree of Christ, and Matthew the *legal*. This he argues on two grounds. First, that Salathiel *could not* have been the natural son of *Jechonias*, who was *childless*—according to the declaration of God by Jeremiah (xxii.)—and was, therefore, as Luke states, the son, properly so called, of Neri, of Nathan's line; and, secondly, that the *Levirate* law imposed no necessity on Jacob to marry Heli's widow, they being only *uterine* brothers. The learned commentator might have been led to this view by St. Ambrose, who, in his *Commentary on Luke*, says, 'Heli, fratre sine liberis decedente, copulatus est fratris uxori, et generavit filium Joseph, qui juxta legem' Jacobi filius dicitur.' But both the reasons assigned by Grotius for differing from the solution of Africanus would seem to be founded on a *petitio principii*. It does not appear an ascertained fact that Salathiel was not the natural son of Jechonias, nor yet that the law which obliged a man to marry the widow of his deceased brother might be departed from when they were only *maternal* brethren; for even in cases of distant relationship the law seemed obligatory, as we see in the case of Boaz marrying Ruth, the widow of his distant kinsman. Whitby defends Africanus' account; Hammond, Le Clerc, and Wetstein, agree with Grotius.

Dr. Barrett, who, in his preliminary dissertation to a curious *fac-simile* of a most ancient MS. of St. Matthew's gospel, brings to bear upon this difficult question a large share of sound learning and correct criticism, objects to the above theory as given by Africanus and altered by Grotius, on the ground principally, that it refers entirely to the descent of Joseph from David, without attempting to prove that the son of Mary was the son of David. Dr. Barrett then states his own hypothesis, viz., that Matthew relates the genealogy of Joseph, and Luke that of Mary. He supposes a sufficient reason, that after Matthew had given his genealogical table another should be added by St. Luke, fully to prove that Christ, according to the flesh, derived his descent from David, not only by his supposed father Joseph, but also by his real mother Mary. The writers who agree in this opinion, Dr. B. divides into two classes. First, those who assert that the families of Solomon and Nathan met in Salathiel and Zorobabel, after which they separated, and were again re-united in Joseph and Mary: secondly, those who suppose that Salathiel and Zorobabel were distinct individuals, and deny that any union took place between them previously to the marriage of Joseph and Mary. He rejects this latter opinion because it seems to contradict the divine promise (2 Sam. vii. 12-16), which intimates that Christ should be *lineally* descended from David through *Solomon*. He therefore receives the former hypothesis, and supports it by numerous and profound arguments. (See his *Preliminary Dissertation to Codex Rescriptus*; see also, on both hypotheses, Lightfoot's *Harmony Ev.*; South's *Sermon on Rev.* xii. 16, vol. iii.; Wetstein, *ad Matthæum*, i. 17; Bishop Kidder's *Demonst. of Messiah*, part ii. to c. xiii.; Hale's *Analysis of Chronology*, vol. iii.).

In constructing their genealogical tables, it is well known that the Jews reckoned wholly by males, rejecting, where the blood of the grandfather passed to the grandson through a daughter, the name of the daughter herself, and counting that daughter's husband for the son of the maternal grandfather (Num. xxvi. 33; xxvii. 4-7). On this principle Joseph, begotten by Jacob, marries Mary, the daughter of Heli; and in the genealogical register of his wife's family, is counted for Heli's son. Salathiel, begotten by Jeconiah, marries the daughter of Neri, and, in like manner, is accounted his son: in Zorobabel, the offspring of Salathiel and Neri's daughter, the lines of Solomon and Nathan coalesce; Joseph and Mary are of the same tribe and family; they are both descendants of David in the line of Solomon; they have in them both the blood of Nathan, David's son. Joseph deduces his descent from Abiud (Matt. i. 13), Mary from Rhesa (Luke iii. 27), sons of Zorobabel. The genealogies of Matthew and Luke are parts of one perfect whole, and each of them is essential to the explanation of the other. By Matthew's table we prove the descent of Mary, as well as Joseph, from Solomon; by Luke's we see the descent of Joseph, as well as Mary, from Nathan.

But still it is asked how know we that Mary was the daughter of Neri?

1. Because the angel Gabriel, at the Annunciation, told the Virgin that God would give her divine son the throne of his father David (Luke i. 32), and thus it was necessary to prove this by her genealogy afterwards.

2. Mary is called by the Jews בתעלי, 'the daughter of Heli;' and by the early Christian writers, 'the daughter of Joakim and Anna' (Lightfoot, *on Luke* iii. 23). But Joakim and Eliakim (as different names in Hebrew for God) are sometimes interchanged (2 Chron. xxxvi. 4): Eli or Heli then is the abridgment of Eliakim.

3. The Evangelist Luke has critically distinguished the *real* from the *legal* genealogy by a parenthetical remark: 'Ιησοῦς ὢν (ὡς ἐνομίζετο) υἱὸς 'Ιωσήφ, τοῦ 'Ηλί, 'Jesus being (as was reputed) the son of Joseph (but in reality), the son of Heli,' or his grandson by the mother's side, for so the ellipsis should be supplied. Moreover, on comparing the two tables, we find that from Abraham to David they agree with each other because they are in accordance with the genealogies of Genesis, Ruth, and 1 Chron. iii.; but from David to Joseph they are evidently distinct lines of pedigree, agreeing only in two persons, viz., Salathiel and Zorobabel.

Again, it is objected, that there are now in Luke's genealogy seventy-*seven* names; whereas Irenæus, Africanus, and other early fathers, acknowledge but seventy-*two*. But if, with them, we omit the names *Levi*, *Matthan*, and *Cainan*, as being interpolations, and also not count the first and the last, then the number will be reduced to seventy-two.

It is said that Abiud and Rhesa are called by the Evangelists the sons of Zorobabel, though in 1 Chron. iii. 19 we have no mention of them among his sons. We remark that it was a custom with the Jews to call the same person by different names, and that this custom was peculiarly prevalent about the time of the captivity

(Dan. i. 6, 7; also compare 2 Sam. iii. 3 with 1 Chron. iii. 1).

Lastly, it is inquired, whence the Evangelists had their genealogies from Zorobabel to Christ, there being nothing of them to be found in Scripture. We answer, from those authentic public tables kept by the Jews, of which, as before noticed, Josephus speaks; and regarding which also Eusebius (*Hist. Eccles.* i. 1) says, 'Omnes Hebræorum generationes descriptæ in Archivis Templi secretioribus habebantur.' It was doubtless from this source that they had the above named parts of our Lord's legal and natural pedigree; for, otherwise, they would have exposed themselves to the cavils of the Jews; nor could the Apostles have appealed, as they did, with confidence, to Christ's pedigree, as answering all the requirements of prophecy.

In addition to the works already referred to on this subject, the reader will do well to consult a learned essay by the Rev. W. H. Mill, D.D., being the Christian Advocate's publication for 1842.—J. W. D.

GENERATION. Considerable obscurity attends the use of this word in the English Version, which arises from the translators having merged the various meanings of the same original word, and even of several different words, in one common term, 'generation.' The remark is too just that, in the literal translations of the Scriptures, the word 'generation' generally occurs wherever the Latin has *generatio*, and the Greek γενεὰ or γένεσις (Rees's *Ency.* art. 'Generation'). The following instances seem to require the original words to be understood in some or other of their *derivative* senses—Gen. ii. 4, 'These are the generations' (תולדות; Sept. ἡ βίβλος γενέσεως; Vulg. *generationes*), rather 'origin,' 'history,' &c. The same Greek words, Matt. i. 1, are rendered 'genealogy,' &c. by recent translators: Campbell has 'lineage.' Gen. v. 1, 'The book of the generations' (ספר תולדת; Sept. as before; Vulg. *liber generationis*) is properly *a family register*, a history of Adam. The same words, Gen. xxxvii. 2, mean a history of Jacob and his descendants: so also Gen. vi. 9, x. 1, and elsewhere. Gen. vii. 1, 'In this generation' (בדור הזה: Sept. ἐν τῇ γενεᾷ ταύτῃ, Vulg. *in generatione hac*) is evidently 'in this age.' Gen. xv. 6, 'In the fourth generation' (דור; Sept. γενεά; Vulg. *generatio*) is an instance of the word in the sense of a *certain assigned period*. Ps. xlix. 19. 'The generation of his fathers' (עד־דור אבותיו, Sept. γενεᾶς πατέρων αὐτοῦ) Gesenius renders 'the *dwelling* of his fathers,' *i. e.* the grave, and adduces Isa. xxxviii. 12. Ps. lxxiii. 15, 'The generation of thy children' (דור בניך, Sept. γενεᾷ τῶν υἱῶν σοῦ) is 'class,' 'order,' 'description;' as in Prov. xxx. 11, 12, 13, 14. Isa. liii. 8, 'Who shall declare his generation?' (דורו; Sept. τὴν γενεὰν αὐτοῦ τίς διηγήσεται; Vulg. *generatio*) Lowth renders 'manner of life,' in translation and note, but adduces no precedent. Some consider it equivalent to זרע, ver. 10: γενεὰ (Sept.) answers to זרע, Esther ix. 28. Josephus uses πολλὴν γενεάν, *Antiq.* i. 10. 3 (Hengstenberg, *Christology of the Old Testament*, vol. i. Washington, 1836-9; Pauli, *Analect. Hebraic.* p. 162, Oxford, 1839). Michaelis renders it 'Where was the providence that cared for his life?' Gesenius and Rosenmüller, 'Who of his contemporaries reflected?' Seiler, 'Who can describe his length of life?' In the New Testament, Matt. i. 17, γενεαί is a series of persons, a succession from the same stock; so used by Josephus (*Antiq.* i. 7. 2); Philo (*Vit. Mos.* vol. i. p. 603); Matt. iii. 7, γεννήματα ἐχιδνῶν, is well rendered by Doddridge and others 'brood of vipers.' Matt. xxiv. 34, ἡ γενεὰ αὕτη means the generation or persons *then* living *contemporary with Christ* (see Macknight's *Harmony* for an illustration of this sense). Luke xvi. 8, εἰς τὴν γενεὰν τὴν ἑαυτῶν, 'in their generations,' &c., wiser in regard to their dealings with the *men* of their generation. Rosenmüller gives, *inter se*. 1 Pet. ii. 8, γένος ἐκλεκτόν, is a 'chosen people,' quoted from Sept. Vers. of Isa. xliii. 20. The ancient Greeks, and, if we may credit Herodotus and Diodorus Siculus, the Egyptians also, assigned a *certain period* to a generation. The Greeks reckoned three generations for every hundred years, *i. e.* 33⅓ years to each. Herod. ii. 142, γενεαὶ τρεῖς ἀνδρῶν ἑκατὸν ἔτεά ἐστι, 'three generations of men make one hundred years.' This is nearly the present computation. To the same effect Clem. Alexandrinus speaks (*Strom.* i. 2); so also Phavorinus, who, citing the age of Nestor from Homer (*Il.* i. 250), τῷ δ' ἤδη δύο μὲν γενεαί, 'two generations,' says, it means that ὑπερέβη τὰ ἑξήκοντα ἔτη, 'he was above sixty years old.' The Greeks, however, assigned different periods to a γενεὰ at different times (Perizonius, *Orig. Ægypt.* p. 175, sq.; Jensius, *Fercul. Literar.* p. 6). The ancient Hebrews also reckoned by the generation, and assigned different spaces of time to it at different periods of their history. In the time of Abraham it was one hundred years (comp. Gen. xv. 16, 'in the fourth generation they shall come hither'). This is explained in verse 13, and in Exod. xii. 40, to be four hundred years. Caleb was *fourth* in descent from Judah, and Moses and Aaron were *fourth* from Levi. In Deut. i. 35, ii. 14, Moses uses the term for thirty-eight years. In later times (Baruch vi., in the Epistle of Jeremiah, ver. 2) γενεὰ clearly means ten years. In Matt. i. 17, γενεὰ means a single descent from father to son [GENEALOGY]. Homer uses the word in the same sense (*Il.* i. 250); also Herodotus (i. 3).—J. F. D.

GENESIS (Sept. Γένεσις), the first book of the Pentateuch, is, in Hebrew, called בראשית, from the word with which it begins. This venerable monument, with which the sacred literature of the Hebrews commences, and which forms its real basis, is divided into two main parts; one universal, and one special. The most ancient history of the whole human race is contained in chapters i.-xi., and the history of Israel's ancestors, the patriarchs, in chapters xii.-l. These two parts are, however, so intimately connected with each other that it would be erroneous to ascribe to the first merely the aim of furnishing a universal history. The chief aim which pervades the whole is to show how the theocratic institution subsequently founded by Moses was rendered possible and necessary. The book, therefore, takes its starting-point from the original unity of the human race, and their original relation to God, and proceeds thence to the interruption of that relation by the appearance of sin, which gradually and progressively wrought an external and internal division in the human race for

want of the principles of divine life which originally dwelt in man in general, but which had subsequently been preserved only among a small and separate race—a race which in progress of time became more and more isolated from all the other tribes of the earth, and enjoyed for a series of generations the special care, blessing, and guidance of the Lord. The Mosaical theocracy appears, therefore, by the general tenor of Genesis, partly as a restoration of the original relation to God, of the communion of man with God, and partly as an institution which had been preparing by God himself through a long series of manifestations of his power, justice, and love. Genesis thus furnishes us with the primary view and notion of the whole of the theocracy, and may therefore be considered as the historical foundation without which the subsequent history of the covenant people would be incomplete and unintelligible.

The *unity* and *composition* of the work, which is a point in dispute among the critics in regard to *all* the books of the Pentateuch, have been particularly questioned in the case of Genesis. The question was raised whether the sources from which the writer of Genesis drew his information were written documents or oral tradition. Writers as early as Vitringa (*Obs. Sac.* i. 4), Richard Simon, Clericus, and others, though they were of opinion that Genesis is founded on written sources, did not undertake to describe the nature and quality of those sources. Another opinion, advanced by Otmar, in Henke's *Magaz.* ii., that Egyptian pyramids and other monuments of a similar nature were the sources of Genesis, was but transient in the critical world; while the attempt of some critics not only to renew the previous assumption that Genesis is founded on written sources, but also to determine more closely the character of those sources, has gained more lasting approval among the learned. Why different names of God are prevalent in different portions of Genesis is a question much discussed by early theologians and rabbis. Astruc, a Belgian physician, in his *Conjectures sur les Mémoires originaux*, &c., Bruxelles, 1753-8, was the first to apply the two Hebrew names of God, *Jehovah* and *Elohim*, to the subject at issue. Astruc's demonstration had many feeble points. He assumed that there had originally existed a number of isolated documents, which had subsequently, by the fault of transcribers, been joined and strung together in the present form of Genesis. Eichhorn's critical genius procured for this hypothesis a favourable reception almost throughout the whole of Germany. Eichhorn pruned away its excrescences, and confined his own view to the assumption of only two different documents, respectively characterized by the two names of *Jehovah* and *Elohim*. Other critics, such as Ilgen (*Urkunden des Jerusalem Tempel-Archivs*, 1798), Gramberg (*Adumbratio libri Geneseos secundum fontes*, 1828), and others, went still farther, and pre-supposed three different documents in Genesis. Vater went much beyond Eichhorn. He fancied himself to be able to combat the authenticity of the Pentateuch by producing a new hypothesis. He substituted for Eichhorn's 'document-hypothesis' his own 'fragment-hypothesis,' which obtained great authority, especially on account of its being adopted by De Wette. According to this opinion Genesis, as well as the greater part of the Pentateuch, consists of a great number of very small detached fragments, internally unconnected with each other, but transcribed *seriatim*, although originating in very different times and from different authors. This 'fragment-hypothesis' has now been almost generally given up. Even its zealous defenders, not excepting De Wette himself, have relinquished it. In its place the former 'document-hypothesis' has been resumed by some critics, simplified however, and supported by new and better arguments. There is at present a great variety of opinion among divines concerning this hypothesis. The leading features of this diversity may be comprised in the following summary. According to the view of Stähelin, De Wette, Ewald, Von Bohlen, Tuch, and others, Genesis is founded on two principal original documents. That of *Elohim* is closely connected in its parts, and forms a whole, while that of *Jehovah* is a mere complementary document, supplying details at those points where the former is abrupt and deficient, &c. These two documents are said to have been subsequently combined by the hand of an editor, so ably as often to render their separation difficult, if not altogether impossible. But Ranke, Hengstenberg, Drechsler, Hävernick, and others, maintain that Genesis is a book closely connected in all its parts, and composed by only one author, while the use of the two different names of God is not owing to two different sources on which Genesis is founded, but solely to the different significations of these two names. The use of each of the two names, Jehovah and Elohim, is everywhere in Genesis adapted to the sense of the passages in which the writer has purposely inserted the one name or the other. This point of view is the more to be considered, as it is the peculiar object of the author to point out in Genesis the gradual and progressive development of the divine revelations. The opponents have in vain attempted to discover in Genesis a few contradictions indicative of different documents in it; their very admission, that a fixed plan and able compilation visibly pervade the whole of the book, is in itself a refutation of such supposed contradictions, since it is hardly to be conceived, that an editor or compiler who has shown so much skill and anxiety to give unity to the book should have cared so little about the removal of those contradictions. The whole of Genesis is pervaded by such a freedom in the selection and treatment of the existing traditions, such an absence of all trace of any previous source or documents which might in some measure have confined the writer within certain limits of views and expressions, as to render it quite impracticable to separate and fix upon them specifically, even if there were portions in Genesis drawn from earlier written documents.

That first question concerning the unity of the book is closely connected with another question, respecting its authenticity, or whether Moses was the author of Genesis. We confine ourselves here to only a few remarks on the authenticity of Genesis in particular, and refer the reader for further information to the article PENTATEUCH. Some critics have attempted to ascertain the period when Genesis was composed, from a few passages

in it, which they say must be *anachronisms*, if Moses was really the author of the book (v. *ex. gr.* Tuch, *Commentar über Genesis*, p. lxxxv. sq.). Among such passages are, in particular, Gen. xii. 6; xiii. 7; 'And the Canaanite was then in the land.' This remark, they say, could only have been made by a writer who lived in Palestine after the extirpation of the Canaanites. But the sense of the passage is not that the Canaanites had not as yet been extirpated, but merely that Abraham, on his arrival in Canaan, had already found there the Canaanites. This notice was necessary, since the author subsequently describes the intercourse between Abraham and the Canaanites, the lords of the country. According to the explanation given to the passage by the opponents, such an observation would be quite a superfluous triviality. Also the name *Hebron* (Gen. xiii. 18; xxiii. 2), they say, was not introduced till after the time of Moses (Josh. xiv. 15; xv. 13). This, however, does not prove anything, since *Hebron* was the original Hebrew name for the place, which was subsequently changed into *Arba* (by a man of that name), but was restored by the Israelites on their entrance into Canaan. The opponents also maintain that the name of the place Dan (Gen. xiv. 14) was given only in the post-Mosaical period (Josh. xix. 47; Judg. xviii. 29). But the two last passages speak of quite a different place. There were two places called *Dan;* Dan-*Jaan* (2 Sam. xxiv. 6), and Dan-*Laish*, or *Leshem*. In Genesis, they further add, frequently occurs the name *Bethel* (xii. 8; xxviii. 19; xxxv. 15); while even in the time of Joshua, the place was as yet called Luz (Josh. xviii. 13). But the name *Bethel* was not first given to the place by the Israelites in the time of Joshua, there being no occasion for it, since Bethel was the old patriarchal name, which the Israelites restored in the place of Luz, a name given by the Canaanites. Another passage in Genesis (xxxvi. 31), 'Before there reigned any king over the children of Israel,' is likewise supposed to have been written at a period when the Jews had already a king over them. But the broachers of these objections forget that this passage refers to those promises contained in the Pentateuch in general, and in Genesis in particular (comp. Gen. xxxv. 11), that there should hereafter be kings among the Israelites as an independent nation. In comparing Israel with Edom (Gen. xxxvi.), the sacred writer cannot refrain from observing that Edom, though left without divine promises of possessing kings, nevertheless possessed them, and obtained the glory of an independent kingdom, long before Israel could think of such an independence; and a little attention to the sense of the passage will show how admirably the observation suits a writer in the Mosaical period. The passage (Gen. xv. 18) where the land of Israel is described as extending from the river of Egypt (the Nile) to the great river (Euphrates), it is alleged, could only have been penned during the splendid period of the Jews, the times of David and Solomon. *Literally* taken, however, the remark is inapplicable to any period, since the kingdom of the Jews at no period of their history extended so far. That promise must, therefore, be taken in a rhetorical sense, describing the central point of the proper country as situated between the two rivers.

The *historical* character of the contents of Genesis forms a more comprehensive subject of theological discussion. It is obvious that the opinions regarding it must be principally influenced by the dogmatical views and principles of the respective critics themselves. Hence the great variety of opinion that still prevails on that subject. Some, such as Vatke, Von Bohlen, and others, assert the whole contents of Genesis to be unhistorical. Tuch and others consider Genesis to be interwoven with mythical elements, but think that the rich historical elements, especially in the account of the patriarchs, can be clearly discerned. Some again limit the mythological part to the first two chapters only; while others perceive in the whole book a consistent and truly historical impress. The field of controversy is here so extensive, and the arguments on both sides are so numerous, that we must content ourselves in this article with a very few remarks on the subject. *Genesis* is a book consisting of two contrasting parts: the first part introduces us into the greatest problems of the human mind, such as the Creation and the fall of man; and the second, into the quiet solitude of a small defined circle of families. In the former, the most sublime and wonderful events are described with childlike simplicity; while, in the latter, on the contrary, the most simple and common occurrences are interwoven with the sublimest thoughts and reflections, rendering the small family circle a whole world in history, and the principal actors in it prototypes for a whole nation, and for all times. The contents in general are strictly religious. Not the least trace of mythology appears in it. Consequently there are no mythical statements, because whatever is mythical belongs to mythology, and Genesis plainly shows how very far remote the Hebrew mode of thinking was from mythical poetry, which might have found ample opportunity of being brought into play when the writer began to sketch the early times of the Creation. It is true that the narrations are fraught with wonders. But primeval wonders, the marvellous deeds of God, are the very subject of Genesis. None of these wonders, however, bear a fantastical impress, and there is no useless prodigality of them. They are all penetrated and connected by one common leading idea, and are all related to the counsel of God for the salvation of man. This principle sheds its lustrous beams through the whole of Genesis; therefore the wonders therein related are as little to be ascribed to the invention and imagination of man as the whole plan of God for human salvation. The foundation of the divine theocratical institution throws a strong light upon the early patriarchal times; the reality of the one proves the reality of the other, as described in Genesis.

The separate accounts in Genesis also manifest great internal evidence of truth if we closely examine them. They bear on their front the most beautiful impress of truth. The *cosmogony* in Genesis stands unequalled among all others known in the ancient world. No mythology, no ancient philosophy, has ever come up to the idea of a *creation out of nothing*. All the ancient systems end in Pantheïsm, Materialism, emanation-theory, &c. But the Biblical cosmogony occupies a place of its own, and there-

fore must not be ranked among, or confounded with, any of the ancient systems of mythology or philosophy. The mythological and philosophical cosmogonies may have been derived from the Biblical, as being later depravations and misrepresentations of Biblical truth; but the contents of Genesis cannot, *vice versâ*, have been derived from mythology or philosophy. Moreover, only with the Biblical fundamental idea of the relation of God to his creatures, consequently only with the doctrine of creation out of nothing, is it possible to furnish an historical representation of creation. Every system deviating from this contains an internal contradiction against history, because it necessarily substitutes the idea of eternity for that of time; and consequently does not admit of any history, but only of either mythology or abstract reflection. The historical delineation also of the Creation and of the fall of man does not bear the least national interest or colouring, but is of a truly universal nature, while every mythus bears the stamp of the national features of the nation and country where it originated and found development. All mythi are subject to continual development and variations, but among the Hebrews the accounts in Genesis stand firm and immutable for all times, without the least thing being added or altered in them for the purpose of further development, even by the New Testament. What a solid guarantee must there be in this foundation of all subsequent revelations, since it has been admitted and maintained by all generations with such immovable firmness! The ancient heathen traditions coincide in many points with the Biblical accounts, and serve to illustrate and confirm them. This is especially the case in the ancient traditions concerning the Deluge (Gen. vi. 9), and in the list of nations in the tenth chapter; for instance (Gen. x. 4), Tarshish is called the son of Javan. This indicates that the ancient inhabitants of Tarshish or Tartessus in Spain were erroneously considered to be a Phœnician colony like those of other towns in its neighbourhood, and that they sprang from Javan, that is, Greece. That they were of Greek origin is clear from the account of Herodotus (i. 163). Also (ver. 8), Nimrod, the ruler of Babel, is called the son of *Cush*, which is in remarkable unison with the mythological tales concerning *Bel* and his Egyptian descent (comp. Diodor. Sic. i. 28, 81; Pausan. iv. 23, 5). *Sidon* alone is mentioned (ver. 15), but not *Tyrus* (comp. xlix. 13), which arose only in the time of Joshua (Josh. xix. 29); and that *Sidon* was an older town than *Tyrus*, by which it was afterwards eclipsed, is certified by a number of ancient reports (comp. Hengstenberg, *De Rebus Tyriorum*, pp. 6, 7).

With the patriarchal history (xii. sqq.) begins an historical sketch of a peculiar character. The circumstantial details in it allow us to examine more closely the historical character of these accounts. The numerous descriptions of the mode of life in those days furnish us with a very vivid picture. We meet everywhere a sublime simplicity quite worthy of patriarchal life, and never to be found again in later history. One cannot suppose that it would have been possible in a later period, estranged from ancient simplicity, to invent such a picture.

The authenticity of the patriarchal history could be attacked only by analogy, the true historical test of negative criticism; but the patriarchal history has no analogy; while a great historical fact, the Mosaical theocracy itself, might here be adduced in favour of the truth of Genesis. The theocracy stands without analogy in the history of the human race, and is, nevertheless, true above all historical doubt. But this theocracy cannot have entered into history without preparatory events. The facts which led to the introduction of the theocracy are contained in the accounts of Genesis. Moreover, this preparation of the theocracy could not consist in the ordinary providential guidance. The race of patriarchs advances to a marvellous destination: the road also leading to this destination must be peculiar and extraordinary. The opponents of Genesis forget that the marvellous events of patriarchal history which offend them most, partake of that character of the whole, by which alone this history becomes commensurate and possible.

There are also many separate vestiges warranting the antiquity of these traditions, and proving that they were neither invented nor adorned; for instance, Jacob, the progenitor of the Israelites, is introduced not as the firstborn, which, if an unhistorical and merely external exaltation of that name had been the aim of the author, would have been more for this purpose.

Neither the blemishes in the history of Abraham, nor the gross sins of the sons of Jacob, among whom even Levi, the progenitor of the sacerdotal race, forms no exception, are concealed.

The same author, whose moral principles are so much blamed by the opponents of Genesis, on account of the description given of the life of Jacob, produces, in the history of Abraham, a picture of moral greatness which could have originated only in facts.

The faithfulness of the author manifests itself also especially in the description of the expedition of the kings from Upper to Western Asia; in his statements concerning the person of Melchizedek (Gen. xiv.); in the circumstantial details given of the incidents occurring at the purchase of the hereditary burial-place (ch. xxiii.); in the genealogies of Arabian tribes (ch. xxv.); in the genealogy of Edom (ch. xxxvi.); and in many remarkable details which are interwoven with the general accounts. In the history of Joseph the patriarchal history comes into contact with Egypt; and here the accounts given by ancient classical writers, as well as the monuments of Egypt, frequently furnish some splendid confirmations. For instance, the account given (xlvii. 13-26) of the manner in which the Pharaohs became proprietors of all the lands, with the exception of those belonging to the priests, is confirmed by Herodotus (ii. 109), and by Diodorus Siculus (i. 73). The manner of embalming described in Gen. l. entirely agrees with the description of Herodotus, ii. 84, &c. For other data of a similar kind, compare Hengstenberg (*Die Bücher Mosis und Aegypten*, p. 21, sq.).

For the important commentaries and writings on Genesis, see the article PENTATEUCH.

GENNESARETH. [CINNERETH.]

GENNESARETH, LAKE OF. [SEA.]

GENTILES (גוים; Sept. ἔθνη), a word which, both in the Hebrew *Goyim*, and in the Anglo-Latin 'Gentile,' by which we translate it, means literally, 'the nations.' It was applied by the Hebrews to all individuals or communities not under the law—that is, all the nations of the world excepting the Jews. But in later times some small states, and many individuals, embraced the law; and they were distinguished from the Gentiles, as well as from the Jews, by the name of PROSELYTES (προσήλυτοι). In some places our authorized version has the word 'Gentiles' where the original has Ἕλληνες, which is usually and properly rendered 'Greeks.'

GEOGRAPHY, considered as a systematic description of the earth, took its rise at a much later period than other sciences, probably because it is of less essential necessity to man; yet the elements of the knowledge out of which scientific geography is constructed must have existed as soon as men turned their attention to the earth on which they dwelt, and found it necessary to journey from one part of its surface to another.

Like most other sciences, geography owes its elementary cultivation as a science to the Hellenic race, who, from the mythic period of their history down to the destruction of the Western empire (A.D. 476), continued to prosecute the study with more or less system, and to more or less definite results; yet it must be added that it is only in a qualified sense that the ancients may be said to have known or advanced scientific geography.

It is the Hebrews who present us with the earliest written information of a geographical kind. In the account of creation mention is made of a spot called Eden, out of which a river, after watering Paradise, ran, and 'from thence it was parted, and became into four heads' (fountains), which sent forth as many rivers, Pison, Gihon, Hiddekel, Phrat or Euphrates. Of these the last is the only stream that is identified. Josephus, on this point, says (*Antiq.* i. 2), 'The garden was watered by one river which ran round about the whole earth and was parted into four parts.' Pison he identifies with the Ganges, Gihon with the Nile, Hiddekel with the Tigris, and the Phrat with the Euphrates. The idea here presented is that of a vast circular plain (the earth), with water, a river, or the sea (ὠκεανός in Homer, *Il.*, xxi. 196) encircling it, from which encircling body of water ran the said four rivers. Such, whether derived from the Hebrew Scriptures or not, was the earliest conception entertained of the earth. Any attempt to reconcile such a view with geographical facts must be futile. That some such idea was entertained among the Hebrews, even at a later period, appears from the words found in Ps. xxiv. 2, 'He hath founded it (the earth) upon the seas, and established it upon the floods' (see also Prov. viii. 27); though Job xxvi. 7, 'He stretcheth out the north over the empty place, and hangeth the earth upon nothing' (comp. Job xxxviii. 4, 6), would seem to intimate that the writer of that book entertained superior notions on the point. That, however, the general idea was that the earth formed an immense disk ('the circle of the earth'), above which were the substantial and firmly fixed heavens, the abode of God, while the earth beneath was his footstool, appears from the general phraseology employed in the sacred books, and may be found specially exhibited or implied in the following passages:—Isa. xl. 21, sq.; Job xxxvii. 18; Ps. cii. 25. Of this wide circular expanse Jerusalem was considered the centre, Ezek. v. 5: 'I have set Jerusalem in the midst of the nations and countries that are round about her.' See the ensuing verses. The highlands of Armenia would appear to have been the first known to the human family. Descending from these some may have gone eastward, others westward. The latter alone are spoken of in Scripture. Coming south and west the progenitors of the world first became acquainted with the countries lying between the Euphrates and the Tigris, roughly termed Mesopotamia, whence they advanced still more south and west into Aram or Syria, Arabia, Canaan, and Egypt. These are the chief countries with which the ancient Hebrews seem to have possessed an acquaintance: yet if the national genealogical table found in Gen. x. is to be referred to the early period which its position in the Bible gives it, it would appear that the geographical knowledge of the Hebrews was, even before the flood, far more extensive, embracing even 'the isles of the Gentiles.' Winer (*Handwörterb.*, note to art. 'Erde'), however, with others, denies its historical value, and certainly other parts of Scripture by no means warrant us in ascribing to the Hebrews, before the Babylonish captivity, a wider range of knowledge than we have indicated above. This national calamity had the effect of enlarging the circle of their knowledge of the earth, or at least of making their knowledge of Assyria, Media, and Babylonia more minute and definite. It was to their neighbours the Phœnicians that the Israelites owed most of their geographical knowledge. This commercial people must have early acquired a superficial acquaintance with remote regions, while engaged in their maritime commercial expeditions. The knowledge they brought back to Palestine would spread beyond their own borders and reach the Hebrews, though they may not have been given to inquiry and study on subjects of the kind; nor is it safe to attempt to define at how early a period some rough notions of the isles of the Gentiles may, by means of the Phœnician navigators, have been spread about in the East. According to Clemens Alexandrinus (*Strom.* vi. 4. 36), the Egyptians had in circulation writings on geography. Their king Sesostris may have had maps (*Schol. ad Apoll Rhod.* iv. 292; Goguet, *Orig. des Loix*, ii. 227), though probably the first attempt to form a map (that is, a written catalogue of places, with something like their relative positions and distances roughly guessed) is to be ascribed to the men whom Joshua (Josh. xviii.) sent with orders to 'go through the land and describe it;' and the men 'went and passed through the land' and described it by cities into seven parts in a book.

At a later period, it is unquestionable that the Hebrews possessed a knowledge of the north-west, and a wider knowledge of the east, and even of the north of Asia (Ezek. xxvii; Isa. li. 27). From the period of the Maccabees the Jews entered into relations of a mercantile and political character, which extended their knowledge of the earth, and made them better acquainted with Asia Minor, Greece, and Italy. In the time embraced by the New Testament history they must have been

widely acquainted with the then known world, since colonies and individuals of their nation were spread over nearly the entire surface covered by ancient civilization, and identified with the Roman empire. The occasional, if not periodical, return of the Jews thus scattered abroad, or at least the relations which they would sustain with their mother country, must have greatly widened, and made less inaccurate, the knowledge entertained in Palestine of other parts of the world. Accordingly we read (Acts ii. 5, sq.) that, at the effusion of the Holy Spirit on the day of Pentecost, 'there were dwelling at Jerusalem Jews out of every nation under heaven.' See the enumeration of the countries whence they came in the context. For a knowledge of the commercial enterprises of the Phœnicians consult Leroy, *Mém. de l'Acad. des Inscr.* xxxviii. 542; Bähr, *Excurs. ad Herod.* ii. 667. Information on the geographical knowledge of the Hebrews may be found in Huet, in Ugolini's *Thesaurus Antiq. Sacrarum*, vii. 244; d'Anville, *Mémoires de l'Acad. des Inscr.* xxx. 83; Bredow's *Untersuch. über Gesch. und Geogr.* ii. 263; Bellermann, *Bibl. Erdbeschr.* i. 143; Zeune's *Erdansichten*, p. 2. On the history of geography among the ancients the following works also may be consulted: Bangondy, *Essai sur l'Histoire de la Géog.* Paris, 1765; Blair, *History of the Rise and Progress of Geography*, London, 1784; Sprengel, *Geschichte der Wichtigsten Geogr. Entdeckung*, Halle, 1792; Ukert, *Geogr. der Griechen und Römer*, 1816; Forbiger, *Handbuch der Alten Geogr.*, Leipz. 1842; as well as the standard works of Ritter and Mannert. Among the older works, Reland's *Palestine* (*Palæstina ex Monumentis Vet. illustrata*, Norimbergæ, 1716) continues to hold a distinguished place. Reland was professor of Oriental languages and ecclesiastical history at Utrecht, and died in 1718. There have been several editions of his work. It is divided into three books: the first treats of the names, situations, boundaries, divisions, rivers, mountains, and plains of Palestine; the second, of the distances of the principal places; and the third, of the cities and villages. His diligence in amassing information is very great. Maps, tables, and engravings of coins, enrich the work. It is reprinted in the sixth volume of Ugolini's great work, *Thesaurus Antiq. Sacrarum.* Much valuable, accurate, and interesting information, brought down to a recent date, may be found in Kitto's *Pictorial History of Palestine*, 1841.

Among the maps of Palestine the following deserve special mention:—that of Montanus, in his *Antiquitates Judaicæ*, 1572; *La Palestine*, par d'Anville, 1784; *Carte Physique et Politique de la Syrie*, par C. Paultre, Paris, 1803; *Palästina*, von Reichardt; *Carte Topographique de l'Egypte et de plusieurs pays limitrophes, levée pendant l'Expédition de l'Armée Française*, construite par Jacotin. This author accompanied Napoleon in his expedition to Egypt, in the capacity of geographical engineer. He was aided by other officers of the army. Robinson says it 'is valuable only in the parts actually visited by the French engineers, namely, along the coast as far as to Akka, the region of Nazareth, and around Mount Tabor. The other parts are worthless, being apparently mere fancy sketches' (*Palest.* Pref. p. xi.). *Karte von Syrien*, von H. Berghaus, Gotha, 1835; of which Raumer (*Palästina*, 2nd edit. p. 18) speaks in favourable terms. *The Illuminated Atlas of Scripture Geography*, by W. Hughes, Lond. 1840, is a useful work. The student would do well to consult the maps in Robinson's *Palestine.*

Among the *original sources* of our knowledge of biblical geography stands first and chief the Bible itself. The value of the Bible in this respect is incomparable, and altogether peculiar, not only because it contains the earliest authentic history in the world, but because its statements are more minute and more accurate than can be found in other ancient authorities. The testimony of Oriental travellers on this point, whether direct or indirect, is full and unanimous. The more we have come to know, by actual inspection, of the countries and places of which the Bible speaks, the greater reason has there been found to repose confidence in the particulars which it supplies; and even to the present day the best itinerary through the Holy Land is the Bible, when expounded and applied by the aid of the native Aramæan population (Robinson's *Palestine*, Introduction). If preference is to be given to any particular parts of the holy volume, the Pentateuch, Joshua, the Gospels, and the Acts deserve special mention. In the New Testament, it is to some extent a new world that is opened out before the geographical student. Certainly, as might be expected, many places found in the Old Testament are sought in vain in the New; while, on the other hand, the New Testament mentions many hills, streams, cities, and countries, not presented in the Old. In a similar way, places which hold a high importance in the one sink or disappear in the other.

The remarks which were made under the head ANTIQUITIES, in relation to the value of the writings of Josephus, are equally applicable in the subject now under consideration.

Among the profane writers, Herodotus mentions Palestine, and probably Jerusalem, which he names Cadytis (Herod. i. 105; ii. 106, 157, 159; iii. 5, 62, 64, 91; iv. 39). Strabo (in the time of Augustus) treats of Palestine in the second chapter of his sixteenth book on Geography, mingling together much truth and much error. Ptolemæus, who died 161 years after Christ, treats of Palestine and the neighbouring countries in chapters xv.-xvii. of his fifth book. Dion Cassius relates the conquest of Palestine by Pompey (xxvii. 15-17), the siege of Jerusalem by Titus (lxi. 4-7), the restoration of the temple by Hadrian, and the insurrection of the Jews under the same emperor (lix. 12-14). Of the Roman writers, Pliny, in his *Natural History* (v. 13-19), treats of Syria, including Palestine, and supplies much useful information. Tacitus' *History*, from the first to the thirteenth chapter of the fifth book, also relates to our subject. He hated both Jews and Christians (*Annal.* xv. 44), and in consequence gave false colourings to much of what he said relating to them (*Hist.* v. 3, 4; ii. 79; *Annal.* ii. 42; xii. 23). Some information may also be found in Justin (xxxvi. 2), in Suetonius (*Augustus*, 93; *Claudius*, 25, 28; *Vespasian*, 4, 5; *Titus*, 4, 5), in Pomponius Mela (i. 2), and in Ammianus Marcellinus (xiv. 8; xxiii. 1).

Among the Fathers of the Church much serviceable knowledge on the subject of Biblical geo-

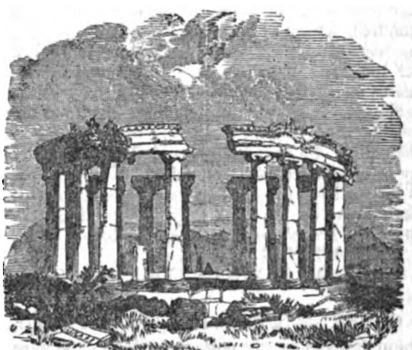
graphy may be found in the expository writings of Theodoret and Jerome. The most important work, however, is *Onomasticon urbium et locorum sacræ Scripturæ, seu liber de locis Hebraicis, Græce primum ab Eusebio Cæsariensi, deinde Latine scriptus ab Hieronymo*, opera J. Bonfrerii, 1707. Living as they did for a long time in Palestine, the writings both of Eusebius and Jerome possess peculiar value, which, however, grows less as the times of which they speak recede from their own.

Some Arabian writers are not without value. We have Edrisi, *Geographia Nubiensis*, Paris, 1619; also Abulfedæ *Tabula Syriæ*, and his *Annales Muslemici*. Schultens, in his *Index Geographicus in Vitam Saladini*, Lugduni Batav. 1732, has collected many observations of Arabian authors on Palestine. See also Rosenmüller, *Handb. Bibl. Alter.* i. 34; Ritter, *Erdkunde*, ii. 478.

Certain itineraries or travelling guides are also of value as sources of information. These itineraries are of two kinds: 1. *Itineraria scripta*; 2. *Itineraria picta*. The last borrowed assistance from the art of drawing, and seem to have existed in earlier times under the Greek name of πίναξ γεωγραφικός (Strabo, i. p. 7; Ptol. i. 6, 20), or simply πίναξ (Strabo, ii. pp. 87, 90), or the Roman designation of *tabula* (Cic. *ad Att.* vi. 2; Propert. iv. 3. 35): sometimes also the Greek word, in Latin letters, *pinax*, was used (Cassiod. *De Inst. Div.* 25). See Reinganum, *Geschichte der Erd und Länder abbildungen der Alten*, Jena, 1839, i. 32. The first class were a kind of guide-books which were designed chiefly for official purposes, and gave, without any geographical remarks, the names of places met with on certain roads, with the distances, and the chief stopping places. These are collected in P. Bertii *Theatrum Geogr. Vet.* (Lugd. Bat. 1618), and in *Vetera Roman. Itineraria*, curante P. Wesselingio (Amstelod. 1735). We may specify, as of most service, the *Itinerarium Hierosolymitanum seu Burdigolense*, which belongs to the fourth century. It was made by a Christian, and gives the route from Bordeaux to Jerusalem, and from Heraclea through Rome to Milan, with some fulness and accuracy, mentioning the smaller intervening places where horses were changed (mutationes) or the night passed (mansiones), with a few scattered historical notices, and, so far as Palestine and Jerusalem are concerned, with pretty exact statements as to the localities of sacred history. The *Itinerarium Antonini*, which gives the routes through all the provinces of the Roman empire, has been ascribed to the emperor Antoninus himself; but, though it may have taken its rise under his patronage, it must, in its actual state, be of a later date, since it mentions places which did not exist till a subsequent period. Extracts and specimens may be seen in Reland's *Palæstina*, p. 422, &c., where also (p. 421) may be found a specimen of the *Itineraria Picta*, executed in copper-plate. Of the *Itineraria Picta* there is a collection which, from its first possessor, Conrad Peutinger of Augsburg, is commonly called *Tabula Peutingeriana*, and probably comes down from the time of Alexander Severus, about A.D. 230. There is no original of it, but only a trustworthy transcript, made by a monk of the thirteenth century, on twelve folio parchment leaves. These tables are a sort of rough chart or map, describing to the eye distances and direction, without regard to the shape or size of countries or the geographical position of places.

Of the works which have appeared treating directly or indirectly on the geography of Palestine from the eighth century downwards, the list is far too long to be here admitted, though many of them must be regarded in the light of valuable as well as original sources. The titles of a few we shall give, referring the reader to the works before specified for fuller details:—*Gesta Dei per Francos, sive Orientalium Expeditionum et regni Francorum Hierosolymitani Historia*, 1611; *Voyages de Rabbi Benjamin fils de Jona de Tudèle*, par Baratier, Amsterd. 1734; *Elucidatio Terræ Sanctæ Historica*, auctore F. Quaresmio, olim T. S. Præsule, Antwerp, 1639; *A Journey from Aleppo to Jerusalem at Easter*, 1697, by Henry Maundrell, sixth edit. Oxf. 1740; T. Shaw's *Travels in Barbary and the Levant*, 1738; R. Pococke's *Travels in the East*, 1743; *Voyages en Syrie et en Egypte*, par Volney, 4th edit., 1807,—an interesting and accurate work, notwithstanding the peculiar opinions of the writer; *Travels in various countries of Europe, Asia, and Africa*, by E. D. Clarke, 4th edit. Lond. 1818; Seetzen, in Zach's *Monatlicher Correspondenz*, 1808: Burckhardt says of him that he was the most indefatigable traveller that ever visited Syria; *Travels in Syria and the Holy Land*, by Burckhardt, Lond. 1822; *Wallfahrten in Morgenlande*, von O. T. von Richter, Berlin, 1823; *Travels in Palestine*, by Buckingham, Lond. 1821; *Voyage de l'Arabie Pétrée*, par Léon de Laborde, Paris, 1830.

With the publication of Robinson's *Biblical Researches in Palestine* (London, 1841), a new era in some sort may be said to have commenced in Biblical geography. We do not allude to the preparation of mind which the author carried into the personal inquiries and observations which he made in the Holy Land, nor to the accuracy with which he both conducted and recorded his investigations, so much as to the principle on which he was, by the course of his researches, led to act, and on the recognition of which his valuable work is constructed, namely, the preference which he has wisely given to popular tradition, in regard to localities and facts, over the monkish legends that prevailed before his visit. He lays it down as a general principle (i. 374) 'that all ecclesiastical tradition respecting the ancient places in and around Jerusalem and throughout Palestine is of no value, except so far as it is supported by circumstances known to us from the Scriptures or from other contemporary history.' The effect of superstition has been the creation and transmission of a vast mass of false and legendary matter, which has imposed on the credulity of successive travellers. 'Even within the last two centuries, so far as the convents and travellers in Palestine are concerned, I fear the cause of Biblical geography can hardly be said to have greatly advanced' (Robin. *Pref.* p. ix.). 'But there is in Palestine another kind of tradition with which the monasteries have had nothing to do, and of which they have apparently in every age known little or nothing—I mean the preservation of the ancient names of places among the common people. This is truly a natural and native tra-



dition, not derived in any degree from the influence of foreign convents or masters, but drawn in by the peasant with his mother's milk, and deeply seated in the genius of the Semitic language' (Robin. *Palest.* i. 376). After remarking that Seetzen and Burckhardt had pointed out a better course by seeking information among the Arab peasantry, Robinson says he adopted two principles in his examination of the Holy Land: 1. To avoid contact with the convents, to examine with the Scriptures in his hands, and to apply for information solely to the native Arab population; 2. To leave the beaten track, and direct attention to the least visited portions of the country (i. 377). Three periods of foreign tradition have had an influence in corrupting our knowledge of the geography of Palestine. The first falls about A.D. 333, when the influence of Constantine, Helena, and their like, gave rise to much topographical falsehood. The *Onomasticon* of Eusebius and the *Jerusalem Itinerary* are a record and a specimen of this period. The second is the age of the Crusades in the twelfth and thirteenth centuries; the tradition of which is best registered in the tract of Brocardus about A.D. 1283. The third period occurs at the beginning of the seventeenth century, when the volumes of Quaresmius exhibit in full the state of the tradition then current in the convents, the great source from which most European travellers have drawn their information. During these three periods the light of truth gradually became dim, and was at length ften quenched in darkness. The *Onomasticon*, however, with all its defects and wrong hypotheses, has yet preserved much of the tradition of the common people, and contains many names of places never since discovered, though still existing; while the few pages of Brocardus are worth more, in a topographical respect, than the unwieldy folios of Quaresmius (Robinson, *Preface*).—J. R. B.

GEPHEN (ἄμπελος). [VINE.]

GERAH (גֵּרָה; Sept. ὀβολός), the smallest piece of money among the Hebrews. Twenty made a shekel; one of them would therefore be worth three halfpence, according to the present value of silver (Exod. xxx. 13).

GERAR (גְּרָר; Sept. Γεράρ), a town and district on the southernmost borders of Palestine, in the country of the Philistines, and not far from Gaza. It was visited by Abraham after the destruction of Sodom (Gen. xx. 1), and by Isaac when there was a dearth in the rest of Canaan (Gen. xxvi. 1). The incidents of their sojourn show that the district was very fertile. It was the seat of the first Philistine kingdom we read of, and gave name to it. The intercourse, differences, and alliances of the Hebrew fathers with the king and people of Gerar form a very curious and interesting portion of patriarchal history. It was still an important place in later times, as we may gather from 1 Chron. xiv. 13, 14. According to the ancient accounts Gerar lay in or near a valley, which appears to be no other than the great Wady Sheriah (or one of the branches of it), that comes down from Beersheba; besides we know that it was in the land of the Philistines, and that it was not far from Beersheba when Isaac resided there (Gen. xxvi. 1, 20, 23; 26-33; comp. xx. 1). The name continued to exist (perhaps as a matter of tradition) for several centuries after the Christian era. Eusebius and Jerome (*Onomast.* s. v. Gerar) place it twenty-five Roman miles southward from Eleutheropolis; and Sozomen (*Hist. Eccles.* vi. 32; ix. 17) reports that a large and celebrated monastery stood there near a winter torrent. The abbot Silvanus resided there towards the end of the fourth century, and the name of Marcion, bishop of Gerar, appears among the signatures of the council of Chalcedon in A.D. 451. The name seems to have been afterwards lost, and Dr. Robinson was unable to discover any traces of it in the locality; but it is to be hoped that some possible remains of the convent may hereafter assist in recovering the knowledge of the site.

GERASA, now JERASH (not named in the Bible), was in the Decapolis, and formed the eastern boundary of Peræa. It lay on elevated ground, according to Ptolemy, in 68° 15′ = 31° 45′. Its inhabitants were mostly heathen (Joseph. *De Bell. Jud.* iii. 3. 3; comp. iv. 9. 1; ii. 18. 5; *Antiq.* xiii. 15. 5). Origen speaks of it as a city of Arabia (Γέρασα τῆς Ἀραβίας ἐστὶν πόλις), which arose from the fact that it was a border city of Peræa, and lay next to Arabia. After the Roman conquests in the East, the country in which Gerasa lies became one of their favourite colonies, and ten principal cities were built on the east of the Jordan, giving the name of Decapolis to the land in which they stood. Gerasa was one, but not the greatest of these. The place was taken by storm by Alexander Jannæus, who was actuated by a desire of gaining a large treasure (Joseph. *De Bell. Jud.* i. 4. 8; *Antiq.* viii. 2. 3). Alexander died near it while besieging Regaba

336.

(*Antiq.* xv. 5). Before the place had time to recover from this calamity, it was included among the number of those cities which were burnt by the enraged Jews in their vengeance on the Syrians, and on the Roman power generally, for the massacre of a number of their nation at Cæsarea (Joseph. *De Bell. Jud.* ii. 18. 1). A terrible revenge was taken by other cities, but Gerasa is honourably excepted (*De Bell. Jud.* ii. 18. 5). Annius, general under Vespasian, took the city; 'after which he set fire to their houses,' 'and what was remaining was all burnt down' (*De Bell. Jud.* iv. 9. 1). Gibbon enumerates this city among the line of fortresses from Bosra to Petra, which formed the frontier of the Syrian provinces

in the lower empire. Baldwin II. of Jerusalem destroyed its castle in the year 1122 (Will. Tyr. p. 825; *Histor. Hierosol.* p. 615). This was the native place of Nicomachus Gerasenus. Coins of Gerasa may be seen in Eckhel (*Num. Vet.* iii. 350). Its ruins were first discovered by Seetzen, and have often been subsequently visited. They have been pronounced superior to those of Palmyra.

On approaching Gerasa on the southern side, Buckingham first saw a triumphal gateway, nearly entire, which was of the Corinthian order. Within this gateway, on the left, he observed a fine naumachia for the exhibition of sea-fights, the channels for filling which with water were still visible. Corn was growing near it. Passing on amid heaps of ruined fragments, he came to a second gateway. Entering the city through this its southern gate, he came into a large and beautiful circular colonnade of the Ionic order, having passed a peripteral temple, above which on the left was an open theatre. A long avenue of columns of the Corinthian order, led through the whole length of the city. Climbing over huge masses of fallen columns and masonry, he noticed four columns on each side of the way of much greater size and height than the rest. Beyond this he came to a square, apparently once lined on both sides by an avenue of columns. He afterwards came to a portion of a semi-circular temple. A broken altar was near the ruins, on which was made out the name of Marcus Aurelius. Beyond this again were temples, colonnades, theatres, bridges, aqueducts, &c. These remarks will give an idea of the magnificence of these ruins, particularly when we add that the northern exit is a mile apart from the southern entrance. A necropolis lies not far from the northern wall, in which were found nearly a hundred sculptured sarcophagi above ground, having the appearance of having been ransacked for treasure. Near the necropolis were the remains of a small temple. The city stood on the facing slopes of two opposite hills, but, from the neighbouring heights, it appears to be seated in the hollow of a deep valley, encircled on all sides by lofty and verdant mountains. Near this spot is the modern village of Aioode. Some inscriptions found on the ruins may be seen in Buckingham's *Travels in Palestine*, p. 405.—J. R. B.

GERGESENES. [GADARA.]

GERIZIM, MOUNT. [EBAL AND GERIZIM.]

GERSHOM (גֵּרְשֹׁם, *a stranger here;* Γηρσάμ), one of the two sons (the other was Eliezer) who were born to Moses in the land of Midian by Zipporah (Exod. ii. 22; xviii. 4). These sons of the great lawgiver held no other rank than that of simple Levites, while the sons of their uncle Aaron enjoyed all the privileges of the priesthood (1 Chron. xxiii. 14). The glory of being the children of such a father doubtless availed them more than the highest dignities; but we must nevertheless admire the rare disinterestedness of Moses in making no public provision—as he might so easily have done—for his own children.

GERSHON (גֵּרְשׁוֹן, *banisher;* Sept. Γηρσών), eldest son of the patriarch Levi, born in Canaan before the going down into Egypt. He is only known from his name having been given to one of the three great branches of the Levitical tribe. The office of the Gershonites, during the marches in the wilderness, was to carry the vails and curtains of the tabernacle, and their place in the camp was west of the tabernacle (Gen. xlvi. 11; Exod. vi. 16; Num. iii. 17).

GESHEM (גֶּשֶׁם, *carcase;* Sept. Γησάμ), one of the enemies of the Jews under Nehemiah (Neh. vi. 6). He was probably a Samaritan, although on some account or other designated an Arabian (Neh. ii. 19), and seems to have been a subaltern officer at Jerusalem. He opposed the designs of the Jewish governor, talking of them as seditious, and turning them into ridicule. Eventually he took part in the plots of Tobiah against the life of Nehemiah (Neh. ii. 19; vi. 2-9), about B.C. 445.

GESHUR (גְּשׁוּר; Sept. Γεδσούρ), a district of Syria (2 Sam. xv. 8; 1 Chron. ii. 23), which adjoined, on the east side of the Jordan, the northern border of the Hebrew territory, and lay between Mount Hermon, Maachah, and Bashan (Deut. iii. 13, 14; Josh. xii. 5). According to the boundaries of the Holy Land, as defined by Moses, Geshur would have formed part of it; but in Josh. xiii. 2, 13, it is stated that the Israelites had expelled neither the Geshurites nor the Maachathites, but dwelt together with them. That the Hebrews did not afterwards permanently subdue Geshur appears from the circumstance that, in David's time, this district had a king of its own, called Talmai, whose daughter, Maacah, was one of the wives of David (2 Sam. iii. 3). She was the mother of Absalom, who took refuge with his grandfather after the murder of Amnon, and remained three years in Geshur (2 Sam. xiii. 37: xv. 8). The word *Geshur* signifies a bridge, and corresponds with the Arabic *Jisr*, and in the same region where, according to the above data, we must fix Geshur, between Mount Hermon and the lake of Tiberias, there still exists an ancient stone bridge over the upper Jordan, called Jisr-Beni-Jakub, or 'the bridge of the children of Jacob,' *i. e.* the Israelites. (See a figure of this bridge in No. 176.) The ancient commercial route to and from Damascus and the East seems to have lain in this direction in the most ancient times (Gen. xxxvii. 25); and hence the probability that there was even then a bridge over the river, which (in times when bridges were rare) gave its name to the adjacent district.

GESHURITES, GESHURI; 1. The inhabitants of the above region [GESHUR]. 2. A people in the south of Palestine, near the Philistines (Josh. xiii. 2; 1 Sam. xxvii. 8).

GETHSEMANE (Γεθσημανῆ, seemingly from the Hebrew גַּת, *press*, and שְׁמָנָא, *oil*, i. e. *oil-press*), the name of a small field, or garden, just out of Jerusalem, over the brook Kidron, and at the foot of the Mount of Olives. That which is now pointed out as the garden in which our Lord underwent his agony, occupies part of a level space between the brook and the foot of the Mount, and corresponds well enough in situation and distance with all the conditions which the narrative requires. It is about fifty paces square, and is enclosed by a wall of no great height, formed of rough loose stones. Eight very ancient olive-trees now occupy this enclosure, some of which are of very large size, and all exhibit symptoms of decay clearly

denoting their great age. The garden belongs to one of the monastic establishments, and much care has been taken to preserve the old trees from destruction. Several young trees have been planted to supply the place of those which have disappeared (Olin's *Travels*, ii. 115). Dr. Robinson remarks that there is nothing particular in this plot to mark it as the garden of Gethsemane; for adjacent to it are many similar enclosures, and many olive-trees equally old (*Researches*, i. 346). This, however, can be no ground for the doubt as to its identity which this learned writer suggests; for it is elsewhere a matter of complaint with him that the sites of Scriptural events are not thus left in the simplicity of their natural state, but are over-crowded with extraneous additions. Dr. Robinson admits the probability that this is the site which Eusebius and Jerome had in view; and, as no other site is suggested as preferable, we may be content to receive the traditional indication.

GEZER (גֶּזֶר; Sept. Γαζέρ and Γάζαρα), formerly a royal city of the Canaanites, and situated in what became the western part of the tribe of Ephraim. The Canaanites were not expelled from it at the conquest (Josh. x. 33; xvi. 5, 10; Judg. i. 29). It was, nevertheless, assigned to the Levites (Josh. xxi. 21). In after times, having been, on some occasion, destroyed by the Egyptians, it was rebuilt by Solomon.

GIANTS. The English word is derived immediately from the Latin *gigas*, which is only Greek in Roman letters; and γίγας itself is, in all likelihood, made up of γινέσθαι and γέα or γῆ, thus signifying 'the earth-born,' in allusion to classical fable.

These beings of unusual height are found in the early history of all nations, sometimes of a purely human origin, but more frequently supposed to have partaken also, in some way, of the supernatural and the divine.

The Scriptural history is not without its giants. The English word has several representatives in the original Hebrew, a consecutive notice of which will lead us to sketch the history of Biblical giants.

1. In Gen. vi. 4, we have the first mention of giants (נפילים)—'There were giants in the earth in those days; and also after that, when the sons of God came in unto the daughters of men, and they bare children to them, the same became mighty men which were of old, men of renown.' A somewhat similar intercourse is made mention of in the second verse of the same chapter—'the sons of God saw the daughters of men that they were fair, and they took them wives of all which they chose.' Wellbeloved (*in loc.*) and others translate and interpret the passage so as to make it speak merely of 'men of violence; men who beat down, oppressed, and plundered the weak and defenceless.' Doubtless this is in agreement with the meaning of the original word. But these giants, as in other cases, would naturally be designated by a descriptive name, and great strength is generally accompanied by violence and oppression. In our judgment the bearing of the passage obviously favours the common notion of giants, and that the rather because their origin is traced to some unexplained connection with 'the sons of God,' that is, with beings of high endowments, if not of a superior nature.

2. In Gen. xiv. 5, we meet with a race termed Rephaim (רפאים), as settled on the other side of the Jordan, in Ashteroth-Karnaim, whom Chedorlaomer defeated. Of this race was Og, king of Bashan, who alone remained, in the days of Moses (Deut. iii. 10), of the remnant of the Rephaim. A passage, which is obviously from a later hand, goes on to say—'Behold, his *coffin* (see Michaelis, Dathe, Rosenmüller) was a coffin of iron; is it not in Rabbath of the children of Ammon? nine cubits is its length and four cubits its breadth, according to the cubit of a man,' or the natural length of the cubit [Cubit]. It does not appear to us to be enough to say that Og was 'no doubt a man of unusual stature, but we cannot decide with accuracy what his stature was from the length of the iron coffin in which he was placed' (Wellbeloved, *in loc.*). Whatever theory of explanation may be adopted, the writer of the passage clearly intended to speak of Og as a giant, and one of a race of giants (comp. Josh. xii. 4; xiii. 12). This race gave their name to a valley near Jerusalem, termed by the Seventy, ἡ κοιλὰς τῶν τιτάνων. In Job xxvi. 5, Rephaïm is rendered, in the common version, 'dead things,' to the entire loss of the force of the original. The Douay Bible gives the passage with truth as well as spirit, making it obviously refer to the old myth of the subjugation of the earth-born by divine power:—'Behold, the gyantes groan under the waters, and they that dwell with them. Hell is naked before them, and there is no covert to perdition.'

3. The Anakim (בני ענק or ענקים). In Num. xiii., the spies sent by Moses before his army to survey the promised land, report among other things—'The people be strong that dwell in the land; and, moreover, we saw the children of Anak' (ver. 28). This indirect mention of the children of Anak shows that they were a well-known gigantic race. In the 32nd and 33rd verses the statement is enhanced,—'It is a land that eateth up the inhabitants; and all the people that we saw in it are men of great stature. And there we saw the giants, the sons of Anak which came of the giants; and we were in our own sight as grasshoppers, and so we were in their sight.' However much of exaggeration fear may have given to the description, the passage seems beyond a doubt to show the writer's belief in a race of giants (Deut. ix. 2). From Deut. ii. 10, it appears that the size of the Anakim became proverbial, and was used as a standard with which to compare others. In the time of Moses they dwelt in the environs of Hebron (Josh. xi. 22). They consisted of three branches or clans—'Ahiman, Sheshai, and Talmai—the children of Anak' (Num. xiii. 22). They were destroyed by Joshua (Josh. xi. 21) 'from the mountains, from Hebron, from Debir, from Anab, and from all the mountains of Judah, and from all the mountains of Israel: Joshua destroyed them utterly with their cities. There was none of the Anakim left in the land of the children of Israel: only in Gaza, in Gath, and in Ashdod, there remained' (Judg. i. 20; Josh. xiv. 12).

4. From this remnant of the Anakim thus left in Gath of the Philistines, proceeded the famous Goliath (גלית), 1 Sam. xvii. 4. This giant is

said to have been in height six cubits and a span. He challenged the army of Israel, and put the soldiers in great alarm. The army of the Philistines and that of Israel were, however, on the point of engaging, when David, the youngest son of Jesse, came near, bringing, at the command of his father, a supply of provisions to his three eldest brothers, who had followed Saul to the battle; and, becoming aware of the defiance which had been again just hurled at 'the armies of the living God,' he at once went and presented himself as a champion to the king; was offered, but refused, a coat of mail; and arming himself solely with a sling, smote the Philistine in his forehead, so that he fell upon his face to the earth, and was decapitated by David with his own sword. A general victory ensued. This achievement is ascribed to the divine aid (v. 46, 47). In 2 Sam. xxi. 19, 'Goliath the Gittite, the staff of whose spear was like a weaver's beam,' is said to have been slain by Elhanan, a chief in David's army. This apparent contradiction the common version tries to get over by inserting words to make this Goliath the brother of him whom David put to death. Winer (*Handwörterb.* s. v. Goliath) supposes that the former was a descendant of the latter, bearing the same, perhaps a family name. See, however, the parallel passage in 1 Chron. xx. 5. Other giants of the Philistines are mentioned in the passage before cited, 2 Sam. xxi. 16, sq., namely:—1. 'Ishbi-benob, which was of the sons of the giant, the weight of whose spear weighed three hundred shekels of brass, he being girded with a new sword, thought to have slain David; but Abishai, the son of Zeruiah, succoured him, and smote the Philistine and killed him.' 2. Saph, which was of the sons of the giant who was slain by Sibbechai. 3. 'A man of great stature, that had on every hand six fingers and on every foot six toes, four and twenty in number, and he also was born to the giant; and when he defied Israel, Jonathan, the son of Shimeah, the brother of David, slew him.' These four were sons of the giant in Gath, that is, probably of the Goliath of Gath whom David slew (1 Kings xx. 8; 2 Sam. xx. 22: 1 Sam. xvii. 4).

5. Another race is mentioned in Deut. ii. 10, the Emim (אימים), who dwelt in the country of the Moabites. They are described as a people 'great and many, and tall as the Anakims, which were also accounted giants' (Gen. xiv. 5).

6. The Zamzummim also (זמזמים) (Deut. xxi. 20), whose home was in the land of Ammon —'that also was accounted a land of giants: giants dwelt therein of old time, and the Ammonites called them Zamzummims, a people great and many, and tall as the Anakims; but the Lord destroyed them before them, and they (the Israelites) succeeded them, and dwelt in their stead.'

From this enumeration it is clear that the Scriptures tell of giants in the olden time, and of races of giants; and that, though giants are mentioned as something singular and consequently as comparatively rare, they appear to have been, relatively to the numbers of the population, of frequent occurrence. Whatever deduction may be made for the influence of the passions in the narratives which have passed under review; and though it is true that more than one passage bears traces of interpolation; yet there is evidence that Scriptural writers believed in giants and races of giants as a reality.

That the primitive races of men greatly surpassed others in stature is an opinion which finds ample support in ancient authors generally; and at an early period and under favourable circumstances, individuals and even tribes may have reached an unusual height and been of extraordinary strength. But many things concur to show that the size of the race did not differ materially from what it is at present. This is seen in the remains of human beings found in tombs; especially among the mummies of Egypt. To the same effect is the size of ancient armour, as well as architectural dimensions, and the measures of length which have been received from antiquity. Ancient writers who are free from the influence of fable, are found to give a concurrent testimony. 'Homer, when speaking of a fine man, gives him four cubits in height and one in breadth; Vitruvius fixes the usual standard of a man at six Roman feet; Aristotle's admeasurement of beds was six feet' (Millingen's *Curiosities of Medical Experience*, p. 14).

That great diversity as to height and size prevails in the human family, is well known. What the precise limits may be within which nature has worked in the formation of man, it would be difficult to determine. The account which Aristotle and others have given both of pigmies and of giants may be safely treated as fables. But the inhabitants of northern latitudes are well known to be below the ordinary standard, many of them scarcely exceeding four feet; while in temperate climates the height of the human race averages from four feet and a half to six feet; and instances are not wanting of persons who measured eight or nine feet. Some authors go so far as ten and eighteen, but these assertions seem to refer to fossil bones erroneously attributed to man. Humboldt says that the Guayaquilists measure six feet and a half, and that the Payaguas are equally tall, while the Caribbees of Cumana are distinguished by their almost gigantic size from all the other nations he had met with in the New World. The Patagonians were stated by the Spanish early navigators to measure seven feet four inches. This account appears to be an exaggeration; but more recent travellers—such as Bougainville, Byron, Wallis, Carteret, and Falkner—affirm that their height ranges from six to seven feet.

Cases of great individual height and strength are not seldom found, though now and then they have been much exaggerated. The tallest persons of whom we have a trustworthy record did not, according to Haller, exceed nine feet. Schreber, who has collected the description of the principal modern giants, found few above seven feet and a half; although he mentions a Swedish peasant of eight feet Swedish measure; and one of the guards of the Duke of Brunswick was eight feet six inches Dutch. One of the best authenticated cases in modern times is that of Parsons, who was by trade a blacksmith, and porter at Court in the early part of the 18th century. Hakewill (*Apology*, iii. 4. 3), Fuller (*Worthies*, Staffordshire), and Plott (*Nat. Hist. Stafford*, viii. 50) concur substantially in their accounts respecting him. He was seven feet two inches, and, on the authority of Fuller, 'he was proportionable in his parts, and had strength equal

to his height, valour to his strength, temper to his valour; so that he disdained to do an injury to any single person. He would make nothing to take two of the tallest yeomen of the guards under his arms at once, and order them as he pleased.' We have in existence evidence of extraordinary height in the case of O'Brien, who was exhibited throughout England about the year 1784. His skeleton, preserved in the Museum of the Royal College of Surgeons in London, measures seven feet eleven inches in height. If we allow two inches for the softer parts of the body, his stature would be eight feet one inch. Other instances of still greater height are on record (see art. 'Giant,' in the *Encyclopædia Metropolitana*); but some are evidently fabulous, some are insufficiently authenticated, and others bear obvious signs of exaggeration. Nor, after all, is it of much consequence to what height the human frame may, in any individual case, have extended. There have been monsters of all kinds; and height, without health, vigour, and corresponding strength, is only a form of monstrosity; not to say that there are certain physical conditions of human existence which, if they do not forbid a height so great as some have fabled of, go far to deprive any very unusual size of even ordinary strength.

The possibility of a race of giants cannot well be denied. There is a known tendency in the human frame to perpetuate peculiarities which have been once evolved. Why not extraordinary 'procerity' as well as any other? In fact, the propagation of stature, whether high or low, is a phenomenon which we all see presented daily before our own eyes. Tall parents give birth to tall children. The tallness is found to remain in families; and, doubtless, did not circumstances intervene to reduce the stature by intermarriage with short persons, the unusual height would be perpetuated in any given line. The inhabitants of Potsdam, descended to a great extent from the famous regiment of tall grenadiers which Frederick of Prussia took so much pains to bring together, are said to be still remarkable for exceeding the average height. The family of Scaligers appears to have been unusually tall.

It may also be to some extent admitted that, in the early ages, men may have surpassed the moderns in size and strength; so that Homer's *οἷοι νῦν βροτοί εἰσιν* may even then have had some ground, which has certainly since his time not grown less. For there are tendencies in the culture of a high civilization which, whatever they do for the mind, can hardly fail to reduce the size and lessen the strength of the body. It is a law in physiology that the exercise of any part or organ adds at once to its size, its vigour, and its power. In early periods the corporeal frame was in constant play, and in some states received especial care; while with us the body is dwarfed by comparative inactivity, as well as by insalubrious air and food. The natural consequence is a general diminution of physical strength, which, by going on for centuries, cannot well do otherwise than reduce the stature, and impair the effectiveness of the race.—J. R. B.

GIBBETHON (גִּבְּתוֹן; Sept. Γαβαθών), a city of the Philistines, which was included in the territories of the tribe of Dan (Josh. xix. 44), and was assigned to the Levites (Josh. xxi. 23). It was still in the hands of the Philistines in the time of Nadab, king of Israel, who besieged it, and was slain under its walls by Baasha, one of his own officers (1 Kings xx. 27; xvi. 15). Nothing is known of its site.

GIBEAH (גִּבְעָה; Sept. Γαβαά). There were several places of this name, which, as before remarked [GEBA], is the feminine form of the word Gibeah, and signifies *a hill*. Without doubt all the places so named were situated upon hills.

1. GIBEAH OF BENJAMIN is historically the most important of the places bearing this name. It is often mentioned in Scripture. It was the scene of that abominable transaction which involved in its consequences almost the entire extirpation of the tribe of Benjamin (Judg. xix. 14, sq.). It was the birth-place of Saul, and continued to be his residence after he became king (1 Sam. x. 26; xi. 4; xv. 33; xxiii. 19; xxvi. 1); and here was the scene of Jonathan's romantic exploit against the Philistines (1 Sam. xiv.). It was doubtless on account of this its intimate connection with Saul, that the Gibeonites hanged up here his seven descendants (2 Sam. xxi. 6). Jerome speaks of Gibeah as, in his time, level with the ground (*Ep.* 86, *ad Eustoch.*), and since then it does not appear to have been visited by travellers till recently. Dr. Robinson, who made many valuable observations in this neighbourhood, detected Gibeah in the small and half-ruined village of Jeba, which lies upon a low, conical, or rather round eminence, on the broad ridge which shelves down towards the Jordan valley, and spreads out below the village in a fine sloping plain. The views of the Dead Sea and the Jordan, and of the Eastern mountains, are here very extensive. Among the ruins some large hewn stones, indicating antiquity, are occasionally seen. This place is about five miles north by east from Jerusalem.

2. GIBEAH in the mountains of Judah (Josh. xv. 57), which, under the name of Gabaatha, Eusebius and Jerome place twelve Roman miles from Eleutheropolis, and state that the grave of the prophet Habakkuk was there to be seen. Dr. Robinson (*Researches*, ii. 327) identifies it with the village of Jebah, which stands upon an isolated hill, in the midst of Wady-el-Musurr, about ten miles south-west of Jerusalem.

3. GIBEAH in Mount Ephraim, called Gibeah of Phineas, where the high-priest Eleazar, son of Aaron, was buried by his son Phineas (Josh. xxiv. 33). The *Onomasticon* makes it five Roman miles from Gophna, on the road to Neapolis (Shechem); which was itself fifteen Roman miles north of Jerusalem. Dr. Robinson finds it in a narrow valley called Wady-el-Jib, the Geeb of Maundrell, lying just midway on the road between Jerusalem and Shechem.

GIBEON (גִּבְעוֹן; Sept. Γαβαών), a town celebrated in the Old Testament, but not mentioned in the New. It was 'a great city,' as one of the royal cities; and to its jurisdiction originally belonged Beeroth, Chephirah, and Kirjath-jearim (Josh. ix. 17; x. 2). It is first mentioned in connection with the deception practised by the inhabitants upon Joshua, by which, although Canaanites (Hivites), they induced the Jewish leader not only to make a league with them, and to spare their lives and cities, but also, in their de-

fence, to make war upon the five kings by whom they were besieged. It was in the great battle which followed, that 'the sun stood still upon Gibeon' (Josh. x. 12, 1-14). The place afterwards fell to the lot of Benjamin, and became a Levitical city (Josh. xviii. 25; xxi. 17), where the tabernacle was set up for many years under David and Solomon (1 Chron. xvi. 39; xxi. 29; 2 Chron. i. 3), the ark being at the same time at Jerusalem (2 Chron. i. 4) It was here, as being the place of the altar, that the young Solomon offered a thousand burnt-offerings, and was rewarded by the vision which left him the wisest of men (1 Kings iii. 4-15; 2 Chron. i. 3-13). This was the place where Abner's challenge to Joab brought defeat upon himself, and death upon his brother Ashael (2 Sam. ii. 12-32), and where Amasa was afterwards slain by Joab (2 Sam. xx. 8-12). None of these passages mark the site of Gibeon; but there are indications of it in Josephus (*De Bell. Jud.* ii. 19. 1), who places it fifty stadia north-west from Jerusalem; and in Jerome (*Ep.* 86, *ad Eustoch.*): which leave little doubt that Gibeon is to be identified with the place which still bears the name of El-Jib; for Jib, in Arabic, is merely a contraction of the Hebrew Gibeon. The name *Gabaon* is indeed mentioned by writers of the time of the Crusades, as existing at this spot, and among the Arabs it then already bore the name of El-Jib, under which it is mentioned by Bohaedinn (*Vita Saladin.* p. 243). Afterwards it was overlooked by most travellers till the last century, when the attention of Pococke was again directed to it.

El-Jib is a moderately sized village, seated on the summit of a hill, five miles north by west from Jerusalem. The houses stand very irregularly and unevenly, sometimes almost above one another. They seem to be chiefly rooms in old massive ruins, which have fallen down in every direction. One large building still remains, probably a former castle or tower of strength. Towards the east the ridge of the hill sinks a little, and here, a few rods from the village, just below the top of the ridge towards the north, is a fine fountain of water. It is in a cave, excavated in and under the high rock, so as to form a large subterranean reservoir. Not far below it, among olive-trees, are the remains of an open reservoir, about one hundred and twenty feet in length by one hundred in breadth. It was doubtless designed to receive the superfluous waters of the cavern, and there can be little question but that this was 'the Pool of Gibeon' mentioned in 2 Sam. ii. 13; and, in the whole, we find the 'Great [or many] waters of Gibeon' of Jer. xli. 12.

GIBLITES (גִּבְלִים; Sept. Βίβλιοι), the inhabitants of the city and district of Gebal in Phœnicia, 34° 7′ N. lat., 35° 42′ E. long., on the shore of the Mediterranean, under Mount Lebanon. 'The land of the Giblites,' with 'all Lebanon,' was assigned to the Israelites by the original appointment (Josh. xiii. 5); but it does not seem that they ever possessed themselves of it. The Giblites are denoted by the word rendered 'stone-squarers' in 1 Kings v. 18; from which it would seem that they were then subject to, or in close connection with, Tyre. It is doubtful whether this Gebal, or the one in Edom, is that mentioned in Ps. lxxxiii. 7. But in Ezek. xxvii. 9, the Phœnician Giblites are distinctly mentioned as such, and preferably employed upon the shipping which formed the glory and strength of Tyre.

Gebal was called Byblos by the Greeks, and so the Septuagint has it here. It was an important place, and celebrated for the birth and worship of Adonis, the Syrian Thammuz. Pliny and other Roman authors call it Gabale (*Hist. Nat.* v. 20). The town still subsists under the name of Jebail. It is seated on a rising ground near the sea, at the foot of Lebanon, which here approaches close to the coast. It is walled on the three sides towards the land, and open on the west towards the sea, being perhaps about half a mile in circuit. Within the wall, which seems of the age of the Crusades, the chief building is an old castle, which has received modern repairs, and is now used as the abode of the agha or commandant. There are three or four open and lofty buildings belonging to the chief people of the place, a mosque with a low minaret, and an old Maronite church of good masonry; but the houses generally are of poor construction, and nearly half the space within the walls is occupied with the gardens of the inhabitants. The population is estimated at 2000. (Maundrell's *Journey*, p. 45; Burckhardt's *Syria*, p. 180; Buckingham's *Arab Tribes*, p. 455.)

GIDEON (גִּדְעוֹן, *destroyer*; Sept. Γεδεών), surnamed JERUBBAAL or JERUBBESHETH, fifth Judge in Israel, and the first of them whose history is circumstantially narrated. He was the son of Joash, of the tribe of Manasseh, and resided at Ophrah in Gilead beyond the Jordan.

The Midianites, in conjunction with the Amalekites and other nomade tribes, invaded the country every year, at the season of produce, in great numbers, with their flocks and herds. They plundered and trampled down the fields, the vineyards, and the gardens; they seized the cattle, and plundered man and house, rioting in the country, after the manner which the Bedouin Arabs practise at this day. After Israel had been humbled by seven years of this treatment, the Lord raised up a deliverer in the person of Gideon. He was threshing corn by stealth, for fear of its being taken away by the Midianites, when an angel of God appeared before him, and thus saluted him:—'The Lord is with thee, thou mighty man of valour.' Gideon expressed some doubt whether God was still with a people subject to such affliction, and was answered by the most unexpected commission—'Go in this thy might, and thou shalt save Israel from the hand of the Midianites: have not I sent thee?' Gideon still urged, 'Wherewith shall I save Israel? Behold my family is poor in Manasseh, and I am the least in my father's house.' The 'Wherewith' was answered by 'Surely I will be with thee.' He then demurred no more, but pressed his hospitality upon the heavenly stranger, who, however, ate not of what was set before him, but directing Gideon to lay it out upon the rock as upon an altar, it was consumed by a supernatural fire, and the angel disappeared. Assured by this of his commission, Gideon proceeded at once to cast down the local image and altar of Baal; and, when the people would have avenged this insult to their false god, their anger was averted through

the address of his father, who, by dwelling on the inability of Baal to avenge himself, more than insinuated a doubt of his competency to protect his followers. This was a favourite argument among the Hebrews against idolatry. It occurs often in the prophets, and was seldom urged upon idolatrous Israelites without some effect upon their consciences.

Gideon soon found occasion to act upon his high commission. The allied invaders were encamped in the great plain of Jezreel or Esdraelon, when he blew the trumpet, and thus gathered round him a daily increasing host, the summons to arms which it implied having been transmitted through the northern tribes by special messengers. The inquietude connected with great enterprises is more sensibly felt some days before than at the moment of action; and hence the two miraculous signs which, on the two nights preceding the march, were required and given as tokens of victory. The first night a fleece was laid out in the middle of an open threshing-floor, and in the morning it was quite wet, while the soil was dry all around. The next night the wonder was reversed, the soil being wet and the fleece perfectly dry (Judg. vii.).

Encouraged by these divine testimonies, Gideon commenced his march, and advanced to the brook Harod, in the valley of Jezreel. He was here at the head of 32,000 men; but, lest so large a host should assume the glory of the coming deliverance, which of right belonged to God only, two operations, remarkable both in motive and procedure, reduced this large host to a mere handful of men. First, by divine direction, proclamation was made that all the faint-hearted might withdraw; and no fewer than 22,000 availed themselves of the indulgence. The remaining 10,000 were still declared too numerous: they were therefore all taken down to the brook, when only those who lapped the water from their hands, like active men in haste, were reserved for the enterprise, while all those who lay down leisurely to drink were excluded. The former numbered no more than 300, and these were the appointed vanquishers of the huge host which covered the great plain (Judg. vii. 1-8).

The overheard relation of a dream, by which Gideon was encouraged (Judg. vii. 9-14), and the remarkable stratagem, with pitchers and torches, by which he overcame (ver. 15-23), are well known.

The routed Midianites fled towards the Jordan, but were pursued with great slaughter, the country being now roused in pursuit of the flying oppressor. The Ephraimites rendered good service by seizing the lower fords of the Jordan, and cutting off all who attempted escape in that direction, while Gideon himself pursued beyond the river those who escaped by the upper fords. Gideon crossed the Jordan a little below where it leaves the lake of Gennesareth, in pursuit of the Midianitish princes Zeba and Zalmunna. On that side the river, however, his victory was not believed or understood, and the people still trembled at the very name of the Midianites. Hence he could obtain no succour from the places which he passed, and town after town refused to supply even victuals to his fatigued and hungry, but still stout-hearted troop. He denounced vengeance upon them, but postponed its execution till his return; and when he did return, with the two princes as his prisoners, he by no means spared those towns which, like Succoth and Penuel, had added insult to injury (Judg. viii. 4-17).

In those days captives of distinction taken in war were almost invariably slain. Zeba and Zalmunna had made up their minds to this fate; and yet it was Gideon's intention to have spared them, till he learned that they had put to death his own brothers under the same circumstances; upon which, as the avenger of their blood, he slew the captives with his own hand (Judg. viii. 18-21).

Among the fugitives taken by the Ephraimites were two distinguished emirs of Midian, named Oreb and Zeeb, whom they put to death. They took their heads over to Gideon, which amounted to an acknowledgment of his leadership; but still the always haughty and jealous Ephraimites were greatly annoyed that they had not in the first instance been summoned to the field; and serious consequences might have followed, but for the tact of Gideon in speaking in a lowly spirit of his own doings in comparison with theirs (Judg. vii. 14; viii. 4).

Gideon having thus delivered Israel from the most afflictive tyranny to which they had been subject since they quitted Egypt, the grateful people, and particularly the northern tribes, made him an offer of the crown for himself and his sons. But the hero was too well acquainted with his true position, and with the principles of the theocratical government, to accept this unguarded offer: 'I will not rule over you,' he said, 'neither shall my son rule over you: JEHOVAH, he shall rule over you.' He would only accept the golden ear-rings which the victors had taken from the ears of their slaughtered foes [EAR-RINGS]; and a cloth being spread out to receive them, the admiring Israelites threw in, not only the ear-rings, but other ornaments of gold, including the chains of the royal camels, and added the purple robes which the slain monarchs had worn, being the first indication of purple as a royal colour. The ear-rings alone weighed 1700 shekels, equal to 74 pounds 4 ounces, and worth, at the present value of gold, about 3300*l*. With this 'Gideon made an ephod, and put it in his city, even in Ophrah; and all Israel went thither a whoring after it; which thing became a snare unto Gideon and to his house.' An ephod, at least that of the high-priest, was an outer garment like a sleeveless tunic, to which was attached the oracular breast-plate, composed of twelve precious stones set in gold, and graven with the names of the twelve tribes. Another plainer description of ephod was worn by the common priests. The object of Gideon in making an ephod with his treasure is not very clear. Some suppose that it was merely designed as a trophy of Israel's deliverance: if so, it was a very strange one. It is more probable that as Gideon had, on his being first called to his high mission, been instructed to build an altar and offer sacrifice at this very place, he conceived himself authorized, if not required, to have there a sacerdotal establishment—for at least the tribes beyond the river—where sacrifices might be regularly offered. In this case the worship rendered there was doubtless in honour of Jehovah, but was still, however well intended, highly schismatical and irregular. Even in his lifetime it must

have had the effect of withdrawing the attention of the people east of the Jordan from the Tabernacle at Shiloh, and thus so far tended to facilitate the step into actual idolatry, which was taken soon after Gideon's death. The probability of this explanation is strengthened when we recollect the schismatical sacerdotal establishments which were formed by Micah on Mount Ephraim, and by the Danites at Laish (Judg. xvii. 5-13; xviii. 29-31).

The remainder of Gideon's life was peaceable. He had seventy sons by many wives, and died at an advanced age, after he had 'ruled Israel' (principally the northern tribes and those beyond the river) for forty years: B.C. 1249 to 1209. He is mentioned in the discourse of Samuel (1 Sam. xii. 11), and his name occurs in Heb. xi. 32, among those of the heroes of the faith.

1. GIHON (גִּיחוֹן; Sept. Γιών), a fountain near Jerusalem. The place outside the city to which the young Solomon was taken to be anointed king, was called Gihon, but its direction is not indicated (1 Kings i. 33, 38). Subsequently King Hezekiah 'stopped the upper water-course [or upper out-flow of the waters] of Gihon, and brought it straight down to the west side of the city of David (2 Chron. xxxii. 30; xxxiii. 14). This was, perhaps, on occasion of the approach of the Assyrian army under Sennacherib, when, to prevent the besiegers from finding water, great numbers of the people laboured with much diligence in stopping the water of the fountains without the city, and in particular of 'the brook that ran through the midst of the land' (2 Chron. xxxii. 3, 4). The author of the book of Sirach (xlviii. 17) also states, that 'Hezekiah brought water into the midst of the city; he dug with iron into the rock, and built fountains for the waters.' The fountain of Gihon is also mentioned by Josephus. From a comparison of these passages the editor of the *Pictorial Bible* (on 2 Chron. xxxii.) arrived at the conclusion, since confirmed by Dr. Robinson (*Researches*, i. 313), that there existed anciently a fountain of Gihon, on the west side of the city, which was 'stopped' or covered over by Hezekiah, and its waters brought by subterraneous channels into the city. Before that time it would naturally have flowed down through the valley of Gihon, and probably formed the brook which was stopped at the same time. 'The fountain may have been stopped, and its waters thus secured very easily by digging deep and erecting over it one or more vaulted subterranean chambers. Something of the very same kind is still seen in the fountains near Solomon's pools beyond Bethlehem, where the water rises in subterranean chambers, to which there is no access except down a narrow shaft like a well. In this way the waters of Gihon would be withdrawn from the enemy and preserved in the city, in which they would seem to have been distributed among various reservoirs and fountains.' From all these circumstances there seems little room to doubt that an open fountain, called 'the fountain of Gihon,' did anciently exist on the west of the city, the waters of which may still continue to flow by subterranean channels down to the ancient temple, and perhaps to Siloam. This fountain was probably near the present Upper Pool, in the valley west of Jerusalem. This Upper Pool is a large tank, which is dry in summer, but in the rainy season becomes full, when its waters are conducted by a small rude aqueduct or channel to the vicinity of the Jaffa Gate, and so to the pool of Hezekiah within the city. (Comp. Robinson's *Researches*, i. 352, 512-514.)

2. GIHON; the name of one of the rivers of Paradise. [PARADISE.]

GILBOA (גִּלְבֹּעַ; Sept. Γελβουέ and Γελβοέ), a mountain memorable for the defeat of Saul by the Philistines, where his three sons were slain, and where he himself died by his own hand (1 Sam. xxviii. 4; xxxi. 1-8; 2 Sam. i. 6-21). The circumstances of the narrative would alone suffice to direct our attention to the mountains which bound the great plain of Esdraelon on the south-east, and are interposed between it and the Jordan valley. Here there are a number of ridges, with a general direction from north-west to south-east, separated by valleys running in the same direction. The largest of these valleys is the southernmost: it is a broad deep plain about two miles and a half wide, and leading direct into the Jordan valley. This is supposed to be distinctively (for the plain of Esdraelon is sometimes so called) the Valley of Jezreel. The mountains which bound it on the north appear to be those of Little Hermon; and the higher mountains which bound it on the south undoubtedly form Mount Gilboa. There is still, indeed, an inhabited village, in whose name of Jelbon that of Gilboa may be recognised.

GILEAD (גִּלְעָד; Sept. Γαλαάδ). 1. A group of mountains connected with Lebanon by means of Mount Hermon. It begins not far from the latter, and extends southward to the sources of the brooks Jabbok and Arnon, thus enclosing the whole eastern part of the land beyond the Jordan (Gen. xxxi. 21; Cant. iv. 1). According to Michaelis (*Mos. Recht*, i. 86), this mountain, which gave its name to the country so called, must be situated beyond the region sketched in our maps, and somewhere about the Euphrates.

Some difficulty has arisen as to its real situation from Judg. vii. 3, where it would appear that it lay on *this* side of the Jordan, in the plain of Jezreel. There is, however, no need of altering the reading of the text, as suggested by Le Clerc and Michaelis, since it merely implies that all those who should not feel inclined to prosecute the war against the Midianites farther than the mountain from which the latter had emerged, were at liberty to return home.

2. (*a*) The name of a large district beyond the Jordan, continually mentioned in the Scriptures in contradistinction to, or apart from, Bashan (Deut. iii. 13; Josh. xii. 5; xiii. 11; xvii. 1; 2 Kings x. 33; 1 Chron. v. 16; Mic. vii. 14); though, to judge from its geographical position (as given Num. xxxii. 26; Deut. iii. 12), it must have comprised the entire possessions of the two tribes of Gad and Reuben, and even the southern part of Manasseh (Deut. iii. 13; Num. xxxii. 40; Josh. xvii. 1-6). The cities Ramoth, Jabesh, and Jazer, are usually designated as lying in Gilead.

This region was distinguished for its rich pastures (Num. xxxii. 1) and aromatic simples; from which latter different sorts of balsam were prepared—facts confirmed by modern travellers

(Seetzen, Burckhardt, &c.), with the addition that the whole region is covered with groups of limestone mountains, intersected by fertile valleys.

(*b*) The name of the whole eastern part of the Jordan (Deut. xxxiv. 1; comp. 2 Kings x. 33; Judg. xx. 1).

The name *Gilead* continued to be used, in a general and geographical sense, even after the exile (1 Macc. v. etc.). Josephus (*Antiq.* xiii. 13. 5) designates it as a part of Arabia, while its special and topographical name was *Peræa*.

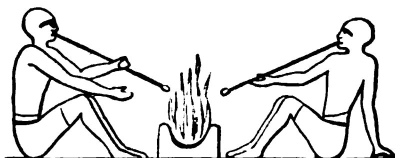
3. A city of this name is apparently mentioned Hos. vi. 8; so, at least, it is given in most of the ancient and modern versions, though the meaning may only be that Gilead is (like) a city full of iniquity, *i. e.* a union of iniquitous people.—E. M.

1. GILGAL (גִּלְגָּל; Sept. Γάλγαλα), the place where the Israelites formed their first encampment in Palestine, and which continued for some time to be their head-quarters while engaged in the conquest of the land (Josh. iv. 19, 20; ix. 6; x. 6, 7, &c.). It was here that they set up the twelve stones which they took out of the bed of the Jordan (iv. 19), which another head will bring under consideration [STONES]. Samuel used to visit Gilgal in his annual circuit as a judge; and here there was a school of the prophets (1 Sam. vii. 16; 2 Kings iv. 38). There is no notice of the place after the Captivity. Indeed, it does not seem that the name belonged at first to a town, although Gilgal eventually became an inhabited place. It appears to have been early abandoned, and Josephus does not seem to mention it as existing in his time. This writer places it on the east border of Jericho, ten stadia from that city, and fifty from the Jordan (*Antiq.* v. 1, 4, 11). From this it would seem to have been in the vicinity of the present village of the pseudo-Jericho, Riha, which is about the assigned distance from the river. No trace of the name or site can now be discovered.

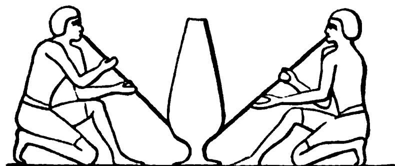
2. GILGAL, a place in the region of Dor, whose king was subdued by Joshua (Josh. xii. 23). The Gilgal of Neh. xii. 29, and 1 Macc. ix. 2, is probably the same as this; as well as the ancient Galgala, which Eusebius and Jerome place six Roman miles north of Antipatris. In this neighbourhood there is still a village called Jiljuleh, which probably represents the ancient site.

GIRDLE. [ABNET; ARMOUR; DRESS.]

GIRGASHITES (גִּרְגָּשִׁי; Sept. Γεργεσαῖοι), one of the families of Canaan, who are supposed to have been settled in that part of the country which lay to the east of the Lake of Gennesareth. This conclusion is founded on the identity between the word Γεργεσαῖοι, which the Septuagint gives for Girgashites, and that by which Matthew (viii. 28) indicates the land of the Gergesenes. But as this last reading rests on a conjecture of Origen, on which little reliance is now placed [GADARA], the conclusion drawn from it has no weight, although the fact is possible on other grounds. Indeed, the older reading, 'Gerasenes,' has sufficient resemblance to direct the attention to the country beyond the Jordan.



The Girgashites are conjectured to have been a part of the large family of the Hivites, as they are omitted in nine out of ten places in which the nations or families of Canaan are mentioned, while in the tenth they are mentioned, and the Hivites omitted. Josephus states that nothing but the name of the Girgashites remained in his time (*Antiq.* i. 6. 2). In the Jewish Commentaries of R. Nachman, and elsewhere, the Girgashites are described as having retired into Africa, fearing the power of God; and Procopius, in his *History of the Vandals*, mentions an ancient inscription in Mauritania Tingitana, stating that the inhabitants had fled thither from the face of Joshua the son of Nun. The fact of such a migration is not unlikely: but we have very serious doubts respecting the inscription, mentioned only by Procopius, which has afforded the groundwork of many wonderful conclusions; such, for instance, as that the American Indians were descended from these expelled Canaanites. The notion that the Girgashites did migrate seems to have been founded on the circumstance that, although they are included in the list of the seven devoted nations either to be *driven out* or destroyed by the Israelites (Gen. xv. 20, 21; Deut. vii. 1; Josh. iii. 10; xxiv. 11), yet they are omitted in the list of those to be utterly destroyed (Deut. xx. 17), and are mentioned among those with whom, contrary to the Divine decree, the Israelites lived and intermarried (Judg. iii. 1-6).



GITTITES (גִּתִּי; Sept. Γεθαῖοι), inhabitants or natives of Gath (Josh. xiii. 3). Obed-edom, although a Levite, is called a Gittite (2 Sam. vi. 10), possibly because he had been with David when at Gath, but much more probably from his being a native of Gath-rimmon, which was a city of the Levites. There seems no reason for extending this interpretation to Ittai (2 Sam. xv. 19), seeing that David expressly calls him 'a stranger' (foreigner), and, what is more, 'an exile.' He was at the head of 600 men, who were also Gittites, for they are called (ver. 22) his 'brethren.' They appear to have formed a foreign troop of experienced warriors, chiefly from Gath, in the pay and service of David; which they had perhaps entered in the first instance for the sake of sharing in the booty obtainable in his wars. We can conceive that the presence of such a troop must have been useful to the king in giving to the Hebrew army that organization and discipline which it did not possess before his time. As natives of Gath they were of course Philistines, and the Philistines were beyond comparison the best soldiers in Palestine; and although they were nationally enemies of Israel, it is easy to conceive various partial influences which might have drawn a troop of them into the service of the most renowned general and successful warrior of their time.

GITTITH, a word which occurs in the title of Ps. viii., lxxxi., lxxxiv. [PSALMS].

GLASS, according to Pliny (*Hist. Nat.* xxxvi. 26), was discovered by what is termed accident. Some merchants kindled a fire on that part of the coast of Phœnicia which lies near Ptolemais, between the foot of Carmel and Tyre, at a spot where the river Belus casts the fine sand which it brings down; but, as they were without the usual means of suspending their cooking vessels, they employed for that purpose logs of nitre, their vessel being laden with that substance: the fire fusing the nitre and the sand produced glass. The Sidonians, in whose vicinity the discovery was

made, took it up, and having in process of time carried the art to a high degree of excellence, gained thereby both wealth and fame. Other nations became their pupils; the Romans especially attained to very high skill in the art of fusing, blowing, and colouring glass. Even glass mirrors were invented by the Sidonians—*etiam specula excogitaverant.* This account of Pliny is in substance corroborated by Strabo (xvi. 15), and by Josephus (*De Bell. Jud.* ii. 9). Yet, notwithstanding this explicit statement, it was long denied that the ancients were acquainted with glass properly so called; nor did the denial entirely disappear even when Pompeii offered evidences of its want of foundation. Our knowledge of Egypt has, however, set the matter at rest—showing at the same time how careful men should be in setting up mere abstract reasonings in opposition to the direct testimony of history. Wilkinson, in his *Ancient Egyptians* (iii. 88, sq.), has adduced the fullest evidence that glass was known to and made by that ingenious people at a very early period of their national existence. Upward of 3500 years ago, in the reign of the first Osirtasen, they appear to have practised the art of blowing glass. The process is represented

327.

in the paintings of Beni Hassan, executed in the reign of that monarch. In the same age images of *glazed* pottery were common. Ornaments of glass were made by them about 1500 years B.C.; for a bead of that date has been found, being of the same specific gravity as that of our crown glass. Many glass bottles, &c. have been met with in the tombs, some of very remote antiquity. Glass vases were used for holding wine as early as the Exodus. Such was the skill of the Egyptians in this manufacture, that they successfully counterfeited the amethyst, and other precious stones. Winckelmann is of opinion that glass was employed more frequently in ancient than in modern times. It was sometimes used by the Egyptians even for coffins. They also employed it, not only for drinking utensils and ornaments of the person, but for Mosaic work, the figures of deities, and sacred emblems, attaining to exquisite workmanship, and a surprising brilliancy of colour. The art too of cutting glass was known to them at the most remote periods; for which purpose, as we learn from Pliny (*Hist. Nat.* xxxvii. 4), the diamond was used. That the ancients had mirrors of glass is clear from the above cited words of Pliny; but the mirrors found in Egypt are made of mixed metal, chiefly copper. So admirably did the skill of the Egyptians succeed in the composition of metals, that their mirrors were susceptible of a polish which has been but partially revived at the present day. The mirror was nearly round, having a handle of wood, stone, or metal. The form varied with the taste of the owner. The same kind of metal mirror was used by the Israelites, who, doubtless, brought it from Egypt. In Exod. xxxviii. 8, it is expressly said that Moses 'made the laver of brass of the looking-glasses (brazen mirrors) of the women.'

It would be justifiable to suppose that the Hebrews brought glass, and a knowledge how to manufacture it, with them out of Egypt, were not the evidence of history so explicit that it was actually discovered and wrought at their own doors. Whether it was used by them for mirrors is another question. That glass, however, was known to the Hebrews appears beyond a doubt. In Job xxvii. 17, זכוכית is believed to mean glass, though it is rendered 'crystal' in the English version; a substance, in Winer's opinion (*Handwörterbuch*), signified by גביש, which occurs in the ensuing verse, while the former is the specific name for glass. In the New Testament the word employed is ὕαλος (compare Aristoph. *Nubes*, 768). In Apoc. xxi. 18, we read 'The city was pure gold, like unto clear *glass*;' ver. 21, 'as it were transparent glass' (compare c. iv. 6). 'Molten glass' also occurs in Job xxxvii. 18, but the original ראי, and its corresponding word in Exod. xxxviii. 8, authorize the translation 'mirror'—that is of some metal. Indeed Winer, referring to Beckman (*Beiträge zur Gesch. der Erfindung*, iii. 319), expressly denies that glass mirrors were known till the thirteenth century—adding that they are still seldom seen in the East. Mirrors of polished metal are those that are mostly used, formed sometimes into such shapes as may serve for ornaments to the person. In the East mirrors had a connection with the observances of religion; females held them before the images of the goddesses, thereby manifesting their own humility as servants of the divinities, and betokening the prevalence in private life of a similar custom (Callimach. *Hymn. in Pallad.* 21; Senec. *Ep.* 95; Cyril, *De Adorat. in Spir.* ii. 64). That in the New Testament a mirror is intended in James i. 23, 'beholding his natural face in a glass,' appears certain; but the signification of the other passage in which the word ἔσοπτρον occurs, is by no means so clear. If by ἔσοπτρον a metal mirror is to be understood, the language employed is not without difficulties. The preposition διά, 'through,' is in such a case improper; 'face to face' presents an equally improper contrast, for in a mirror 'face answers to face' (Prov. xxvii. 19). So the general import of the passage seems to require a medium, and an imperfectly transparent medium, through which objects are beheld. This is confirmed by the words ἐν αἰνίγματι, *in enigmas*, that is, with the meaning hidden or involved in outward coverings: in this state objects are seen mediately, not immediately (see the passages quoted by Wetstein); in the next the veil will be removed, and we shall see them as they are, as when two persons behold each other with no substance intervening. Hence the rendering in the common version appears not unsuitable, and the statement of the Apostle corresponds with

fact and experience; for it is obscurely, as through a dim medium, that we see spiritual objects. What the precise substance was which the Apostle thought of when he used the words it may not be easy to determine. It could not well be ordinary glass, for that was transparent. It may have been the *lapis specularis*, or a kind of talc, of which the ancients made their windows. This opinion is confirmed by Schleusner, who says that the Jews used a similar mode of expression to describe a dim and imperfect view of mental objects (Schottgen. *Hor. Heb.* in loc.) See Michaelis, *Hist. Vitri ap. Heb.* in *d. Comment. Soc. Goetting.* iv. 57; also Dr. Falconer on 'the knowledge of the Ancients respecting Glass,' in the *Memoirs of the Lit. and Phil. Soc. of Manchester*, ii. 96.—J. R. B.

GLEDE (Deut. xiv. 13) is an obsolete name for the common kite, adopted in our version for ראה *raah*, or, as Gesenius thinks, דאה *daah*, there being a slight mutation in the initial letter of the word (comp. the parallel passage in Lev. xi. 14). The Septuagint renders it by γύψ, and the Vulgate by *milvus*. It has by some been taken for Percnopterus, noticed under RACHAM; and having there shown the species referred to Racham, in the uncertainty which here appears insurmountable, we can have recourse only to the very unsatisfactory inference that may be drawn from the root whence *raah* or *daah* may be derived. Etymologists agree to connect it with velocity or rapidity of flight; and that quality agrees perfectly with the Greek and Vulgate versions, for the kite has, in comparison with its bulk, very long wings, and a forked tail extending beyond them. It is a species that rises to a towering height, hangs apparently motionless in the sky, and darts down with immense velocity; but the legs and claws being weak, it is

328. [Milvus Ater.]

cowardly, and feeds upon carrion, fish, insects, mice, and small birds. About Cairo kites are particularly abundant, mixing with the carrion vultures in their wheeling flight, and coming in numbers to the daily distribution of food awarded them. But the question whether the kite of Europe and that of Egypt are the same species, is not decided, though there is no want of scientific names for both species found in the valley of the Nile; one of which is certainly distinct from the European, and the other, if not so, is still a strongly marked variety. We find it noticed in various stages of plumage, as *Milvus Ictinus*, *Milvus Etolius*, Savigny; *Falco Ægyptiacus* and *Falco Forskahlii*, Gmel.; *Falco cinereo-ferrugineus*, Forskahl; *Falco Arda*, Savigny; probably, also, *Falco parasiticus*, Lath. The bill of this species is dark; head and throat whitish, with brown streaks; body above dark grey brown, pale ferruginous below; tail but slightly forked; legs yellow. It is found in hieroglyphic paintings, coloured with sufficient accuracy not to be mistaken. The other species, which we figure above as *Milvus ater*, is the black kite, *Falco melanopterus*, Daudin; *Elanus Cæsius*, Savigny; *Falco Souninensis*, Lath.; *Le Blac*, Le Vaill., and *Kouhieh* of the Arabs. It has the head, neck, and back dark rusty grey; scapulars bordered with rusty; wing-coverts and primaries black, the last-mentioned tipt with white; tail rusty grey above, white beneath; bill dark; legs yellow. The manners of both species are much the same: it is likely that they are equally abundant at Cairo, and spread into Palestine. [HAWK.]—C. H. S.

GLORY, in the English Version, represents the words כָּבוֹד and δόξα. The Hebrew, from כָּבֵד, 'to be heavy,' is susceptible of the various *analogical* meanings which are derived from its root, viz. 'to be hard,' 'honoured,' 'rich,' &c. In Gen. xxxi. 1, 'all this glory;' Isa. x. 3, 'your glory;' lxvi. 12, 'the glory of the Gentiles,' it means *wealth, abundance*. Ps. lxxix. 9, 'the glory of thy name,' i. e. *honour, reputation*. Isa. xxxv. 2; lx. 13, comp. x. 18, 'the glory of Lebanon,' i. e. *ornament*. Isa. viii. 7, 'the king of Assyria and all his glory,' is rendered by Lowth 'and all his *force*.' In some passages it conveys the ideas of the ancients respecting the bodily seat of certain passions. Among others, they thought *the liver* to be the seat of *anger* and *love*. Thus Horace (*Carm.* i. 13. 4), describing jealous anger or resentment—Fervens difficili bile tumet *jecur*, —'My burning *liver* swells with angry bile' (see notes of the Delphin edition. Comp. Persius, *Sat.* v. 129; Juvenal, *Sat.* vi. 647). Thus Ps. xvi. 9, 'My heart is glad and' כבודי, literally, 'my liver rejoiceth.' Gen. xlix. 6, 'mine honour' is rendered by Sept. τὰ ἥπατά μου, 'my liver.' Lam. ii. 11, is literally rendered by our translators 'My liver is poured upon the earth,' indicating *violent grief*. 'To be heavy' is the *primary* meaning of the root; hence כבוד means 'the liver,' the *heaviest* of all the viscera; just as the lungs, the *lightest* of all, are in our language called *the lights* (Taylor's *Heb. Concord.*). In some instances the literal rendering of the Hebrew idiom in our version is attended with obscurity. 1 Sam. ii. 8, 'throne of glory' is 'a glorious throne.' Ps. xxiv. 7, 8, 'the king of glory' is 'the glorious or majestic king.' Ps. xxix. 3, 'the God of glory' is 'the glorious God,' and is so rendered in the Prayer-book version. In the New Testament, Luke ii. 9, 'the glory of the Lord shone,' is *an extreme splendour* (see also Acts vii. 2). In 1 Cor. ii. 8, 'Lord of glory' is 'glorious or illustrious Lord.' Rom. viii. 8, 'spirit of God' and 'spirit of Christ,' are 'a godly and Christian spirit, temper, or disposition.' *Remarkable events* are a well-known cause of the introduction of *new* words or *new senses* of words. The *appearances* of what is termed כבוד יהוה, 'the glory of Jehovah,' Sept. δόξα Κυρίου, 'the Shechinah of the

Rabbins, so often referred to in the Old Testament, seem to have originated certain uses of the word, in the sense of *light*, and *visible splendour*, and numerous applications of these senses among the Hellenistic writers. It is first *distinctly* called by this term in Exod. xvi. 7, 10. It is described as being like a *bright fire* (Exod. xxiv. 17), and as *attended* with a cloud, Exod. xl. 34, 35. It is probable that the *tradition* of these phenomena influenced the representations of heathen poets, who so often describe the appearances of the deities as attended by a cloud, with a brightness in it (see Taubmann's *Notes on Virgil*). It is believed that the classical Greek writers never use δόξα in the sense of *light* or *splendour*. The nearest instance yet adduced is from Plutarch (*Nicias*, tom. i. p. 538, E), who speaks of Πλάτωνος ἐκλάμψασα δόξα, 'the glory of Plato shining forth.' It answers very frequently, in the Sept., to כבוד (Exod. xxiv. 17, 40; xxxiv. 35; Deut. v. 24, &c.) down to the Captivity. The following instances are offered of the Hellenistic uses, allusions, or applications of the word, *originated* by the events above mentioned:—Matt. vi. 29, 'Solomon in all his *glory*;' i. e. *visible* magnificence, as opposed to the *clothing*, called 'array' of the lilies. 1 Cor. xv. 41, 'the glory, *i. e. lustre*, of the sun, moon, and stars.' Jesus is called, Heb. i. 3, ἀπαύγασμα τῆς δόξης, 'the effulgence of his (the Father's) glory,' an evident allusion to Ezek. x. 4. Rom. i. 23, 'the glory of God' is 'the glorious *form* of God.' 2 Thes. i. 9, 'the *presence* of the Lord and the *glory* of his power.' 1 Tim. vi. 16, 'dwelling in light.' 1 Cor. xi. 7, 'man is the image and *glory* of God,' metonym. that which *exhibits* or *reflects* this glory, i. e. *symbol*, *demonstration*. Other *events* would also conduce to such peculiar uses of the word as *the shining of the face of Moses* (comp. Exod. xxxiv. 29; 2 Cor. iii. 7, 8; iv. 6); the splendour attending the *appearance of angels*, especially in later ages (Matt. xxviii. 3, &c.); *the transfiguration of Jesus*, in which it is said that Peter, James, and John, saw his *glory* (Luke ix. 32; comp. John i. 14; 2 Pet. i. 17, 19. See Macknight on Phil. iii. 21). And since the appearances, &c. alluded to, are connected with the Deity, the Saviour, angels, &c., the same word is also *consistently* adopted to denote the *participation* in the *glory and blessedness* of these beings which is reserved for the faithful. Col. iii. 4, 'appear with him in glory. 2 Cor. iv. 17, 18; 2 Thess. ii. 14, 'the obtaining of the glory of our Lord Jesus Christ.' These senses of the word originated in the *events* recorded in the Scriptures, and are consequently confined to the writers of Scripture, or to those writers who adopted their ideas and language. For the *ordinary* senses and applications of the word, reference must be made to the Biblical Lexicons, as Robinson's, by Bloomfield; Parkhurst's, by H. J. Rose, &c.—J. F. D.

GNAT (κώνωψ; Vulg. *culex*; Order, *diptera*, Linn., *culicidæ*, Latr.; occurs Matt. xxiii. 24). The common gnat scarcely yields to any insect in regard to the interesting facts which it presents to the naturalist. The following *outline* will recall the chief of them to the reader:—The boat-shaped *raft of eggs*, which the parent gnat forms, and leaves upon the water, so admirably constructed, that, though hollow, it neither becomes filled with water, nor sinks even under the torrents of a thunder-shower; the aquatic *larva*, breathing, head downwards, through its *tufted* spiracle; its *hook* with which it seizes the animalcules on which it feeds; the variations and even *reverses of structure* it undergoes in the *pupa* state, now swimming, head *upwards*, by means of its finlike tail, and breathing through spiracles placed behind the *head*; the amazing transformation it undergoes when raising its shoulders out of the water, and upon the bursting of the skin which had enveloped them, the *perfect insect* emerges, its former covering now serving as a life-boat during those few critical moments while it disengages and trims its wings for flight, and commences its existence a winged creature in a new element, and instantly begins to suck the juices of animals or vegetables, while 'its shrill horn its fearful 'larum rings;' the complicated mechanism of its *tube*, which serves the purposes both of lancet and cupping-glass, and of inserting a fluid for liquefying the blood, and making it flow more freely. The various organs, comprehended in so small a structure, excited the wonder of Pliny (*Hist. Nat.* xi. 2), and attracted the notice of Socrates, as we learn from his poetical adversary Aristophanes (*Nubes*, 158); but the further discoveries of the microscope raise our wonder into a still higher principle. What has been said of the naturalist generally, is peculiarly true of him when examining this subject —*dum studet, orat.* 'I dare boldly affirm,' says Swammerdam, 'that the incomprehensible greatness of Deity manifests itself in these mysterious operations in a particular manner, and affords an opportunity of examining, as it were with our senses, the Divine nature,' p. 2. 51. The word κώνωψ seems to be the *generic* term for the gnat among the ancient Greek writers, under which they included several *species*, as we use the word 'fly,' and '*the* fly;' though they give distinct names to *some* species, as the word σέρφος, &c. Rosenmüller observes that the κώνωπες of the Greeks seem to be the *ephemeræ* of Linnæus (apud Bochart, vol. iii. p. 444, 4to., Leips. 1793-6). Aristotle gives the name to a species whose larvæ are bred in the lees of wine, which is then called the *culex vinarius* (*Hist. An.* 5. 19). Pliny also refers to various species of gnats: 'varia sunt culicum *genera*' (*Hist. Nat.* xi. 35). 'Alii ex ficis, *ficarii* dicti' (ibid.). Alii *ex aceto* nascuntur' (ibid.) 'Sunt etiam qui vocantur *muliones*. Alii *centrinæ*' (xvii. 27). We ourselves recognise several kinds under the common name, as gall gnats, horse, wheat, winter (see also Linn. *Syst. Nat.* Diptera, Culex). Our Saviour's allusion to the gnat is a kind of proverb, either in use in his time, or invented by himself, 'Blind guides, who strain *out* a gnat, and swallow down [*bolt*, as we say] a camel.' He adopts the antithesis of the *smallest insect* to the *largest animal*, and applies it to those who are superstitiously anxious in avoiding small faults, yet do not scruple to commit the greatest sins. The typographical error, 'strain *at* a gnat,' first found its way into King James's translation, 1611. It is 'strain out' in the previous translations. The custom of filtering wine, among the Jews, for this purpose, was founded on the prohibition of 'all flying, creeping things' being used for food, excepting the *saltatorii* (Lev. xi. 23). The custom seems alluded to by the Sept., which, in Amos vi. 6, reads διυλισμένον

οἶνον, 'filtered wine'—a passage having a similar scope. According to the Talmud, eating a gnat incurred scourging or excommunication. It is considered that the means adopted in ancient times to avoid the molestation of gnats, originated our English word *canopy*, from *κωνωπεῖον*, a bed with hangings of gauze to keep off gnats, or the gauze-net itself. It occurs in the Apocrypha (Judith x. 21), and elsewhere. In such a litter was Cleopatra carried to the battle of Actium (Horace, *Epod.* ix. 11). A curious speculation has lately been advanced respecting the use of *net-work*, found in a passage in Herodotus, which had heretofore baffled explanation. He says (ii. 96) that 'the people living in the marshy parts of Egypt sleep in lofty towers, to avoid the gnats, but that they also reside near the marshes, substitute a *net* with which the man *catches fish* in the *day*, and makes the following use of it *at night*:—Around and over the bed he sleeps on he casts the *net*, creeps under, and lays himself down. The gnats, *κώνωπες*, which, even if he was to wrap himself in a linen cloak when in bed, would bite through all, do not so much *as even try the net*.' Now the use of retreating to *towers* to avoid gnats could be understood, because it is well known that gnats never fly beyond *a certain height*. The modern Egyptians also sleep on the roof of their houses for the same purpose. Wilkinson (ii. 122) gives a drawing of an ancient Egyptian house, with a tower rising above the terrace-roof. Such an addition is also common in modern houses (Shaw's *Travels*, p. 214). But the efficacy of the *net-work* has been rendered *credible* by a statement of Mr. Spence to the Entomological Society—that the *house-fly* will not enter a window across which a *net* or even *lines of thread* are drawn (*Transact. Entomolog. Soc.* vol. i. p. 8, &c., 1834). If the *gnats* have a similar objection, then this may be regarded as an additional instance of the accuracy of Herodotus, when he relates things *he actually observed*, having been elucidated by modern discoveries (Vorstius, *De Adagiis, N. T.*, p. 771, ed. Fischer; Kirby and Spence, *Introd. to Entomology*; Bæliani *Spicileg.*; Grief, *Oraculum Christi contra percolantes culicem*, &c., Leips. 1749).—J. F. D.

GNOSTICISM. In the whole history of the human mind there is not a more instructive chapter, at once strange and sad, interesting to our curiosity and mortifying to our pride, than the history of Platonism sinking into Gnosticism, or, in other words, of Greek philosophy merging in Oriental mysticism; showing, on the one hand, the decline and fall of philosophy, and, on the other, the rise and progress of syncretism. Perhaps, also, it is the most remarkable instance on record, that out of the religious, moral, and political, in one word, the intellectual corruption which brings on the fall of great and mighty nations (so it doubtless was with Babylon and Thebes, and so we know it to have been with Athens and Rome), God's providence educes purer principles and higher hopes for the nations and people that rise out of their ashes, and who, if they will be taught wisdom and principle, righteousness and peace, by the errors and sufferings of those who have preceded them, may rise to higher destinies in the history of man's conduct and God's providence.

In the Bampton lectures of Dr. Edward Burton, late Regius Professor of Divinity at Oxford, Gnosticism is attributed principally to the writings of Plato, as studied at Alexandria. Though the wisdom of Egypt may have influenced the Greeks and Romans through the mysticism of Pythagoras, though the Oriental doctrines of Babylon may have made their way amongst the Jews both of Jerusalem and Alexandria by means of their Cabbala and Talmuds, and though some sects of declared Gnostics may have gone still more directly to the metaphysical, or rather mystical, genealogies of the Eastern Magi, still it is the opinion of Dr. Burton that it was the Greek writings of Plato which gave the extraordinary impulse of their genius, and, if we may use the word, of their fashion, to the lost writings of the Gnostics, as well as to those which remain to us of Philo and Plotinus; in a word, that Platonist, Philonist, and Gnostic, are but emanations at different distances from the Gnosis of Plato, though they have drawn so deeply from some fountains from which Plato drew more sparingly, and with far better taste, as to have muddied the clearer stream, and darkened the purer light which they derived primarily from the writings of Plato.

The character, learning, and station of Dr. Burton, the years of study he is known to have devoted to this subject, the judicious moderation with which he has spoken of the fathers, the general fairness and ability with which he has examined his authorities, the mass of valuable information he has accumulated in his notes, and, lastly, the ably reasoned theory which he has brought forward in his lectures, entitle his opinions on this subject to great attention. It is our purpose, therefore, in our present article on Gnosticism, as well as in the article upon the Logos, which may be considered a continuation of the subject, to give such a series of extracts from Dr. Burton's lectures, with references to some of the most valuable passages in his notes, as may bring his opinions, and the facts on which he grounds them, most fairly before the reader, adding at the close of each article such remarks as may have occurred to us. We take this course, as it does not seem quite honourable towards a great scholar and divine to present his thoughts in our own words (as Professor Matter, in his clever and agreeable work *Histoire Critique du Gnosticisme*, appears to us to have practised a little too much towards the learned and profound work of his great countryman Beausobre); nor, lastly, is it wise in one who is seeking to establish truth to diminish one jot or one tittle from a great authority. And, let us add, that a writer who has on the whole been so fair to his fellow labourers, to Beausobre, Mosheim, and Brucker, to Irenæus and Ittigius, as Professor Burton has been in his criticisms and acknowledgments, deserves himself to be had in remembrance, and not to be obscured in the works of those who have borrowed from him.

Dr. Burton states the object of his course to be 'to consider the heresies which infested the church in the lifetime of the apostles,' that is, as he afterwards shows, 'during the first century of the Christian era; for it seems certain that St. John survived the rest of the apostles, and the death of St. John, according to every account, very nearly coincided with the commencement of the second

century.' Respecting the probability of our finding traces of heresies in the New Testament, Dr. Burton remarks, 'If false doctrines were disseminated in the church while the apostles were alive, it is at least highly probable that they would allude to them in their writings.' He then proceeds to quote texts which clearly prove 'the existence of heresies in the days of the apostles themselves' (1 Cor. xi. 19; Gal. v. 20; Titus iii. 10; 1 John ii. 18, 19; Coloss. ii. 8; 1 Tim. vi. 20, 21; Rev. ii. 6, 15; 2 Tim. xvii. 18; 1 Tim. i. 19, 20; 2 Tim. i. 15; 3 John, ver. 9). After tracing the term heresy through its successive meanings to the present times, he adds, 'In the course of these lectures I shall speak of the heresies of the apostolic age in the sense which was attached to the term by the early fathers; and all that I wish to be remembered at present is, that the term is not to be understood according to modern ideas' (*i. e.* as limited to heterodoxies about the Trinity), 'but that an heretic is a man who embraces any opinion concerning religion, that opinion not being in accordance with the faith of the Gospel.' Why heresies were allowed to arise so early, and to spread their roots so deep and wide, Professor Burton presumes not to answer; but he quotes 1 Cor. xi. 19 as pointing out one of the principal good effects to be produced by such a trial of the Christian's faith. Approaching still nearer to his main subject, he adds, 'It will appear in the course of these lectures, that many persons who were called heretics in the first and second centuries had little or nothing in common with Christianity. They took such parts of the Gospel as suited their views or struck their fancy; but these rays of light they mixed up and buried in such a chaos of absurdity, that the apostles themselves would hardly have recognised their own doctrines. Such were most of the heresies in the lifetime of the apostles; and when we come to consider the state of philosophical opinion at that period, we shall cease to wonder that the fathers speak of so many heresies appearing in the lifetime of the apostles.'

Having thus glanced at the peculiar character of the heresies, or rather of the heresy, of which he is about to give an account, Dr. Burton proceeds to attribute its early prevalence, and the consequent errors it introduced into the religion of so many Christian converts, to the length of time (fifteen years) which Dr. Burton states to have elapsed between the conversion of St. Paul and his first journeying and preaching in Cilicia, Phrygia, Macedonia, Athens, and Corinth; during the latter part of which journey, namely whilst he was at Corinth, he appears to have written the earliest of his Epistles—the first Epistle to the Thessalonians. 'It appears, therefore, that seventeen years elapsed between the first promulgation of the Gospel and the date of the earliest writing which has come down to us. Those Epistles from which most evidence will be drawn concerning the early heresies, were written several years later; and I am speaking greatly within compass in saying, that the accounts which we have of heresies in the first century, are taken from documents which were written twenty years after the first promulgation of the Gospel. I have said that this fact is not always borne in mind by persons who are considering the events of the first century; and yet this period is unquestionably the most important which ever has occurred in the annals of mankind.' In a subsequent passage he remarks, respecting the period in question, 'If it had not been for an incidental expression of St. Paul in his Epistle to the Galatians we should never have known that he passed three years in Arabia immediately after his conversion, nor that fourteen more years elapsed before the end of his first journey. Whether he passed the greater part of this period in his native city, Tarsus, and what was the nature of his occupation, we seek in vain to learn. We could hardly conceive that the chosen Apostle of the Gentiles would be inclined or permitted to delay the great work to which he had been called, nor would it be easy to imagine that the other Apostles were idle in spreading that Gospel which they had been so solemnly ordered to preach amongst all nations. The death of St. James, and the imprisonment of St. Peter, by order of Herod, prove that they were not idle, and that the Gospel made its way. But still it was not till fourteen years after our Lord's ascension that St. Paul travelled for the first time, and preached the Gospel to the Gentiles. Nor is there any evidence that during that period the other Apostles passed the confines of Judæa.'

Professor Burton proceeds as follows with his very striking argument: 'During the time when we have supposed the Apostles to have confined themselves to Judæa, the Gospel was making rapid progress in several parts of the world. This is the point to which I now wish to direct your attention, and particularly to the fact that this progress was without co-operation and control of the Apostles: which may itself be sufficient to furnish a reason for the appearance of so many heresies, and for such strange corruptions of Christianity in those early times.' He then marks, by quotations from the New Testament, the times and places when and where the Gospel must have been spread by those first converts whose accounts of what they had heard and seen preceded by so many years the journeyings and preachings of the Apostles (John xii. 20, 21; Acts ii. 9, 11; viii. 1; xi. 19), and concludes with the following summary of his argument: 'The Acts of the Apostles leave St. Paul at Tarsus, in the third year after his conversion (Acts ix. 30); and ten years afterwards we find him still at Tarsus, when Barnabas went thither, and brought him to Antioch. During this period the Gospel was making its way in many parts of the three quarters of the world, though as yet none of the Apostles had travelled beyond Judæa: and when we come to consider the state of philosophy at that time, and the fashion which prevailed of catching at any thing new, and of uniting discordant elements into fanciful systems, we shall not be surprised to find the doctrines of the Gospel disguised and altered, and that according to the language of that age many new heresies were formed.'

Professor Burton closes this striking view of the first progress of the Gospel through the reports of those who were not its authorized teachers, by pointing out what must have been the effect of such a state of things in Rome, Corinth, and Galatia; and then shows that the argument applies *à fortiori* to places which had not the teaching of the Apostles to correct this evil till a later time. 'How much more,' says he, 'must this have been the case in places which the Apostle

did not visit so soon, and where, as in Rome, the Gospel made its way for five-and-twenty years, with nothing but the zeal of individuals to spread it, and subject to all the fancies which those individuals might adopt.'

The greatest danger to which Christianity under such circumstances was exposed arose from that great Gnostic Heresy, which was long the rival, and too often the corrupter, of its purer doctrines. Simon Magus is considered by Professor Burton to have been the leader of that large division of the Gnostics who attempted to unite Gnosticism with Christianity; and the learned professor has attempted the somewhat difficult task of reconciling with the truth, and with one another, the strange accounts of this Heresiarch told by the Fathers. When we remember the obscure claims of one Euphrates, surnamed Persicus, to be the Father of Gnosticism, which have been advocated by Mosheim, it will appear most probable in itself, and most exculpatory of the Fathers, to consider both these personages to have been regarded in much the same light by some of the Fathers as Æolus and Dorus are now considered in the history of the Greek tribes; and that their learned ingenuity, not unmixed with something of the *odium Theologicum*, was let loose from all restraints, not so much against the real Simon of the Scriptures, as against Magus, who also might have been called Persicus. The other heresiarchs, Menander and his disciples Basilides and Saturninus, and afterwards Marcion and Valentinus, were in their turn leaders of the great Gnostic heresy, to which also Cerinthus belonged (to combat whose opinions St. John is said to have written his Gospel), as did the early sect of the Nicolaitans. 'When the reader of ecclesiastical history,' continues Dr. Burton, 'comes to the second century, he finds it divided into schools, as numerously and zealously attended as any which Greece or Asia boast in their happiest days. He meets with names totally unknown to him before, which excited as much sensation as those of Aristotle and Plato. He hears of volumes having been written in support of this new philosophy, not one of which has survived to our own day. His classical recollections are roused by finding an intimate connection between the doctrine of the Gnostics and of Plato: he hears of Jews who made even their exclusive creed bend to the new system: and what interests him most is, that in every page he reads of the baneful effect which Gnosticism had upon Christianity, by adopting parts of the Gospel scheme, but adopting them only to disguise and deform them.'

The following extracts contain Professor Burton's view of the Gnostic doctrines, with some remarks on the sources from which they were derived:—

'In attempting to give an account of these doctrines, I must begin with observing, what we shall see more plainly when we trace the causes of Gnosticism, that it was not by any means a new and distinct philosophy, but made up of selections from almost every system. Thus we find in it the Platonic doctrine of ideas, and the notion that every thing in this lower world has a celestial and immaterial archetype. We find in it evident traces of that mystical and cabbalistic jargon which, after their return from captivity, deformed the religion of the Jews; and many Gnostics adopted the Oriental notion of two independent co-eternal principles, the one the author of good, and the other of evil. Lastly, we find the Gnostic theology full of ideas and terms which must have been taken from the Gospel: and Jesus Christ, under some form or other, of Æon, emanation, or incorporeal phantom, enters into all their systems, and is the means of communicating to them that knowledge which raised them above all other mortals, and entitled them to their peculiar name.'

'The genius and very soul of Gnosticism was mystery: its end and object was to purify its followers from the corruptions of matter, and to raise them to a higher scale of being, suited only to those who were to become perfect by knowledge. We have a key to many parts of their system, when we know that they held matter to be intrinsically evil, of which, consequently, God could not be the author. Hence arose their fundamental tenet, that the Creator of the world, or Demiurgus, was not the same with the supreme God, the Author of good, and the Father of Christ. Their system allowed some of them to call the Creator *God*, but the title most usually given was *Demiurgus*. Those who embraced the doctrine of two principles supposed the world to have been produced by the evil principle; and in most systems, the Creator of the world, and not the Father of Christ, was looked upon as the God of the Jews, and the author of the Mosaic law. Some, again, believed that angels were employed in creating the world: but all were agreed in maintaining that matter itself was not created; that it was eternal; and that it remained inactive till the world was formed out of it by the Creator.'

'The supreme God, according to the Gnostics, had dwelt from all eternity in a pleroma of inaccessible light; and beside the name of first Father, or first Principle, they called him also Bythos, as if to denote the unfathomable nature of his perfections. This Being, by an operation purely mental, or by acting upon himself, produced two other beings of different sexes, from whom by a series of descents, more or less numerous according to different schemes, several pairs of beings were formed, who were called *æons*, from the periods of their existence before time was, or *emanations*, from the mode of their production. These successive æons or emanations appear to have been inferior each to the preceding; and their existence was indispensable to the Gnostic scheme, that they might account for the creation of the world without making God the author of evil. These æons lived through countless ages with their first Father. But the system of emanations seems to have resembled that of concentric circles, and they gradually deteriorated as they approached nearer and nearer to the extremity of the pleroma. Beyond this pleroma was matter, inert and powerless, though co-eternal with the supreme God, and, like him, without beginning. At length one of the æons passed the limits of the pleroma, and, meeting with matter, created the world after the form and model of an ideal world, which existed in the pleroma, or the mind of the supreme God.'

'Here it is that inconsistency is added to absurdity in the Gnostic scheme. For, let the intermediate æons be as many as the wildest imagination could devise, still God was the remote, if not

the proximate cause of creation. Added to which, we are to suppose that the Demiurgus formed the world without the knowledge of God, and that, having formed it, he rebelled against him. Here again we find a strong resemblance to the Oriental doctrine of two principles, good and evil, or light and darkness. The two principles were always at enmity with each other. God must have been conceived to be more powerful than matter, or an emanation from God could not have shaped or moulded it into form: yet God was not able to reduce matter to its primeval chaos, nor to destroy the evil which the Demiurgus had produced. What God could not prevent he was always endeavouring to cure: and here it is that the Gnostics borrowed so largely from the Christian scheme. The names, indeed, of several of their æons were evidently taken from terms which they found in the Gospel. Thus we meet with Logos, Monogenes, Zoe, Ecclesia, all of them successive emanations from the supreme God, and all dwelling in the pleroma. At length we meet with Christ and the Holy Ghost, as two of the last æons which were put forth. Christ was sent into the world to remedy the evil which the creative æon, or Demiurgus, had caused. He was to emancipate men from the tyranny of matter, or the evil principle; and by revealing to them the true God, who was hitherto unknown, to fit them, by a perfection and sublimity of knowledge, to enter the divine pleroma. To give this knowledge was the end and object of Christ's coming upon earth: and hence the inventors and believers of the doctrine assumed to themselves the name of *Gnostics*.'

It was in agreement with the Gnostic doctrine of the utter malignity of matter, which Professor Burton considers the very corner-stone of the Gnostic system (both as to the *knowledge* of divine things to which they pretended, and as to the *morality*, or, to speak more correctly, the *mortification*, which they inculcated), that the different Gnostic sects 'either denied that Christ had a real body at all, and held that he was an unsubstantial phantom; or granting that there was a man called Jesus, the son of human parents, they believed that one of the æons, called Christ, quitted the pleroma and descended upon Jésus at his baptism.'

It was upon this belief of the utter malignity of matter, on the one hand, and upon the elevating nature of the divine knowledge to which they pretended, on the other, that the morality of Gnosticism, if it deserves to be so called, was founded. 'If we would know the effect which the doctrines of the Gnostics had upon their moral conduct, we shall find that the same principle led to two very opposite results. Though the Fathers may have exaggerated the errors of their opponents, it seems undeniable that many Gnostics led profligate lives, and maintained upon principle that such conduct was not unlawful. Others, again, are represented as practising great austerities, and endeavouring by every means to mortify the body and its sensual appetites. Both parties were actuated by the same common notion, that matter is inherently evil. The one thought that the body, which is compounded of matter, ought to be kept in subjection, and hence they inculcated self-denial and the practice of moral virtue' [if the learned professor had said that they thought the body ought to be mortified, and for that purpose inculcated a system of asceticism, we think he would have been more correct]; 'while others, who had persuaded themselves that knowledge was every thing, despised the distinctions of the moral law, which was given, as they said, not by the supreme God, but by an inferior æon, or a principle of evil, who had allied himself to matter.'

Professor Burton gives a brief and clear summary of the Gnostic doctrines in the following passage, which well deserves to be retained in the memory:—'The system was stated to have begun with Simon Magus; by which I would understand that the system of uniting Christianity with Gnosticism began with that heretic; for the seeds of Gnosticism, as we shall see presently, had been sown long before. What Simon Magus began was brought to perfection by Valentinus, who came to Rome in the former part of the second century; and what we know of Gnosticism is taken principally from writers who opposed Valentinus. Contemporary with him there were many other Gnostic leaders, who held different opinions; but in the sketch which I have given, I have endeavoured to explain those principles which, under certain modifications, were common to all the Gnostics. That the supreme God, or the Good Principle, was not the creator of the world, but that it was created by an evil, or at least an inferior being; that God produced from himself a succession of æons or emanations, who dwell with him in the Pleroma; that one of these æons was Christ, who came upon earth to reveal the knowledge of the true God; that he was not incarnate, but either assumed an unsubstantial body, or descended upon Jesus at his baptism; that the God of the Old Testament was not the father of Jesus Christ; that there was no resurrection or final judgment. This is an outline of the Gnostic doctrines as acknowledged by nearly all of them.'

Of the erroneous and mischievous nature of the Gnostic doctrines, and of the 'opposition of science, falsely so called,' to the doctrines of Christianity, we shall have to speak presently. For the present, we must confine ourselves to the *historical* portion of this curious and important subject, that is, to a statement of the facts of Gnosticism as given in the lectures of the Regius Professor.

Having given the above admirable outline of the great leading doctrines of the Gnostic heresy, or, rather, of the Gnostic school, he next proceeds to trace up Gnosticism itself to the three sources which we briefly indicated at the beginning of this article, to wit, the *Oriental doctrines* of the Magi of Babylon, or the belief in two principles, the causes of good and evil; secondly, *the Cabbala* of the Jewish doctors, who from the time of the captivity in Babylon had blended much of the Oriental doctrines with the Mosaic law, namely, in that traditional wisdom, and secret doctrine, and mystical interpretation which they pretended to have received; and, lastly, *the philosophy of Plato* (including that of his followers, Greek and Alexandrian, Jewish and Oriental)—that popular philosophy, in which Plato, following Pythagoras and deserting Socrates, set an example of blending philosophy with theosophy, which ended in merging the Philosophy of Greece in the Mysticism of the East.

We proceed to give Dr. Burton's very clear and striking history of Gnosticism (or, in other words, of eclecticism and syncretism, that is, of selecting opinions and uniting them together), in his own words.

'Some persons,' says he, 'have deduced Gnosticism from the Eastern notion of a good and evil principle; some from the Jewish Cabbala, and others from the doctrines of the later Platonists. Each of these systems is able to support itself by alleging very strong resemblances; and those persons have taken the most natural and probably the truest course, who have concluded that all these opinions contributed to build up the monstrous system which was known by the name of Gnosticism.'

'We will begin with considering that which undoubtedly was the oldest of the three, the *Eastern doctrine* of a good and evil principle. There is no fact connected with remote antiquity, which seems more certainly established, than that the Persian religion recognised two beings or principles, which, in some way or other, exercised an influence over the world and its inhabitants. To one they gave the name of Ormuzd, and invested him with the attributes of light and beneficence: the other they called Ahreman, and identified him with the notions of darkness and malignity. It has often been disputed, whether these two principles were considered as self-existing co-eternal gods, or whether they were subject to a third and superior power. Plutarch evidently considered that both of them had a beginning, and that one of them at least would come to an end; for he says that Ormuzd took its rise from light, and Ahreman from darkness; so that light and darkness must have existed before them: he adds, that the time would come when Ahreman would be destroyed, and an age of pure unmixed happiness would commence.' 'Upon the whole,' adds Professor Burton, 'I cannot but consider that those persons have taken a right view of this intricate subject, who represent the Persians as having been always worshippers of one supreme God.

'It is true that the simplicity of their worship was soon corrupted; and the heavenly bodies, particularly the great source of light and heat, became the object of adoration. It is undoubted that the sun, under the name of Mithra, received from them the highest honours; and it will solve many difficulties, if we conceive, that as their ideas became more gross, and the externals of religion occupied more of their attention, they came at length to identify the sun with the one supreme God. There is evidence that a difference of opinion existed among the Magi upon this subject. Some of them embraced what has been called the dualistic system, or the notion that both principles were uncreated and eternal; while others continued to maintain the ancient doctrine, either that one principle was eternal, and the other created, or that both proceeded from one supreme, self-existing source. This fundamental difference of opinion, together with the idolatry which was daily gaining ground, seems to have led to that reformation of religion, which, it is agreed on all hands, was effected in Persia by Zoroaster.' Dr. Burton considers this reformation of religion to have taken place in the reign of Darius Hystaspis. 'There may,' he observes, 'have been an identification of Mithra, or the sun, with the first cause; but to bring back his countrymen to an acknowledgment of a first cause is worthy the praises which have been bestowed on the name of Zoroaster.'

He further remarks, 'The Oriental writers are fond of asserting that Zoroaster conversed with the captive Jews, and borrowed from them many of his ideas. The fact is perhaps chronologically possible; and Zoroaster may well have consulted with the Jews, if it be true that the reform which he introduced consisted in establishing the doctrine' [Dr. Burton had before stated this to be a return to the ancient doctrine of Persia], 'that the two principles were subservient to a third, or higher principle, by which they were originally created.'

Professor Burton proceeds to consider the second source of Gnosticism, 'the mystical philosophy of the Jews, which has been known by the name *Cabbala*;' and he tells us that 'the Jewish cabbala may be loosely defined to be a mystical system, affecting the theory and practice of religion, founded upon oral tradition.' Farther on, in the third lecture, he gives the following account of the origin of the cabbala, and of the spirit in which it was composed. 'That extraordinary and infatuated people' [he is speaking of the Jewish tendency to go after strange gods] 'were from the earliest times inclined to engraft foreign superstitions upon their national worship; and when their idolatries at length caused the Almighty to destroy their city and send them captives to Babylon, they came in contact with a new system of superstition, different from that of Egypt or Canaan, which had before ensnared them. The Jews, who returned from Babylon at the end of their captivity, would be sure to bring with them some of the rites and customs of the people whom they had left: but they also found the evil already waiting for them at their doors. The mixed people who settled in Samaria, when Shalmeneser had depopulated it, set up a variety of idolatries, and joined them to the worship of the God of the Jews (2 Kings xvii. 24-34). Most of the idolaters were from the nations beyond the Euphrates; and this heterogeneous mixture of creeds continued in the country when the Jews returned from captivity. We know from Scripture, that of those who were the first to return, many formed marriages with the people of the neighbourhood (Ezra ix. 2); and the zeal with which Ezra endeavoured to prevent this intercourse showed that he considered the religion of his country to be in danger. We learn also from Josephus, that many Jews continued to live in the countries beyond the Euphrates; he speaks of them as many myriads; and he shows in several places that they kept up an intercourse with their countrymen at Jerusalem; they attended the festivals; they paid the didrachma to the temple, and sent their pedigrees to be registered at Jerusalem: all which shows that a constant communication was kept up between the Jews and those Eastern nations, where the religion of the Magi had lately been reformed by Zoroaster. In one sense the Jews had greatly profited by their captivity in Babylon; and we read no more of the whole nation falling into idolatry. The Persians, indeed, were not idolaters; and it was from them that the greatest effect was produced upon the

opinions of the Jews. It seems certain that their notions concerning angels received a considerable tincture from those of the Persians: and the three principal sects of Pharisees, Sadducees, and Essenes, show how far religious differences were allowed among them, and yet the unity of the faith was considered to be maintained. The Cabbala contains many doctrines concerning angels, and other mystical points, which can only have come from an Eastern quarter: and the secondary, or allegorical interpretation of Scripture, with which the Cabbala abounds, began soon after the return from the captivity.'

Dr. Burton gives rather too slight a sketch of the principles of the Cabbala, and remarks on its resemblance to those of the Gnostics: 'They,' the Cabbalists, 'did not hold the eternity of matter with the Greeks; nor, with the Persians, had they recourse to two opposite principles: they cut the knot which they could not solve; and they taught that God being a spirit, who pervaded all space, the universe also was not material, but spiritual, and proceeded by emanation from God. The first emanation was called in their language *the first man*, or the first begotten of God: and he was made the medium of producing nine other emanations, or *sephiroth*, from which the universe was formed. All this is highly mystical; and it is melancholy to see how the human mind can fall when it attempts the highest flights. Imperfectly as I have described the system of the Cabbalists, it will be seen that it bears no small resemblance to that of the Gnostics, who interposed several æons or emanations between the supreme God and the creation of the world.' Respecting the secondary and mystical interpretation of the Scriptures introduced by the Cabbalists, and carried so much farther by the Gnostics, he says: 'With the Gnostics, to interpret Scripture literally was the exception; and they only did it when it suited their purpose: their rule was to extort a hidden meaning from every passage, and to make every word, and almost every letter, contain a mystical allusion. There undoubtedly was a Cabbala, or secret doctrine, among the Jews, before we hear anything of the Gnostic philosophy: the latter, therefore, could not have contributed to produce the former.'

It will be obvious from the above statements that the Gnostics were as much indebted to the Cabbala, as the Cabbala had been to the Oriental doctrines. 'The notion of emanations, as has been observed by Professor Matter, is the essential feature of the Cabbala; and since there is no warrant for this in the Bible, nor did it appear in the prevailing schemes of heathen philosophy, he very naturally deduces it from the East, where many of the Magi taught that every thing emanated from God, the fountain of light.'

Professor Burton connects the second source of Gnosticism with the third, and, as he considers it, the greatest, or, at least, the most immediate cause of Gnosticism, namely *Platonism*, in the following passage: 'It is natural for us to ask, how the Cabbala came to receive a system of philosophy so far removed from the simplicity of the Mosaic; and how the opinions of the Jews, hitherto so exclusive and so little known, could produce any effect upon a system which, at the time of which we are speaking, was spread over great part of the world. A solution of these questions may probably be found by a consideration of the Platonic doctrines.' These doctrines he considers to have been 'the principal source of Gnosticism,' and to have had an effect 'upon the Cabbalistic philosophy of the Jews.'

In the Greek philosophy, as well as in the Greek Mythology or Cosmogony, the origin of evil was the same stumbling-block that it appears to have been to every system, imaginative or rational; and the Greeks had their own peculiar way of getting over the difficulty. 'The Grecian philosophy,' says Professor Burton, 'did not adopt the system of emanation. They all held that matter was eternal; and such undoubtedly was the opinion of Plato. This was the expedient by which all the philosophers thought to rescue God from being the author of evil; forgetting, as it appears, that at the same time they limited his omnipotence, and made him, though not the author of evil, yet himself subject to its influence: for a being who is all good, and yet restricted in his power, is undoubtedly subject to evil.—Here then was the basis, the false, the unphilosophical basis, on which all the Grecian sages built their systems. Matter was co-eternal with God; and the world was formed either by matter acting upon itself, or being acted upon by God. The school of Epicurus made matter act upon itself, and the Deity was reduced to a name. The Stoics and Peripatetics believed God to have acted upon matter; but it was from necessity, and not from choice.'

'Plato had already adopted a system more worthy of the Deity, and conceived that God acted upon matter of his own free will, and by calling order out of disorder formed the world. Plato certainly did not believe the world to be eternal, though such a notion is ascribed to Aristotle. Plato held the eternity of matter; but he believed the arrangement and harmony of the universe to be the work of the Deity. Here begins the peculiar intricacy of the Platonic system. Every thing, except the Deity, which exists in heaven or in earth, whether the object of sense or purely intellectual, was believed to have had a beginning. There was a time when it did not exist; but there never was a time, when the *Idea*, *i. e.* the form or archetype, did not exist in the mind of the Deity. Hence we find so many writers speak of three principles being held by Plato, the Deity, the *idea*, and matter. It is difficult to explain the Platonic doctrine of *ideas*, without running into mysticism or obscurity; but perhaps, if we lay aside for a time the doctrines of the ancients, and take our own notions of the Deity, we may be able to form some conception of Plato's meaning.'

'We believe that there was a time when the world which we inhabit, and every thing which moves upon it, did not exist; but we cannot say that there ever was a time when the works of creation were not present to the mind of the Deity. There may therefore be the image of a thing, though as yet it has received no material form; or, to use the illustration of the Platonists, the seal may exist without the impression.—Plato supposed these images to have a real existence, and gave to them the name of form, example, archetype, or *idea;* and the use which he made of them constitutes the peculiar character of the Platonic philosophy. He saw that these *ideas* not only preceded the creation of the world, but must have been present to the Deity from all eternity; and he

could assign them no other place than the mind of the Deity.'

'The Gnostics, as we have seen, agreed with Plato in making matter co-eternal with God. They also believed that the material world was formed after an eternal and intellectual *idea*. This peculiar and mystical notion is the very soul of Platonism: and we learn from Irenæus that it was held by all the Gnostics. Both parties also believed in an intermediate order of beings between the supreme God and the inhabitants of the earth: these beings were supposed by both to have proceeded from the mind or reason of God: and it may furnish a clew to much of the Gnostic philosophy, if we suppose the æons of the Gnostics to be merely a personification of the ideas of Plato; or we may say generally, that the Gnostics formed their system of æons by combining the intellectual beings of the Platonic philosophy with the angels of the Jewish Scriptures.'

'There is, indeed, one material difference between the system of Plato and that of the Gnostics. According to the former, God ordered the intellectual beings which he had produced, to create the world; and he delegated this work to them, that he might not be himself the author of evil. But according to the Gnostics, the Demiurgus, one of the inferior æons, created the world without the knowledge of God. This is perhaps as rational an hypothesis as that of Plato himself; and the one may have very naturally grown into the other, during the frequent agitation of the question concerning the origin of evil. It may be observed, also, that the constant hostility which existed between the supreme God and the creative æon, or demiurgus, does not find any parallel in the Platonic philosophy. This was probably borrowed from the Eastern doctrine of a good and evil principle; and what the Scriptures say of Satan, the great adversary of man, may also have contributed to form the same doctrine.'

Such is Professor Burton's view of the doctrines of Gnosticism, and of the three great sources from which it originated, together with some of its effects upon Christianity, in diverting many of the first converts from a better faith into a vain philosophy, '*profane and vain babblings, and the oppositions of science falsely so called.*'

It will remain for us, in the article LOGOS, to lay before our readers Professor Burton's estimate of one of the most remarkable effects of Gnosticism upon Christianity; but as it relates to the Logos of St. John's Gospel, and as it ought, we think, to have been preceded by a more definite, not to say a more searching inquiry into the errors of Plato's philosophy (which are indeed very types or the principal faults of Gnosticism) than Dr. Burton has given to them, we propose there to show what were the false principles in Plato's philosophy which were propagated so widely by the Gnostic heresy, and from which Christianity offered to all who would be taught better things a means of escape.

We trust it has already become evident to our readers that, in presenting them with a brief and clear analysis of the doctrines and origin of Gnosticism in the very words of the late Regius Professor of Divinity, we have been influenced by no desire to save ourselves trouble of thought or composition. The character, learning, and station of Dr. Burton, and the many years of his innocent and useful life which he devoted to the Gnostic heresy and the Apostolic age, must give authority to his opinions when fairly stated.—J. P. P.

GOAT. Chaldee, *izza;* Phœnician, *aza;* Arabic, *jidda* and *hedsjaz*. Of the several Hebrew denominations of this animal there is no doubt, for the simple manners of the ancient Semitic nations multiplied the names of the few objects they had constantly before their eyes; and their domestic animals, in particular, received abundant general and distinctive appellations, according to sex, age, race, and conditions of existence or purpose. Thus we have for goat, עז *ez* (Gen. xxvii. 9); חשיף *chasiph* (1 Kings xx. 27); עתוד *attud*, 'a he-goat,' or rather עתודים *attudim*, 'he-goats' (Gen. xxxi. 10, 12); צפיר *tzaphir*, 'a he-goat' (Dan. viii. 5, 21); שעיר *sair*, 'a hairy one' (Lev. iv. 24); יעל *jaal*, a kind of wild goat (1 Sam. xxiv. 2); אקו *akko*, either the same or another species of wild goat (Exod. xxiii. 19); and גדי *gedi*, 'a kid' (Gen. xxxviii. 17, &c.).

329. [Syrian Goat.]

The races either known to or kept by the Hebrew people were probably—1. The domestic Syrian long-eared breed, with horns rather small and variously bent; the ears longer than the head, and pendulous; hair long, often black;—2. The Angora, or rather Anadoli breed of Asia Minor, with long hair, more or less fine;—3. The Egyptian breed, with small spiral horns, long brown hair, very long ears;—4 A breed from Upper Egypt, without horns, having the nasal bones singularly elevated, the nose contracted, with the lower jaw protruding the incisors, and the female with udder very low and purse-shaped. This race, the most degraded by climate and treatment of all the domestic varieties, is clad in long coarse hair, commonly of a rufous brown colour, and so early distinct, that the earlier monuments of Egypt represent it with obvious precision. It is probable that some of the names which now appear synonymous were anciently applied to distinguish breeds from different regions. Thus Tzaphir, being of Chaldee origin, may have denoted a goat of a northern mountainous region; or may have been the same as Tschäfer, 'the leader of a flock;' while *Azazel*, on the contrary, applied in the Auth. Vers. to the scape-goat, might seem to be derived from the wandering Syrian or Phœnician breed of the coast, were it not shown in the next article to have a different reference.

The natural history of the domestic goat requires no illustration in this place, and its economic uses demand only a few words. Notwithstanding the offensive lasciviousness which causes it to be significantly separated from sheep, the goat was em-

ployed by the people of Israel in many respects as their representative. It was a pure animal for sacrifice (Exod. xii. 5), and a kid might be substituted as equivalent to a lamb: it formed a principal part of the Hebrew flocks; and both the milk and the young kids were daily articles of food. Among the poorer and more sober shepherd families, the slaughter of a kid was a token of hospitality to strangers, or of unusual festivity; and the prohibition, thrice repeated in the Mosaic law, 'not to seethe a kid in its mother's milk' (Exod. xxiii. 19; xxxiv. 26; and Deut. xiv. 21), may have originated partly in a desire to recommend abstemiousness, which the legislators and moralists of the East have since invariably enforced with success, and partly with a view to discountenance a practice which was connected with idolatrous festivals, and the rites they involved. It is from goatskins that the leathern bottles to contain wine and other liquids are made in the Levant. For this purpose, after the head and feet are cut away, the case or hide is drawn off the carcass over the neck, without opening the belly; and the extremities being secured, it is dried with the hair in or outside, according to the use it is intended for. The old worn-out skins are liable to burst: hence the obvious propriety of putting new wine into new bottles (Matt. ix. 17). Harmer appears to have rightly referred the allusion in Amos iii. 12 to the long-eared race of goats: 'As the shepherd taketh out of the mouth of the lion two legs or a piece of ear, so shall the children of Israel be taken out that dwell in Samaria and Damascus.'

330. [Wild Goat of Sinai.]

Beside the domestic goats, Western Asia is possessed of one or more wild species—all large and vigorous mountain animals, resembling the ibex or bouquetin of the Alps. Of these, Southern Syria, Arabia, Sinai, and the borders of the Red Sea, contain at least one species, known to the Arabs by the name of Beden or Beddan, and Taytal—the *Capra Jaela* of Ham. Smith, and *Capra Sinaitica* of Ehrenberg. We take this animal to be that noticed under the name of יעל, Jaal or Jol, in the plural Jolim (1 Sam. xxiv. 2; Job xxxix. 1; Ps. civ. 18; Prov. v. 19). The male is considerably taller and more robust than the larger he-goats, the horns forming regular curves backwards, and with from 15 to 24 transverse elevated cross ridges, being sometimes near three feet long, and exceedingly ponderous: there is a beard under the chin, and the fur is dark brown; but the limbs are white, with regular black marks down the front of the legs, with rings of the same colour above the knees and on the pasterns. The females are smaller than the males, more slenderly made, brighter rufous, and with the white and black markings on the legs not so distinctly visible. This species live in troops of 15 or 20, and plunge down precipices with the same fearless impetuosity which distinguishes the ibex. Their horns are sold by the Arabs for knife handles, &c.; but the animals themselves are fast diminishing in number.

In Deut. xiv. 5, אקו *Akko* is translated 'wild goat.' Schultens (*Origines Hebraicæ*) conjectures that the name arose 'ob fugacitatem,' from its shyness, and consequent readiness to fly; and Dr. Harris points out what he takes to be a confirmation of this conjecture in Shaw's travels; who, from the translations of the Sept. and Vulgate, makes it a goat-deer, or Tragelaphus, such as the Lerwee or Fishtall, by mistake referred to *Capra Mambrica* of Linnæus; whereas that naturalist (*System. Nat.* 13th ed. by Gmelin) places Lerwee among the synonyms of *Ant. Cervicapra*, which does not suit Shaw's notice, and is not known in Western Asia. The Fishtall is, however, a ruminant of the African desert, possibly one of the larger Antilopidæ, with long mane, but not as yet scientifically described. Akko, therefore, if it be not a second name of the Zamor, which we refer to the Kebsch, or wild sheep (Chamois), as the species must be sought among ruminants that were accessible for food to the Hebrews, we should be inclined to view as the name of one of the Gazelles, probably the Ahu (*Ant. Subgutturosa*), unless the Abyssinian Ibex (*Capra Walie*) had formerly extended into Arabia, and it could be shown that it is a distinct species. We may here also remark upon the researches of Rüppell and of Hemprich and Ehrenberg, that they naturally sought in vain for the Abyssinian Ibex as it is figured in Griffiths' Cuvier, because, by some mistake of the letter engraver, he has affixed that name to the representation of Ovis Tragelaphus or Kebsch.—C. H. S.

GOAT, SCAPE. Under this head we cannot do better than present the reader with the substance of a very ingenious article in Hengstenberg's *Die Bücher Mosis und Aegypten*, one of the most interesting books on Egyptian antiquities, as applied to the illustration of Scripture, which has yet appeared, and of which an excellent translation has been produced in America, by R. D. C. Robbins, under the title of *Egypt and the Books of Moses*, 1843.

It appears to Dr. Hengstenberg, that an Egyptian reference must necessarily be acknowledged in the ceremony of the Great Atonement day: and in order to establish this reference, he first endeavours to substantiate his view of the meaning of the word עזאזל *Azazel:* which is, that it designates Satan. But this notion can only be placed in a right point of view by taking a general survey of the whole rite, in order to point out definitely the position which Azazel holds in it.

The account of this remarkable ceremony is contained in Lev. xvi.

First, in verses 1-10, the general outlines are given; and then follows, in verses 11, sq., the explanation of separate points. It is of no small

importance for the interpretation that this arrangement, which has been recognised by few interpreters, should be clearly understood. Aaron first offers a bullock as a sin-offering for himself and his house. He then takes a firepan full of coals from the altar, with fragrant incense, and goes within the vail. There he puts the incense on the fire before the Lord, and 'the cloud of the incense' (the embodied prayer) covers the mercy-seat which is upon the ark of the covenant, that he die not. Aaron then takes the blood of the bullock and sprinkles it seven times before the mercy-seat. After he has thus completed the expiation for himself, he proceeds to the expiation for the people. He takes two he-goats for a sin-offering for the children of Israel (xvi. 5). These he places before the Lord at the door of the tabernacle (xvi. 7). He casts lots upon them; one lot 'for the Lord' and one lot 'for Azazel' (xvi. 8). The goat upon which the lot for the Lord fell (xvi. 9) he offers for a sin-offering, brings the blood within the vail, and does with it as with the blood of the bullock. In this way is the sanctuary purified from the defilements of the children of Israel, their transgressions, and all their sins, so that the Lord, the holy one and pure, can continue to dwell there with them. After the expiation is completed, the second goat, on which fell the lot for Azazel, is brought forward (xvi. 10). He is first placed before the Lord to absolve him (לכפר עליו). Then Aaron lays his hands upon his head, and confesses over him the (forgiven) iniquities, transgressions, and sins of the children of Israel, puts them upon his head, and gives him to a man to take away, in order that he may bear the sins of the people into a solitary land (xvi. 22), into the desert, for Azazel (xvi. 10). Then Aaron offers a burnt-offering for himself, and one for the people.

Now, in respect to language, there can be no objection to interpreting Azazel as meaning Satan. That the Hebrew עזל, *Azal*, corresponds to the Arabic عزل, was long ago asserted by Bochart and others, and is now generally admitted; and עזאזל, *Azazel*, belongs to the form which repeats the second and third radicals. In reference to this form, Ewald remarks (*Gramm.* § 333), that it expresses general intension, and that the idea of continual, regular repetition, without interruption, is also specially expressed by the repetition of nearly the whole word. The Arabic word *Azala* signifies in that language 'semovit, dimovit, removit, descivit;' in the passive it signifies 'remotus, depositus fuit;' and the participle, *azul*, means 'a cæteris se sejungens.' In like manner *azal*, *mazul*, denote 'semotus, remotus, abdicatus.' From this two explanations of Azazel, as relating to Satan, may be educed; either 'the apostate' (from God), or, 'the one entirely separate.' It is in favour of the latter that the signification 'descivit' is only a derived one, and that it is appropriate to the abode in the desert. The goat is sent to Azazel in the desert, in the divided land ('terra abscissa'). How then could he be designated by a more appropriate name than 'the separate one'?

And this explanation, as far as the facts of the case are concerned, is, in Hengstenberg's opinion, equally unexposed to any well grounded objection. The doctrinal signification of the symbolical action, as far as it has reference to Azazel, is this, that Satan, the enemy of the people of God, cannot harm those forgiven by God, but that they, with sins forgiven of God, can go before him with a light heart, deride him, and triumph over him.

The positive reasons which favour this explanation are the following:—

1. The manner in which the phrase לעזאזל, 'for Azazel,' is contrasted with ליהוה, 'for Jehovah,' necessarily requires that Azazel should denote a personal existence, and, if so, only Satan can be intended. 2. If by Azazel, Satan is not meant, there is no ground for the lots that were cast. We can then see no reason why the decision was referred to God; why the high-priest did not simply assign one goat for a sin-offering, and the other for sending away into the desert. The circumstance that lots are cast implies that Jehovah is made the antagonist of a personal existence, with respect to which it is designed to exalt the unlimited power of Jehovah, and to exclude all equality of this being with Jehovah. 3. Azazel, as a word of comparatively unfrequent formation, and only used here, is best fitted for the designation of Satan. In every other explanation the question remains, 'Why, then (as it has every appearance of being), is the word formed for this occasion, and why is it never found except here?'

By this explanation the third chapter of Zechariah comes into a relation with our passage, entirely like that in which chap. iv. of the same prophecy stands to Exod. xxv. 31. Here, as there, the Lord, Satan, and the high-priest appear. Satan wishes by his accusations to destroy the favourable relations between the Lord and his people. The high-priest presents himself before the Lord, not with a claim of purity, according to law, but laden with his own sins and the sins of his people. Here Satan thinks to find the safest occasion for his attacks; but he is mistaken. Forgiveness baffles his designs, and he is compelled to retire in confusion. It is evident that the doctrinal part of both passages is substantially the same, and that the one in Zechariah may be considered the oldest commentary extant upon the words of Moses. In substance we have the same doctrine also in Rev. xii. 10, 11: 'the accuser of our brethren is cast down,—who accuses them before our God day and night, and they overcame him by the blood of the Lamb.'

The relation in which, according to this explanation, Satan is here placed to the desert, finds analogy in other passages of the Bible, where the deserted and waste places appear as peculiarly the abode of the Evil Spirit. See Matt. xii. 43, where the unclean spirit cast out of the man is represented as going through 'dry places': also Luke viii. 27; and Rev. xviii. 2, according to which the fallen Babylon is to be the dwelling of all unclean spirits.

To the reasons already given, the Egyptian reference, which the rite bears according to this explanation, may be added—'a reference so remarkable, that no room is left for the thought that it has arisen through false explanation.'

Dr. Hengstenberg then proceeds to meet the objections which have been brought to bear against the view adopted by him—'adopted,' for this explanation is by no means a new one, though he

has brought it forward in greater force than before, and with new illustrations.

The most important of the objections, and the one which has exerted the greatest influence, is this, that it gives a sense which stands in direct opposition to the spirit of the religion of Jehovah. It is asked, 'Could an offering properly be made to the Evil Spirit in the desert, which the common precepts of religion in the Mosaic law, as well as the significance of the ceremony, entirely oppose?' To this Hengstenberg answers—'Were it really necessary to connect with the explanation of Azazel as meaning Satan, the assumption that sacrifice was offered to him, we should feel obliged to abandon it, notwithstanding all the reasons in its favour. But nothing is easier than to show that this manner of understanding the explanation is entirely arbitrary. The following reasons prove that an offering made to Azazel cannot be supposed:'—

1. Both the goats are, in verse 5, taken together as forming unitedly one single offering, which wholly excludes the thought that one of them was brought as an offering to Jehovah, and the other to Azazel. And further, an offering which is made to a bad being can never be a sin-offering. The idea of a sin-offering implies holiness, hatred of sin in the being to whom the offering is made.

2. Both the goats were first placed at the door of the tabernacle of the congregation before the Lord. To him, therefore, they both belong; and when afterwards one of them is sent to Azazel, this is done in accordance with the wish of Jehovah, and also without destroying the original relation, since the one sent to Azazel does not cease to belong to the Lord.

3. The casting of lots also shows that both these goats were considered as belonging to the Lord. The lot is never used in the Old Testament except as a means of obtaining the decision of Jehovah. So then, here also, Jehovah decides which of the goats is to be offered as a sin-offering, and which to be offered to Azazel.

4. The goat assigned to Azazel, before he is sent away, is absolved (xvi. 21). The act by which the second goat is, as it were, identified with the first, in order to transfer to the living the nature which the dead possessed, shows to what the phrase 'for a sin-offering,' in verse 5, has reference. The two goats (as Spencer had before observed) became, as it were, one goat, and their duality rests only on the physical impossibility of making one goat represent the different points to be exhibited. Had it been possible, in the circumstances, to restore life to the goat that was sacrificed, this would have been done. The two goats, in this connection, stand in a relation entirely similar to that of the two birds in the purification of the leprous person in Lev. i. 4, of which the one let go was dipped in the blood of the one slain. As soon as the second goat is considered an offering to Azazel, the connection between it and the first ceases, and it cannot be conceived why it was absolved before it went away.

5. According to verse 21, the already forgiven sins of Israel are laid upon the head of the goat. These he bears to Azazel in the desert. But where there is already forgiveness of sin, there is no more offering.

The other objections which have on different principles been made to this view are of less weight.

One of them, which alleges the apparent equality given under this explanation to the claims of Jehovah and of Satan, is answered by showing that it is rather calculated to act against the tendency of an ancient people to entertain that belief. The lot is under the direction of Jehovah, and is a means of ascertaining his will; and not a mediation between the two by an independent third agency, which decides to which the one and to which the other shall fall.

Another objection, founded on the belief that Satan nowhere appears in the Pentateuch, will not in this country be deemed to require much answer. It is entertained chiefly by those who believe that the presence of Satan in Scripture is owing to the influence of a foreign (Babylonian and Persian) theology upon Hebrew opinions; and it is answered by a reference to the book of Job, in which Satan appears distinctly, while even the objectors admit that this book was written long before the assigned influence existed. And if it were indeed necessary to refer the knowledge of Satan to a foreign influence, it might be perceived that quite as much is accomplished by referring to the Egyptian Typhon as to the Persian Ahreman. Hengstenberg also points to the intimations of the doctrine of Satan, which appear in Gen. iii., and remarks—'From a theological point of view, as well as from the nature of the case, it will be found almost impossible that a dogma which in the later period of the revelation holds so important a place, should not at least be referred to in the statement of the first principles of that revelation.

After exhibiting the positive reasons for this explanation, and disposing of the objections to it, Hengstenberg subjects to examination those among the various explanations that have been given, which are now current; and makes out that they are either philologically untenable with reference to the word Azazel, do not agree with the context, or are unsatisfactory in the result to which they conduct us.

If it has been thus established that Satan is to be understood by the term Azazel, then, argues Hengstenberg, an allusion to Egypt in the whole rite cannot be mistaken. In that country every bad influence or power of nature, and generally the bad itself, in a physical or ethical respect, was personified under the name of Typhon. The doctrine of a Typhon among the Egyptians is as old as it is firmly established. Representations of him are found on numerous monuments as old as the time of the Pharaohs. Herodotus speaks of Typhon (ii. 144. 56, and iii. 5). But Plutarch gives the most accurate and particular account, with, indeed, many incorrect additions.

The barren regions around Egypt generally belonged to Typhon. The desert was especially assigned to him as his residence, whence he made his wasting inroads into the consecrated land. 'He is,' says Creuzer, 'the lover of the degenerate Nephthys, the hostile Libyan desert, and of the sea-shore. There is the kingdom of Typhon. On the contrary, Egypt the blessed, the Nile-valley glittering with fresh crops, is the land of Isis.' Herodotus ascribes a similar dwelling to Typhon.

By a strange but very natural alteration, the Egyptians sought sometimes to propitiate the god

whom they hated, but feared, by offerings, and indeed by those which consisted of sacred animals. Sometimes, again, when they supposed that the power of the gods was prevalent and sustained them against him, they allowed themselves in every species of mockery and abuse. 'The obscured and broken power of Typhon,' says Plutarch, 'even now, in the convulsions of death, they seek sometimes to propitiate by offerings, and endeavour to persuade him to favour them; but at other times, on certain festival occasions, they scoff at and insult him. Then they cast mud at those who are of a red complexion, and throw down an ass from a precipice, as the Coptites do, because they suppose that Typhon was of the colour of the fox and the ass.'

The most important passage on the worship of Typhon is found in *De Is. et Osir.* p. 380: 'But when a great and troublesome heat prevails, which in excess either brings along with it destructive sickness or other strange or extraordinary misfortunes, the priests take some of the sacred animals, in profound silence, to a dark place. There they threaten them first and terrify them; and when the calamity continues, they offer these animals in sacrifice there.'

Now, the supposition of a reference to these *Typhonia sacra* Hilsius considers as a profanation. But it is seen at once that the reference contended for by him is materially different from that adopted by our author. The latter is a controversial one. In opposition to the Egyptian view, which implied the necessity of yielding respect even to bad beings generally, if men would insure themselves against them, it was intended by this rite to bring Israel to the deepest consciousness that all trouble is the punishment of a just and holy God, whom they, through their sins, have offended; that they must reconcile themselves only with him; that when that is done, and the forgiveness of sins is obtained, the bad being can harm no farther.

How very natural and how entirely in accordance with circumstances such a reference was, is evident from the facts contained in other passages of the Pentateuch, which show how severe a contest the religious principles of the Israelites had to undergo with the religious notions imbibed in Egypt. This is especially exhibited in the regulations in Leviticus xvii., following directly upon the law concerning the atonement-day, which prove that the Egyptian idol-worship yet continued to be practised among the Israelites. The same thing is also evident from the occurrences connected with the worship of the golden calf.

The assumption of a reference so specially controversial might indeed be supposed unnecessary, since in a religion, which teaches generally the existence of a powerful bad being, the error here combated, the belief that this being possesses other than derived power, will naturally arise in those who have not found the right solution of the riddle of human life in the deeper knowledge of human sinfulness.

But yet the whole rite has too direct a reference to a prescribed practice of propitiating the bad being, and implies that formal offerings were made to him—a thing which could never be the natural product of Israelitish soil, and could scarcely spring up there, since such an embodying of error contradicts fundamental principles among the Israelites respecting the being of Jehovah, which, indeed, allows the existence of no other power with itself.

And, finally, there exists here a peculiar trait, which in Hengstenberg's opinion makes it certain that there is an Egyptian reference, namely, the circumstance that the goat was sent to Azazel into the desert. The special residence of Typhon was in the desert, according to the Egyptian doctrine, which is most intimately connected with the natural condition of the country. There, accordingly, is Azazel placed in our passage, not in the belief that this was literally true, but merely symbolically.

Such is the view taken by Professor Hengstenberg, and which we have endeavoured with all possible conciseness to place before the reader. Those who desire to contemplate the subject in different points of view will do well to consult the valuable dissertation in Professor Bush's *Notes on Leviticus* xvi., and previously published by him in the *American Biblical Repository* for July, 1842. Professor Bush takes notice of the opinion that Azazel was Satan: he shows that the Septuagint makes Azazel a person, and that the early Christian church, and most of the Jewish writers, regarded him as Satan. The professor is, however, not of this opinion; but he had not the advantage of having seen it as reproduced in the new and strong lights thrown upon it by Hengstenberg, whose vast erudition and soundness of theological opinion give great weight to any conclusion which his judgment approves. The subject is one of the most curious and interesting in Biblical literature; but it is also one on which it seems scarcely possible to realize an implicit conviction: and the present writer, in reporting the views of another, must admit that he, for himself, has not been able to do so.

GOD. The two principal Hebrew names of the Supreme Being (St. Jerome and the Rabbins enumerate ten, but they belong rather to his attributes) used in the Scriptures are יהוה *Jehovah*, and אלהים *Elohim*. Dr. Hävernick, in his erudite work, *Historisch-critische Einleitung ins alte Testament*, Berlin, 1839, proposes the reading יַהְוֶה *Jahveh* instead of יְהוָֹה *Jehovah*, meaning 'the *Existing One*,' while he derives אלהים *Elohim*, from an ancient Hebrew root, now lost, אלה *coluit*, and thinks that the plural is used merely to indicate the abundance and super-richness contained in the Divine Being. With him, therefore, *Jehovah* is not of the same origin as the heathen *Jove*, but of a strictly peculiar and Hebrew origin. Both names, he admirably proves, are used by Moses discriminately, in strict conformity with the theological idea he wished to express in the immediate context; and, pursuing the Pentateuch nearly line by line, it is astonishing to see that Moses never uses any of the names at mere random or arbitrarily, but is throughout consistent in the application of the respective terms. *Elohim* is the abstract expression for absolute *Deity* apart from the special notions of unity, holiness, substance, &c. It is more a philosophical than devotional term, and corresponds with our term *Deity*, in the same way as *state* or *government* is abstractedly expressive of a king or monarch. *Jehovah*, however, he considers to be the revealed Elohim, the Manifest, Only, Per-

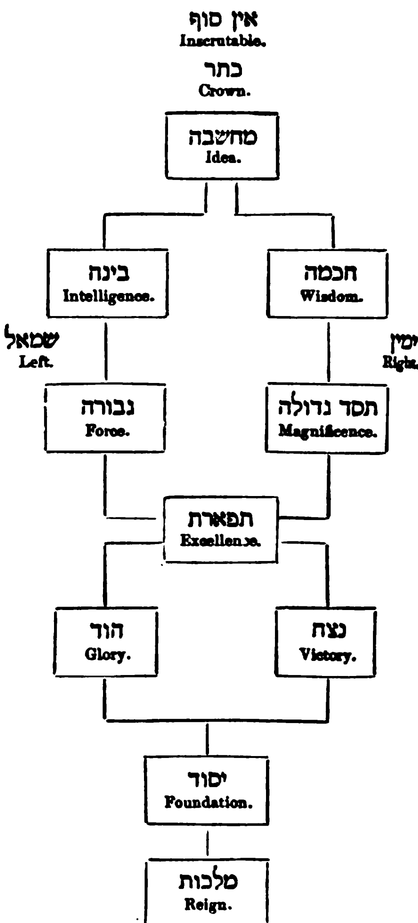
sonal, and Holy Elohim: Elohim is the Creator, Jehovah the Redeemer, &c.

To Elohim, in the later writers, we usually find affixed the adjective חיים *chayim* 'the living' (Jer. x. 10; Dan. vi. 20, 26; Acts xiv. 15; 2 Cor. vi. 16), probably in contradistinction to *idols*, which might be confounded in some cases with the true God, the linguistical difference in the Hebrew existing only in the plural, the former being called אלילים *Elilim* instead of *Elohim* (Lev. xix. 14; xxvi. 1; Hab. ii. 18).

The attributes ascribed to God by Moses are systematically enumerated in Exod. xxxiv. 6-7, though we find in isolated passages in the Pentateuch and elsewhere, additional properties specified, which bear more directly upon the dogmas and principles of religion, such as *e. g.* that he is not the author of sin (Gen. i. 31), although since the fall, man is born prone to sin (Gen. vi. 5; viii. 21, &c). But as it was the avowed design of Moses to teach the Jews the Unity of God in opposition to the Polytheism of the other nations with whom they were to come in contact, he dwelt particularly and most prominently on that point, which he hardly ever omitted when he had an opportunity of bringing forward the attributes of God (Deut. vi. 4; x. 17; iv. 39; ix. 16, &c.; Num. xvi. xxii; xxxiii. 19, &c.; Exod. xv. 11; xxxiv. 6, 7, &c.).

In the Prophets and other sacred writers of the Old Testament, these attributes are still more fully developed and explained by the declarations that God is the first and the last (Is. xliv. 6), that He changes not (Hab. iii. 6), that the earth and heaven shall perish, but He shall endure (Ps. cii. 26)—a distinct allusion to the last doomsday—and that He is Omnipresent (Prov. xv. 3; Job xxxiv. 22, &c.).

In the New Testament also we find the attributes of God systematically classified (Rev. v. 12 and vii. 12), while the peculiar tenets of Christianity embrace, if not a farther, still a more developed idea, as presented by the Apostles and the primitive teachers of the church (comp. Semisch's Justin Martyr, vol. ii. p. 151, sq., translated by J. E. Ryland, 1843).



The expression 'to see God' (Job xix. 26; xlii. 5; Isa. xxxviii. 11) sometimes signifies merely to experience his help; but in the Old Testament Scriptures it more usually denotes the approach of death (Gen. xxxii. 30; Judg. vi. 23; xiii. 22; Isa. vi. 5).

The term בן אלהים, 'son of God,' applies to Kings (Ps. ii. 7; lxxxii. 6, 27). The usual notion of the ancients, that the royal dignity was derived from God, may here be traced to its source: hence the Homeric διογένης βάσιλευς. This notion, entertained by the Oriental nations with regard to kings, made the latter style themselves *Gods* (Ps. lxxxii. 6).

בני אלהים, 'sons of God,' in the plural, implies inferior gods, angels (Gen. vi. 2; Job i. 6); as also faithful adherents, worshippers of God (Deut. xiv. 1; Ps. lxxiii. 15; Prov. xiv. 26).

איש אלהים, 'man of God,' is sometimes applied to an angel (Judg. xiii. 6, 8); as also to a prophet (1 Sam. ii. 27; ix. 6; 1 Kings xiii. 1).

When, in the middle ages, scholastic theology began to speculate on the divine attributes, as the basis of systematic and dogmatic Christianity, the Jews, it appears, did not wish to remain behind on that head, and collecting a few passages from the Old Testament, and more especially from Isa. xi. 2, and Chron. xxix. 11, where the divine attributes are more amply developed and enumerated, they strung them together in a sort of cabbalistic tree, but in reality representing a human figure.

These attributes they call ספירות *Sephiroth* (numbered ones), and divide them into three upper (crown, wisdom, and intelligence) and seven lower. The first constitute the being of God, and the latter merely his virtues. Only the first three are called *intellects*, but not *attributes* (*Cabbala Denudata*).

Instead of giving the term *Sephiroth* an Hebrew derivation, from ספר *sophar*, 'to count,' 'number,' we would rather incline to assign it a Greek etymology, from σφαῖρα, *globe*, *circle*, this Sephiroth-system representing among the cabbalists the planetary system of ten spheres. The plural termination in ות it has in common with many similar words adopted by the Rabbins from the Greek; such as הדיוטות, from ἰδιώτης

אפוטרופסים from ἐπίτροπος, נימוסין from νομός, &c.—E. M.

GOEL. [Blood-revenge.]

GOG (גוֹג) occurs Ezek. xxxviii. 3, 14, and xxxix. 11, as a proper name; that of a prince of *Magog* (מגוג), a people that were to come from the North to invade the land of Israel, and be there defeated. In a different sense, but corresponding with the assertions of other Oriental authors, in whose traditions this people occupy an important place, *Gog* occurs in Rev. xx. 8, as the name of a country.

Interpreters have given very different explanations of the terms Gog and Magog; but they have generally understood them as symbolical expressions for the heathen nations of Asia, or more particularly for the Scythians, a vague knowledge of whom seems to have reached the Jews in Palestine about that period. Thus Josephus (*Antiq.* i. 6. 3) has dropped the Hebrew word *Magog*, and rendered it by Σκύθαι: and so does Jerome, while Suidas renders it by Πέρσαι—a difference that matters but little in the main question, since Σκύθαι, in the ancient authors, is but a collective name for the northern but partially-known tribes (Cellar, *Notit.* ii. 753, sq.); and, indeed, as such a collective name, *Magog* seems also to indicate in the Hebrew the tribes about the Caucasian mountains (comp. Jerome on Ezek. *ibid.*). Bochart (*Phal.* iii. 13) supports the opinion of Josephus, though by but very precarious etymologies. According to Reinegge (*Descrip. of the Caucasus*, ii. 79) some of the Caucasian people call their mountains *Gog*, and the highest northern points *Magog*. The Arabians are of opinion that the descendants of Gog and Magog inhabit the northern parts of Asia, beyond the Tartars and Sclavonians, and they put ياجوج وماجوج always in conjunction, thereby indicating the extreme points of north and north-east of Asia (Bayer, in *Comment. Acad. Petrop.* i.; D'Herbelot, *Bibl. Orient.* p. 528). Nor are there wanting interpreters who understand by the Gog of Revelations the anti-Christ, and by the Gog of Ezekiel the Goths, who invaded the Roman empire in the 5th century of the Christian era.—E. M.

GOLAN (גּוֹלָן; Sept. Γαύλων) or Gaulon, a Levitical town of Bashan, in the tribe of Manasseh (Deut. iv. 43; Josh. xx. 8; xxi. 27; 1 Chron. vi. 71), from which the small province of Gaulonitis (Γαυλωνῖτις) took its name. The word is recognised in the present Jolan or Djolan, mentioned by Burckhardt (*Syria*, p. 286), as giving name to a district lying east of the lake of Tiberias, and composed of the ancient Gaulonitis, with part of Bashan and Argob. It is indeed clear, that the Gaulonitis of the later Jewish history must have included part of the more ancient Bashan, if Golan gave name to the province, seeing that Golan was certainly in Bashan. Some difficulty has been suggested as arising from the fact, that the Judas whom Josephus (*Antiq.* xviii. 1. 1) calls a Gaulonite, is called by St. Luke (Acts v. 37) a Galilæan. This is the more remarkable, as Josephus elsewhere (ex. gr. *De Bell. Jud.* ii. 20. 4) carefully distinguishes Galilee and Gaulonitis. Yet he himself elsewhere calls this very Judas a Galilæan (*Antiq.* xviii. 1. 6; xx. 5. 2; *De Bell. Jud.* ii. 9. 1). It is, from this, probable that Judas had a double cognomen, perhaps because he had been born in Gaulonitis, but had been brought up or dwelt in Galilee; as Apollonius, although an Egyptian, yet was, from his place of residence, called Rhodius (see Kuinoel, in *Act.* v. 37).

GOLD. The Hebrew word זהב (*zahab*) is merely the mineralogical name of this metal, while the various kinds, in a purified state, are called פז, כתם, חרוץ, &c.

Gold was known and valued in very early times. Abraham was rich in gold (Gen. xiii. 2; xxiv. 35); and female ornaments were made of gold (Gen. xxiv. 22).

To judge from 1 Chron. xxii. 14; xxix. 4, the Jews must have been, in their palmy days, in possession of enormous quantities of this metal, considering the many tons of gold that were spent in the building of the temple alone, though the expression, *plenteous as stones* (2 Chron. i. 15), may be considered as hyperbolical. It is, however, confirmed by the history of the other Asiatic nations, and more especially of the Persians, that the period referred to really abounded in gold, which was imported in vast masses from Africa and the Indies (Heeren, *Ideen*, i. 1. 37, sq.). The queen of Sheba brought with her (from Arabia Felix), among other presents, 120 talents of gold (2 Chron. ix. 9). The technical name of *goldsmiths* (צרפים *zorphim*) occurs for the first time in Judg. xvii. 4; and that of the *crucible* (מצרף *mazreph*) in Prov. xvii. 3. Both names are derived from the verb צרף *zoraph, to purify* (metal).—E. M.

GOLGOTHA (in Greek letters Γολγοθᾶ; in Aramæan גָּלְגָּלְתָּא). The original word signifies 'a skull,' as does its Latin representative, *Calvaria, Calvary*. Different opinions have prevailed as to why the place was so termed. Old fables assign as the reason, that Adam was interred at Golgotha, in order that where he lay who had effected the ruin of mankind, there also might the Saviour of the world suffer, die, and be buried (Reland, *Palæst.* p. 860). Many have held that Golgotha was the place of public execution, the Tyburn of Jerusalem; and that hence it was termed the 'place of a skull.' Another opinion is that the place took its name from its shape, being a hillock of a form like a human skull. The last is the opinion to which the writer of these remarks inclines. That the place was of some such shape seems to be generally agreed, and the traditional term *mount*, applied to Calvary, appears to confirm this idea. And such a shape, it must be allowed, is in entire agreement with the name—that is, 'skull.' To these considerations there are added certain difficulties which arise from the second explanation. So far as we know there is no historical evidence to show that there was a place of public execution where Golgotha is commonly fixed, nor that any such place, in or near Jerusalem, bore the name Golgotha. Nor is the term Golgotha descriptive of such a place; to make it so, to any extent, the name should have been 'skulls,' or 'the place of skulls.' Equally unapt is the manner in which the writers of the Gospels speak of the place: Matthew calls it 'a place called Golgotha; that is to say, a place of a skull;' Mark, 'the place Golgotha; which is,

being interpreted, the place of a skull;' Luke, 'the place which is called Calvary;' John, 'a place called of a skull, which is called in the Hebrew Golgotha.' Now, no one of these descriptions is what would have been natural had Golgotha been a place or the place of public execution. An English writer would say, 'they took the criminal to Tyburn and executed him.' In the same manner would the biographers of Jesus have spoken—'they took him to Golgotha;' in such a case there was no need of explanations; what and where Golgotha was every person would have known. In truth, the context seems to show that the Roman guard hurried Jesus away and put him to death at the first convenient spot; and that the rather because there was no small fear of a popular insurrection, especially as he was attended by a crowd of people. But where was the place? Not far, we may suppose from what has been said, from the judgment-hall, which was doubtless near the spot (Fort Antonia), where the Roman forces in Jerusalem were concentrated. From our plan of Jerusalem it will be seen that Fort Antonia lay on the north-west angle of the temple. Was it likely, then, that in the highly excited state of the public mind the soldiers should take Jesus southward; that is, through the whole breadth of the city? Somewhere in the north, it is clear, they would execute him, as thus they would most easily effect their object. But if they chose the north, then the road to Joppa or Damascus would be most convenient; and no spot in the vicinity would probably be so suitable as the slight rounded elevation which bore the name of Calvary. That some hillock would be preferred, it is easy to see, as thus the exposure of the criminal and the alleged cause of his crucifixion would be most effectually secured. But the particulars detailed by the sacred historians show that our Lord was not crucified on the spot, or very near the spot, where he was condemned, but was conducted some distance through the city. If so, this, as appears from our plan, must have been towards the west. Two points seem thus determined: the crucifixion was at the *north-west* of the city.

The account, as given in the Evangelists, touching the place of the crucifixion and burial of our Lord, is as follows:—Having been delivered by Pilate to be crucified, Jesus was led away, followed by a great company of people and women, who bewailed his fate. On the way the soldiers met one Simon, a Cyrenian, *coming out of the country*, who is compelled to bear Jesus' cross. When they were come to the place which is called Calvary, there they crucified him. This place was nigh to the city: and, sitting down, they watched him there. They that passed by reviled him, wagging their heads and scoffing. Likewise also the chief priests mocked him, with the scribes and elders; and the people stood beholding. The soldiers too mocked him. There stood by the cross of Jesus his mother, and his mother's sister, and Mary Magdalene. And all his acquaintance and the women that followed him from Galilee stood afar off, beholding these things. *In the place where he was crucified* there was a garden, and in the garden a new sepulchre, hewn out in the rock; *there* laid they Jesus, and rolled a great stone to the door of the sepulchre. The writer of the epistle to the Hebrews adds, that Jesus suffered *without the gate*, subjoining, 'let us, therefore, go forth to him without the camp (or the city) bearing his reproach' (Heb. xiii. 12, 13; Matt. xxvii.; Mark xv; Luke xxiii.; John xix.).

We thus learn, as a positive fact, that the crucifixion and burial took place out of the city, and yet nigh to the city; and the statement of the writer to the Hebrews is confirmed by the incidental remark (Mark xv. 21), that the soldiers seized Simon, as he was 'coming out of the country.' It now appears, then, that Calvary lay at the north-west, and at the outside, of the city. The reader, on perusing the abstract just given of the evangelical narrators, combined with previous remarks, will find reason to think that Calvary was only just on the outer side of the second wall. It is also clear that the place was one around which many persons could assemble, near which wayfarers were passing, and the sufferers in which could be seen or addressed by persons who were both near and remote: all which concurs in showing that the spot was one of some elevation, and equally proves that 'this thing was not done in a corner,' but at a place and under circumstances likely to make Calvary well known and well remembered alike by the foes and the friends of our Lord. Other events which took place immediately after, in connection with the resurrection, would aid (if aid were needed) in fixing the recollection of the spot deep and ineffaceably in the minds of the primitive disciples.

Was it likely that this recollection would perish? Surely of all spots Calvary would become the most sacred, the most endearing, in the primitive church. The spot where Jesus was crucified, died, was buried, and rose again, must have been bound to the heart of every disciple in the strongest and most grateful bonds. We do not need history to tell us this; or, rather, there is a history—the history of man, of what human nature is, and feels, and loves—which declares the fact to every intelligent mind. Nor did the Jew, with his warm gushing affections, feel on such a point less vividly than his fellow men. 'The tombs of the prophets,' 'the sepulchre of David,' were, we read (Matt. xxiii. 29; Acts ii. 29), reverentially regarded, and religiously preserved from age to age. That of 'David's Lord' would assuredly not be neglected. It was a season of public religious festivity when our Lord suffered. Jerusalem was then crowded with visiters from foreign parts. Such too was the fact at the time of the effusion of the Holy Spirit. These pilgrims, however, soon returned home, and wherever they went many carried with them the news of the crucifixion of Jesus, and told of the place where he had been executed. When these had reached their homes they became, under Providential influences and the preaching of Apostles, in each case, a nucleus of an infant church, which would naturally preserve embedded in its heart the knowledge of Calvary. Perhaps no one spot on earth had ever so many to remember it and know its precise locality, as the place where Jesus died and rose again. First in Jerusalem, and soon in all parts of the earth, were there hearts that held the recollection among their most valued treasures.

We do not think these remarks need confirmation; but the passage in the Hebrews shows that

they are substantially correct. We there learn that far on in the first century Calvary was well known in the church; that the tradition was preserved, and preserved in so living a form as to be made the subject of a figurative illustration of Christian doctrine. The memory of distinguished places is among the least perishable of earthly things. Thermopylæ and Runnymede are yet, and will ever be, known. With how much more reason Calvary! At the first there were not only in Jerusalem and Palestine, but in all parts of the earth, bosoms which had found for it a shrine. Fathers would convey their knowledge and their impressions to sons; one generation and one church to another. The passage in the Hebrews would tend to keep alive the recollection. And thus from age to age there would be a regular transmission of the essential facts of the case, till at length the tradition became fixed in history, and a splendid edifice was raised in perpetual commemoration of the great events which rendered Golgotha the most remarkable spot on the wide earth. Before, however, we speak more of this edifice and this record, we must add that heathenism lent an aid to the Christian tradition. It was the fate of Jerusalem, after its capture by the Romans, to become a heathen city; even its name was changed into Colonia Ælia Capitolina. In the excess of their triumphant joy, the conquerors made Jupiter its patron God, and erected statues of Jupiter and Venus on the place where Jesus had been crucified (Sozomen, xi. 1). This was done not so much to insult as to conciliate. New-comers in religion have always availed themselves of established feelings, and therefore erected their sacred edifices on places already consecrated in the minds of the people. So was it when Christianity was planted in Great Britain. Many of our old churches stand on spots where stood before idolatrous temples. Such was the policy of the Romans. The mere fact of a temple to Venus standing on Calvary suffices to show that Calvary was the place where Jesus suffered. The temple thus takes up the tradition and transmits it in stone and marble to coming ages. This continuation of the tradition is the more important because it begins to operate at a time when the Christians were driven from Jerusalem. But the absence of the Christians from the holy city was not of long duration, and even early in the third century we find pilgrimages from distant places to the Holy Land had already begun, for the express purpose of viewing the spots which the presence and sufferings of the Saviour had rendered sacred and memorable (*Hist. Hierosol.* p. 591; Euseb. *Hist. Eccles.* vi. 11). A century later, Eusebius (A.D. 315) informs us that Christians visited Jerusalem from all regions of the earth for the same object. So early and so decided a current towards the holy city presupposes a strong, wide-spread, and long pre-eminent feeling—an established tradition in the church touching the most remarkable spots; a tradition of that nature which readily links itself with the actual record in Hebrews.

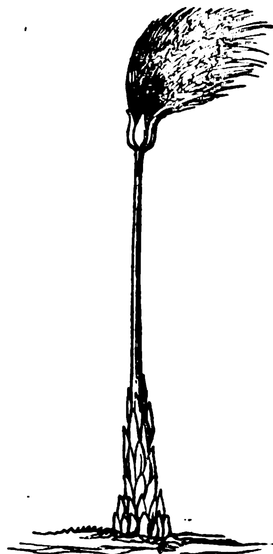
Early in the fourth century Eusebius and Jerome write down the tradition and fix the locality of Calvary in their writings. Eusebius was born at Cæsarea, in Palestine, about A.D. 270. In 315 he became a bishop in his native country, and died in 340. He was a most learned man, and wrote a history of the Christian church. About 330 he composed his *Onomasticon*, which was expressly devoted to the business of determining and recording the sites of holy and other places in Palestine. This work of Eusebius, written in Greek, Jerome afterwards translated into Latin, and thus added his authority to that of Eusebius. Jerome took up his residence in the Holy Land in the latter part of the fourth century, and remained there till his death (for an estimate of the value of these geographical authorities see Reland, *Palæst.* p. 467, sq.). Pilgrims now streamed to Jerusalem from all parts of the world, and that site was fixed for Golgotha which has remained to the present hour.

This was done not merely by the testimony of these two learned fathers, but by the acts of the Emperor Constantine and his mother Helena. This empress, when very far advanced in life, visited Jerusalem for the express purpose of erecting a church on the spot where the Lord Jesus had been crucified. The preceding details show that the preservation of the memory of the locality was anything but impossible. Helena would naturally be solicitous to discover the true spot: whence ensues the likelihood that she was not mistaken. She had previously heard that the holy places had been heaped up and concealed by the heathen, and resolved to attempt to bring them to light, εἰς φῶς ἀγαγεῖν (Theoph. in *Chron.* p. 18; quoted in Reland, *Palæst.* under 'Golgotha') 'On her arrival at Jerusalem she inquired diligently of the inhabitants. Yet the search was uncertain and difficult, in consequence of the obstructions by which the heathen had sought to render the spot unknown. These being all removed, the sacred sepulchre was discovered, and by its side three crosses, with the tablet bearing the inscription written by Pilate' (Robinson, *Bibl. Res.* ii. 14; Theodoret, i. 17). This account of her proceedings taken from one who labours to bring into discredit the whole of Helena's proceedings, and who is far too indiscriminate and sweeping in his hostility to the *primitive* traditions of the church, shows sufficiently that Helena was cautious in her proceedings, that there did exist a tradition on the subject, that by that tradition the empress was guided, and that she found reason to fix the site of Calvary on the spot where the heathen had erected their temple and set up their profane rites. That no small portion of the marvellous, not to say legendary and incredible, is mixed up in the accounts which the ecclesiastical historians have given, we by no means deny; but we see no reason whatever, and we think such a course very unphilosophical, to throw doubt unsparingly over the whole, as (by no means in the best taste) does Dr. Robinson. However, on the site thus ascertained, was erected, whether by Constantine or Helena, certainly by Roman influence and treasure, a splendid and extensive Christian temple. Socrates (*Eccles. Hist.* i. 17) says, 'the emperor's mother erected over the place where the sepulchre was a most magnificent church, and called it new Jerusalem, building *it opposite to that old* deserted Jerusalem.' This church was completed and dedicated A.D. 335. It was a great occasion for the Christian world. In order to give it importance and add to its splendour, a council of bishops was convened, by order of the emperor, from all the provinces of the empire, which as-

sembled first at Tyre, and then at Jerusalem. Among them was Eusebius, who took part in the solemnities, and held several public discourses in the holy city (Euseb. *Vit. Const.*; Robinson, ii. 13). The reader's attention is directed to the words above cited from Socrates, by which it appears that the church was built not in the old city, but opposite to it (ἀντιπρόσωπον). In this description Socrates is borne out by Eusebius (*Vit. Const.* iii. 33). A reference to the plan will show that such an account of its site corresponds with the locality on which the crucifixion and interment took place. The church of the holy sepulchre was burnt by the Persians in A.D. 614. It was shortly after rebuilt by Modestus with resources supplied by John Eleemor, patriarch of Alexandria. The Basilica or Martyrion erected under Constantine remained as before. The Mohammedans next became masters of Jerusalem. At length Harun er Rashid made over to Charlemagne the jurisdiction of the holy sepulchre. Palestine again became the scene of battles and bloodshed. Muez, of the race of the Fatimites, transferred the seat of his empire to Cairo when Jerusalem fell into the hands of new masters, and the holy sepulchre is said to have been again set on fire. It was fully destroyed at the command of the third of the Fatimite kalifs in Egypt, the building being razed to the foundations. In the reign of his successor it was rebuilt, being completed A.D. 1048; but instead of the former magnificent Basilica over the place of Golgotha, a small chapel only now graced the spot. The crusades soon began. The crusaders regarded the edifices connected with the sepulchre as too contracted, and erected a stately temple, the walls and general form of which are admitted to remain to the present day (Robinson, ii. 61). So recently, however, as A.D. 1808 the church of the holy sepulchre was partly consumed by fire; but being rebuilt by the Greeks, it now offers no traces of its recent desolation.

We have thus traced down to the present day the history, traditional and recorded, of the buildings erected on Golgotha, and connected these edifices with the original events by which they are rendered memorable. To affirm that the evidence is irresistible may be going too far. Not less blameworthy is the carping and inculpatory tone pursued by Robinson in his review of the subject. Few antiquarian questions rest on an equally solid basis, and few points of history would remain settled were they subject to the same sceptical, not to say unfair, scrutiny which Robinson has here applied.

The sole evidence of any weight in the opposite balance is that urged by Robinson, that the place of the crucifixion and the sepulchre are now found in the midst of the modern city. But to render this argument decisive it should be proved that the city occupies now the same ground that it occupied in the days of Christ. It is, at least, as likely that the city should have undergone changes as that the site of the crucifixion should have been mistaken. The identity of such a spot is more likely to be preserved than the size and relative proportions of a city which has undergone more violent changes than probably any other place on earth. The present walls of Jerusalem were erected so late as A.D. 1542; and Robinson himself remarks, *en passant*, that a part of Zion is now left out (p. 67). If, then, the city has been contracted on the south, and if, also, it was after the death of Christ expanded on the north, what should we expect but to find Golgotha in the midst of the modern city?



Jerusalem in the days of Christ had two walls, those termed in our plan of Jerusalem 'first' and 'second.' It is with the second wall that we are here chiefly concerned. It began at a tower, named Gennath, of the first wall, curved outward to the north, and ended at the castle of Antonia. The third wall ran as on the plan, embracing a wide suburb on the north and north-west. This comprehended a sort of new city, and was built in consequence of the large population which by degrees fixed their abode in the space which falls between the second and third walls. This wall was begun under Claudius, at least forty-one years after Christ (Joseph. *De Bell. Jud.* v. 4. 2; comp. Tacit. *Hist.* v. 12). This third wall, then, did not exist in the time of our Lord; and Robinson allows that if the present site of the sepulchre fell without the second wall, all the conditions of the general question would be satisfied. Our plan of the city shows that it may have fallen without the second wall. The city bulged out on the north, as it contracted on the south, thus bringing Golgotha into its central parts. Robinson, however, asserts that the second wall must either have excluded the pool of Hezekiah, which was in the city, or included the site of the sepulchre, which was out of the city. In our plan the second wall does neither, but leaves both where the Scriptures place them. But the distance from the western point of the temple to the present site of the sepulchre Robinson considers insufficient, it being only about a quarter of a mile. We know not that there is anything in Scriptural account which gives support to this notion. A distance of a quarter of a mile appears quite enough for the recorded events, to say nothing of the essential weakness of such a position; for how can Robinson know that his measures extended along the same ground as our Lord was hurried over? But reason has already been given why the Jews should have taken no very protracted course.

Two or three additional facts in confirmation of the identity of the present place may, finally, be adduced. Buckingham (*Palest.* p. 283) says, 'the present rock called Calvary, and enclosed within the church of the holy sepulchre, bears marks in every part that is naked of its having been a round nodule of rock standing above the common level of the surface.' Scholz (*De Golgotha situ*, p. 9) states that he traced the remains of a wall, which ran as the second wall on the plan runs, excluding Golgotha and taking in the pool of Hezekiah (Raumer, p. 352). It may also be remarked that since the publication of Robinson's work Raumer has put forth a piece (*Beiträge zur Bib. Geog.* 1843) in which he revises his *Palästina* so far as Robinson's ascertained results render necessary; but he remains of the same opinion in regard to the possibility of the present church of the sepulchre being out of the city. At most, a very few hundred yards only can the original Golgotha have lain from the present site; and the evidence in favour of its identity, if not decisive, is far stronger than any that has been adduced against it. At the best, then, very small

is the reason for disturbing the convictions and distressing the hearts of the sincere believers who visit the holy sepulchre in order to give vent to their tearful gratitude and cherish their pious faith.—J. R. B.

GOLIATH. [Giant.]

GOME (גֹּמֶא), translated 'rush' and 'bulrush,' is mentioned in four places of Scripture, from which there is no doubt that it was a plant growing in moist situations in Egypt, and employed in the construction of vessels of different kinds, intended to float upon the water, such as the ark in which Moses was hid, and vessels for transit (Job viii. 11; Isa. xxxv. 7; Exod. ii. 3; Isa. xviii. 2). The name *gome*, according to Celsius (*Hierobot.* vol. ii. p. 138), is derived from גמא *gimme*, 'absorbere, bibere, quia in aqua nascitur, et aquam semper imbibit.' Though other plants are adduced by translators and commentators as the *gome* of Scripture, yet it is evident that only the *papyrus* can be meant, and that it is well suited to all the passages. Being in some respects so obvious, it could not escape the notice of all translators. Hence, in the Arabic Version, and in the *Annals of Eutychius*, the word بردي *burdee* is given as the synonym of *gome* in Exod. ii. 3. The Sept. in Job (viii. 11) gives πάπυρος, in Isaiah (xviii. 2) βιβλίνας, and the Vulgate, in this last passage, *papyrum*. In Arabic authors on Materia Medica, we find the *papyrus* mentioned under the three heads of *Fafeer*, *Burdee*, and *Chartas*. *Fafeer* is said to be the Egyptian name of a kind of *burdee* (bur-reed) of which paper (*charta*) is made; and of *burdee*, the word *fafururs* (evidently a corruption of *papyrus*) is given as the Greek synonym.

331.

The *papyrus* is now well known: it belongs to the tribe of *sedges* or *cyperaceæ*, and is not a rush or bulrush, as in the Authorized Version. It may be seen growing to the height of six or eight feet, even in tubs, in the hothouses of this country, and is described by the ancients as growing in the shallow parts of the Nile. The root is fleshy, thick, and spreading; the stems triangular, eight or ten feet in height, of which two or so are usually under water, thick below but tapering towards the apex, and destitute of leaves; those of the base broad, straight, and sword-shaped, but much shorter than the stem. This last is terminated by an involucel of about eight leaves, sword-shaped and acute, much shorter than the many-rayed umbel which they support. The secondary umbels are composed only of three or four short rays, with an involucel of three awl-shaped leaflets. The flowers are in a short spike at the extremity of each ray. Cassiodorus, as quoted by Carpenter, graphically described it as it appears on the banks of the Nile, 'There rises to the view this forest without branches, this thicket without leaves, this harvest of the waters, this ornament of the marshes.'

The *papyrus* was well known to the ancients as a plant of the waters of Egypt. 'Papyrum nascitur in palustribus Ægypti, aut quiescentibus Nili aquis, ubi evagatæ stagnant' (Pliny, xiii. 11). Theophrastus, at a much earlier period, described it as growing, not in the deep parts, but where the water was of the depth of two cubits, or even less. It was found in almost every part of Egypt inundated by the Nile, in the Delta, especially in the Sebennytic nome, and in the neighbourhood of Memphis, &c. By some it was thought peculiar to Egypt; hence the Nile is called by Ovid 'amnis papyrifer.' So a modern author, Prosper Alpinus (*De Plant. Ægypti*, c. 36):—'Papyrus, quam *berd* Ægyptii nominant, est planta fluminis Nili.' By others it was thought to be a native also of India, of the Euphrates near Babylon, of Syria, and of Sicily. The genus *cyperus*, indeed, to which it is usually referred, abounds in a great variety of large aquatic species, which it is difficult for the generality of observers to distinguish from one another; but there is no reason why it should not grow in the waters of hot countries, as, for instance, near Babylon or in India. In fact, modern botanists having divided the genus *cyperus* into several genera, one of them is called *papyrus*, and the original species *P. nilotica*. Of this genus *papyrus* there are several species in the waters of India (Wight, *Contributions to the Botany of India*, Cypereæ, p. 88).

A brief description of the uses of this plant, as given in the works of the ancients, is thus summed up by Parkinson in his *Herbal*, p. 1207: 'The plant, say the ancients, is sweete, and used by the Egyptians, before that bread of corne was known unto them, for their food, and in their time was chawed, and the sweetnesse sucked forth, the rest being spit out; the roote serveth them not only for fewell to burne, but to make many sorts of vessels to use, for it yielded much matter for the purpose. *Papyrus ipse* (say they), that is the stalke, is profitable to many uses, as to make ships, and of the barke to weave, and make sailes, mats, carpets, some kinds of garments, and ropes also.' The construction of *papyrus* boats is mentioned by Theophrastus: so Pliny (*Hist. Nat.* vi. 24), 'Papyraceis navibus armamentisque Nili;' and again (vii. 56), 'Naves primum repertas in Ægypto in Nilo ex papyro.' Plutarch, as quoted by Rosenmüller,

says, 'Isis circumnavigated the marshes in a *papyrus* wherry for the purpose of collecting the pieces of Osiris's body. From Heliodorus's account it appears that the Ethiopians made use of similar boats; for he relates that the Ethiopians passed in reed wherries over the Astaboras; and he adds that these reed wherries were swift sailing, being made of a light material, and not capable of carrying more than two or three men.' Bruce relates that a similar kind of boat was made in Abyssinia even in his time, having a keel of acacia wood, to which the *papyrus* plants, first sewed together, are fastened, being gathered up before and behind, and the ends of the plants thus tied together. Representations of some Egyptian boats are given in the *Pictorial Bible* (ii. p. 135); where the editor remarks that when a boat is described as being of reeds or rushes or *papyrus* (as in Egypt), a covering of skin or bitumen is to be understood. That the *papyrus* was employed for making paper is also well known, and Wilkinson mentions that from ancient paper being found at Thebes and elsewhere, it is evident that this application of it was much anterior to the time of Alexander the Great.—J. F. R.

GOMER (גֹּמֶר). 1. The eldest son of Japhet, son of Noah, whose descendants Bochart (*Phal.* iii. 8) supposes to have settled in Phrygia (Gen. x. 3; comp. 1 Chron. i. 5). Most of the interpreters take him to be the ancestor of the Celtæ, and more especially of the *Cimmerii*, Κιμμέριοι, who were already known in the time of Homer (*Odyss.* xi. 14). To judge from the ancient historians (Herodotus, Strabo, Plutarch, &c.), they had in early times settled to the north of the Black Sea, and gave their name to the Crimea, the ancient *Chersonesus Taurica*. But the greater part of them were driven from their territories by the Scythians, when they took refuge in Asia Minor, B.C. 7.

In the Scriptures, however, the people named Gomer imply rather an obscure and but vaguely known nation of the barbarous north (Rosenmüller, *Alterth.* i. 1. 235, sq.)

Josephus (*Antiq.* i. 6. 1) says expressly, that the ancestor of the Galatians, a Celtic colony, was called Gomer (Michael. *Suppl.* p. 335, sq.). The Jerusalem Targum gives Gen. x. 3 with אפריקי *Africanus*; Arab. תרך *Turca*.

2. The name of the daughter of Diblaim, wife of the prophet Hosea (Hosea i. 3).—E. M.

GOMORRHA, one of 'the cities of the plain,' destroyed along with Sodom. An account of that catastrophe is given under SODOM.

GOPHER WOOD (עֲצֵי גֹפֶר, *etz-gopher*) is mentioned only once in Scripture, as the material of which Noah was directed to build the ark (Gen. vi. 14), 'Make thee an ark of gopher wood; rooms shalt thou make in the ark, and shalt pitch it within and without with pitch' (*khemar*, probably 'bitumen'). In endeavouring to ascertain the particular kind of wood which is mentioned in the above passage, we can get assistance only from the name, the country where the wood was supposed to have been procured, or the traditional opinions respecting it. That nothing very satisfactory has been ascertained is evident from the various interpretations that have been given of this word, so that some have preferred, as in our Authorised Version, to retain the original Hebrew. The Septuagint renders it 'squared timbers,' and Jerome, in the Vulgate, renders it 'planed wood' and 'pitched wood.' Some have adopted the opinion that a kind of pine-tree is intended; and others that several species may be included, as they all yield resin, tar, and pitch. The Persian translator has also adopted the pine; but Celsius objects that it was never common in Assyria and Babylonia. The Chaldee version and others give the cedar, because it was always plentiful in Asia, and was distinguished by the incorruptible nature of its wood. But cedar is a very general term, and correctly applied, as we have seen [EREZ], only to different kinds of juniper. These, though yielding excellent wood, remarkable for its fragrance, never grow to a large size in any warm country. Eutychius, patriarch of Alexandria, relates in his *Annals* (p. 34), as quoted by Celsius (*Hierobot.* i. p. 331), that the ark was made of a wood called *sag* or *saj* صن خشب الساج. The *sag* or *saj* has been thought by some to be ebony, but apparently without any foundation. Still less is there any likelihood of its being a shrub like *juniperus sabina*, as indicated in a note by Rosenmüller, Eng. transl. p. 261. It is curious, as already alluded to in the *Essay on the Antiquity of Hindoo Medicine*, as mentioned by Forskal, that the woods imported from India into Arabia are *saj*, *abnoos* (ebony) and *sissoo* (*Dalbergia sissoo*). Some Persian writers on Materia Medica consider *saj* to be the *sâl* (*shorea robusta*), another valued and much used Indian timber tree, but common only along the foot of the Himalayan mountains. The *teak* is the best known and the most highly valued timber tree on the Malabar coast, and it has long been imported into Arabia, and also into Egypt. One of the names by which it is known in India is *sagoon*. The *saj* is described in some Persian works, chiefly translations from the Arabic, as having large leaves like elephants' ears. This applies well to the leaves of the *teak* tree: and there is little doubt, therefore, that the *saj* of Arab authors is the *teak* tree. With respect to its being the gopher wood, the present writer has already remarked in the above work: 'The gopher wood of Scripture is so differently translated by different commentators, that it is difficult to form even a conjecture on the subject; besides being used at so early a period, and mentioned only once. It need not have been alluded to, except that the Arabic version translates it *saj*, which is the *teak*, and not likely to have been the wood employed.' The Chaldee Samaritan translator, for *gopher*, gives, as a synonym, *sisam*, of which Celsius says (*Hierobot.* i. p. 332), 'Vocem obscuram, sive referas ad ξύλα σησάμινα, quæ ex Indiis adferri scribit Arrianus (*Peripl. Mar. Erythr.* p. 162), et Ebeno similia perhibent alii (Salmas. *in Solin.* p. 727).' The *sisam* is probably the above *sissoo*, mentioned by Forskal as imported in his time into Arabia, and which is a highly-valued, dark-coloured wood, of which one kind is called blackwood (*Dalbergia latifolia*). The greatest number of writers have been of opinion that by the gopher wood we are to understand the cypress; and this opinion is supported by such authorities as Fuller in his *Sacred Miscellanies*; Bochart (*Geogr. Sacra*); as well as by Celsius,

Hierobot. It has been stated that the letters *g* and *ph*, *k* and *p*, differ only in the soft or hard manner in which they are pronounced, and therefore that *gopher* and *kupar* differ very little in sound, and that ισσος in the Greek κυπάρισσος is a mere addition to the root. It is argued further that the wood of the cypress, being almost incorruptible, was likely to be preferred; that it was frequently employed in later ages in the construction of temples, bridges, and even ships; and that it was very abundant in the countries where, according to these authors, the ark is supposed to have been built, that is, in Assyria, where other woods are scarce. But wherever the ark was built, there would be no deficiency of timber if there was a certain degree of moisture with warmth of climate; and we know not what change of climate may have taken place at the Deluge. The pine tribe, including the cypress, appears as likely as any other to have been employed, usually growing as they do in extensive forests, and yielding straight and easily worked timber, calculated, from its resinous nature, effectually to resist moisture, especially if covered with pitch and tar, which might easily have been prepared from the refuse branches and timber, and used as well as the natural bitumen. But the whole of these suggestions amount only to conjectures, and there seems no possibility of arriving at a satisfactory conclusion.—J. F. R.

GOSHEN (גֹּשֶׁן; Sept. Γεσέν, Γεσέμ), a province or district of Egypt in which Jacob and his family settled through the instrumentality of his son Joseph, and in which they and their descendants remained for a period of 430 years (Gen. xlv. 10; xlvi. 28; xlvii. 27; l. 8; Exod. viii. 22; ix. 26). The Bible does not present any definite information as to the precise locality of Goshen, and of course later authorities possess only an inferior value. There are, however, incidental expressions, allusions, and implications in the Scriptures, which afford aid in determining the spot. That Goshen lay on the eastern side of the Nile may be justifiably inferred from the fact that Jacob is not reported to have crossed that river; nor does it appear that the Israelites did so in their flight out of Egypt. With this inference all the language employed (see the passages as given above), to say the least, agrees, if it does not afford an indirect evidence in its favour. By comparing Exod. xiii. 17 and 1 Chron. vii. 21, it appears that Goshen bordered on Arabia (see Gen. xlv. 10, Sept. Γεσέμ Ἀραβίας) as well as Palestine, and the passage of the Israelites out of Egypt shows that the land was not far removed from the Red Sea. It appears probable that we may fix the locality of Goshen in Lower Egypt, on the east side of the Pelusiac branch of the Nile, in the district around Heroopolis. The Septuagint renders the words גשן ארצה 'land of Goshen' (Gen. xlvi. 28), καθ' Ἡρώων πόλιν, εἰς γῆν Ῥαμεσσῆ, thus identifying Goshen with Rameses, or the district of Pithom or Heroopolis. (See map, No. 3, in Knight's Illuminated Atlas.) This would make Goshen correspond with one of the divisions of what was anciently termed the Præfectura Arabica, Ti-Arabia, the eastern district, lying, that is, on the eastern or Arabian side of the Nile. This division was that of Heliopolis or On, Matariyeh, or Ain-Shems. An attempt has been made to define it accurately, so as to identify Goshen (Rosenm. *Alterthum.*, iii. 246) with the Nomos Arabiæ (Ptol. iv. 5), or the country of Esch-schar Kijah (the eastern land), which stretches south from Pelusium as far as Belbeis (north-east from Cairo), and to the north-east borders of the desert El Dschefar. Traces are found here, it is thought, of the residence of the Israelites, in large heaps of ruins, a few hours' journey to the north-east of Cairo, which the Arabs call *Tell el Jhud* (Jews' hills), or *Turbeh el Jhud* (Jews' graves) (Niebuhr, i. 100). According to Bois Aymé (*Descrip. de l'Egypte*, viii. 111) Goshen was the valley Sabal-yar, which begins in the vicinity of Belbeis, and embraces the district of Heroopolis. Robinson (*Palestine*, i. 37) makes light of the evidence supposed to be supplied by 'the mounds of the Jews,' just mentioned. He says, 'If there is any historical foundation for this name, which is doubtful, these mounds can only be referred back to the period of the Ptolemies, in the centuries immediately before the Christian era, when great numbers of Jews resorted to Egypt and erected a temple at Leontopolis.' This opinion, however, appears to us somewhat arbitrary. And whatever the actual origin of these mounds, the ordinary account of them may be the transmission or echo of a very ancient tradition. Robinson, however, does not deny that Goshen is to be found about where the best authorities ordinarily place it, as will appear from the following quotation; we regret that the wish here spoken of was not fulfilled: 'It had been our wish to take a more circuitous route from Suez to Cairo, descending the eastern branch or canal of the Nile beyond Belbeis, as far as to the province of Shur-kiyeh, and thence along the valley of the ancient canal to the head of the gulf of Suez. Our object in taking this route would have been to make inquiries and observations personally in relation to the land of Goshen and the Exodus of the Israelites' (i. 54). The following passage, however, will serve to prove that even the desert is not unsuited to pastoral purposes:—'The desert which we were now crossing is not sandy, but its surface, for the most part, is a hard gravel, often strewed with pebbles. Numerous wadys, or shallow water-courses, intersect its surface. In all these wadys there are usually to be found scattered tufts of herbs or shrubs, on which the camels browse as they pass along, and which serve likewise as their pasturage when turned loose at night. During the rainy season and afterwards, the inhabitants of Belbeis and the Shur-kiyeh, as probably did the Israelites of old, still drive their mingled flocks of sheep and goats for pasturage to this quarter of the desert.'

Laborde (*Arabia Petræa*, p. 58) fixes Goshen in the country around Belbeis, on the eastern side of the Nile. Speaking of his journey from Cairo by Belbeis to Suez, he says, 'This plain is the province of Goshen, where the children of Egypt settled and multiplied: it was here that the meeting occurred between Jacob, the patriarch, and Joseph, the minister and master of Egypt.' Laborde passed the banks of the canal which formerly united the Nile with the Red Sea, and which, he says, Bonaparte was the first in modern times to observe. M. Quatremère has endeavoured to define the locality, and by comparing several pas-

sages collected from different writers, he infers that the Wady Tumilat (Wady Tomlate in Laborde) in which the canal of Cairo terminates is the land of Goshen: such at least seems to have been the opinion of Saadias and Abu Said, the authors of the earliest Arabic Versions of the Old Testament—the one for the use of the Jews, and the other for that of the Samaritans (*Mém. Géogr. sur l'Egypte*). J. D. Michaelis was of opinion (*Spicil.* p. 371) that Goshen extended from Palestine along the Mediterranean as far as the Tanitic mouth of the Nile, and thence inland up to Heliopolis, embracing a sweep of country so as to take in a part of Arabia, bordering on Egypt. The various opinions that have been held on the subject may be found classified and considered by Bellermann in his *Handb. d. Bibl. Lit.* iv. 191-220 (see also Jablonsky, *Dissert.* viii. *de Terra Gosen*).

This district was suitable for a nomadic people, who would have been misplaced in the narrow limits of the valley of the Nile. Children of the desert, or at least used as they were to wander freely from one fertile plain to another with their flocks and herds, the sons of Jacob required a spot where the advantages of an advanced civilization could be united with unrestricted freedom, and abundance be secured without the forfeiture of early and cherished habits. The several opinions which we have given substantially agree in referring Goshen to the country intervening between the desert of Arabia and Palestine on the one side, and the Pelusiac arm of the Nile on the other, with the Mediterranean at the base. The district assigned to Jacob and his family was chosen for its superiority (Gen. xlvii. 6), 'In the best of the land make thy father and brethren to dwell, in the land of Goshen let them dwell;' and the subsequent increase of the Israelites themselves, as well as the multiplication of their cattle, shows that the territory was one of extraordinary fertility. Time and circumstances have doubtless had their effect on the fertility of a country in which the desert is ever ready to make encroachments so soon as the repelling hand of man is relaxed or withdrawn. But Laborde (p. 53) represents the vicinity of Heliopolis as still covered with palm-trees, and as having an enclosure, comprehending a considerable space of ground, which is covered every year by the inundation of the Nile to the height of five feet. We are not, however, to expect evidences of luxuriant fertility. The country was chosen for its pre-eminent fitness for shepherds. If a nomadic tribe had wide space and good pasture-grounds, they would have 'the best (for themselves) of the land,' and these advantages the district in which we have placed Goshen abundantly supplied in ancient times, when the waters of the Nile were more liberally dispensed than at present to the eastern side of the country. Nothing is needed but water to make the desert fertile. 'The water of the Nile soaks through the earth for some distance under the sandy tract (the neighbourhood of Heliopolis), and is everywhere found on digging wells eighteen or twenty feet deep. Such wells are very frequent in parts which the inundation does not reach. The water is raised from them by wheels turned by oxen and applied to the irrigation of the fields. Whenever this takes place the desert is turned into a fruitful field. In passing to Heliopolis we saw several such fields in the different stages of being reclaimed from the desert; some just laid out, others already fertile. In returning by another way more eastward, we passed a succession of beautiful plantations wholly dependent on this mode of irrigation' (Robinson's *Palestine*, vol. i. p. 36).—J. R. B.

GOSPEL. The Greek word εὐαγγέλιον, *glad tidings*, is translated in the English Version by the word *Gospel*, viz., *God's spell*, or the *Word of God*. The central point of Christian preaching was the joyful intelligence that the Saviour had come into the world (Matt. iv. 23; Rom. x. 15); and the first Christian preachers, who characterized their account of the person and mission of Christ by the term εὐαγγέλιον, were themselves called εὐαγγελισταί (Eph. ii. 11; Acts xxi. 8). The former name was also prefixed to the written accounts of Christ; and as this intelligence was noted down by various writers in various forms, the particle κατὰ (*e. g.* εὐαγγέλιον κατὰ Ματθαῖον) was inserted. We possess four such accounts; the first by Matthew, announcing the Redeemer as the promised King of the Kingdom of God; the second by Mark, declaring him 'a Prophet mighty in deed and word' (Luke xxiv. 19); the third by Luke, of whom it might be said that he represented Christ in the special character of the Saviour of sinners (Luke vii. 36, sq.; xv. 18-9, sq.); the fourth by John, who represents Christ as the Son of God, in whom deity and humanity became one. The ancient church gave to Matthew the symbol of the lion, to Mark that of man, to Luke that of the ox, and to John that of the eagle; these were the four faces of the cherubim. The cloud in which the Lord revealed himself was borne by the cherubim, and the four Evangelists were also the bearers of that glory of God which appeared in the form of man.

Concerning the order which they occupy in the Scriptures, the oldest Latin and Gothic Versions, as also the Codex Cantabrigiensis, place Matthew and John first, and after them Mark and Luke, while the other MSS. and old versions follow the order given to them in our Bibles. As dogmatical reasons render a different order more natural, there is much in favour of the opinion that their usual position arose from regard to the chronological dates of the respective composition of the four gospels: this is the opinion of Origen, Irenæus, and Eusebius. All ancient testimonies agree that Matthew was the earliest, and John the latest Evangelist. The relation of the Gospel of John to the other three Gospels, and the relation of the Gospels of Matthew, Mark, and Luke to each other, is very remarkable. With the exception of the history of the Baptist, and that of Christ's passion and resurrection, we find in John not only narratives of quite different events, but also different statements even in the above sections, the strongest of which is that relating to the crucifixion of Christ, which—according to the first three Gospels—took place on the first day of the Passover, while, to judge from John xiii. 1, 29; xviii. 28; xix. 14, 31, it would appear that it had taken place on the eve of the day on which the passover was to be eaten, but which was either not eaten at all by our Lord, or was anticipated by him by a day. On the other hand, the

first three Evangelists not only tolerably harmonize in the substance and order of the events they relate, but correspond even sentence by sentence in their separate narratives (comp. *ex. gr.* Mark i. 21-28 with Luke iv. 31-37; Matt. viii. 31-34; Mark vi. 34; v. 17; Luke viii. 32-37, etc.). The thought that first suggests itself on considering this surprising harmony is, that they all had mutually drawn their information from one another. Thus Grotius, *ex. gr.*, is of opinion that Matthew was the oldest source, and that Mark drew his information both from Matthew and Luke; again, according to Büsching, Luke was the oldest, and Matthew made use of Luke and Mark; while most critics in Germany have adopted the view of Griesbach, that Matthew was the oldest, and was made use of by Luke, and that Mark derived his information both from Matthew and Luke. Following the suggestion of Rore, some of the most modern critics, such as Weisse, Wilke (in his work entitled *Ur-evangelist*, 1838), and Bauer, are, on the other hand, of opinion that Mark was the original evangelist, and that Matthew and Luke derived their information from him. The difference of these opinions leads to the suspicion that none of them are right, more especially when we consider that, notwithstanding the partial harmony of the three evangelists in the choice of their *sentences*, there is still a surprising difference in them as regards the *words* of those sentences; a fact which compelled the critics who suppose that the evangelists made use of each other's writings, to account everywhere for such deviations, and frequently to have recourse to the most trivial and pedantic arguments. To us these differences in word and phrase would appear inconceivable were we disposed to assume that the evangelists had copied one another.

Wilke has tried, with great show of learning and much confidence, to defend his opinion, that Mark's Gospel was the primitive text; but Wilke also is obliged to have recourse to the most artificial hypotheses; one of which is, that even Mark has subsequently been extended by glossarial additions, because he could account in no other way for the omission of Matthew and Luke to copy the seven sections peculiar to Mark. Another difficulty, viz. that the text of Matthew often harmonizes more with the text of Luke than with that of Mark, he is obliged to meet by assuming that Matthew reformed the text of Mark in conformity with that of Luke, etc. These difficulties led to the supposition, already brought forward by Le Clerc, Semler, and Lessing, that there existed originally a *Protevangelium*, or primitive Gospel, composed by the Apostles in the Aramæan language, which was afterwards variously recast in the Greek tongue by authors who made use of each other. This hypothesis was particularly developed by Eichhorn and Marsh, but is now again generally relinquished on account of the serious objections against it.—1. By this hypothesis it is assumed that the parts in which all the three harmonize existed in the original evangelium, while the *plus* consists of additions by the separate writers. Now, how are we to account, in a natural way, for their frequent harmony in these additions also? This objection can only be answered in a very artificial manner. 2. The chronological order would thus remain the same. 3. Luke in his prooemium does not mention an original evangelium, but, on the contrary, speaks of various reports from eye-witnesses. 4. It is not likely that the knowledge of such original evangelium should not have been preserved for some time; but none of the ancient writers know anything about it.

Herder suggested another hypothesis, which has been very ably defended by Gieseler, in his work *Ueber die Entstehung und frühesten Schicksale der Evangelien*, 1818; namely, that our written gospels are founded upon a cyclus of oral traditions; that the original witnesses of the life of our Lord at first confined the narration of their testimony to Jerusalem and Judæa, where the facts which had occurred in Galilee were little known; and that by frequently repeating these accounts, not only a certain sphere of facts, but also of phrases, and partially also of words, became the fixed standard for these narrations, without, however, encroaching altogether on the free choice of the narrator. But this assumption, likewise, is liable to objections:—1. If the Apostles had really fixed for the primitive *oral* gospel a certain set of facts, how does it happen, then, that the evangelists disagree so much in their chronological arrangement? (comp. Luke iv. 16, sq. with Matt. xiii. 53, sqq.) 2. If the cycle of traditions was fixed by the Apostles, why, then, does John so entirely deviate from it? 3. According to Papias, Mark collected what Peter preached as circumstances required. Papias states that on this account Peter could not have written a complete σύνταξις. Does it not follow from this that Peter had no fixed standard, or pattern, or cycle for his preaching? 4. According to Luke i. 1, 2, several earlier writers had put together (ἀνατάσσεσθαι) into a narration the facts told to them by eye-witnesses. Does this not indicate that it was the writers who first brought into connection the accounts of the eye-witnesses? These arguments are, however, not quite incontrovertible. As to John, he is, throughout, original; and, having written at an advanced age and far from Palestine, he may certainly have pursued a course of his own. Papias's assertion does not render impossible the fact that Peter communicated a certain fixed cycle of facts. The same reason which induced Papias to consider the Gospel of Mark an incomplete syntaxis, because it does not contain everything, may also have induced him to consider as such the communications of Peter. The phrase ἀνατάσσεσθαι διήγησιν in Luke does not precisely indicate that the relations of the eye-witnesses had no connection. Of more importance certainly is the argument derived from the chronological position of certain facts in Matthew and Luke. However, as regards Luke, there cannot be the least doubt that his Gospel, as well as the *Acts*, was composed and arranged from already existing original documents; a fact confirmed among other reasons also by the good Greek in the preface of his Gospel, and in the last chapters of the *Acts*, where he himself appears in his narration as the travelling companion of Paul. This good Greek style forms a striking contrast with the Hellenic Greek used in the historical part of his Gospel, and in the first and greater portion of the *Acts*. If, therefore, he found documents on some separate parts of the life of our Lord, which had been

committed to writing from the oral communications of the Apostles and Evangelists, these documents might certainly have been arranged in a chronologically different manner. 1. If we possess in the Gospel of the most ancient Evangelist and Apostle the pattern of oral tradition, how can it be that Luke compiles his Gospel from private documents, and thus changes the order of the arrangement? and how can it be that Mark in this respect partially follows Luke? This different arrangement of the events is observable not only in one or two isolated instances, but the order of all the events in Matt. iv. 23; xiv., differs from that of Mark and Luke. 2. It cannot be denied that though Matthew frequently adds to his narration some expressions which indicate the time of the events, there is also frequently wanting all such indications, as well in Matthew as in Luke. It has long been assumed that Matthew, in his narrative of the sayings of Christ, has grouped together kindred sayings; for instance, various parables (ch. xiii.); denunciations against the Pharisees (ch. xxiii.). Since, therefore, Matthew frequently does not connect the various events chronologically, but rather according to their similarity, it is likely that he had no intention to furnish the succession of the times, and there is no reason to suppose that the apostles had any definite pattern for a compendium of gospel history. We therefore suppose it to be necessary to limit the hypothesis of an oral protevangelium to the fact that certain groups of speeches and events in the history of our Lord were, from the very beginning of Christianity, frequently narrated and also written down. Hence it will be understood why the sentences in various evangelists are frequently arranged in a similar manner, and why the evangelists frequently differ in their phraseology, in the *plus* or *minus* of their communications, and in their arrangement. The learned Schott concludes his *Isagoge* with a confession which deprives criticism of all hope even for the future: 'etsi lubenter largiamur ejusmodi conjecturam cujus ope, quæcunque disceptari possint de his illisve rectioribus evangeliorum canonicorum parallelis prorsus definiantur, *haud facile unquam produturam esse*.' 'Although we would gladly allow such a conjecture, by the aid of which any doubt concerning these or those more correct parallels of the canonical gospels may be fully determined, *yet it cannot easily be ever advanced*.'

As the three Evangelists mutually supply and explain each other, they were early joined to each other, by Tatian, about A.D. 170, and by Ammonius, about A.D. 230,* and the discrepancies among them early led to attempts to reconcile them.† An ingenious essay of this kind was written by Augustine in his book *De Consensu Evangelistarum*. Starting from the principle of a *verbal inspiration* in the Gospels, every difference in expressions and facts was considered as a proof that the speeches and facts had repeatedly occurred. This opinion is advanced, for instance, in Andreas Osiander's *Harmonia Evangelistarum*. The subject is, however, more freely handled by Calvin, Chemnitz, Kaiser, Gerhard, and others, in their respective works, *De Harmonia Evangelistarum*. Gerhard's book, in three folio volumes, is one of the most comprehensive exegetical works on the four Gospels. Strauss has drawn his principal argument against the unhistorical character of the Gospels from these discrepancies; but he is in the first instance wrong in supposing that the Evangelist had the intention of relating the particulars of events scrupulously in a chronological order; nor is he less wrong in seeing in every deviation a contradiction, and in the attempts at reconciliation, productions of mere dogmatic prejudice, while he is himself guilty of prejudice, by the very aversion he shows against every attempt at such reconciliation!

When we consider that one and the same writer, namely, Luke, relates the conversion of Paul (Acts ix. 22, 26), with different incidental circumstances, after three various documents, though it would have been very easy for him to have annulled the discrepancies, we cannot help being convinced that the Evangelists attached but little weight to minute preciseness in the incidents, since, indeed, the historical truth of a narration consists less in them, in the relation of minute details, than in the correct conception of the *character* and *spirit* of the event. An exposition and refutation of the most recent attacks against the truth of the Evangelical history on account of this discrepancy, may be seen in Tholuck's *Glaubwürdigkeit der Evangelischen Geschichte*; and in his *Review of Strauss's Life of Christ* in *Literarischer Anzeiger*, 1838; also in Ebrard's *Wissenschaftliche Kritik der Evangelischen Geschichte*, 2 vols. 1842. This last work is a compendium of all critical investigations into the history contained in the Gospels.—A. T.

GOSPELS, SPURIOUS (Apocrypha). The canon of the New Testament, as we have already seen, having been finally settled before the close of the fourth century, the rejected writings which bore the names of the Apostles and Evangelists soon sunk into oblivion, and few, if any, have descended to our times in their original shape. From the decree of Gelasius and a few other sources we have the names and a few detached notices of a good many of these productions. We shall first speak of those which are still extant.

The History of Joseph the Carpenter, which has been preserved in the East in an Arabic translation, was first made known in Europe in the commencement of the sixteenth century by Isidore de Isolanis in his *Summa de donis Sti. Josephi*. He observes that the 'Catholics of the East' commemorate St. Joseph on the 19th March, and read the legend of the saint, omitting certain parts which are not approved in the Roman church. This work was first published by Wallin, at Leipsic, in 1722, from an Arabic MS. of the thirteenth century, in the *Bibliothèque du Roi*, accompanied with a Latin translation. It was divided by Wallin into chapters and verses. It is also found in Coptic, Sahidic, and Memphic. It is highly esteemed by the Copts. The former part, to chap. ix., appears to have been derived from an ancient Gospel of the Infancy. The Latin was republished by Fabricius.

The Gospel of the Infancy was first published by Henry Sike, at Utrecht, in 1697, from an Arabic MS. Sike's Latin version was republished by Fabricius, who divided it into chapters.

* Such *putting together* is called *synopsis*.

† Harmonies.

The Arabic was divided into corresponding chapters by Thilo, in 1832.

There are several MSS. of this gospel extant, the oldest of which known is that in the Medicean Library, written in 1299. The narratives which it contains were current in the second century, and the account contained in this gospel respecting Christ's learning the alphabet is mentioned by Irenæus (*Adv. Hæres.* i. 20) as a fabrication of the Marcosians. The Gospel of the Infancy is found in the catalogue of Gelasius, and it is especially remarkable from the fact that it was most probably this gospel which was known to Mohammed, who seems to have been unacquainted with any of the canonical Scriptures, and who has inserted some of its narrations in the Koran. The *Sepher Toldoth Jesu*, a well-known publication of the Jews, contains similar fables with those in this gospel (Wagenseil's *Sota*). This work was received as genuine by many of the Eastern Christians, especially the Nestorians and Monophysites. It was found to have been universally read by the Syrians of St. Thomas, in Travancore, and was condemned at the Synod of Diamper, in 1599, by Archbishop Menezes, who describes it as 'the book called the *Gospel of the Infancy*, already condemned by the ancients for its many blasphemous heresies and fabulous histories.' Wherever the name Jesus occurs in this gospel, he is universally entitled الرب, while Christ is called السيد. This was a distinction introduced by the Nestorians. The Blessed Virgin is also entitled the Lady Mary. The Persians and Copts also received this gospel (De la Brosse's *Lexic. Pers.* voc. *Tinctoria ars*). The original language was probably Syriac. It is sometimes called the Gospel of Peter, or of Thomas.

THE GOSPEL OF THOMAS THE ISRAELITE (Greek), a work which has flowed from the same source with the former, was first published by Cotelerius (*Notes on the Constitutions of the Apostles*, l. vi. c. 17, tom. i. p. 348), from an imperfect MS. of the fifteenth century. It was republished and divided into chapters by Fabricius. The most perfect edition was that of Mingarelli, in the *Nuova Raccolta d' Opusculi scientifice e filosofice*, Venet. 1764, from a Bologna MS. of the fifteenth century. Mingarelli (who believed it to have been a forgery of the Manichees) accompanied his text with a Latin translation. Thilo has given a complete edition from a collation of Mingarelli's work with two MSS. preserved at Bonn and Dresden. This gospel relates the fable of Christ's learning the *Greek* alphabet, in which it agrees with the account in Irenæus. In other Gospels of the Infancy (as in that published by Sike) he is represented as learning the *Hebrew* letters. It has been questioned whether this is the same work which is called the Gospel of Thomas, by Origen, Ambrose, Bede, and others. This gospel probably had its origin among the Gnostics, and found its way from them, through the Manichees, into the church; but having been more generally received among the heretics it was seldom copied by the monks, which accounts for the paucity of MSS. Nicephorus says that the Gospel of Thomas contained 1300 στίχοι [STICHOMETRY]. This pseud-epigraphal work is probably the foundation of all the histories of Christ's infancy, but it is supposed to have been recast and interpolated.

THE PROTEVANGELION OF JAMES has descended to us in the original Greek, and was first published by Bibliander, at Basel, in 1552, in a Latin version by William Postell, who asserted that it was publicly read in the Greek churches, and maintained that it was a genuine work of the Apostle James, and intended to be placed at the head of St. Mark's Gospel. These commendations provoked the wrath of the learned Henry Stephen, who insinuated that it was fabricated by Postell himself, whom he calls 'a detestable monster' (*Introduction au Traité de la Conformité des Merveilles Anciennes avec les Modernes*, 1566). It was reprinted in the *Orthodoxographa* of J. Herold, Basil, 1555; and again in the *Orthodoxographa*, vol. i. (1569), of Jacob Grynæus, who entertained a very favourable opinion of it. Subsequent discoveries have proved that, notwithstanding the absurdity of Postell's high pretensions in favour of the authenticity of this gospel, Stephen's accusations against him were all ill-founded. There had, even at the time when Stephen wrote, been already a Greek translation published by Neander, of which Stephen was not aware; it appeared among the Apocrypha annexed by Oporin to his edition of Luther's Catechism, Basel, 1564. It was republished by Fabricius (who divided it into chapters), and subsequently by Birch and Thilo. Thilo collated for his edition six Paris MSS., the oldest of which is of the tenth century. From the circumstance of these MSS. containing a Greek calendar or martyrology, and from other internal evidences, there seems little doubt that this gospel was formerly read in the Greek church (Montfaucon, *Palæogr. Græc.* p. 304). There are also extant versions of the Gospel of the Infancy in the Arabic and other languages of the Eastern churches, among which they appear to have possessed a high degree of authority.

Although this work is styled by Postell the *Protevangelium*, there is no MS. authority for this title, nor for the fact of its being ascribed to St. James the Apostle. It only appears that the author's name is James. The narrations of this Gospel were known to Tertullian (*Adv. Gnost.* c. viii.), Origen (*Com. in Matt.* p. 223), Gregory Nyssen (*Orat. in diem Nat. Christ.*: *Opp.* vol. iii. p. 346), Epiphanius (*Hær.* 79. § 5), the author of the *Imperfect Work on Matt.*: Chrysost. *Opp.* tom. vi. p. 24), and many others among the ancients.

THE GOSPEL OF THE NATIVITY OF MARY (Latin). Although the Latins never evinced the same degree of credulity which was shown by the Greeks and Orientals in regard to these fabulous productions, and although they were generally rejected by the fathers, they were again revived about the sixth century. Notwithstanding their contemptuous rejection by Augustine and Jerome, and their condemnation by Popes Innocent and Gelasius, they still found readers in abundance. Gelasius expressly condemns the book concerning the *Nativity of St. Mary and the Midwife*.

The Gospel of the Nativity of Mary, which most probably, in its present form, dates its origin from the sixth century, has been even recommended by the pretended authority of St. Jerome

There is a letter extant, said to be written by the Bishops Chromatius and Heliodorus to Jerome, requesting him to translate out of Hebrew into Latin the history of the *Birth of Mary*, and of the *Birth and Infancy of Christ*, in order to oppose the fabulous and heretical accounts of the same, contained in the apocryphal books. To this Jerome accedes, observing at the same time that the real author of the book was not, as they supposed, the Evangelist Matthew, but Seleucus the Manichee. Jerome observes that there is some truth in the accounts, of which he furnishes a translation from the original Hebrew. These pretended letters of Jerome are now universally acknowledged to be fabrications; but the apocryphal gospel itself, which is the same in substance with the *Protevangelion of James*, is still extant in Jerome's pretended Latin version. This gospel was republished by Mr. Jones from Jerome's works. It is from these Gospels of the Infancy that we have learned the names of the parents of the Blessed Virgin, Joachim (although Bede reads Eli) and Anna. The narratives contained in these gospels were incorporated in the *Golden Legend*, a work of the thirteenth century, which was translated into all the languages of Europe, and frequently printed. There are extant some metrical accounts of the same in German, which were popular in the era of romance. These legends were, however, severely censured by some eminent divines of the Latin church, of whom it will be sufficient to name Alcuin, in his *Homilies*, in the ninth, and Fulbert and Petrus Damianus (bishop of Ostia) in the eleventh century. 'Some,' says the latter, 'boast of being wiser than they should be, when, with superfluous curiosity, they inquire into the names of the parents of the Blessed Virgin, for the Evangelist would surely not have failed to have named them if it were profitable to mankind' (*Sermon on the Nativity*). Eadmer, the monk, in his book on the *Excellence of the Virgin*, writes in a similar strain (cap. ii. Anselm. *Opp.* p. 435, Paris, 1721). Luther also inveighs against the readers of these books (*Homil.* ed. Walch. tom. xi.; and *Table-Talk*, ch. vii. tom. xxii. p. 396).

There were several editions of Jerome's pretended translation published in the fifteenth century, one of them by Caxton. It is printed by Thilo from a Paris MS. of the fourteenth century, and divided by him into twenty-four chapters, after a MS. of the fifteenth century in the same library. One of the chief objects of the writer of these gospels seems to be to assert the Davidical origin of the Virgin, in opposition to the Manichees.

Mr. Jones conceives that the first author of these ancient legends was a Hellenistic Jew, who lived in the second century, but that they were added to and interpolated by Seleucus at the end of the third, who became their reputed author; and that still further additions were made by the Nestorians, or some late Christians in India. Lardner (*Credibility*, vol. viii) so far differs from Mr. Jones as to believe the author not to have been a Jew. That these legendary accounts have not altogether lost their authority appears from the *Life of St. Joseph*, in the last number of the *Catholic Magazine* (December, 1843).

The Gospel of the Nativity of Mary was received by many of the ancient heretics, and is mentioned by Epiphanius, St. Augustine, and Gelasius. The Gnostics and Manichees endeavoured to found on its authority some of their peculiar opinions (such as that Christ was not the Son of God before his baptism, and that he was not of the tribe of Judah, but of that of Levi); as did also the Collyridians, who maintained that too much honour could not be paid to the Blessed Virgin, and that she was herself born of a virgin, and ought to be worshipped with sacrifices.

Although the GOSPEL OF MARCION, or rather that of St. Luke as corrupted by that heretic in the second century, is no longer extant, Professor Hahn has endeavoured to restore it from the extracts found in ancient writers, especially Tertullian and Epiphanius. This work has been published by Thilo.

Thilo has also published a collation of a corrupted Greek GOSPEL OF ST. JOHN, found in the archives of the Knights Templars in Paris. This work was first noticed (in 1828) by the Danish Bishop Muenter, as well as by Abbé Grégoire, ex-bishop of Blois. It is a vellum MS. in large 4to., said by persons skilled in palæography to have been executed in the thirteenth or fourteenth century, and to have been copied from a Mount Athos MS. of the twelfth. The writing is in gold letters. It is divided into nineteen sections, which are called *gospels*, and is on this account supposed to have been designed for liturgical use. These sections, corresponding in most instances with our chapters (of which, however, the twentieth and twenty-first are omitted), are subdivided into verses, the same as those now in use, and said to have been first invented by Robert Stephen [VERSES]. The omissions and interpolations (which latter are in barbarous Greek) represent the heresies and mysteries of the Knights Templars. Notwithstanding all this, Thilo considers it to be modern, and fabricated since the commencement of the eighteenth century.

One of the most curious of the apocryphal gospels is the GOSPEL OF NICODEMUS, or ACTS OF PILATE. It is a kind of theological romance partly founded on the canonical gospels. The first part, to the end of ch. xv., is little more than a paraphrastic account of the trial and death of Christ, embellished with fabulous additions. From that to the end (ch. xxviii.) is a detailed account of Christ's descent into hell to liberate the spirits in prison, the history of which is said to have been obtained from Lenthius and Charinus, sons of Simeon, who were two of those 'saints who slept,' but were raised from the dead, and came into the holy city after the resurrection. This part of the history is so far valuable, that it throws some light upon the ancient ideas current among Christians on this subject. It is therefore considered by Birch (*Auctarium*, Proleg. p. vi.) to be as valuable in this respect as the writings of the Fathers.

The subscription to this book states that it was found by the emperor Theodosius among the public records in Jerusalem, in the hall of Pontius Pilate (A.D. 380). We read in chap. xxvii. that Pilate himself wrote all the transactions from the relation of Nicodemus, who had taken them down in Hebrew; and we are informed by Epiphanius that the Quartadecimans appealed to the *Acts of Pilate* in favour of their opinions as to the proper time of keeping Easter.

It was written in these Acts that our Saviour suffered on the eighth Kal. of April, a circumstance which is stated in the subscription to the present *Acts*. It is uncertain, however, when this work was first called by the name of Nicodemus.

The two ancient apologists, Justin Martyr and Tertullian, both appeal in confirmation of our Saviour's miracles and crucifixion to the *Acts of Pilate* (Justin Martyr, *Apology*, pp. 76, 84; Tertullian, *Apol.* c. 21, or English transl. by Chevallier, 1833). From this circumstance it has been generally held that such documents must have existed, although this fact has been called in question by Tanaquil Faber and Le Clerc (Jones, *On the Canon*, vol. ii. p. 282, pt. iii. ch. 29). These appeals, however, in all probability first furnished the idea of the present pious fraud. Mr. Jones supposes that this may have been done in order to silence those pagans who denied the existence of such Acts. The citations of those Fathers are all found in the present work.

We have already seen that a book entitled the *Acts of Pilate* existed among the Quartadecimans, a sect which originated at the close of the third century. We are informed by Eusebius that the heathens forged certain Acts of Pilate full of all sorts of blasphemy against Christ, which they procured (A.D. 303) to be dispersed through the empire; and that it was enjoined on schoolmasters to put them into the hands of children, who were to learn them by heart instead of their lessons. But the character of the Gospel of Nicodemus, which contains no blasphemy of the kind, forbids us to identify it with those *Acts*. This gospel probably had its origin in a later age. From the circumstance of its containing the names of Lenthius and Charinus, Mr. Jones conceives it to have been the work of the celebrated fabricator of gospels, Lucius Charinus, who flourished in the beginning of the fourth century. It is certainly not later than the fifth or sixth. 'During the persecution under Maximin,' says Gieseler (*Eccles. Hist.* vol. i. § 24, note), 'the heathens first brought forward certain calumnious *Acts of Pilate* (Euseb. ix. 5), to which the Christians opposed others (Epiphan. *Hær.* 79, § 1), which were afterwards in various ways amended. One of these improved versions was called afterwards the Gospel of Nicodemus.'

Beausobre suspected that the latter part of the book (the descent into hell) was taken from the *Gospel of Peter*, a work of Lucius Charinus now lost. Thilo (*Codex Apocryphus*) thinks that it is the work of a Jewish Christian, but it is uncertain whether it was originally written in Hebrew, Greek, or Latin. The only Greek writer who cites it is the author of the *Synaxarion*, and the first of the Latins who uses it is the celebrated Gregory of Tours (*Hist. Franc.* i. 20, 23).

The Gospel of Nicodemus (in Latin) was one of the earliest books printed, and there are subsequent editions in 1490, 1516, 1522, and 1538, and in 1569 in the *Orthodoxographa* of Grynæus. It was afterwards published by Fabricius (*Cod. Apoc.*), who divided it into chapters. Fabricius gives us no information respecting the age or character of his MS., which is extremely defective and inaccurate. Mr. Jones republished this with an English version.

The Greek Gospel of Nicodemus was first published from an incorrect Paris MS. by Birch (*Auctarium*), and subsequently, from a collation of several valuable manuscripts, the most ancient of which are of the thirteenth century, by Thilo, with the Latin text of the very ancient MS. at Einsidl, described by Gerbert in his *Iter Alemannicum*. It has been shown by Smidt (*Bibl. für Critik und Exegese*) that the present MSS. exhibit in their citations from the canonical books a text of the sixth century, and consequently that this gospel is extremely useful in a critical point of view.

The esteem in which this work was held in the middle ages may be seen from the number of early versions which were in popular use, of which innumerable MSS. have descended to our times. The earliest of these is the Anglo-Saxon translation, printed at Oxford in 1698, from a Cambridge MS. (Thwaites's *Heptateuchus*). This is a translation from the Latin, as none of the Greek MSS. contain Pilate's letter to Claudius. There are also MSS. of the same in the Bodleian and Canterbury libraries. That in the Bodleian is divided into thirty-four chapters. There are several MSS. of the English version in the Bodleian, one in Sion College, and one in English verse in Pepys's collection. It was also translated by Wickliffe; and there were versions printed in London, in 1507 and 1509, by Julian Notary and Wynkyn de Worde, which ran through several editions (Panzi's *Annals*). The latest published before Mr. Jones's work was by Joseph Wilson in 1767. He says nothing of the age of his MS., but the following specimen from the prologue may not prove uninteresting:—

'It befel in the eighteenth year of the seigniory of Tiberius Cæsar, Emperor of Rome, and in the seigniory of Herod, who was King of Galilee, the 8th Kalend of April, which is the 25th day of March, the fourth year of the son of Velom, who was Counsellor of Rome, and *Olympias had been afore two hundred years and two*; at this time Joseph and Annas were lords above all justices of peace, mayors and Jews. Nicodemus, who was a worthy prince, did write this blessed history in Hebrew; and Theodosius the emperor did translate it out of Hebrew into Latin, and Bishop Turpin did translate it out of Latin into French, and hereafter did ensue the blessed history called the Gospel of Nicodemus.' The regard, indeed, in which this book was held in England will be understood from the fact that, in 1524, Erasmus acquaints us that he saw the Gospel of Nicodemus affixed to one of the columns of the cathedral of Canterbury.

Translations were also common in French, Italian, German, and Swedish. In the French MSS. and editions it is united with the old romance of *Perceforest, King of Great Britain*. There was also a Welsh translation (Lhuyd's *Archæologia*, p. 256), and the work was known to the Eastern Christians, and has been even supposed to be cited in the Coptic liturgy; but this has been shown by Ludolf to be a mistake, as the lesson is from the history of Nicodemus, in John iii.

Of the gospels no longer extant, we know

little more than that they once existed. We read in Irenæus, Epiphanius, Origen, Eusebius, and other ecclesiastical writers, of the Gospels of Eve or of Perfection, of Barnabas (ancient and modern), of Bartholomew, of Basilides, of Hesychius, of Judas Iscariot, of the Valentinians, of Apollos, of Cerinthus, of the Twelve Apostles, and several others. Some of these were derived from the Gnostics and other heretics; others, as the Gospel of Matthias, are supposed by Mill, Grabe, and most learned men to have been genuine gospels now lost. Those of which we have the fullest details are the *Gospel of the Egyptians* and that of the NAZARENES. This latter is most probably the same with that of the Hebrews, which was used by the Ebionites. It was supposed by St. Jerome to have been a genuine Gospel of St. Matthew, who, he says, wrote it in the Hebrew language and letters. He copied it himself from the original in the library of Cæsarea, translated it into Greek and Latin, and has given many extracts from it. Grabe conceived this gospel to have been composed by Jewish converts soon after our Lord's ascension, before the composition of the canonical Gospel of St. Matthew. Baronius, Grotius, Father Simon, and Du Pin, look upon it as the Gospel of St. Matthew—interpolated, however, by the Nazarenes. Baronius and Grabe think that it was cited by Ignatius, or the author of the Epistles ascribed to him. Others look upon it as a translation altered from the Greek of St. Matthew. Mr. Jones thinks that this Gospel was referred to by St. Paul in his Epistle to the Galatians. It is referred to by Hegesippus (Euseb. *Eccl. Hist.* iv. 22), Clemens Alexandrinus (*Strom.* ii. p. 280), Origen (*Comm. on John; Hom.* viii. *in Matt.*), and Eusebius (*Hist. Eccl.* iii. 25, 27, 39). Epiphanius (*Hær.* §§ 29, 30) acquaints us that it was held in great repute by the ancient Judaizing Christians, and that it began thus: 'It came to pass in the days of Herod king of Judæa that John came baptizing with the baptism of repentance in the river Jordan,' &c. It consequently wanted the genealogy and the two first chapters.

The GOSPEL OF THE EGYPTIANS is cited by Clemens Alexandrinus (*Strom.* iii. pp. 445, 452, 453, 465), Origen (*Hom. in Luc.* p. 1), Ambrose, Jerome (*Præf. to his Comm. on Matt.*), and Epiphanius (*Hæres.* lxii. § 2). Grabe, Mill, Du Pin, and Father Simon, who thought highly of this Gospel, looked upon it as one of the works referred to by St. Luke in the commencement of his Gospel. Mill ascribes its origin to the Essenes, and supposes this and the former Gospel to have been composed in or a little before A.D. 58. It is cited by the Pseudo-Clement (*Second Epistle to the Corinthians*, or Chevallier's Translation, 1833), who is generally supposed to have written not before the third century. (See Car. Chr. Schmidt's *Corpus omnium vet. Apocr. extra Biblia;* Kleuker, *De Apoc. N. T.;* Hencke, *De Pilati actis probab.;* W. L. Brunn, *De indole, ætate et usu libr. Apocr. vulgo inscripti Evangel. Nicodemi*, Berlin, 1794; Birch's *Auctarium*, Fasc. 1, Hafn. 1804. Hone's *Apocryphal N. T.*, London, 1820, which in its external form was designed to be an imitation of the English New Testament, is of no critical use. The *Orthodoxographa* of Grynæus, 7 vols. in 2, fol. Basil, 1569, of which there was formerly a copy in the British Museum, which exists there no longer; but there is a fine copy in Mr. Darling's valuable Clerical Library.)—W. W.

GOURD. [KIKAYON.]

GOZAN (גּוֹזָן; Sept. Γωζάν), a river of Media, to the country watered by which Tiglath-pileser first, and afterwards Shalmaneser, transported the captive Israelites (1 Chron. v. 26; 2 Kings xvii. 6). It is unnecessary to trouble the reader with antiquated conjectures concerning this river, as, since the appearance of Major Rennell's *Geography of Herodotus*, Lond. 1800 (which contains a section, xv., 'Concerning the disposal of the Ten Tribes of the Jews,' pp. 389-407), there has been scarcely a dissenting voice to *his* conclusion—that the Gozan is no other than the present Ozan, or, with the prefix, Kizzil-Ozan (Golden River), which is the principal river of that part of Persia that answers to the ancient Media. Everything in criticism or travel which has since transpired has tended to confirm this most happy conjecture. When Major Rennell wrote it was scarcely known so well as it is now, to what extent the Oriental Jews themselves connect the memories of the first captivity with the country through which the Kizzil-Ozan flows. This river rises eight or nine miles south-west of Sennah, in Kurdistan. It runs along the north-west frontier of Irak, and passes under the Kafulan Koh, or Mountain of Tigris, where it is met by the Karanku. These two rivers combined force a passage through the great range of Caucasan, and, during their course, form a junction with the Sharood. The collective waters, under the designation of Sifeed Rood or White River, so named from the foam occasioned by the rapidity of its current, flow in a meandering course through Ghilan to the Caspian Sea (Sir John Macdonald Kinneir's *Geograph. Memoir of the Persian Empire*, pp. 121, 122; Morier's *Second Journey*, p. 208; Ker Porter's *Travels*, i. 267). The present writer, in crossing the river in September, under the Kafulan Koh, by a bridge of three arches, found it there a low but rapid stream, flowing between well wooded banks, and in a deep channel which afforded manifest traces of its breadth and impetuosity when swollen by the periodical rains and by the drainage of the mountains.

GRAPE. [VINE.]

GRASS. [DESHA and CHAZIR.]

GRASSHOPPER (חָגָב). The creature denoted by this Hebrew word so evidently belongs to the class of '*flying* creeping things' (Lev. xi. 21, 22), that the *grasshopper*, according to the common acceptation of the word, can scarcely be the proper translation. Other reasons render it most probable that *a species of locust* is intended. It is, therefore, referred to the general English word [LOCUST], under which the various species will be considered which are not already treated of under the Hebrew names [CHARGOL; CHASIL].

J. F. D.

GRAVE. [BURIAL.]

GREECE. The relations of the Hebrews with the Greeks were always of a distant kind, until the Macedonian conquest of the East: hence in the Old Testament the mention of the Greeks is naturally rare. It appears by Cruden's *Concord-*

ence that 'Tubal and Javan,' in connection, are named four times, Dan and Javan once (Ezek. xxvii. 19), and Javan, translated by us Greece and Greeks, five times, of which three are in the book of Daniel. Of these passages, that which couples Dan and Javan is generally referred to a different tribe [see JAVAN]; in the rest Javan is understood of Greece or its people. The Greek nation had a broad division into two races, Dorians and Ionians: of whom the former seem to have long lain hid in continental parts, or on the western side of the country, and had a temperament and institutions more approaching to the Italic. The Ionians, on the contrary, retained many Asiatic usages and tendencies, witnessing that they had never been so thoroughly cut off as the Dorians from Oriental connection. When afterwards the Ionic colonies in Asia Minor rose to eminence, the Ionian race, in spite of the competition of the half Doric Æolians, continued to attract most attention in Asia; and it is not wonderful that the Ionian name (for *Javan* is the same word as Ἰάων) should have maintained its extensive application in Oriental usage. Just so in the 'Persæ' of the tragic poet Æschylus, the Persians are made to style all the Greeks Ἰάονες, *i. e.* Javan.

The few dealings of the Greeks with the Hebrews seem to have been rather unfriendly, to judge by the notice in Zech. ix. 13. In Joel iii. 6, the Tyrians are reproached for selling the children of Judah and Jerusalem to the Grecians: but at what time, and in what circumstances, must depend on the date assigned to the book of Joel [see JOEL]. With the Greeks of Cyprus or Chittim, the Hebrews were naturally better acquainted; and this name, it would seem, might easily have extended itself in their tongue to denote the whole Greek nation. Such at least is the most plausible explanation of its use in 1 Macc. i. 1, and viii. 1.

The Greeks were eminent for their appreciation of beauty in all its varieties: indeed their religious creed owed its shape mainly to this peculiarity of their mind; for their logical acuteness was not exercised on such subjects until quite a later period. The puerile or indecent fables of the old mythology may seem to a modern reader to have been the very soul of their religion; but to the Greek himself these were a mere accident, or a vehicle for some embodiment of beauty. He thought little whether a legend concerning Artemis or Apollo was true, but much whether the dance and music celebrating the divinity were solemn, beautiful, and touching. The worship of Apollo, the god of youth and beauty, has been regarded as characterizing the Hellenic in contrast with the older Pelasgian times; nor is the fact without significance, that the ancient temple and oracle of Jupiter at Dodona fell afterwards into the shade in comparison with that of Apollo at Delphi. Indeed the Dorian Spartans and the Ionian Athenians alike regarded Apollo as their tutelary god, who was Ἀπόλλων πατρῷος at Athens, and Ἀπόλλων Καρνεῖος at Amyclæ. Whatever the other varieties of Greek religious ceremonies, no violent or frenzied exhibitions arose out of the national mind; but all such *orgies* (as they were called) were imported from the East, and had much difficulty in establishing themselves on Greek soil. Quite at a late period the managers of orgies were evidently regarded as mere jugglers of not a very reputable kind (see Demosth. *De Coronâ*, § 79, p. 313); nor do the Greek States, as such, appear to have patronized them. On the contrary, the solemn religious processions, the sacred games and dances, formed a serious item in the public expenditure; and to be permanently exiled from such spectacles would have been a moral death to the Greeks. Wherever they settled they introduced their native institutions, and reared temples, gymnasia, baths, porticoes, sepulchres, of characteristic simple elegance. The morality and the religion of such a people naturally were alike superficial; nor did the two stand in any close union. Bloody and cruel rites could find no place in their creed, because faith was not earnest enough to endure much self-abandonment. Religion was with them a sentiment and a taste rather than a deep-seated conviction. On the loss of beloved relatives they felt a tender and natural sorrow, but unclouded with a shade of anxiety concerning a future life. Through the whole of their later history, during Christian times, it is evident that they had little power of remorse, and little natural firmness of conscientious principle: and, in fact, at an earlier and critical time, when the intellect of the nation was ripening, an atrocious civil war, that lasted for twenty-seven years, inflicted a political and social demoralization, from the effects of which they could never recover. Besides this, their very admiration of beauty, coupled with the degraded state of the female intellect, proved a frightful source of corruption, such as no philosophy could have adequately checked. From such a nation then, whatever its intellectual pretensions, no healthful influence over its neighbours could flow, until other and higher inspiration was infused into its sentiment.

Among the Greeks the arts of war and peace were carried to greater perfection than among any earlier people. In navigation they were little behind the Tyrians and Carthaginians; in political foresight they equalled them; in military science, both by sea and land, they were decidedly their superiors; while in the power of reconciling subject-foreigners to the conquerors and to their institutions, they perhaps surpassed all nations of the world. Their copious, cultivated, and flexible tongue carried with it no small mental education to all who learned it thoroughly; and so sagacious were the arrangements of the great Alexander throughout his rapidly acquired Asiatic empire, that in the twenty years of dreadful war between his generals which followed his death, no rising of the natives against Greek influence appears to have been thought of. Without any change of population adequate under other circumstances to effect it, the Greek tongue and Greek feeling spread far and sank deep through the Macedonian dominions. Half of Asia Minor became a new Greece; and the cities of Syria, North Palestine, and Egypt, were deeply imbued with the same influence. Yet the purity of the Hellenic stream was various in various places; and some account of the mixture it underwent will be given in the Article HELLENISTS.

When a beginning had been made of preaching Christianity to the Gentiles, Greece immediately became a principal sphere for missionary

exertion. The vernacular tongue of the Hellenistic Christians was understood over so large an extent of country, as almost of itself to point out in what direction they should exert themselves. The Grecian cities, whether in Europe or Asia, were the peculiar field for the Apostle Paul; for whose labours a superintending Providence had long before been providing, in the large number of devout Greeks who attended the Jewish synagogues. Greece Proper was divided by the Romans into two provinces, of which the northern was called Macedonia, and the southern Achaia (as in 2 Cor. ix. 2, &c.); and we learn incidentally from Acts xviii. that the pro-consul of the latter resided at Corinth. To determine the exact division between the provinces is difficult; nor is the question of any importance to a Biblical student. Achaia, however, had probably very nearly the same frontier as the kingdom of modern Greece, which is limited by a line reaching from the gulf of Volo to that of Arta, in great part along the chain of Mount Othrys. Of the cities celebrated in Greek history, none are prominent in the early Christian times except Corinth. Laconia, and its chief town Sparta, had ceased to be of any importance: Athens was never eminent as a Christian church. In Macedonia were the two great cities of Philippi and Thessalonica (formerly called Therme); yet of these the former was rather recent, being founded by Philip the Great; the latter was not distinguished above the other Grecian cities on the same coast. Nicopolis, on the gulf of Ambracia (or Arta), had been built by Augustus, in memory of his victory at Actium, and was, perhaps, the limit of Achaia on the western coast (Tacitus, *Annal.* ii. 53). It had risen into some importance in St. Paul's days, and, as many suppose, it is to this Nicopolis that he alludes in his epistle to Titus. (See further under ACHAIA and NICOPOLIS.)—F. W. N.

GRINDING. [MILL.]

GUEST. [HOSPITALITY.]

H.

HABAKKUK (חֲבַקּוּק), one of the most distinguished Jewish prophets, who flourished about 610 B.C., the name descending in the form of שַׁעְרוּר, from חבק, *amplecti*, and denoting, as observed by Jerome, as well a 'favourite' as a 'struggler.' Abarbanel thinks that in the latter sense it has allusion to the patriotic zeal of the prophet, fervently contending for the welfare of his country: but other prophets did the same; and in the first and less distant signification, the name would be one like Theophilus, 'a friend of God,' which his parents may have given him for a good omen. The Greeks, not only the Septuagint translators but the fathers of the Church, probably to make it more sonorous, corrupt it into Ἀραβακούκ, Ἀραβακούρω, or as Jerome writes, Ἀβακούρω, and only one Greek copy, found in the library of Alcalá in Spain, has Ἀββαλούκ, which seems to be a recent correction made to suit the Hebrew text. Of this prophet's birth-place, parentage, and life we have only apocryphal and conflicting accounts. The Pseudo-Epiphanius (*De Vitis Prophet.* Opp. tom. ii. 18, p. 247) states that he was of the tribe of Simeon, and born in a place called Βηδζοχὴρ (*al.* Βιδζεχάρ); that he fled to Ostrarine when Nebuchadnezzar attacked Jerusalem, but afterwards returned home, and died two years before the return of his countrymen. But rabbinical writers assert that he was of the tribe of Levi, and name different birth-places (Huetius, *Dem. Evang.* Prop. iv. p. 508). In the apocryphal appendix to Daniel, in the story of Bel and the Dragon, we are told that an angel seized Habakkuk by the hair, when he was in Judæa carrying food to his reapers in the field, and transported him through the air to the lions' den in Babylon, where Daniel then lay; and that, after having provided the latter with victuals, he was the same day carried back to his own country in like manner. Eusebius notices that in his time the tomb of Habakkuk was shown in the town of Ceila, in Palestine; and this is repeated also by Nicephorus (*Hist. Eccles.* xii. 48), and Sozomen (vii. 29); still there are other writers who name different places where, according to common opinion, he had been buried (Carpzov, *Introd. ad libros canonicos V. T.*, p. 402).

A full and trustworthy account of the life of Habakkuk would explain his imagery, and many of the events to which he alludes; but since we have no information on which we can depend, nothing remains but to determine from the book itself its historical basis and its age. Now, we find that in chap. i. the prophet sets forth a vision, in which he discerned the injustice, violence, and oppression committed in his country by the rapacious and terrible Chaldæans, whose oppressions he announces as a divine retribution for sins committed; consequently he wrote in the Chaldæan period, shortly before the invasion of Nebuchadnezzar which rendered Jehoiakim tributary to the king of Babylon (2 Kings xxiv. 1). When he wrote the first chapter of his prophecies, the Chaldæans could not yet have invaded Palestine, otherwise he would not have introduced Jehovah saying (i. 5), 'I *will work* a work in your days, which ye will not believe, though it be told you;' (ver. 6) 'for I raise up the Chaldæans, that bitter and hasty nation, which *shall march* through the breadth of the land to possess the dwelling-places that are not theirs.' From ver. 12 it is also evident that the ruin of the Jews had not then been effected; it says, 'the Lord ordained them for judgment, established them for correction.' Agreeably to the general style of the prophets, who to lamentations and announcements of divine punishment add consolations and cheering hopes for the future, Habakkuk then proceeds in the second chapter to foretell the future humiliation of the conquerors, who plundered so many nations. He also there promulgates a vision of events shortly to be expected; (ver. 3) 'the vision is yet for an appointed time, but at the end *it shall speak*, and not lie; though it tarry, wait for it, because it *will surely come;* it will not tarry.' This is succeeded in the third chapter by an ode, in which the prophet celebrates the deliverances wrought by the Almighty for his people in times past, and prays for a similar interference now to mitigate the coming distresses of the nation; which he goes on to describe, representing the land as already waste and desolate, and yet giving encouragement to hope for a return

of better times. Some interpreters are of opinion that ch. ii. was written in the reign of Jehoiachin, the son of Jehoiakim (2 Kings xxiv. 6), after Jerusalem had been besieged and conquered by Nebuchadnezzar, the king made a prisoner, and, with many thousands of his subjects, carried away to Babylon; none remaining in Jerusalem, save the poorest class of the people (2 Kings xxiv. 14). But of all this nothing is said in the book of Habakkuk, nor even so much as hinted at; and what is stated of the violence and injustice of the Chaldæans does not imply that the Jews had already experienced it. The prophet distinctly mentions that he sets forth what he had discerned in a vision, and he, therefore, speaks of events to be expected and coming. It is also a supposition equally gratuitous, according to which some interpreters refer ch. iii. to the period of the last siege of Jerusalem, when Zedekiah was taken, his sons slain, his eyes put out, the walls of the city broken down, and the temple burnt (2 Kings xxv. 1-10). There is not the slightest allusion to any of these incidents in the third chapter of Habakkuk; and from the 16th verse it appears, that the destroyer is only coming, and that the prophet expresses fears, not of the entire destruction of the city, much less of the downfall of the state, but only of the desolation of the country. It thus appears beyond dispute, that Habakkuk prophesied in the beginning of the reign of Jehoiakim, about the year stated above. Carpzov (*Introductio ad libr. canon. V. T.*, pp. 79, 410) and Jahn (*Introd. in libros sacros V. T.*, ii. § 120) refer our prophet to the reign of Manasseh, thus placing him thirty odd years earlier; but at that time the Chaldæans had not as yet given just ground for apprehension, and it would have been injudicious in Habakkuk prematurely to fill the minds of the people with fear of them. Some additional support to our statement of the age of this book is derived from the tradition, reported in the apocryphal appendix to Daniel and by the Pseudo-Epiphanius, that Habakkuk lived to see the Babylonian exile; for if he prophesied under Manasseh he could not have reached the exile at an age under 90 years; but if he held forth early in the reign of Jehoiakim he would have been only 50 odd years old at the time of the destruction of Jerusalem and of the exile. He was, then, a contemporary of Jeremiah, but much younger, as the latter made his first appearance in public as early as B.C. 629, in the thirteenth year of Josiah. Ranitz (*Introductio in Hab. Vatic.* pp. 24, 59), Stirkel (*Prolog. ad interpr. tertii cap. Hab.* pp. 22, 27), and De Wette (*Lehrbuch der Historisch-kritischen Einleit.* Berlin, 1840, p. 338) justly place the age of Habakkuk before the invasion of Judæa by the Chaldæans.

The style of this prophet has been always much admired. Lowth (*De Poesi Hebræor.* p. 287) says: 'Poeticus est Habaccuci stylus; sed maxime in oda, quæ inter absolutissimas in eo genere merito numerari potest.' Eichhorn, De Wette, and Rosenmüller are loud in their praise of Habakkuk's style; the first giving a detailed and animated analysis of the construction of his prophecies (*Einleitung in das A. T.* iii. p. 333). He equals the most eminent prophets of the Old Testament—Joel, Amos, Nahum, Isaiah; and the ode in ch. iii. may be placed in competition with Ps. xviii. and lxviii. for originality and sublimity. His figures are all great, happily chosen, and properly drawn out. His denunciations are terrible, his derision bitter, his consolation cheering. Instances occur of borrowed ideas (ch. iii. 19, comp. Ps. xviii. 34; ch. ii. 6, comp. Isa. xiv. 7; ch. ii. 14, comp. Isa. xi. 9); but he makes them his own in drawing them out in his peculiar manner. With all the boldness and fervour of his imagination, his language is pure and his verse melodious. Eichhorn, indeed, gives a considerable number of words which he considers to be peculiar to this prophet, and supposes him to have formed new words, or altered existing ones, to sound more energetic or feeble, as the sentiments to be expressed might require: but his list needs sifting, as De Wette observes (*Einleitung*, p. 339); and קיקלון, ch. ii. 16, is the only unexceptionable instance. The ancient catalogues of canonical books of the Old Testament do not, indeed, mention Habakkuk by name; but they must have counted him in the twelve minor prophets, whose numbers would otherwise not be full. In the New Testament some expressions of his are introduced, but his name is not added (Rom. i. 17; Gal. iii. 11; Heb. x. 38, comp. Hab. ii. 4; Acts xiii. 40, 41, comp. Hab. i. 5).

The best auxiliaries, ancient and modern, to the interpretation of the book of Habakkuk are the following:—

1. Introductory works: T. C. Friederich, *Historisch-kritischer Versuch über Hab. Zeitalter und Schriften*, in Eichhorn's *Allg. Biblioth. des Bibl. Lit.* x. 379-400; A. C. Ranitz, *Introductio in Hab. Vaticinia*, Lipsiæ, 1808; Hänlein, *Symb. Crit. ad Interp. Vaticin. Hab.*, Erlangæ, 1795.

2. General commentaries: Abarbanel, *Rabbinicus Comment. in Hab.*, *Latine redditus a Diderico Sprechero*, Helmst. 1790; D. Chytræi *Lectiones in Proph. Hab.*, in his *Opp.* t. ii.; Kofod, *Commentarius crit. atque exeget.*, Götting. et Lips. 1792; I. A. Tingstadii *Animadv. phil. et crit.* Upsal. 1795; 4.—Rosenmüller, *Scholia in V. T.* vol. vi.

3. Translations with notes, explanatory and critical: S. F. G. Wahl (Hanover, 1790), G. C. Horst (Gotha, 1798), and K. M. Tusti (Leipzig, 1721).

4. Commentaries on single chapters:—The first and second chapters are interpreted by G. A. Ruperti in the *Commentatt. Theol.* ed. Velthusen, Kuinoel et Ruperti, iii. 405, sq. The third chapter is explained by G. Perschke (Frankfort, 1777), G. A. Schroeder (Gröning, 1781), Oh. F. Schnurrer (Tüb. 1786; also in his *Dissertat. phil. crit.* p. 342), and by Moerner (Upsalæ, 1791).—J. V. H.

HA-BARKANIM, or BARKANIM. [THORNS.]
HABAZZELETH. [CHABAZZELETH.]
HABERGEON. [ARMS; ARMOUR.]

HABOR (חָבֹר; Sept. Ἀβώρ), or rather CHABOR, a city or country of Media, to which portions of the ten tribes were transported, first by Tiglath-pileser, and afterwards by Shalmaneser (2 Kings xvii. 6; xviii. 11). It is thought by some to be the same mountainous region between Media and Assyria, which Ptolemy (*Geog.* vi. 1) calls Chaboras (Χαβώρας). This notion has the name, and nothing but the name, in its favour. Habor was by the river Gozan; and as we have accepted Major Rennell's conclusion, that Gozan was the

present Kizzil-Ozan [Gozan], we are bound to follow him in fixing the position of Habor at the town of Abhar, which is situated on a branch of that river, and has the reputation of being very ancient. At this place Mr. Morier found ruins composed of large sun-dried bricks compacted with straw, like some of those found at Babylon. As this kind of construction is an infallible sign of remote antiquity, it so far affords a most important corroboration of Major Rennell's conjecture.

HADAD (הֲדַד; Sept. 'Αδάδ) is equivalent to Adad, the name of the chief deity of the Syrians [Adad], and borne, with or without additions, as a proper name, or more probably as a title, like 'Pharaoh' in Egypt, by several of the kings of Southern Syria.

1. Hadad, king of Edom, who defeated the Midianites in the intervening territory of Moab (Gen. xxxvi. 35; 1 Chron. i. 46). This is the only one of the ancient kings of Edom whose exploits are recorded by Moses. Another king of Edom of the same name is mentioned in 1 Chron. i. 51.

2. Hadad, king of Syria, who reigned in Damascus at the time that David attacked and defeated Hadad-ezer, king of Zobah, whom he marched to assist, and shared in his defeat. This fact is recorded in 2 Sam. viii. 5, but the name of the king is not given. It is supplied, however, by Josephus (*Antiq.* vii. 5. 2), who reports, after Nicolas of Damascus, that he carried succours to Hadadezer as far as the Euphrates, where David defeated them both.

3. Hadad, a young prince of the royal race of Edom, who, when his country was conquered by David, contrived, in the heat of the massacre committed by Joab, to escape with some of his father's servants, or rather was carried off by them into the land of Midian. Thence Hadad went into the desert of Paran, and eventually proceeded to Egypt. He was there most favourably received by the king, who assigned him an estate and establishment suited to his rank, and even gave him in marriage the sister of his own consort, by whom he had a son, who was brought up in the palace with the sons of Pharaoh. Hadad remained in Egypt till after the death of David and Joab, when he returned to his own country in the hope of recovering his father's throne (1 Kings xi. 14-22). The Scripture does not record the result of this attempt further than by mentioning him as one of the troublers of Solomon's reign, which implies some measure of success. After relating these facts the text goes on to mention another enemy of Solomon, named Rezin, and then adds (ver. 25), that this was 'besides the mischief that Hadad did; and he abhorred Israel and reigned over Syria.' On this point the present writer may quote what he has elsewhere stated—'Our version seems to make this apply to Rezin; but the Septuagint refers it to Hadad, reading אדום *Edom*, instead of ארם *Aram* or *Syria*, and the sense would certainly be improved by this reading, inasmuch as it supplies an apparent omission; for without it we only know that Hadad left Egypt for Edom, and not how he succeeded there, or how he was able to trouble Solomon. The history of Hadad is certainly very obscure. Adopting the Septuagint reading, some conclude that Pharaoh used his interest with Solomon to allow Hadad to reign as a tributary prince, and that he ultimately asserted his independence. Josephus, however, seems to have read the Hebrew as our version does, "Syria" not "Edom." He says that Hadad, on his arrival in Edom, found the territory too strongly garrisoned by Solomon's troops to afford any hope of success. He therefore proceeded with a party of adherents to Syria, where he was well received by Rezin, then at the head of a band of robbers, and with his assistance seized upon part of Syria and reigned there. If this be correct, it must have been a different part of Syria from that in which Rezin himself reigned, for it is certain, from verse 24, that he (Rezin) did reign in Damascus. Carrieres supposes that Hadad reigned in Syria after the death of Rezin; and it might reconcile apparent discrepancies, to suppose that two kingdoms were established (there were more previously), both of which, after the death of Rezin, were consolidated under Hadad. That Hadad was really king of Syria seems to be rather corroborated by the fact, that every subsequent king of Syria is, in the Scripture, called Ben-Hadad, "son of Hadad," and in Josephus simply Hadad; which seems to denote that the founder of the dynasty was called by this name. We may observe that, whether we here read Aram or Edom, it must be understood as applying to Hadad, not to Rezin' (*Pictorial Bible*, on 2 Kings xi. 14).

HADADEZER (הֲדַדְעֶזֶר, *Hadad-helped*; Sept. 'Αδρααζάρ), or Hadadrezer, king of Zobah, a powerful monarch in the time of David, and the only one who seems to have been in a condition seriously to dispute with him the predominancy in south-western Asia. He was defeated by the Israelites in the first campaign (B.C. 1032) in the neighbourhood of the Euphrates, with a great loss of men, war-chariots, and horses, and was despoiled of many of his towns (2 Sam. viii. 3; 1 Chron. xviii. 3). This check not only impaired, but destroyed his power. A diversion highly serviceable to him was made by a king of Damascene-Syria (whom the Scripture does not name, but who is the same with Hadad, 3), who, coming to his succour, compelled David to turn his arms against him, and abstain from reaping all the fruits of his victory (2 Sam. x. 6, sq.; 1 Chron. xix. 6, sq.). The breathing-time thus afforded Hadadezer was turned by him to such good account that he was able to accept the subsidies of Hanun, king of the Ammonites, and to take a leading part in the confederacy formed by that monarch against David. The first army brought into the field was beaten and put to flight by Abishai and Joab; but Hadadezer, not yet discouraged, went into the countries east of the Euphrates, and got together the forces of all his allies and tributaries, which he placed under the command of Shophach, his general. To confront so formidable an adversary, David took the field in person, and in one great victory so completely broke the power of Hadadezer, that all the small tributary princes seized the opportunity of throwing off his yoke, of abandoning the Ammonites to their fate, and of submitting quietly to David, whose power was thus extended to the Euphrates.

HADAR. [Etz-hadar.]

HADAS (הֲדַס), always translated 'myrtle,' occurs in several passages of the Old Testament,

as in Isaiah xli. 19; lv. 13; Neh. viii. 15; Zech. i. 8, 10, 11. The Hebrew word *hadas* is identical with the Arabic هدس *hadas*, which in the dialect of Arabia Felix signifies the myrtle-tree (Richardson's *Pers. and Arabic Dict.*). The myrtle is, moreover, known throughout Eastern countries, and is described in Arabic works under the name آس *As*. The present writer found the berries of the myrtle sold in the bazaars of India under this name (*Illust. Himal. Bot.* p. 217). Esther is supposed by Simonis (*Bibl. Cabinet*, xi. 262) to be a compound of *As* and *tur*, and so to mean a fresh myrtle; and hence it would appear to be very closely allied in signification to *Hadassah*, the original name of Esther. Almost all translators unite in considering the myrtle as intended in the above passages; the Sept. has μυρσίνην, and the Vulgate *myrtus*.

The myrtle has from the earliest periods been highly esteemed in all the countries of the south of Europe, and is frequently mentioned by the poets: thus Virgil (Ecl. ii. 54)—

Et vos, O lauri, carpam, et te, proxima myrte:
Sic positæ quoniam suaves miscetis odores.

By the Greeks and Romans it was dedicated to Venus, and employed in making wreaths to crown lovers, but among the Jews it was the emblem of justice. The note of the Chaldee Targum on the name Esther, according to Dr. Harris, is, 'they call her Hadassah because she was *just*, and those that are just are compared to *myrtles*.'

332.

The repute which the myrtle enjoyed in ancient times it still retains, notwithstanding the great accession of ornamental shrubs and flowers which has been made to the gardens and greenhouses of Europe. This is justly due to the rich colouring of its dark green and shining leaves, contrasted with the white starlike clusters of its flowers, affording in hot countries a pleasant shade under its branches, and diffusing an agreeable odour from its flowers or bruised leaves. It is, however, most agreeable in appearance when in the state of a shrub, for when it grows into a tree, as it does in hot countries, the traveller looks under instead of over its leaves, and a multitude of small branches are seen deprived of their leaves by the crowding of the upper ones. This shrub is common in the southern provinces of Spain and France, as well as in Italy and Greece; and also on the northern coast of Africa, and in Syria. The poetical celebrity of this plant had, no doubt, some influence upon its employment in medicine, and numerous properties are ascribed to it by Dioscorides (i. 127). It is aromatic and astringent, and hence, like many other such plants, forms a stimulant tonic, and is useful in a variety of complaints connected with debility. Its berries were formerly employed in Italy, and still are so in Tuscany, as a substitute for spices, now imported so plentifully from the far East. A wine was also prepared from them, which was called myrtidanum, and their essential oil is possessed of excitant properties. In many parts of Greece and Italy the leaves are employed in tanning leather. The myrtle, possessing so many remarkable qualities, was not likely to have escaped the notice of the sacred writers, as it is a well-known inhabitant of Judæa. Hasselquist and Burckhardt both notice it as occurring on the hills around Jerusalem. It is also found in the valley of Lebanon. Capt. Light, who visited the country of the Druses in 1814, says, he 'again proceeded up the mountain by the side of a range of hills abounding with myrtles in full bloom, that spread their fragrance round,' and, further on, 'we crossed through thickets of myrtle.' Irby and Mangles (p. 222) describe the rivers from Tripoli towards Galilee as generally pretty, their banks covered with the *myrtle*, olive, wild vine, &c. Savary, as quoted by Dr. Harris, describing a scene at the end of the forest of Platanea, says, 'Myrtles, intermixed with laurel-roses, grow in the valleys to the height of ten feet. Their snow-white flowers, bordered with a purple edging, appear to peculiar advantage under the verdant foliage. Each myrtle is loaded with them, and they emit perfumes more exquisite than those of the rose itself. They enchant every one, and the soul is filled with the softest sensations.'—J. F. R.

HADASSAH. [ESTHER.]

HADES, a Greek word (ᾅδης) by which the Septuagint translates the Hebrew שׁאול *sheol*, denoting the abode or world of the dead, in which sense it occurs frequently in the New Testament, where it is usually rendered 'hell' in the English version. The word *hades* means literally *that which is in darkness*. In the classical writers it is used to denote *Orcus*, or the infernal regions. According to the notions of the Jews, *sheol* or *hades* was a vast receptacle where the souls of the dead existed in a separate state until the resurrection of their bodies. The region of the blessed during this interval, or the inferior paradise, they supposed to be in the upper part of this receptacle; while beneath was the abyss or *gehenna* (Tartarus), in which the souls of the wicked were subjected to punishment.

The question whether this is or is not the doctrine of the Scriptures is one of much im-

portance, and has, first and last, excited no small amount of discussion. It is a doctrine received by a large portion of the nominal Christian church; and it forms the foundation of the Roman Catholic doctrine of Purgatory, for which there would be no ground but for this interpretation of the word *hades*.

The question therefore rests entirely upon the interpretation of this word. At the first view the classical signification would seem to support the sense above indicated. On further consideration, however, we are referred back to the Hebrew *sheol*: for the Greek term did not come to the Hebrews from any classical source, or with any classical meanings, but through the Septuagint as a translation of their own word; and whether correctly translating it or not is a matter of critical opinion. The word *hades* is therefore in nowise binding upon us in any *classical* meaning which may be assigned to it. The real question therefore is, what is the meaning which *sheol* bears in the Old Testament, and *hades* in the New? A careful examination of the passages in which these words occur will probably lead to the conclusion, that they afford no real sanction to the notion of an intermediate place of the kind indicated, but are used by the inspired writers to denote *the grave*—the resting place of the bodies both of the righteous and the wicked; and that they are also used to signify *hell*, the abode of miserable spirits. But it would be difficult to produce any instance in which they can be shown to signify the abode of the spirits of just men made perfect, either before or after the resurrection.

In the great majority of instances *sheol* is in the Old Testament used to signify *the grave*, and in most of these cases is so translated in the Authorized Version. It can have no other meaning in such texts as Gen. xxxvii. 35; xlii. 38; 1 Sam. ii. 6; 1 Kings ii. 6; Job xiv. 13; xvii. 13, 16; and in numerous other passages in the writings of David, Solomon, and the prophets. But as the grave is regarded by most persons, and was more especially so by the ancients, with awe and dread, as being the region of gloom and darkness, so the word denoting it soon came to be applied to that more dark and gloomy world which was to be the abiding place of the miserable. Where our translators supposed the word to have this sense, they rendered it by 'hell.' Some of the passages in which this has been done may be doubtful; but there are others of which a question can scarcely be entertained. Such are those (as Job xi. 8; Ps. cxxxix. 8; Amos ix. 3) in which the word denotes the opposite of heaven, which cannot be the grave, nor the general state or region of the dead, but hell. Still more decisive are such passages as Ps. ix. 17; Prov. xxiii. 9; in which *sheol* cannot mean any place, in this world or the next, to which the righteous as well as the wicked are sent, but the penal abode of the wicked as distinguished from and opposed to the righteous. The only case in which such passages could by any possibility be supposed to mean the grave, would be if the grave—that is, extinction—were the *final* doom of the unrighteous.

In the New Testament the word ᾅδης is used in much the same sense as שאול in the Old, except that in a less proportion of cases can it be construed to signify 'the grave.' There are still, however, instances in which it is used in this sense, as in Acts ii. 31; 1 Cor. xv. 55; but in general the *hades* of the New Testament appears to be no other than the world of future punishments (*e. g.* Matt. xi. 23; xvi. 18; Luke xvi. 23).

The principal arguments for the intermediate *hades*, as deduced from Scripture, are founded on those passages in which things 'under the earth' are described as rendering homage to God and the Saviour (Philip. ii. 10; Rev. v. 13, &c.) If such passages, however, be compared with others (as with Rom. xiv. 10, 11, &c.), it will appear that they must refer to the day of judgment, in which every creature will render some sort of homage to the Saviour; but *then* the bodies of the saints will have been already raised, and the intermediate region, if there be any, will have been deserted.

One of the seemingly strongest arguments for the opinion under consideration is founded on 1 Pet. iii. 19, in which Christ is said to have gone and 'preached to the spirits in prison.' These spirits in prison are supposed to be the holy dead—perhaps the virtuous heathen—imprisoned in the intermediate place, into which the soul of the Saviour went at death, that he might preach to them the Gospel. This passage must be allowed to present great difficulties. The most intelligible meaning suggested by the context is, however, that Christ by his spirit preached to those who in the time of Noah, while the ark was preparing, were disobedient, and whose spirits are *now* in prison, abiding the general judgment. The prison is doubtless *hades*, but what *hades* is must be determined by other passages of Scripture; and, whether it is the grave or hell, it is still a prison for those who yet await the judgment-day. This interpretation is in unison with other passages of Scripture, whereas the other is conjecturally deduced from this single text.

Another argument is deduced from Rev. xx. 14, which describes 'death and *hades*' as 'cast into the lake of fire' at the close of the general judgment—meaning, according to the advocates of the doctrine in question, that *hádes* should then cease as an intermediate place. But this is also true if understood of the grave, or of the general intermediate *condition* of the dead, or even of hell, as once more and for ever reclaiming what it had temporarily yielded up for judgment—just as we every day see criminals brought from prison to judgment, and after judgment returned to the prison from which they came.

It is further urged, in proof of Hades being an intermediate place other than the grave, that the Scriptures represent the happiness of the righteous as incomplete till after the resurrection. This must be admitted; but it does not thence follow that their souls are previously imprisoned in the earth, or in any other place or region corresponding to the Tartarus of the heathen. Although at the moment of death the disembodied spirits of the redeemed ascend to heaven, and continue there till the resurrection, it is very possible that their happiness shall be incomplete until they have received their glorified bodies from the tomb, and entered upon the full rewards of eternity.

A view supported by so little force of Scripture, seems unequal to resist the contrary evidence which may be produced from the same source, and which it remains briefly to indicate. The effect of this

is to show that the souls of the redeemed are described as proceeding, after death, at once to heaven—*the place* of final happiness, and those of the unredeemed to *the place* of final wretchedness.

In Heb. vi. 12, the righteous dead are described as being in actual inheritance of the promises made to the fathers. Our Saviour represents the deceased saints as already, before the resurrection (for so the context requires), 'like unto the angels,' and 'equal to the angels' (Matt. xxii. 30; Luke xx. 36); which is not very compatible with their imprisonment even in the happier region of the supposed Hades. Our Lord's declaration to the dying thief—'This day shalt thou be with me in Paradise' (Luke xxiii. 43), has been urged on both sides of the argument; but the word is here not Hades, but Paradise, and no instance can be produced in which the paradise beyond the grave means anything else than that 'third heaven,' that 'paradise' into which the Apostle was caught up, and where he heard 'unutterable things' (2 Cor. xii. 2, 4). In the midst of that paradise grows the mystic 'tree of life' (Rev. ii. 7), which the same writer represents as growing near the throne of God and the Lamb (xxii. 2). In Eph. iii. 15, the Apostle describes the whole church of God as being at present in heaven or on earth. But, according to the view under consideration, the great body of the church would be neither in heaven nor on earth, but in Hades—the intermediate place. In Heb. xii. 21-24, we are told that in the city of the living God dwell not only God himself, the judge of all, and Jesus, the mediator of the new covenant, and the innumerable company of angels, but also 'the spirits of just men made perfect'—all dwelling together in the same holy and happy place. To the same effect, but, if possible, still more conclusive, are the various passages in which the souls of the saints are described as being, when absent from the body, present with Christ in heaven (comp. 2 Cor. v. 1-8; Philip. i. 23; 1 Thess. v. 10). To this it is scarcely necessary to add the various passages in the Apocalyptic vision, in which St. John beheld, as inhabitants of the highest heaven, around the throne of God, myriads of redeemed souls, even before the resurrection (Rev. v. 9; vi. 9; vii. 9; xiv. 1, 3). Now the 'heaven' of these passages cannot be the place to which the term Hades is ever applied, for that word is never associated with any circumstances or images of enjoyment or happiness [HEAVEN].

As these arguments seem calculated to disprove the existence of the more favoured region of the alleged intermediate place, a similar course of evidence militates with equal force against the existence of the more penal region of the same place. It is admitted by the staunchest advocates for the doctrine of an intermediate place, that he souls of the wicked, when they leave the body, go immediately into punishment. Now the Scripture knows no place of punishment after death but that which was prepared for the devil and his angels. This place they *now* inhabit; and this is the place to which, after judgment, the souls of the condemned will be consigned (comp. 2 Pet. ii. 4; Matt. xxv. 41). This verse of Peter is the only one in Scripture in which any reference to the word Tartarus occurs: here then, if anywhere, we should find that intermediate place corresponding to the Tartarus of the heathen, from whom the word is borrowed. But from the other text we can be quite certain that the Tartarus of Peter is no other than the hell which is to be the final, as it is, in degree, the present doom of the wicked. That this hell is Hades is readily admitted, for the course of the argument has been to show that Hades is hell, whenever it is not the grave. 'Whether the righteous and the wicked, after the judgment, will go literally to the same places in which they were before situated, it is not material to inquire. But, both before and after the judgment, the righteous will be in the same place with their glorified Saviour and his holy angels; and this will be heaven: and before and after the judgment the wicked will be in the same place with the devil and his angels; and this will be hell' (Dr. Enoch Pond, *On the Intermediate Place*, in *American Biblical Repository*, for April, 1841, whom we have here chiefly followed: comp. Knapp's *Christian Theology*, § 104; Meyer, *De Notione Orci ap. Hebræos*, Lub. 1793; Bahrens, *Freimüthigé Unterss. über d. Orkus d. Hebraer*, Halle, 1786).

The notion repelled in this article was entertained by Justin Martyr, Irenæus, Tertullian, and many other of the early Christian fathers. This, however, proves nothing in its favour, as the same notion was common among the Jews themselves, in and before the time of Christ. It may even have been entertained by the Seventy when they translated the Hebrew *sheol* by the Greek *hades*. The question connected with Hades has indirectly brought under view two of the three notions respecting the state of the soul after death. The third notion is that of those who hold that the soul is in a perfectly quiescent condition until the resurrection. This requires notice under another head [SOUL: see also HEAVEN; HELL].

HAGAR (הָגָר, *a stranger;* Sept. Ἄγαρ), a native of Egypt, and servant of Abraham; but how or when she became an inmate of his family we are not informed. The name Hagar, which is pure Hebrew, signifying *stranger*, having been probably given her after her arrival, and being the one by which she continued to be designated in the patriarch's household, seems to imply that her connection with it did not take place till long after this family had emigrated to Canaan; and the presumption is that she was one of the female slaves presented to Abraham by Pharaoh during his visit to Egypt (Gen. xii. 16). But some derive the name from עָגַר, *to flee;* and suppose it to have been applied to her from a remarkable incident in her life, to be afterwards mentioned; just as the Mahomedans call the flight of Mahomet by the collateral term 'Hegira.' Whatever were her origin and previous history, her servile condition in the family of Abraham must have prevented her from being ever known beyond the limits of her humble sphere, had not her name, by a spontaneous act of her mistress, become indissolubly linked with the patriarch's history. The long continued sterility of Sarah suggested to her the idea (not uncommon in the East) of becoming a mother by proxy through her handmaid, whom, with that view, she gave to Abraham as a secondary wife [ABRAHAM; ADOPTION; CONCUBINE].

The honour of such an alliance and elevation was too great and unexpected for the weak and ill-regulated mind of Hagar: and no sooner did she find herself in a delicate situation, which made

her, in the prospect of becoming a mother, an object of increasing interest and importance to Abraham, than she openly indulged in triumph over her less favoured mistress, and showed by her altered behaviour a growing habit of disrespect and insolence. The feelings of Sarah were severely wounded, and she broke out to her husband in loud complaints of the servant's petulance. 'My wrong be upon thee,' she cried—language which is generally considered an impassioned burst of temper, in which she unjustly charged Abraham with causing or encouraging, by his marked attention to the concubine, the ill usage she met with; but it appears susceptible of other constructions much more favourable to Sarah's character. The words חמסי ע יך signify either 'My wrong be *super te*,' as Cocceius and others render it, *i. e.* lieth upon thee, pointing to his duty as her protector, and soliciting his interference, or else 'My wrong is *propter te*'—on your account. 'I have exposed myself to these indignities solely out of my intense anxiety to gratify you with a son and heir.' Whichever of these interpretations we prefer, the exclamation of Sarah expresses bitter indignation at the misconduct of her slave; and Abraham, whose meek and prudent behaviour is strikingly contrasted with the violence of his wife, leaves her with unfettered power, as mistress of his household, to take what steps she pleases to obtain the required redress. In all Oriental states where concubinage is legalized, the principal wife has authority over the rest; the secondary one, if a slave, retains her former condition unchanged, and society thus presents the strange anomaly of a woman being at once the menial of her master and the partner of his bed. In like manner Hagar, though taken into the relation of concubine to Abraham, continued still, being a dotal maid-servant, under the absolute power of her mistress, who, after her husband had left her to take her own way in vindication of her dignity as the principal wife, was neither reluctant nor sparing in making the minion reap the fruits of her insolence. Sarah, indeed, not content with the simple exertion of her authority, seems to have resorted even to corporal chastisement, the word תענה conveying such a meaning, and hence Augustine has drawn an elaborate argument for inflicting civil penalties on heretics (*Epist.* xlviii.). But whether she actually inflicted blows, or merely threw out menaces to that effect, cannot be determined, as the two renderings, 'Sarah afflicted' and 'would afflict' her, have received equal support from respectable lexicographers and versions. Sensible, at length, of the hopelessness of getting the better of her mistress, Hagar determined on flight; and having seemingly formed the purpose of returning to her relations in Egypt, she took the direction of that country; which led her to what was afterwards called Shur, through a long tract of sandy uninhabited country, lying on the west of Arabia Petræa, to the extent of 150 miles between Palestine and Egypt. In that lonely region she was sitting by a fountain to replenish her skin-bottle or recruit her wearied limbs, when the angel of the Lord, whose language on this occasion bespeaks him to have been more than a created being, appeared, and in the kindliest manner remonstrated with her on the course she was pursuing, and encouraged her to return by the promise that she would ere long have a son, whom Providence destined to become a great man, and whose wild and irregular features of character would be indelibly impressed on the mighty nation that should spring from him. Obedient to the heavenly visitor, and having distinguished the place by the name of Beer-lahai-roi, 'the well of the visible God,' Hagar retraced her steps to the tent of Abraham, where in due time she had a son; and having probably narrated this remarkable interview to Abraham, that patriarch, as directed by the angel, called the name of the child Ishmael, 'God hath heard.'

Fourteen years had elapsed after the birth of Ishmael when an event occurred in the family of Abraham, by the appearance of the long-promised heir, which entirely changed the prospects of that young man, though nothing materially affecting him took place till the weaning of Isaac, which, as is generally thought, was at the end of his third year. Ishmael was then a lad of seventeen years of age; and being fully capable of understanding his altered relations to the inheritance, as well as having felt perhaps a sensible diminution of Sarah's affection towards him, it is not wonderful that a disappointed youth should inconsiderately give vent to his feelings on a festive occasion, when the newly-weaned child, clad according to custom with the sacred symbolic robe, which was the badge of the birthright, was formally installed heir of the tribe (see *Biblioth. Bibl.* vol. i.; Vicasi, *Annot.* 32; Bush on Gen. xxvii. 15). Our feelings of justice naturally lead us to take part with Ishmael, as hardly dealt with in being so unexpectedly superseded after having been so long the acknowledged heir. But the procedure of Abraham in awarding the claim to the inheritance to Isaac in preference to his elder son was guided by the special command of God; and it may be remarked, moreover, that it was in harmony with the immemorial practice of the East, where the son of a slave or secondary wife is always supplanted by that of a free woman, even if born long after. The harmony of the weaning feast was disturbed by Ishmael being discovered mocking. The Hebrew word מצחק, though properly signifying 'to laugh,' is frequently used to express strong derision, as in Gen. xix. 14; Neh. ii. 19; iv. 1; Ezek. xxiii. 32; accompanied, as is probable on some of the occasions referred to in these passages, with violent gestures; and in accordance with this idea the Chaldee and Septuagint versions render it by 'I play,' which is used by the latter in 2 Sam. ii. 14-17, as synonymous with boxing, whence it might very justly be characterized as persecution (Gal. iv. 29). This conduct gave mortal offence to Sarah, who from that moment would be satisfied with nothing short of his irrevocable expulsion from the family; and as his mother also was included in the same condemnation, there is ground to believe that she had been repeating her former insolence, as well as instigating her son to his improprieties of behaviour. So harsh a measure was extremely painful to the affectionate heart of Abraham; but his scruples were removed by the timely appearance of his divine counsellor, who said, 'Let it not be grievous in thy sight, because of the lad, and because of thy bondwoman: in all that Sarah hath said unto thee, hearken unto her voice:' 'for,' adds

the Targum of Jonathan, 'she is a prophetess.' Accordingly, what she said is called the Scripture (Gal. iv. 30), and the incident affords a very remarkable instance of an overruling Providence in making this family feud in the tent of a pastoral chief 4000 years ago the occasion of separating two mighty peoples, who, according to the prophecy, have ever since occupied an important chapter in the history of man. Hagar and Ishmael departed early on the day fixed for their removal, Abraham furnishing them with the necessary supply of travelling provisions. The Septuagint, which our translators have followed, most absurdly represents Ishmael as a child, placed along with the travelling-bags on the heavily-loaded shoulders of Hagar. But a little change in the punctuation, the observance of the parenthetical clause, and the construction of the word 'child' with the verb 'took,' remove the whole difficulty, and the passage will then stand thus: 'And Abraham rose up early in the morning, and took bread, and a bottle of water (and gave it unto Hagar, putting it on her shoulder), and the child, and sent her away.'

In spite of their instructions for threading the desert, the two exiles missed their way. Overcome by fatigue and thirst, increasing at every step under the unmitigated rays of a vertical sun, the strength of the young Ishmael, as was natural, first gave way, and his mother laid him down in complete exhaustion under one of the stunted shrubs of this arid region, in the hope of his obtaining some momentary relief from smelling the damp in the shade. The burning fever, however, continued unabated, and the poor woman, forgetting her own sorrow, destitute and alone in the midst of a wilderness, and absorbed in the fate of her son, withdrew to a little distance, unable to witness his lingering sufferings; and there 'she lifted up her voice and wept.' In this distressing situation the angel of the Lord appeared for the purpose of comforting her, and directed her to a fountain, which, concealed by the brushwood, had escaped her notice, and from which she drew a refreshing draught, that had the effect of reviving the almost lifeless Ishmael. This well, according to the tradition of the Arabs, who pay great honour to the memory of Hagar, is Zemzem, near Mecca.

Of the subsequent history of Ishmael we have no account, further than that he established himself in the wilderness of Paran, in the neighbourhood of Sinai, was married by his mother to a countrywoman of her own, and maintained both himself and family by the produce of his bow.—R. J.

HAGARENES. [Arabia.]

HAGGAI (חַגַּי; Sept. and Joseph. Ἀγγαῖος; Jerome and Vulg. Aggæus or Aggeus, otherwise Haggæus), one of the twelve minor prophets, and the first of the three who, after the return of the Jews from the Babylonian exile, prophesied in Palestine. Of the place and year of his birth, his descent, and the leading incidents of his life, nothing is known which can be relied on. Some assert that he was born in Babylon, and came to Jerusalem when Cyrus, in the year B.C. 536, allowed the Jews to return to their country (2 Chron. xxxiv. 23; Ezra i. 1),—the new colony consisting chiefly of people belonging to the tribes of Judah, Benjamin, and Levi, with a few from other tribes. The more fabulous traditions of Jewish writers, who pass him for an Assessor of the *Synagoga Magna*, and enlarge on his literary avocations, have been collected by Carpzov (*Introductio in V. T.* iii. p. 426). This much appears from his prophecies, that he flourished during the reign of the Persian monarch Darius Hystaspis, who ascended the throne B.C. 521. These prophecies are comprised in a book of two chapters, and consist of discourses so brief and summary as to have led some German theologians to suspect that they have not come down to us in their original complete form, but are only an epitome (Eichhorn, *Einleitung in das A. T.* iii. § 598; Jahn, *Introductio in libros sacros Vet. Fœd.*, edit. 2, Viennæ, 1814, § 156). Their object generally is to urge the rebuilding of the Temple, which had indeed been commenced as early as B.C. 535 (Ezra iii. 10), but was afterwards discontinued, the Samaritans having obtained an edict from the Persian king, which forbade further procedure, and influential Jews pretending that the time for rebuilding the Temple had not arrived, since the seventy years predicted by Jeremiah applied to the Temple also, from the time of the destruction of which it was then only the sixty-eighth year. As on the death of Pseudo-Smerdis, and the consequent termination of his interdict, the Jews still continued to wait for the end of the seventy years, and were only engaged in building splendid houses for themselves, Haggai began to prophesy in the second year of Darius, B.C. 520.

His first discourse (ch. i.), delivered on the first day of the sixth month of the year mentioned, foretells that a brighter era would begin as soon as Jehovah's house was rebuilt; and a notice is subjoined, stating that the address of the prophet had been effective, the people having resolved on resuming the restoration of the Temple. The second discourse (ch. ii. 1-9), delivered on the twenty-first day of the seventh month, predicts that the glory of the new Temple would be greater than that of Solomon's, and shows that no fear need be entertained of the Second Temple not equalling the first in splendour, since, in a remarkable political revolution, the gifts of the Gentiles would be brought thither. The third discourse (ch. ii. 10-19), delivered on the twenty-fourth day of the ninth month, refers to a period when building materials had been collected, and the workmen had begun to put them together; for which a commencement of the Divine blessing is promised. The fourth and last discourse (ch. ii. 20-23), delivered also on the twenty-fourth day of the ninth month, is exclusively addressed to Zerubbabel, the political chief of the new Jewish colony, who, it appears, had asked for an explanation regarding the great political revolutions which Haggai had predicted in his second discourse: it comforts the governor by assuring him they would not take place very soon, and not in his lifetime. The style of the discourses of Haggai is suitable to their contents: it is pathetic when he exhorts; it is vehement when he reproves; it is somewhat elevated when he treats of future events; and it is not altogether destitute of a poetical colouring, though a prophet of a higher order would have depicted the splendour of the Second Temple in brighter hues. The language labours under a poverty of terms, as may be observed in the constant repetition of the same expressions.

e.g. כה אמר יהוה (i. 2, 5, 7), נאם יהוה three times in one verse (ii. 4), with חזק three times in the same verse, and רוח three times also in one verse (i. 14). Eichhorn (*Einleitung*, § 599) attributes these repetitions to an attempt at ornament, rendering the writer disposed to recur frequently to a favourite expression. The prophetical discourses of Haggai, נבואת הגי נביאה, are referred to in the Old and New Testament (Ezra v. 1; vi. 14; Heb. xii. 26; comp. Hagg. ii. 7, 8, 22). In most of the ancient catalogues of the canonical books of the Old Testament, Haggai is not, indeed, mentioned by name; but as they specify the twelve minor prophets, he must have been included among them, as otherwise their number would not be full. Josephus, mentioning Haggai and Zechariah (*Antiq.* xi. 4. § 5, p. 557), calls them *δύο προφῆται*. (See generally Rosenmüller, *Scholia in Vet. Test.* vii. 4. p. 74; Jahn, *Einleitung in die göttlichen Bücher des Alten Bundes*, ii. 2. p. 658; Bertholdt, *Einleitung*, iv. p. 169.)—J. v. H.

HAGIOGRAPHA, *Sacred Writings.* The word *ἁγιόγραφα* is first found in Epiphanius (*Panarium*, p. 58), who used it, as well as *γραφεῖα*, to denote the third division of the Scriptures, called by the Jews כתובים, or the *Writings*, consisting of *five books* [MEGILLOTH], viz. the three *poems* (אמת), Job, Proverbs, and the Psalms, and the two books of Chronicles.

These divisions are found in the Talmud (*Bava Bathra*, fol. 1, ed. Amsterd.), where the sacred books are classified under the *Law*, the *Prophets*, and the *Writings* (*Cetubim*). The last are thus enumerated (*l. c.*):—Ruth, the book (*sepher*) of Psalms, Job, Proverbs, Ecclesiastes (*Koheleth*), the Song of Songs, Lamentations, Daniel, and the books (*megilloth*) of Esther, Ezra, and Chronicles. The Jewish writers, however, do not uniformly follow this arrangement, as they sometimes place the Psalms, or the book of Job, as the first of the Hagiographa. Jerome gives the arrangement followed by the Jews in his time. He observes that they divided the Scriptures into five books of Moses, eight prophetical books (viz. 1. Joshua; 2. Judges and Ruth; 3. Samuel; 4. Kings; 5. Isaiah; 6. Jeremiah; 7. Ezekiel; 8. The twelve prophets), and nine *Hagiographa*, viz. 1. Job; 2. David, five parts; 3. Solomon, three parts; 4. Koheleth; 5. Canticles; 6. Daniel; 7. Chronicles; 8. Esdras, two books [viz. Ezra and Nehemiah]; 9. Esther. 'Some, however,' he adds, 'place Ruth and Lamentations among the Hagiographa rather than among the prophetical books.' We find a different arrangement in Josephus, who reckons thirteen prophetical books, and four containing hymns and moral precepts; from which it would appear that after the time of Josephus the Jews comprised many books among the prophets which had previously belonged to the Hagiographa. It has, however, been considered as more probable that Josephus had no authority from manuscripts for his classification.

The earliest notice which we find of these divisions is that contained in the prologue to the book of Ecclesiasticus, written B.C. 130, the author of which refers to the Law, the Prophets, and the *other books*: by which last were most probably meant the Hagiographa. Philo also speaks of the Laws, the Prophets, the Hymns, and the other books, but without classifying them. In the New Testament we find three corresponding divisions mentioned, viz. the Law, the Prophets, and the Psalms; which last book has been supposed to have given its name to the third division, from the circumstance of its then being the first in the catalogue (Luke xxiv. 44). Hävernick, however (*Handbuch*, p. 78), supposes that Luke calls the Hagiographa by the name of Psalms, rather on account of the poetical character of several of its parts. The 'book of the Prophets' is referred to in the New Testament as a distinct volume (Acts vii. 42, where the passage indicated is Amos v. 25, 26). It is well known that the second class was divided by the Jews into the early Prophets, viz. Joshua, Judges, Samuel, and Kings; and the later Prophets, viz. Isaiah, Jeremiah, Ezekiel (called the major prophets), and the book of the twelve (minor) prophets.

When this division of books was first introduced it is now impossible to ascertain. Probably it commenced after the return from the exile, with the first formation of the canon. Still more difficult is it to ascertain the principle on which the classification was formed. The rabbinical writers maintain that the authors of the *Cetubim* enjoyed only the lowest degree of inspiration, as they received no immediate communication from the Deity, like that made to Moses, to whom God spake face to face; and that they did not receive their knowledge through the medium of visions and dreams, as was the case with the prophets or the writers of the second class; but still that they felt the Divine Spirit resting on them and inspiring them with suggestions. This is the view maintained by Abarbanel (*Præf. in Proph. priores*, fol. 20. 1), Kimchi (*Præf. in Psalm.*), Maimonides (*More Nevochim*, ii. 45, p. 317), and Elias Levita (*Tisbi*); which last writer defines the word כתוב to mean *a work written by divine inspiration.* The placing of Ruth among the Hagiographa, and especially the separation of Lamentations from Jeremiah, seems, however, to be irreconcilable with this hypothesis; nor is it easy to assign a satisfactory reason why the historical books of Joshua, Judges, Samuel, and Kings should be placed among the *Prophets*, and the book of Chronicles among the *Hagiographa*. The reasons generally assigned for this, as well as for placing in the third class the books of Psalms, Daniel, and Job, are so fanciful and unsatisfactory as to have led Christian writers to form other and more definite classifications. It will suffice to mention the reason assigned by Rabbi Kimchi for excluding Daniel from the book of Prophets, viz. that he has not equalled the other prophets in his visions and dreams. Others assign the late date of the book of Daniel as the reason for the insertion of it, as well as of some historical books, in the Hagiographa, inasmuch as the collection of the Prophets was closed at the date of the composition of this book (De Wette, § 255). Bertholdt, who is of this opinion (*Einleitung*, vol. i. p. 70, sqq.), thinks that the word *Cetubim* means 'books newly introduced into the canon' (p. 81). Hengstenberg (*Authentie der Daniel*, &c., p. 25, sqq.) follows the ancient opinion of the rabbins, and maintains that the book of Daniel was placed in the Hagiographa in consequence of the lower degree of inspiration attached to it; but herein he is opposed by Hävernick (*Handbuch*, p. 62). De Wette (§ 13) supposes

that the two first divisions (the *Law* and the *Prophets*) were closed a little after the time of Nehemiah (comp. 2 Macc. ii. 13, 14), and that perhaps at the end of the Persian period the Jews commenced the formation of the *Hagiographa*, which long remained 'changeable and open.' The collection of the Psalms was not yet completed when the two first parts were formed.

It has been concluded from Matt. xxiii. 35 and Luke xi. 51, comp. with Luke xxiv. 44, that as the Psalms were the first, so were Chronicles the last book in the Hagiographa (Carpzov, *Introd.* iv. p. 25.) If, when Jesus spoke of the righteous blood shed from the blood of Abel (Gen. iv. 8) to that of Zechariah, he referred, as most commentators suppose, to Zechariah the son of Jehoiada (2 Chron. xxiv. 20, 21), there appears a peculiar appositeness in the appeal to the first and the last books in the canon. The book of Chronicles still holds the last place in the Hebrew Bibles, which are all arranged according to the threefold division. The late date of Chronicles may in some measure account for its separation from the book of Kings; and this ground holds good whether we fix the era of the Chronicler, with Zunz, at about B.C. 260, or, with the eminent Roman Catholic, Professor Movers, the able defender of the antiquity and authenticity of the book, we conceive him to have been a younger contemporary of Nehemiah, and to have written about B.C. 400 (*Kritische Untersuchung über de Biblische Chronik*, Bonn, 1834). The circumstance of the existence of a few acknowledged later additions, such as 1 Chron. iii. 19-24, does not militate against this hypothesis. De Wette conceives that the genealogy in this passage comes down only to the third generation after Nehemiah.

The word *Hagiographa* is once used by Jerome in a peculiar sense. Speaking of Tobit, he asserts that the Jews, cutting off this book from the catalogue of the divine Scriptures, place it among those books which they call *Hagiographa*. And again, of Judith he says, 'by the Jews it is read among the Hagiographa, whose authority is not sufficient to confirm debated points;' but, as in the latter instance, the greater number of manuscripts read *Apocrypha*, which is doubtless the true reading, it is highly probable that the word Hagiographa, used in reference to the book of Tobit, has arisen from the mistake of a transcriber. The two words were in the middle ages frequently used as synonymous [DEUTERO-CANONICAL]. Hagiographa has been also used by Christian writers as synonymous with Holy Scripture.

The Alexandrian translators have not been guided by the threefold division in their arrangement of the books of Scripture. We have already [DEUTERO-CANONICAL] given the order of the Codex Alexandrinus. In the Vatican Codex Tobit and Judith are placed between Nehemiah and Esther. Wisdom and Ecclesiasticus follow Canticles. Baruch and Lamentations follow Jeremiah, and the Old Testament concludes with the four books of Maccabees. Luther (who introduced into the Bible a peculiar arrangement, which in the *Old* Testament has been followed in the English Authorized Version) was the first who separated the canonical from the other books. Not only do the Alexandrian translators, the Fathers, and Luther differ from the Jews in the order of succession of the sacred books, but among the Jews themselves the Talmudists and Masorites, and the German and Spanish manuscripts follow each a different arrangement.—W. W.

HAI. [AI.]

HAIR is frequently mentioned in Scripture, and in scarcely anything has the caprice of fashion been more strikingly displayed than in the various forms which the taste of different countries and ages has prescribed for disposing of this natural covering of the head. The Greeks let their hair grow to a great length, and their natural fondness for this attribute of beauty has been perpetuated not only by the frequently recurring epithet of Homer, καρηκομόωντες, as descriptive of the Ἀχαιοί, but by the circumstance of the poets and artists of that ancient people representing even the gods themselves with long hair. The early Egyptians, again, who were proverbial for their habits of cleanliness, removed the hair as an incumbrance, and the almost unavoidable occasion of sordid and offensive negligence. They shaved even the heads of young children, leaving only certain locks, as an emblem of youth, on the front, the back, and the sides. In the case of royal children those on the sides were covered and enclosed in a bag, which hung down conspicuously as a badge of princely rank. All classes amongst that people, not excepting the slaves imported from foreign countries, were required to submit to the tonsure (Gen. xli. 14); and yet, what was remarkable in the inhabitants of a hot climate, while they removed their natural hair, they were accustomed to wear wigs, which were so constructed that 'they far surpassed,' says Wilkinson, 'the comfort and coolness of the modern turban, the reticulated texture of the ground-work on which the hair was fastened allowing the heat of the head to escape, while the hair effectually protected it from the sun (*Anc. Egyptians*, iii. 354). Different from the custom both of the Greeks and the Egyptians, that of the Hebrews was to wear their hair generally short, and to check its growth by the application of scissors only. The priests at their inauguration shaved off all their hair, and when on actual duty at the temple, were in the habit, it is said, of cutting it every fortnight. The only exceptions to this prevailing fashion are found in the case of the Nazarites, whose hair, from religious duty, was *not* to be cropped during the term of their vow; of young persons who, during their minority, allowed their hair to hang down in luxuriant ringlets on their shoulders; of such effeminate persons as Absalom (2 Sam. xiv. 26); and of Solomon's horse-guards, whose vanity affected a puerile extravagance, and who strewed their heads every day with particles of gold-dust (Josephus, *Antiq.* viii. 7). Although the Hebrews wore their hair short, they were great admirers of strong and thickset locks; and so high a value did they set on the possession of a good head of hair, that they deprecated nothing so much as baldness; to which, indeed, so great ignominy was attached that, whether a man was destitute of hair or not, bald-head became a general term expressive of deep and malignant contempt (2 Kings ii. 23) [BALDNESS]. To prevent or remedy this defect they seem, at an early period, to have availed themselves of the assistance of art, not only for beautifying the hair, but increasing its thickness; while the heads of the priests were anointed with an unguent of a peculiar kind, the in-

gredients of which, with their various proportions, were prescribed by divine authority, and the composition of which the people were prohibited, under severe penalties, from attempting to imitate (Exod. xxx. 32). This custom spread till anointing the hair of the head became a general mark of gentility and an essential part of the daily toilet; the usual cosmetics employed consisting of the best oil of olives mingled with spices, a decoction of parsley-seed in wine, and more rarely of spikenard (Ps. xxiii. 5; xlv. 7; Eccles. ix. 8; Mark xiv. 3). The prevailing colour of hair among the Hebrews was dark; 'locks bushy and black as a raven,' being mentioned in the description of the bridegroom as the perfection of beauty in mature manhood (Sol. Song, v. 11). Hence the appearance of an old man with a snow-white head in a company of younger Jews, all whose heads, like those of other Eastern people, were jet black—a most conspicuous object—is beautifully compared to an almond-tree, which in the early part of the year is in full blossom, while all the others are dark and leafless (Eccles. xii. 5). A story is told of Herod, that in order to conceal his advanced age, he used secretly to dye his gray locks with a dark pigment (Joseph. *Antiq.* xvi. 8); and although the anecdote was probably an unfounded calumny on that prince, yet that it was customary with many of his Roman contemporaries to employ artificial means for changing or disguising the silver hue of age, is sufficiently apparent from the works of Martial and other satirical poets. From Rome the fashion spread into Greece and other provinces, and it appears that the members of the church of Corinth were, to a certain extent, captivated by the prevailing taste, some Christians being evidently in the eye of the Apostle, who had attracted attention by the cherished and womanly decoration of their hair (1 Cor. xi. 14-16). To them the letter of Paul was intended to administer a timely reproof for allowing themselves to fall in with a style of manners which, by confounding the distinctions of the sexes, threatened a baneful influence on good morals: and that not only the Christian converts in that city, but the primitive church generally, were led by this admonition to adopt simpler habits, is evident from the remarkable fact that a criminal, who came to trial under the assumed character of a Christian, was proved to the satisfaction of the judge to be an impostor, by the luxuriant and frizzled appearance of his hair (Tertullian, *Apol.*; Fleury, *Les Mœurs des Chrétiens*).

With regard to women, the possession of long and luxuriant hair is allowed by Paul to be an essential attribute of the sex—a graceful and modest covering provided by nature; and yet the same Apostle elsewhere (1 Tim. ii. 9) concurs with Peter (1 Pet. iii. 9) in launching severe invectives against the ladies of his day for the pride and passionate fondness they displayed in the elaborate decorations of their head-dress. As the hair was pre-eminently the 'instrument of their pride' (Ezek. xvi. 39, margin), all the resources of ingenuity and art were exhausted to set it off to advantage and load it with the most dazzling finery; and many when they died caused their longest locks to be cut off, and placed separately in an urn, to be deposited in their tomb as the most precious and valued relics. In the daily use of cosmetics they bestowed the most astonishing pains in arranging their long hair; sometimes twisting it round on the crown of the head, where, and at the temples, by the aid of gum, which they knew as well as the modern belles, they wrought it into a variety of elegant and fanciful devices—figures of coronets, harps, wreaths, diadems, emblems of public temples and conquered cities, being formed by the mimic skill of the ancient friseur; or else, plaiting it into an incredible number of tresses, which hung down the back, and which, when necessary, were lengthened by ribbons so as to reach to the ground, and were kept at full stretch by the weight of various wreaths of pearls and gold fastened at intervals down to the extremity. From some Syrian coins in his possession Hartmann (*Die Hebräerinam Putzishe*) has given this description of the style of the Hebrew coiffure; and many ancient busts and portraits which have been discovered exhibit so close a resemblance to those of Eastern ladies in the present day, as to show that the same elaborate and gorgeous disposition of their hair has been the pride of Oriental females in every age.

From the great value attached to a profuse head of hair arose a variety of superstitious and emblematic observances, such as shaving parts of the head, or cropping it in a particular form; parents dedicating the hair of infants (Tertullian, *De Anima*) to the gods; young women theirs at their marriage; warriors after a successful campaign; sailors after deliverance from a storm; hanging it up on consecrated trees, or depositing it in temples; burying it in the tomb of friends, as Achilles did at the funeral of Patroclus; besides shaving, cutting off, or plucking it out, as some people did; or allowing it to grow in sordid negligence, as was the practice with others, according as the calamity that befell them was common or extraordinary, and their grief was mild or violent.

Various metaphorical allusions are made to hair by the sacred writers, especially the prophets. 'Cutting off the hair' is a figure used to denote the entire destruction of a people by the righteous retributions of Providence (Isa. vii. 20). 'Gray hairs here and there on Ephraim' portended the decline and fall of the kingdom of Israel (Hos. vii. 9). 'Hair like women's' forms part of the description of the Apocalyptic locusts, and historically points to the prevailing head-dress of the Saracens, as well as the voluptuous effeminacy of the Antichristian clergy (Rev. ix. 8). And, finally, 'hair like fine wool' was a prominent feature in the appearance of the deified Redeemer, emblematic of the majesty and wisdom that belong to him (Rev. i. 14).

HALAH (חְלַח; Sept. Ἀλαέ), or rather Chalach, a city or district of Media, upon the river Gozan, to which, among other places, the captives of Israel were transplanted by the Assyrian kings. Many, after Bochart (*Geog. Sacra*, iii. 14. p. 220), have conceived this Halah or Chalach to be the Calachene which Ptolemy places in the north of Assyria. But if the river Gozan be the Kizzil-Ozan, Halah must needs be sought elsewhere, and near that river. Accordingly Major Rennell indicates as lying along its banks a district of some extent, and of great beauty and fertility, named Chalchal, having within it a

remarkably strong position of the same name, situated on one of the hills adjoining to the mountains which separate it from the province of Ghilan (*Geog. of Herod.* p. 396).

HALLELUJAH (הַלְלוּיָהּ), or ALLELUIA (Ἀλληλούϊα), a word which stands at the beginning of many of the Psalms. From its frequent occurrence in this position it grew into a formula of praise, and was chanted as such on solemn days of rejoicing. This is intimated by the Apocryphal book of Tobit (xiii. 18), when speaking of the rebuilding of Jerusalem, 'And all her (Jerusalem's) streets shall sing Alleluia' (comp. Rev. xix. 1, 3, 4, 6). This expression of joy and praise was transferred from the synagogue to the church, and is still occasionally heard in devotional psalmody. It is so often found in the beautiful hymns of John and Charles Wesley, that the frequent use of it has almost become a characteristic of the religious body named after the former.

HAM (חָם). 1. The youngest son of Noah (Gen. v. 32; comp. ix. 24). Having provoked the wrath of his father by an act of indecency towards him, the latter cursed him and his descendants to be slaves to his brothers and their descendants (ix. 25). To judge, however, from the narrative, Noah directed his curse only against Canaan (the fourth son of Ham) and his race, thus excluding from it the descendants of Ham's three other sons, Cush, Mizraim, and Phut (Gen. x. 6). How that curse was accomplished is taught by the history of the Jews, by whom the Canaanites were subsequently exterminated. The general opinion is, that all the Southern nations derive their origin from Ham (to which the Hebrew root חם, *hot*, not unlike the Greek Αἰθίοπες, lends some force). *Cush* is supposed to have been the progenitor of the nations of East and South Asia, more especially of South Arabia, and also of Ethiopia; *Mizraim*, of the African nations, including the Philistines and some other tribes which Greek fable and tradition connect with Egypt; *Phut*, likewise of some African nations; and *Canaan*, of the inhabitants of Palestine and Phœnicia. On the Arabian traditions concerning Ham, *vid.* D'Herbelot (*Bibl. Orient.* art. 'Ham').

2. A poetical name for the land of Egypt (Ps. lxxviii. 51; cv. 23, 27; cvi. 22). In the Egyptian language XHMI, or KHME, signifies *black*. Plutarch also (*De Isid. et Osir.* 33) calls Egypt *Chemia*: τὴν Αἴγυπτον ἐν τοῖς μάλιστα μελάγγειον οὖσαν, ὥσπερ τὸ μέλαν τοῦ ὀφθαλμοῦ, Χημίαν καλοῦσιν.

In Gen. xiv. 5 occurs a country or place called *Ham*, belonging to the *Zuzim*, but its geographical situation is unknown.—E. M.

HAMAN (הָמָן, a name of the planet *Mercury*; Sept. Ἀμάν), a favourite of the king of Persia, whose history is involved in that of Esther and Mordecai. He is called an Agagite; and as Agag was a kind of title of the kings of the Amalekites [AGAG], it is supposed that Haman was descended from the royal family of that nation. He or his parents probably found their way to Persia as captives or hostages; and that the foreign origin of Haman was no bar to his advancement at court, is a circumstance quite in union with the most ancient and still subsisting usages of the East. Joseph, Daniel, and Mordecai afford other examples of the same kind.

It is unnecessary to repeat the particulars of a story so well known as that of Haman. The circumstantial details of the height which he attained and of his sudden downfall, afford, like all the rest of the book of Esther, a most faithful picture of the customs of an Oriental court and government, and furnish invaluable materials for a comparison between the regal usages of ancient and modern times. The result of such a comparison will excite surprise by the closeness of the resemblance; for there is not a single fact in the history of Haman which might not occur at the present day, even in its merely formal characteristics, and which, indeed, is not of frequent occurrence in different combinations. The boundless credit which Haman enjoyed with Ahasuerus; the homage which all the court in consequence paid to him; the royal signet-ring, the impression from which gave such authority to all written orders, and placed the doom of nations in the hands of its possessor; the price of blood which Haman offered to the king; the inquietude of that inordinate power which could endure no rival, and which the shadow of opposition offended and alarmed; and the form of poetical justice given to the final retribution in the hanging of Haman upon a gallows which he had prepared for another;—all these are traits which would at the present day be received in Asia as the unexaggerated record of current events.

Even the decree for the extermination of the Jews which was granted at the request of Haman, however startling it may appear to those whose notions are grounded upon European institutions, would appear in no wise strange under an Oriental government. Even in Europe the fanaticism and tyranny of ancient governments often produced similar proscriptions (sometimes with reference to the very same people), which, under the mildness and tranquillity of modern institutions, we are as little able to comprehend. But in the East we have still no difficulty in discovering the traces of the same excesses of despotism, the same blind submission in the people, the same respect for the seal of the sovereign, and the same passive resignation to the sword which he uplifts or to the bowstring which he sends. Even in our own day we have seen imperial firmauns consign to utter destruction in the mass the Greeks, the Druses, and the Maronites; and such things must and will occur wherever the extermination of a people is unhappily so easy a matter that it costs a despot no further trouble than the drawing of a ring from his finger. Other times and other names make all the difference—the manners are the same. It may be well to observe that Haman never mentions Mordecai himself to the king; and that in speaking of the Jews he does not name them directly, but describes them as 'a certain people' dispersed through the kingdom, and living separate under laws of their own (Esth. iii. 8). That this people, or any other subject to his sceptre, should require to be thus descriptively indicated, seems to show how little the king knew of the actual state of his dominions, or of persons beyond the immediate circle of the court. The death of Haman appears to have taken place about the year B.C. 510.

HAMATH (חֲמָת; Sept. Ἐμάθ), one of the smaller kingdoms of Syria, having Zobah on the east and Rehob on the south. This last kingdom, lying within the greater Mount Hermon, is expressly said to have been taken possession of by the Israelites, and, like Dan or Laish, which is represented to have been in the valley of Beth-rehob (Judg. xviii. 28), is used to denote the northern boundary of the Holy Land. Thus it it is said (Num. xiii. 21) that the spies 'went up and searched the land, from the wilderness of Zin unto Rehob, as men come to Hamath,' which lay to the south of Rehob, beyond Hermon. The approach to it from the south is by an opening or mountain-pass, called 'the entrance of Hamath,' and 'the entering in of Hamath,' which, being the passage from the northern extremity of the land of Israel into Syria, is sometimes used to describe the boundary of the former in this direction, as 'from the entering in of Hamath to the river of Egypt' (1 Kings viii. 65). This 'entering in of Hamath' answers to the route taken by Burckhardt (*Syria*, p. 249) from El-Bekaa, or the southern part of the valley between the two chains of Libanus and Anti-Libanus, to Banias. As there does not appear, from his description, to be any elevated ground in this route, there would seem to be a depression of the chain which bears the name of Jebel es-Sheikh.

The kingdom of Hamath, or, at least, the southern or central parts of it, appear to have nearly corresponded with what was afterwards denominated Cœle-Syria; but northwards, it stretched as far as the city Hamath on the Orontes, which seems to have been the capital of the whole country. This city was called Epiphania by the Greeks, under which name it was known to Josephus (*Antiq.* i. 6. 2; comp. Michaelis, *Spicil.* ii. 52) and Jerome (*Quæst. in Gen.* x. 15; *Comment. in Ezek.* xlvii. 15, 16); but it has now resumed its more ancient denomination, which indeed was probably never lost among the native population. Toi was king of Hamath at the time when David conquered the Syrians of Zobah; and it appears that he had reason to rejoice in the humiliation of a dangerous neighbour, as he sent his own son Joram to congratulate the victor (2 Sam. viii. 9, 10). In the time of Hezekiah the town along with its territory was conquered by the Assyrians (2 Kings xvii. 24; xviii. 34; xix. 13; Isa. x. 9; xi. 11); and afterwards by the Chaldæans (Jer. xxxix. 2, 5). Abulfeda, the Arabian geographer, who was prince of Hamath in the fourteenth century, correctly states (*Tab. Syriæ*, p. 108) that this city is mentioned in the books of the Israelites. He adds, 'It is reckoned one of the most pleasant towns of Syria. The Orontes flows round the greater part of the city on the east and north. It boasts a lofty and well-built citadel. Within the town are many dams and water-machines, by means of which the water is led off by canals to irrigate the gardens and supply private houses. It is remarked of this city and of Schiazar that they abound more in water-machines than any other cities in Syria.' This description still, in a great degree, applies. Hamath is a picturesque town, of considerable circumference, and with wide and convenient streets. In Burckhardt's time the attached district contained 120 inhabited villages, and 70 or 80 that lay waste. The western part of this district forms the granary of Northern Syria, though the harvest never yields more than a tenfold return, chiefly on account of the immense numbers of mice, which sometimes completely destroy the crops (Pococke, *Travels*, ii. 209; Burckhardt, *Travels in Syria*, p. 249; Richter, *Wallfahrten*, p. 231: comp. Rosenmüller's *Bib. Geography*, ii. 243-246).

HANAMEEL, a kinsman of Jeremiah, to whom, before the siege of Jerusalem, he sold a field which he possessed in Anathoth, a town of the Levites (Jer. xxxii. 6-12). If this field belonged to Hanameel as a Levite, the sale of it would imply that an ancient law had fallen into disuse (Lev. xxv. 34); but it is possible that it may have been the property of Hanameel in right of his mother. The transaction was conducted with all the forms of legal transfer, and was intended to evince the certainty of restoration from the approaching exile, by showing that possessions which could be established by documents would yet be of future value to the possessor (B.C. 587).

1. **HANANI** (חֲנָנִי, *gracious;* Sept. Ἀνανί), a prophet under the reign of Asa, king of Judah, by whom he was seized and imprisoned for announcing that he had lost, from want of due trust in God, an advantage which he might have gained over the king of Syria (2 Chron. xvi. 7). The precise occasion of this declaration is not known. This Hanani is supposed to be the same who was father of another prophet, named Jehu (1 Kings xvi. 7); but circumstances of time and place seem adverse to this conclusion.

2. **HANANI**, a brother of Nehemiah, who went from Jerusalem to Shushan, being sent most probably by Ezra, and brought that information respecting the miserable condition of the returned Jews which led to the mission of Nehemiah. Hanani came back to Judæa, probably along with his brother, and, together with one Hananiah, was appointed to take charge of the gates of Jerusalem, and see that they were opened in the morning and closed in the evening at the appointed time. The circumstances of the time and place rendered this an important and responsible duty, not unattended with some danger (Neh. vii. 2, 3). B.C. 455.

1. **HANANIAH** (חֲנַנְיָה, *Jehovah's goodness;* Sept. Ἀνανίας), a false prophet of Gibeon, who, by opposing his prophecies to those of Jeremiah, brought upon himself the terrible sentence, 'Thou shalt die *this year*, because thou hast taught rebellion against the Lord.' He died accordingly (Jer. xxviii. 1, sq.), B.C. 596.

2. **HANANIAH.** [SHADRACH.]

3. **HANANIAH**, the person who was associated with Nehemiah's brother Hanani in the charge of the gates of Jerusalem. The high eulogy is bestowed upon him, that 'he was a faithful man, and feared God above many' (Neh. vii. 2) [HANANI 2].

HAND, the organ of feeling, rightly denominated by Galen the instrument of instruments, since by its position at the end of the fore-arm, its structure and its connection with the mind, the hand admirably executes the behests of the human will, and acquires and imparts to man incomparable skill and power. By the peculiarities of

its conformation—the inclination of the thumb to the palm, the comparative length of the thumb and of the fingers, 'the hollow of the hand,' and the fleshy protuberances by which that hollow is mainly formed — this member is wonderfully adapted to the purposes for which it was designed, and serves to illustrate the wisdom and providence of the great Creator (*The Hand, its Mechanism, and vital Endowments, as evincing Design*, by Sir Charles Bell). In no one quality is the hand more distinguished as an instrument than in the flexibility of the parts, and the ease with which the whole is moved—a power which is owing to the complexity of its structure, consisting, as it does, of no fewer than twenty-seven separate bones, which are bound together and put in motion by nineteen muscles.

The hand itself serves to distinguish man from other terrestrial beings. No other animal has any member comparable with the human hand. The trunk of the elephant unites the attributes of skill and power to a surprising extent, but yields the palm to the hand. The fore-foot of the ouran-outang, though possessed of extraordinary properties, is greatly inferior to the hand. In the chimpanzee the thumb is so short as not to extend further than the root of the fingers.

Of the two hands the right has a preference derived from natural endowment. Its universal use, as the chief instrument in acting, serves to show that its superiority is something more than an accident. But the preference which it holds is only a part of the general advantage which the right side has over the left, not only in muscular strength, but also in its vital or constitutional properties (Bell).

Considering the multiplex efficacy of the human hand, the control which it has given man, the conquest over the external world which it has enabled him to achieve, and the pleasing and useful revolutions and improvements which it has brought about, we are not surprised to read the glowing eulogy in which Cicero (*De Nat. Deor*. ii. 60) has indulged on the subject, nor to find how important is the part which the hand performs in the records of divine revelation. From the properties already described, the student of Scripture is prepared to see the hand employed in holy writ as a symbol of skill, strength, and efficacy. As a part of that general anthropomorphism, without whose aid men in the early ages could probably have formed no conception of God, and which, after all, is less gross among the ancient Hebrews than among other contemporary nations, the Deity is frequently spoken of in the records of revelation as if possessed of hands; though it may be questioned if such phraseology was, even in primitive times, anything more than figurative, a setting forth of the unknown by the known, a sort of pictorial writing in divine things. It is, however, pretty safe to affirm, that many vulgar errors in religion owe their origin and support to the inaptitude of men to look through the sign to the thing signified, to pass from the shadow upwards to the substance, to divest eternal truth of its temporary vestments. Were this more generally effected, God would not be regarded as seated in some part of space on a throne of gold, with his son placed literally at his 'right hand;' but the scriptural representations would be seen to indicate the ceaseless providence and constant supervision of the Creator, in which the risen and glorified Jesus has an intimate interest and a supreme share.

The ordinary usages of Scripture in regard to 'hand,' 'right hand,' &c., must be familiar to the student, and the passages on which the representations above made are founded, are too easy of access, by means of a Concordance, to need being enumerated here: it may therefore be more useful to confine the rest of our remarks to one or two specific and more important points.

The phrase 'sitting at the right hand of God,' as applied to the Saviour of the world, is derived from the fact that with earthly princes a position on the right hand of the throne was accounted the chief place of honour, dignity, and power: —'upon thy right-hand did stand the queen' (Ps. xlv. 9; compare 1 Kings ii. 19; Ps. lxxx. 17). The immediate passage out of which sprang the phraseology employed by Jesus may be found in Ps. cx. 1: 'Jehovah said unto my Lord, sit thou at my right hand until I make thine enemies thy footstool.' Accordingly the Saviour declares before Caiaphas (Matt. xxvi. 64; Mark xiv. 62), 'Ye shall see the Son of man sitting on the right hand of power, and coming in the clouds of heaven;' where the meaning obviously is that the Jews of that day should have manifest proofs that Jesus held the most eminent place in the divine favour, and that his present humiliation would be succeeded by glory, majesty, and power (Luke xxiv. 26; 1 Tim. iii. 16). So when it is said (Mark xvi. 19; Rom. viii. 34; Col. iii. 1; 1 Pet. iii. 22; Heb. i. 3; viii. 1) that Jesus 'sits at the right hand of God,' 'at the right hand of the Majesty on high,' we are obviously to understand the assertion to be that, as his Father, so he worketh always (John v. 17) for the advancement of the kingdom of heaven, and the salvation of the world.

As the hand is the great instrument of action, so is it eminently fitted for affording aid to the mind, by the signs and indications which it makes. Thus to lay the hand on any one was a means of pointing him out, and consequently an emblem of setting any one apart for a particular office or dignity. *Imposition of hands* accordingly formed, at an early period, a part of the ceremonial observed on the appointment and consecration of persons to high and holy undertakings. In Num. xxvii. 19 Jehovah is represented as thus speaking to Moses, 'Take thee Joshua, the son of Nun, a man in whom is the spirit, and lay thine hand upon him, and set him before Eleazar the priest, and before all the congregation, and give him a charge in their sight,' &c.: where it is obvious that the laying on of hands did neither originate nor communicate divine gifts; for Joshua had 'the spirit' before he received imposition of hands; but was merely an instrumental sign for marking him out individually, and setting him apart, in sight of the congregation, to his arduous work. Similar appears to be the import of the observance in the primitive church of Christ (Acts viii. 15-17; 1 Tim. iv. 14; 2 Tim. i. 6). A corruption of this doctrine was, that the laying on of hands gave of itself divine powers, and on this account Simon, the magician (Acts viii. 18), offered money, saying 'Give me also this power, that on whomsoever I lay hands he may receive the Holy Ghost,' in-

tending probably to carry on a gainful trade by communicating the gift to others.

In Col. ii. 13, 14, 'the law of commandments contained in ordinances' (Ephes. ii. 15), is designated '*the handwriting* of ordinances that was against us,' which Jesus blotted out, and took away, nailing it to his cross; phraseology which indicates the abolition, on the part of the Saviour, of the Mosaic law (Wolfius, *Curæ Philolog. in N. T.* iii. 16).—J. R. B.

HANDICRAFT. In the early periods to which the Scriptural history refers we do not meet with those artificial feelings and unreasonable prejudices against hand-labour which prevail and are so banefully influential in modern society. The entire circle of achievement which man had effected in the natural world, was, in ancient times, too immediately and too obviously connected with the labour of the hands, which is, in truth, the great primary source of wealth, for any feeling regarding it to prevail but one of high estimation. When hand-labourers were seen on every side, and found in every grade of life, and when the products of their skill and industry were the chief, if not the sole, advantages which civilization gave, handicraftsmen, as they were among the great benefactors, so were they among the chief favourites of human kind. Accordingly, even the creation of the world is spoken of as the work of God's hands, and the firmament is said to show his handy-work (Ps. viii. 3; xix. 1; Gen. ii. 2; Job xxxiv. 19). The primitive history, too, which the Bible presents is the history of hand-labourers. Adam dressed the garden in which God had placed him (Gen. ii. 15), Abel was a keeper of sheep, Cain a tiller of the ground (Gen. iv. 3), Tubal-cain a smith (Gen. iv. 22). These references prove how soon men gave themselves to the labours of the hand, and these and similar passages serve to show what were the earliest employments, did not the nature of the case suffice to assure us that the most necessary arts would be first cultivated. The general nature of this article does not require any extensive or detailed inquiry into the hand-labours which the Israelites practised before their descent into Egypt; but the high and varied culture which they found there, declares that any history of hand-labour must be very defective the sources of which are found exclusively in the Bible. The shepherd-life which the patriarchs previously led in their own pasture-grounds, was not favourable to the cultivation of the practical arts of life, much less of those arts by which it is embellished. Egypt, in consequence, must have presented to Joseph and his father not only a land of wonders, but a source of rich and attractive knowledge. And though the herdsman-sort of life which the Hebrews continued to lead would not be conducive to their advancement in either science or art; yet it cannot be doubted that they derived in no slight degree those advantages which have always been reaped by a less cultured people, when brought into proximity or contact with a high state of civilization.

Another source of knowledge to the Hebrews of handicrafts were the maritime and commercial Phœnicians. Commerce and navigation imply great skill in art and science; and the pursuits to which they lead largely increase the skill whence they emanate. It is not, therefore, surprising that the origin of so many arts has been referred to the north-eastern shore of the Mediterranean Sea; nor is there any difficulty in understanding how arts and letters should be propagated from the coast to the interior, conferring high advantages on the inhabitants of Syria in general, as well before as after the settlement of the Hebrew tribes in the land of promise. At first the division of labour was only very partial. The master of the family himself exercised such arts as were found of absolute necessity. Among these may be reckoned not only those which pasturage and tillage required, but most of those which were of that rough and severe nature which demand strength as well as skill; such, for instance, as the preparation of wood-work for the dwelling, the slaying of animals for food, which every householder understood, together with the art of extracting the blood from the entire carcass. The lighter labours of the hand fell to the share of the housewife; such as baking bread—for it was only in large towns that baking was carried on as a trade (2 Sam. xiii. 8),—such, also, as cooking in general, supplying the house with water, no very easy office, as the fountains often lay at a considerable distance from the dwelling: moreover, weaving, making of clothes for males as well as females, working in wool, flax, hemp, cotton, tapestry, richly coloured hangings, and that not only for domestic use, but for 'merchandise,' were carried on within the precincts of the house by the mistress and her maidens (Exod. xxxv. 25; 1 Sam. ii. 19; 2 Kings xxiii. 7; Prov. xxxi.).

The skill of the Hebrews during their wanderings in the desert does not appear to have been inconsiderable; but the pursuits of war and the entire absorption of the energies of the nation in the one great work of gaining the land which had been given to them, may have led to their falling off in the arts of peace; and from a passage in 1 Sam. (xiii. 20) it would appear that not long after they had taken possession of the country they were in a low condition as to the instruments of handicraft. A comparatively settled state of society, however, soon led to the revival of skill by the encouragement of industry. A more minute division of labour ensued. Trades, strictly so called, arose, carried on by persons exclusively devoted to one pursuit. Thus in Judg. xvii. 4 and Jer. x. 14, 'the founder' is mentioned, a trade which implies a practical knowledge of metallurgy; the smelting and working of metals were well known to the Hebrews (Job xxxvii. 18); brass was in use before iron; arms and instruments of husbandry were made of iron. In Exodus (xxxv. 30-35) a passage occurs which may serve to specify many arts that were practised among the Israelites, though it seems also to intimate that at the time to which it refers artificers of the description referred to were not numerous—'See, the Lord hath called by name Bezaleel, and hath filled him with the spirit of God, in knowledge and all manner of workmanship, and to devise curious works, to work in gold, and in silver, and in brass, and in the cutting of stones, to set them, and in carving of wood, to make any manner of cunning work; and he hath put in his heart that he may teach; both he and Aholiab: them hath he filled with wisdom of heart to work all manner of work

of *the engraver*; and of the cunning workman, and of *the embroiderer* in blue and in purple, in scarlet and in fine linen, and of *the weaver*.' From the ensuing chapter (ver. 34) it appears that gilding was known before the settlement in Canaan. The ark (Exod. xxxvii. 2) was overlaid with pure gold within and without. The cherubim were wrought ('beaten,' Exod. xxxvii. 7) in gold. The candlestick was of beaten gold (verses 17, 22). Wire-drawing was probably understood (Exod. xxxviii. 4; xxxix. 3). Covering with brass (Exod. xxxviii. 2) and with silver (Prov. xxvi. 23) was practised. Architecture and the kindred arts do not appear to have made much progress till the days of Solomon, who employed an incredible number of persons to procure timber (1 Kings v. 13, sq.); but the men of skill for building his temple he obtained from Hiram, king of Tyre (1 Kings v. sq.; 1 Chron. xiv. 1; 2 Chron. ii. 7). Without pursuing the subject into all its details (see Scholz, *Handb. der Bib. Archäol.* p. 390, sq.; De Wette, *Lehrb. der Archäol.* p. 115, sq.; Winer, *Realwört.* art. 'Handwerke'), we remark that the intercourse which the Babylonish captivity gave the Jews seems to have greatly improved their knowledge and skill in both the practical and the fine arts, and to have led them to hold them in very high estimation. The arts were even carried on by persons of learning, who took a title of honour from their trade (Rosenmüller, *Morgenl.* vi. 42). It was held a sign of a bad education if a father did not teach his son some handicraft—quicunque filium suum non docet aliquid opificium est ac si doceret eum latrocinium—'whoever does not teach his son a trade, teaches him robbing' (Lightfoot, p. 616; Mish. Tr. *Pirke Aboth*, ii. 2; Wagenseil's *Sota*, p. 597; Othon. *Lex. Rabb.* 491).

In the Apocrypha and New Testament there are mentioned tanners (Acts ix. 43), tent-makers (Acts xviii. 3); in Josephus (*De Bell. Jud.* v. 4. 1) cheese-makers; domestics (*κουρεῖς*, *Antiq.* xvi. 11. 5); in the Talmud, with others we find tailors, shoe-makers, blood-letters, glaziers, goldsmiths, plasterers. Certain handicraftsmen could never rise to the rank of high-priest (Mish. Tr. *Kiddush*, 82. 1), such as weavers, barbers, fullers, perfumers, cuppers, tanners; which pursuits, especially the last, were held in disesteem (Mishna, Tr. *Megillah*, iii. 2; Othon. *Lex. Rabb.* 155; Wetstein, *N. T.* ii 516). In large cities particular localities were set apart for particular trades, as is the case in the East to the present day. Thus in Jeremiah (xxxvii. 21) we read of 'the bakers' street.' So in the Talmud (*Mishna*, v. 169, 225) mention is made of a flesh-market; in Josephus (*De Bell. Jud.* v. 4. 1) of a cheese-market; and in the New Testament (John v. 2) we read of a sheep-market. See Iken, *Antiq. Hebr.* iii.-ix. p. 578, sq.; Bellermann, *Handb.* i. 22, sq.—J. R. B.

HANDKERCHIEF, NAPKIN (*σουδάριον*; Vulg. *sudarium*), occurs in Luke xix. 20; John xi. 44; xx. 7; Acts xix. 12. The Greek word is adopted from the Latin (like *κῆνσος*, *μεμβράνα*, and many others), and probably, at first, had the *same* meaning with it, and which, being derived from *sudo*, to perspire, corresponds to our word (pocket) *handkerchief*. The Greek rhetorician Pollux (A.D. 180) remarks that the word *σουδάριον* had supplanted not only the *ancient* Greek word for handkerchief, *ἡμιτύβιον* or *ἡμιτύμβιον*, which he considers an Egyptian word, but even the more *recent* term *καψιδρώτιον*: Τὸ δὲ ἡμιτύμβιον ἔστι μὲν καὶ τοῦτο Αἰγύπτιον, εἴη δ' ἂν κατὰ τὸ ἐν τῇ μέσῃ κωμῳδίᾳ, καψιδρώτιον καλούμενον, ὃ νῦν σουδάριον ὀνομάζεται (*Onomast.* vii. 16). The influence of the Romans caused the introduction of this word even among the Orientals. The rabbins have סודרא. In the Syriac version סידרא answers to the Hebrew מטפחת, *a veil* (margin, *sheet* or *apron*); and in Chaldee סודר or סודרא is used for a veil or *any* linen cloth (Buxtorf, *Lex. Chal.* p. 1442). It is indeed but natural to expect that a foreign word, introduced into any language, should be applied by those who borrow it in a looser sense than they do from whom it is obtained. Hence, although the Latin word *sudarium* is *generally* restricted to the forementioned meaning, yet in the Greek and Syriac languages it signifies, *chiefly*, napkin, wrapper, &c. These observations prepare us for the different uses of the word in Scripture. In the first instance (Luke xix. 20) it means a wrapper, in which the 'wicked servant' had laid up the pound entrusted to him by his master. For references to the custom of laying up money, &c. in *σουδάρια*, both in classical and rabbinical writers, see Wetstein's *N. T.* on Luke xix. 20. In the second instance (John xi. 44) it appears as a kerchief, or cloth attached to the head of a corpse. It was perhaps brought round the forehead and under the chin. In many Egyptian mummies it does not *cover the face*. In ancient times among the Greeks it *did*. Nicolaus (*De Græcor. Luctu*, c. iii. § 6, Thiel. 1697). Maimonides, in his comparatively recent times, describes the *whole face* as being covered, and gives a reason for the custom (Tract *Efel*, c. 4). The next instance is that of the *σουδάριον* which had been 'about the head' of our Lord, but which, after his resurrection, was found rolled up, as if deliberately, and put in a place separately from the linen clothes *χωρὶς ἐντετυλιγμένον εἰς ἕνα τόπον*. The last instance of the Biblical use of the word occurs in the account of 'the special miracles' wrought by the hands of Paul (Acts xix. 11); 'so that *σουδάρια* (handkerchiefs, napkins, wrappers, shawls, &c.) were brought from his body to the sick; and the diseases departed from them, and the evil spirits went out of them.' The Ephesians had not unnaturally inferred that the apostle's miraculous power could be communicated by such a mode of contact; and certainly cures thus received by parties at a distance, among a people famed for their addictedness to 'curious arts,' *i. e.* magical skill, &c., would serve to convince them of the truth of the gospel, by a mode well suited to interest their minds. The Apostle is not *recorded* to have expressed any *opinion* respecting the *reality* of this *intermediate means* of those miracles. He had doubtless sufficiently explained that these and all the other miracles 'wrought by his hands,' *i. e.* by his means, were really wrought by God (ver. 11) in attestation of the mission of Jesus. If he himself did *not* entertain exactly the same ideas upon the subject as they did, he may be considered as conceding to, or rather not disturbing unnecessarily, popular notions, rendered harmless by his previous explanation, and affording a very convenient medium for achieving much higher purposes. If the connection be-

tween the *secondary* cause and the effect was *real*, it reminds us of our Saviour's expression, 'I perceive that virtue is gone out of me' (Mark v. 30); which is, however, regarded by many critics as a popular mode of saying that he knew that a miracle had been wrought by his power and efficacy—a mode of speaking in *unison* at least with the belief of the woman that she should be healed if she could but touch the hem of his garment unperceived by him, and perhaps even conceded to, in accordance with the miracles wrought through the medium of contact related in the Old Testament (1 Kings xvii. 21; 2 Kings iv. 29, &c.), and in order, by a superior display, in regard both to speed and extensiveness, to demonstrate his supremacy by a mode through which the Jews were best prepared to perceive it (Luke vi. 19; Schwarz, *ad Olear. de Stylo N. T.* p. 129; Soler. *de Pileo*, p. 17; Pierson, *ad Mœr.* p. 348; Lydii *Flor. Spars. ad Pass. J. C.* p. 5; Drusius, *Quæstt. Heb.* c. 2; Rosenmüller and Kuinoel on the passages).—J. F. D.

HANGING. [PUNISHMENTS.]

HANNAH, properly CHANNAH (חַנָּה, *graciousness*; Sept. Ἄννα), wife of a Levite named Elkanah, and mother of Samuel. She was very dear to her husband, but being childless was much aggrieved by the insults of Elkanah's other wife Peninnah, who was blessed with children. The family lived at Ramathaim-zophim, and, as the law required, there was a yearly journey to offer sacrifices at the sole altar of Jehovah, which was then at Shiloh. Women were not bound to attend; but pious females free from the cares of a family often did so, especially when the husband was a Levite. Every time that Hannah went there childless she declined to take part in the festivities which followed the sacrifices, being then, as it seems, peculiarly exposed to the taunts of her rival. At length, on one of these visits to Shiloh, while she prayed before returning home, she vowed to devote to the Almighty the son which she so earnestly desired (Num. xxx. 1, sq.). It seems to have been the custom to pronounce all vows at the holy place in a loud voice, under the immediate notice of the priest (Deut. xxiii. 23; Ps. xxvi. 14); but Hannah prayed in a low tone, so that her lips only were seen to move. This attracted the attention of the high-priest, Eli, who suspected that she had taken too much wine at the recent feast. From this suspicion Hannah easily vindicated herself, and returned home with a lightened heart. Before the end of that year Hannah became the rejoicing mother of a son, to whom the name of Samuel was given, and who was from his birth placed under the obligations of that condition of Nazariteship to which his mother had vowed him. B.C. 1171.

Hannah went no more to Shiloh till her child was old enough to dispense with her maternal services, when she took him up with her to leave him there, as, it appears, was the custom when one already a Levite was placed under the additional obligations of Nazariteship. When he was presented in due form to the high-priest, the mother took occasion to remind him of the former transaction: 'For this child,' she said, 'I prayed, and the Lord hath given me my petition which I asked of him' (1 Sam. i. 27). Hannah's gladness afterwards found vent in an exulting chant, which furnishes a remarkable specimen of the early lyric poetry of the Hebrews, and of which many of the ideas and images were in after times repeated by the Virgin Mary on a somewhat similar occasion (Luke i. 46, sq.).

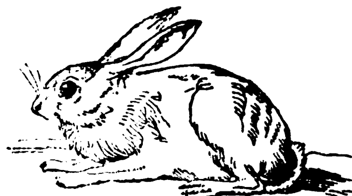
After this Hannah failed not to visit Shiloh every year, bringing a new dress for her son, who remained under the eye and near the person of the high-priest [SAMUEL]. That great personage took kind notice of Hannah on these occasions, and bestowed his blessing upon her and her husband. The Lord repaid her abundantly for that which she had, to use her own expression, 'lent to him;' for she had three sons and two daughters after Samuel.

HANUN (חָנוּן, *bestower*; Sept. Ἀννών), son and successor of Nahash, king of the Ammonites. David, who had in his troubles been befriended by Nahash, sent, with the kindest intentions, an embassy to condole with him on the death of his father, and to congratulate him on his own accession. The rash young king, however, was led to misapprehend the motives of this embassy, and to treat with gross and inexpiable indignity the honourable personages whom David had charged with this mission. Their beards were *half* shaven, and their robes cut short by the middle, and they were dismissed in this shameful trim; which can be appreciated only by those who consider how reverently the beard has always been regarded by the Orientals [BEARD] (B.C. 1038). When the news of this affront was brought to David, he sent word to the ambassadors to remain at Jericho till the growth of their beards enabled them to appear with decency in the metropolis. He vowed vengeance upon Hanun for the insult; and the vehemence with which the matter was taken up forms an instance, interesting from its antiquity, of the respect expected to be paid to the person and character of ambassadors. Hanun himself looked for nothing less than war as the consequence of his conduct; and he subsidized Hadarezer and other Syrian princes to assist him with their armies. The power of the Syrians was broken in two campaigns, and the Ammonites were left to their fate, which was severe even beyond the usual severities of war in that remote age [AMMONITES; DAVID] (2 Sam. x.; 1 Chron. xix.).

HARA (הָרָא), a Chaldee form for הָרָה, *mountain* (Gesenius); Vulg. *Ara*. One of the places to which the tribes beyond the Jordan were carried away by Tiglath-pileser. The word occurs only in a single passage (1 Chron. v. 26); in the Septuagint and Syriac version it is altogether omitted. The Chaldee Paraphrast renders it by טורי קבלא, *mountains of darkness*. Bochart and Gesenius conjecture that it is a name for the northern part of Media, which in Arabic is called *Algebal*, 'the mountainous region,' to which the Hebrew term corresponds. Media, Bochart observes, is called *Aria* by the Greeks, and the inhabitants are denominated Arii (Ἄριοι) (Herod. vii. 62; Bochart, *Geog. Sacra*, iii. 14. p. 194; Gesenius, *Thesaurus*, *s.v.*; Michaelis, *Supplementa ad Lex. Heb.*, vol. i. p. 570).—J. E. R.

HARADAH, a camp or station of the Israelites (Num. xxxiii. 24) [WANDERING].

HARAM. [HOUSE.]



1. HARAN, eldest son of Terah, brother of

Abraham and Nahor, and father of Lot, Milcah, and Iscah. He died before his father Terah; which, from the manner in which it is mentioned, appears to have been a much rarer case in those days than at present (Gen. xi. 27, sq.).

HARAN, or rather CHARAN (חָרָן; Sept. Χαῤῥάν), called by the Greeks Charran, and by the Romans Charræ. It was situated in the north-western part of Mesopotamia, on a river of the same name running into the Euphrates. It is supposed to have been so called from Haran, the father of Lot and brother of Abraham; but there appears no ground for this conclusion except the identity of names. Abraham, after he had been called from Ur of the Chaldees, tarried here till his father Terah died, when he proceeded to the land of Canaan (Gen. xi. 31, 38; Acts vii. 4). The elder branch of the family still remained at Haran; which led to the interesting journeys thither described in the patriarchal history—first, that of Abraham's servant to obtain a wife for Isaac (Gen. xxiv.), and next, that of Jacob when he fled to evade the wrath of Esau (Gen. xxviii. 10). The plain bordering on this town is celebrated in history as the scene of a battle in which the Roman army was defeated by the Parthians, and the Triumvir Crassus killed. Abulfeda (*Tab. Syriæ*, p. 164) speaks of Haran as formerly a great city, which lay in an arid and barren tract of country in the province of Diar Modhar. The Sabians had a chapel there which was dedicated to Abraham.

Haran still retains its ancient name in the form of Harran, and is only peopled by a few families of wandering Arabs, who are led thither by a plentiful supply of water from several small streams. It is situated in a flat and sandy plain in 36° 40′ N. lat., 39° 2′ 45″ E. long.

HARE (אַרְנֶבֶת *arnebeth;* Arab. *arneb*) occurs in Lev. xi. 6, and Deut. xiv. 7, and, in both instances, it is prohibited from being used as food, because it chews the cud, although it has not the hoof divided. But the hare belongs to an order of mammals totally distinct from the ruminantia, which are all, without exception, bisulca, the camel's hoof alone offering a partial modification. They have all four stomachs; incisor teeth, with again some slight modification in the camel, solely in the lower jaw; molars made for grinding, and the lower jawbone articulated, so as to admit of the circular action required for that purpose, when the food, already swallowed, is forced up to be thoroughly triturated. All these characters and faculties are wanting in the hare, which belongs to the order rodentia; for, in common with porcupines, squirrels, beavers, and rats, it has incisor teeth above and below, set like chisels, and calculated for gnawing, cutting, and nibbling. The word 'nibble' itself shows an affinity to the Semitic particle *neb* in the names above cited.) The stomach of rodents is single, and the motion of the mouth, excepting when they masticate some small portion of food reserved in the hollow of the cheek, is more that of the lips, when in a state of repose the animals are engaged in working the incisor teeth upon each other. This practice is a necessary condition of existence, for the friction keeps them fit for the purpose of nibbling, and prevents their growing beyond a proper length. It is a provision of nature in the whole order of rodents; and, if by any accident the four cutting teeth be rendered inefficient by not closing upon each other at the exact line of contact, they grow rapidly beyond serviceable use, exceed the opening of the mouth, and impede feeding till the animal perishes from want. As hares do not subsist on hard substances, like most of the genera of the order, but on tender shoots and grasses, they have more cause, and therefore a more constant craving, to abrade their teeth; and this they do in a manner which, combined with the slight trituration of the occasional contents of the cheeks, even modern writers, not zoologists, have mistaken for real rumination. In the German versions, the expression *wiederkauen*, 'to chew again,' is much more correct than the English phrase, 'to chew the cud,' because this last implies a faculty which re-chewing does not, and which the hare does not possess.

333. [Syrian Hare.]

Physiological investigation having fully determined these questions, it follows that both with regard to the Shaphan and the Hare we should understand the original in the above passages, rendered 'chewing the cud,' as merely implying a second mastication, more or less complete, and not necessarily that faculty of true ruminants, which derives its name from a power to draw up aliment, after deglutition, when worked into a ball, from the first stomach into the mouth, and there to submit it to a second grinding process. The act of 'chewing the cud' and 're-chewing' being considered identical by the Hebrews, the sacred lawgiver, not being occupied with the doctrines of science, no doubt used the expression in the sense in which it was then understood. It may be added, that a similar opinion, and consequent rejection of the hare as food, pervaded many nations of antiquity, who derived their origin, or their doctrines, from a Semitic source; and that among others it existed among the British Celts, probably even before they had any intercourse with Phœnician merchants.

There are two distinct species of hare in Syria, one, Lepus Syriacus, or Syrian hare, nearly equal in size to the common European, having the fur ochry buff, and Lepus Sinaiticus, or hare of the desert, smaller and brownish. They reside in the localities indicated by their trivial names, and are distinguished from the common hare, by a greater length of ears, and a black tail with white fringe. There is found in Egypt, and higher up the Nile, a third species, represented in the outline paintings on ancient monuments, but not coloured with that delicacy of tint required for distinguishing it from the others, excepting that it appears to be marked with the black speckles which characterize the existing species.—C. H. S.

HARETH, a forest in Judah, to which David fled from Saul (1 Sam. xxii. 5) [FOREST].

HARLOT, WHORE, STRANGE WOMAN, &c. (זוֹנָה; Sept. πόρνη; Vulg. *meretrix*; קְדֵשָׁה, זָרָה, נָכְרִיָּה, &c. The first of these English words, to which various etymologies have been assigned, signifies a prostitute for lust or gain. The *mercenary* motive is more evident in the second, from the German *huren*, Dutch *hueren*, 'to hire.' It is equally apparent in the Greek πόρνη, from περνάω, 'to sell;' and in the Latin *meretrix*, from *mereor*, 'to earn.' Thus Ovid (*Amor.* i. 10, 21):—

'Stat meretrix certo cuivis mercabilis ære,
Et miseras jusso corpore quærit opes.'

The first Hebrew word (זונה) occurs frequently, and is often rendered in our version by the first of these English words, as in Gen. xxxiv. 31, &c., and sometimes, without apparent reason for the change, by the second, as in Prov. xxiii. 27, and elsewhere. The first English word is also applied to *different* Hebrew words, whereby important distinctions are lost. Thus in Gen. xxxviii. 15, the word is זונה, 'harlot,' which, however, becomes changed to קדשה, 'harlot,' in vers. 21, 22, which means, literally, a *consecrated* woman, a female (perhaps priestess) devoted to prostitution in honour of some *heathen* idol. The distinction shows that Judah supposed Tamar to be a *heathen*: the facts, therefore, do not prove that prostitution was then practised between *Hebrews*. The following elucidation is offered of the most important instances in which the several words occur:—

First, זונה. From the foregoing account of Judah it would appear that the 'veil' was at that time peculiar to harlots. Judah thought Tamar to be such, '*because* she had covered her face.' Mr. Buckingham remarks, in reference to this passage, that 'the Turcoman women go unveiled to this day' (*Travels in Mesopotamia*, i. 77). It is contended by Jahn and others that in ancient times all females wore the veil (*Bibl. Archäol.* p. 127). Possibly some peculiarity in the size of the veil, or the mode of wearing it, may have been (שית זונה, Prov. vii. 10) the distinctive dress of the harlot at that period (see New Translation, by the Rev. A. De Sola, &c. pp. 116, 248-9). The priests and the high-priest were forbidden to take a wife that was (*had been*, Matt. xxi. 31) a harlot. Josephus extends the law to all the Hebrews, and seems to ground it on the prohibition against oblations arising from prostitution, Deut. xxiii. 18 (*Antiq.* iv. 8. 23). The celebrated case of Rahab has been much debated. She is, indeed, called by the word usually signifying harlot (Josh. ii. 1; vi. 17; Sept. πόρνη; Vulg. *meretrix;* and in Heb. xi. 31; James ii. 25); but it has been attempted to show that the word may mean an innkeeper [RAHAB]. The next instance introduces the epithet of 'strange woman.' It is the case of Jephthah's mother (Judg. xi. 2), who is *also* called a harlot (πόρνη; *meretrix*); but the epithet אשה אחרת, 'strange woman,' merely denotes *foreign extraction*. Josephus says ξένος περὶ τὴν μητέρα, 'a stranger by the mother's side.' The masterly description in Prov. vii. 6, &c. may possibly be that of an abandoned *married* woman (ver. 19, 20), or of the solicitations of a courtezan, 'fair speech,' under such a pretension. The mixture of religious observances (ver. 14) seems illustrated by the fact that 'the gods are actually worshipped in many oriental brothels, and fragments of the offerings distributed among the frequenters' (Dr. A. Clarke's *Comment.* in loc.). The representation given by Solomon is no doubt *founded* upon facts, and therefore shows that in his time prostitutes plied their trade in the 'streets' (Prov. vii. 12; ix. 14, &c.; Jer. iii. 2; Ezek. xvi. 24, 25, 31). Since the Hebrews regarded Jehovah as the husband of his people, by virtue of the covenant he had made with them (Jer. iii. 1); therefore, to *commit fornication* is a very common metaphor in the Scriptures to denote defections on their part from that covenant, and especially by the practice of idolatry [FORNICATION]. Hence the degeneracy of Jerusalem is illustrated by the symbol of a harlot (Isa. i. 21), and even that of heathen cities, as of Nineveh (Nah. iii. 4). Under this figure the prophet Ezekiel delivers the tremendous invectives contained in ch. xvi., xxiii. In the prophecy of Hosea the illustration is carried to a startling extent. The prophet seems commanded by the Lord to take 'a wife of whoredoms and children of whoredoms' (ch. i. 2), and to 'love an adulteress' (ch. iii. 1). It has, indeed, been much disputed whether these transactions were real, or passed in vision only; but the idea itself, and the diversified applications of it throughout the prophecy, render it one of the most effective portions of Scripture [HOSEA].

Secondly, קדשה (occurs Gen. xxxviii. 15, 21, 22; Deut. xxiii. 17; Hos. iv. 14). It has been already observed that the proper meaning of the word is *consecrated prostitute*. The very early allusion to such persons, in the *first* of these passages, agrees with the accounts of them in ancient heathen writers. Herodotus refers to the 'abominable custom of the Babylonians, who compelled every native female to attend the temple of Venus once in her life, and to prostitute herself in honour of the goddess' (i. 199; Baruch, vi. 43). Strabo calls prostitutes, who, it is well known, were at Athens dedicated to Venus, ἱερόδουλοι γυναῖκες, 'consecrated servants,' 'votaries' (*Geog.* viii. p. 378; Grotius, *Annotat. on Baruch;* Beloe's *Herodotus*, Notes, vol. i. p. 272, Lond. 1806). The transaction related in Numbers xv. 1-15 (comp. Ps. cvi. 28) seems connected with idolatry. The prohibition in Deut. xxiii. 17, 'there shall be no קדשה, "whore," of the daughters of Israel,' is intended to exclude such *devotees* from the worship of Jehovah (see other allusions, Job xxxvi. 14; 1 Kings xiv. 24; xv. 12).

Thirdly, נכריה, 'the strange woman' (1 Kings xi. 1; Prov. v. 20; vi. 24; vii. 5; xxiii. 27; Sept. ἀλλοτρία; Vulg. *aliena*, *extranea*). It seems probable that some of the Hebrews in later times interpreted the prohibition against fornication (Deut. xxii. 41) as limited to females of their own nation, and that the 'strange women' in question were Canaanites and other Gentiles (Josh. xxiii. 13). In the case of Solomon they are specified as Moabites, Ammonites, Edomites, Zidonians, and Hittites. The passages referred to discover the character of these females. To the same class belongs זרה, 'the strange woman' (Prov. v. 3, 20; xxii. 14; xxiii. 33; γυνὴ πόρνη, ἀλλοτρία; *meretrix*, *aliena*, *extranea*): it is sometimes found אשה זרה (Prov. ii. 16; vii. 5)

To the same class of females belongs אשת כסילות, 'the foolish woman,' *i. e.* by a common association of ideas in the Shemitish dialects, *sinful* (Ps. xiv. 1). The description in Prov. ix. 14, &c. illustrates the character of the female so designated. To which may be added אשת רע, 'the evil woman' (Prov. v. 24).

In the New Testament πόρνη occurs in Matt. xxi. 31, 32; Luke xv. 30; 1 Cor. vi. 15, 16; Heb. xi. 31; James ii. 25. In none of these passages does it *necessarily* imply prostitution for gain. The likeliest is Luke xv. 30. It is used symbolically for a city in Rev. xvii. 1, 5, 15, 16; xix. 2, where the term and all the attendant imagery are derived from the Old Testament. It may be observed in regard to Tyre, which (Isa. xxiii. 15, 17) is represented as 'committing fornication with all the kingdoms of the world upon the face of the earth,' that these words, as indeed seems likely from those which follow, may relate to the various arts which she had employed to induce *merchants* to trade with her' (Patrick, *in loc.*). So the Sept. understood it, ἔσται ἐμπόριον πάσαις ταῖς βασιλείαις τῆς οἰκουμένης ἐπὶ πρόσωπον τῆς γῆς. Schleusner observes that the same words in Rev. xviii. 3 *may* also relate to *commercial dealings*. (Winer's *Realwörterb.* s. v. HURE; RAHAB; Fesselii *Advers. Sacr.* ii. 27. 1, 2; Witteb. 1650. Frisch, *De muliere peregrina ap. Hebr.* Lips. 1744). —J. F. D.

HARMONIES. The object of Harmonies is to arrange the Scriptures in chronological order, so that the mutual agreement of the several parts may be rendered apparent, and the true succession of events clearly understood. With this view various scholars have compiled harmonies of the Old Testament, of the New, and of particular portions of both. Harmonies of the Old Testament exhibit the books disposed in chronological order, as is done by Lightfoot in his 'Chronicle of the Times, and the order of the Texts of the Old Testament;' and by Townsend in his 'Old Testament arranged in Historical and Chronological order.' Harmonies of the New Testament present the gospels and epistles distributed in like order, the latter being interspersed among the Acts of the Apostles. In this way Townsend has proceeded in his valuable work entitled, 'The New Testament arranged in Chronological and Historical order.' Books, however, of this kind are so few in number, that the term *harmony* is almost appropriated by usage to the *gospels*. It is this part of the New Testament which has chiefly occupied the attention of those inquirers whose object is to arrange the Scriptures in their true order. The memoirs of our Lord written by the four Evangelists, have chiefly occupied the thoughts of those who wish to show that they all agree, and mutually authenticate one another. Accordingly, such compositions are exceedingly numerous. The four gospels narrate the principal events connected with our Lord's abode on earth, from his birth to his ascension. There must therefore be a general resemblance between them, though that of John contains little in common with the others, being apparently supplementary to them. Yet there are considerable diversities, both in the order in which facts are narrated, and in the facts themselves. Hence the difficulty of weaving the accounts of the four into a continuous and chronological history. Those portions of the Gospels that relate to the *resurrection* of the Saviour have always presented the greatest obstacles to the compilers of harmonies, and it must be candidly admitted that the accounts of this remarkable event are not easily reconciled. Yet the labours of West and Townson, especially the latter, have served to remove the apparent contradictions. In addition to them may be mentioned Cranfield and Hales, who have endeavoured to improve upon the attempts of their predecessors.

In connection with harmonies the term *diatessaron* frequently occurs. It denotes a continued narrative selected out of the four Gospels, in which all repetitions of the same or similar words are avoided. It is thus the *result* of a harmony, since the latter, properly speaking, exhibits the entire texts of the four Evangelists, arranged in corresponding columns. In popular language the two are often used synonymously.

The following questions relative to harmonies demand attention:—

1. Have *all* or *any* of the Evangelists observed chronological arrangement in their narratives?

2. What was the duration of our Lord's ministry?

1. It was the opinion of Osiander and his followers, that *all* the Evangelists record the facts of the Saviour's history in their true order. When therefore the same transactions are placed in a different order by the writers, they were supposed to have happened more than once. It was assumed that they took place as often as they were differently arranged. This principle is too improbable to require refutation. Instead of endeavouring to solve difficulties, it boldly meets them with a clumsy expedient. Improbable however as the hypothesis is, it has been adopted by Macknight. It is our decided conviction that *all* the Evangelists have not adhered to chronological arrangement.

The question then arises, have *all neglected* the order of time? Newcome and many others espouse this view. 'Chronological order,' says this writer, 'is not precisely observed by any of the Evangelists; St. John and St. Mark observe it most; and St. Matthew neglects it most.' Bishop Marsh supposes that Matthew probably adhered to the order of time, because he was for the most part an eye-witness of the facts. The others, he thinks, neglected the succession of events. The reason assigned by the learned prelate in favour of Matthew's order, is of no weight, as long as the *inspiration* of Mark, Luke, and John, is maintained. If they were infallibly directed in their compositions, they were in a condition equally favourable to *chronological* narration.

A close inspection of Matthew's Gospel will show that he did not intend to mark the true succession of events. He gives us no definite expressions to assist in arranging his materials in their proper order. Very frequently he passes from one occurrence to another without any note of time; sometimes he employs a τότε, sometimes ἐν ταῖς ἡμέραις ἐκείναις, ἐν ἐκείνῳ τῷ καιρῷ, or ἐν ἐκείνῃ τῇ ὥρᾳ. Rarely is he so minute as to use μεθ' ἡμέρας ἕξ (xvii. 1). In short, time and place seem to have been subordinated to the grand object which he had in view, viz., the lively exhibition

of Jesus in his person, works, and discourses. In pursuing this design, he has often brought together similar facts and addresses. Although, therefore, Kaiser founds upon the phrases we have adduced a conclusion the very reverse of ours, yet we believe that Matthew did not propose to follow chronological order. The contrary is obviously implied.

Mark again is still more indefinite than Matthew. Even the *general* expressions found in the first Gospel are wanting in his. The facts themselves, not their true succession, were the object of his attention. Chronological order is not observed in his Gospel, except in so far as that Gospel agrees with Luke's. Yet Cartwright, in his Harmony published about 1630, makes the arrangement of Mark his rule for method.

With regard to Luke, it is probable that he intended to arrange every thing in its true place, because at the beginning of his work, he employs the term καθεξῆς. This word is often referred to *succession of events*, without involving *time*; but it seems clearly to imply *chronological* succession (comp. Acts xi. 4). Although, therefore, Grotius and many others oppose the latter view, we cannot but coincide with Beza when he says: 'In harmonia Evangelistarum scribenda, rectiorem ordinem servari putem si in iis quæ habent communia, reliqui ad Lucam potius accommodentur, quam Lucas ad cæteros' (comp. also Olshausen, *Die Echtheit der vier Canon Evang.*, &c., Band i. ss. 82, 3, dritte Aufl.). We may therefore conclude that this Evangelist usually follows the chronological order, especially when such passages as iii. 1 and iii. 23 are considered, where exact notices of time occur. But as the Gospel advances, those expressions which relate to time are as indeterminate as Matthew's and Mark's. Frequently does he pass from one transaction to another without any note of time; and again, he has μετὰ ταῦτα, ἐν μιᾷ τῶν ἡμερῶν. In consequence of this vagueness, it is very difficult, if not impossible, to make out a complete harmony of the Gospels according to the order of Luke, because we have no precise data to guide us in inserting the particulars related by Matthew and Mark in their proper places, in the third Gospel. All that can be determined with any degree of probability is, that Luke's order seems to have been adopted as the true, chronological one. Whether the writer has deviated from it in any case, may admit of doubt. We are inclined to believe, that in *all minute particulars* chronological arrangement is not observed. The *general body* of facts and events seems to partake of this character, not *every special circumstance* noticed by the Evangelist. But we are reminded that the *assignment of dates* is distinct from *chronological arrangement*. A writer may narrate all his facts in the order in which they occurred, without specifying the particular time at which they happened; or, on the other hand, he may mark the dates without arranging his narrative in chronological order. But attention to one of these will naturally give rise to a certain opinion with regard to the other. The more indeterminate the notifications of time, the less probable is it that time was an element kept before the mind of the writer. If there be a few dates assigned with exactness, it is a *presumption* that the true arrangement is observed in other parts where no dates occur. In the succession of events Luke and Mark generally agree.

With regard to John's Gospel, it has little in common with the rest except the two last chapters. It is obvious, however, that his arrangement is chronological. He carefully marks, in general, whether one, two, or three days happened between certain events. His Gospel is therefore of great use in compiling a synopsis.

On the whole, we should make the Gospel of Luke the document to which the others should be subordinated in point of arrangement, not neglecting at the same time that of John in conjunction with it, wherever it is possible to connect them.

Still it appears that there are not sufficient data in the four Evangelists to enable the inquirer to compose a harmony in *exact chronological order*, so as to preclude objections to its arrangement. Since times and places have been left so indeterminate, it is hopeless to conceive of a diatessaron chronologically accurate in all particulars. The problem may continue to employ the ingenuity of inquirers, without affording an adequate compensation for the learning and labour bestowed upon it.

2. What was the duration of our Lord's ministry?

This is a question upon which the opinions of the learned have been much divided, and which cannot be settled with conclusive certainty. In order to resolve it, it is necessary to mark the different Passovers which Christ attended. Looking to the Gospels by Matthew, Mark, and Luke, we should infer that he was present at no more than two; the first at the time of his baptism, the second immediately before his crucifixion. But in John's Gospel *three* Passovers *at least* are named during the period of our Lord's ministry (ii. 13; vi. 4; xi. 55). It is true that some writers have endeavoured to adapt the Gospel of John to the other three, by reducing the Passovers mentioned in the former to *two*. So Priestley, Vossius, and Mann. In order to accomplish this, it was conjectured that πάσχα, in ch. vi. 4, is an interpolation, and then that ἑορτή denotes some other Jewish festival. Bishop Pearce went so far as to conjecture that the *entire verse* has been interpolated. For these rash speculations there is no authority. The received reading must here be followed (Lücke's *Commentar über Johannes*, dritte Aufl., zweiter Theil, s. 104). In addition to these passages, it has been thought by many that another Passover is referred to in v. 1, where, although πάσχα does not occur, ἡ ἑορτή is supposed to denote the same feast. But this is a subject of dispute. Irenæus is the oldest authority for explaining it of the Passover. Cyril and Chrysostom, however, referred it to the Feast of *Pentecost*; an opinion approved of by Erasmus, Calvin, and Beza. But Luther, Chemnitz, Calovius, Scaliger, Grotius, and Lightfoot, returned to the ancient view of Irenæus. Keppler seems to have been the first who conjectured that it meant the Feast of *Purim* immediately preceding the Second Passover. He was followed by Petau, Lamy, D'Outrein, &c. Cocceius, followed by Kaiser, referred it to the *Feast of Tabernacles*; while Keppler and Petau intimated that it *may possibly* have been the *Feast of Dedication*. Bengel defended the opinion of Chrysostom; while Hug

with much plausibility endeavours to show that it alludes to the feast of *Purim* immediately before the Passover. The latter view is adopted by Tholuck, Olshausen, and Clausen; though Greswell maintains that the Passover is meant.

It would occupy too much space to adduce the various considerations that have been urged for and against the two leading opinions, viz. the *Passover* and the *Feast of Purim*. The arguments advanced on either side are not conclusive. There is still room for doubt. The true meaning of ἑορτή (for Lachmann has rightly expunged the article from before it) is still indeterminate (see especially Lücke *über Johannes*, dritte Aufl., zweiter Theil, ss. 1-15, and Hug's *Introduction* translated by Fosdick, § 64, p. 447, sqq.). To us it appears most probable that the most ancient hypothesis is correct; although the circumstances urged against it are neither few nor feeble.

Sir Isaac Newton and Macknight suppose that *five* Passovers intervened between our Lord's baptism and crucifixion. This assumption rests on no foundation. Perhaps the term ἑορτή in John vii. 2 may have given rise to it; although ἑορτή is explained in that passage by σκηνοπηγία.

It has been well remarked by Bishop Marsh, that the Gospel of John presents almost insuperable obstacles to the opinion of those who confine Christ's ministry to one year. If John mentions but *three* Passovers, its duration must have exceeded two years; but if he mentions *four*, it must have been longer than three years. During the first three centuries it was commonly believed that Christ's ministry lasted but one year, or one year and a few months. Such was the opinion of Clemens Alexandrinus and Origen. Eusebius thought that it continued for above three years; which hypothesis became general. The ancient hypothesis, which confined the time to one year, was revived by Mann and Priestley; but Newcome, with more judgment, defended the common view, and refuted Priestley's arguments. In interweaving the Gospels of Matthew, Mark, and Luke, with that of John, the intervals between the Passovers are filled up by various transactions. Were the number of these feasts determinate and precise, there would be a general agreement in the filling up of the times between them; but in consequence of the uncertainty attaching to the subject, harmonies are found materially to differ in their modes of arrangement. One thing is evident, that the moderns in their endeavours after a chronological disposition of the Gospels, adopt a far more rational course than the ancients. The latter strangely supposed that the first six chapters of John's Gospel relate to a period of Christ's ministry prior to that with which the other three evangelists begin their accounts of the miracles. Thus John *alone* was supposed to narrate the events belonging to the earlier part of his ministry, while Matthew, Mark, and Luke related the transactions of the last year.

The most ancient Harmony of the Gospels of which we have any account was composed by Tatian of Syria in the second century; but it is now lost (see H. A. Daniel's *Tatianus der Apologet.*, Halle, 1837, 8vo.). In the third century, Ammonius* was the author of a Harmony supposed to be still extant. Eusebius of Cæsarea also composed a Harmony of the Gospels about A.D 315. In it he divided the Gospel history into ten canons or tables, according as different facts are related by one or more of the evangelists. These ancient Harmonies, however, differ in character from such as belong to modern times. They are *summaries* of the life of Christ, or *indexes* to the four Gospels, rather than a chronological arrangement of different facts, accompanied by a reconciliation of apparent contradictions. In modern times, Andreas Osiander published his *Harmony of the Gospels* in 1537. He adopted the principle that the evangelists constantly wrote in chronological order. Cornelius Jansenius' *Concordia Evangelica* was published in 1549. Martin Chemnitz's *Harmony* was first published in 1593, and afterwards, with the continuations of Leyser and Gerhard, in 1628. Chemnitz stands at the head of that class of harmonists who maintain that in one or more of the four Gospels chronological order has been neglected; while Osiander is at the head of those harmonists who maintain that all the Gospels are arranged in chronological order. Other harmonies were published by Lightfoot (1654), Cradock (1668), Lamy (1689), Le Clerc (1699), Toinard (1707), Whiston (1702), Rus (1727-8-30), Bengel (1736), Hauber (1737), Doddridge (1739 and 40), Pilkington (1747), Macknight (1756), Bertling (1767), Griesbach (1776, 97, 1809, 22), Newcome (1778), Priestley (1777 in Greek, and 1780 in English), Michaelis (1788, in his Introduction), White (1799), De Wette and Lücke (1818), Matthaei (1826), Kaiser (1828), Roediger (1829), Clausen (1829), Greswell (1830), Carpenter (1838), Reichel (1840), and Overbeck (1843).

The latest work of importance which has appeared in Germany on this subject is that of Ziegler.

In connection with Greswell's *Harmonia Evangelica*, the same author's *Dissertations upon the Principles and Arrangement of a Harmony of the Gospels*, of which a second edition has been published, deserve notice. These dissertations are exceedingly elaborate, and demand a patient perusal. The learned writer has greatly distinguished himself as the most laborious of modern harmonists. His work is the most copious that has appeared, at least since the days of Chemnitz's folios. Some of his fundamental principles, however, are questionable. On the whole, were we confined to *one* Harmony of the Gospels, we should prefer that of Newcome to any other. But to adopt any one implicitly, is more than the enlightened inquirer can consent to do. We should therefore recommend a minute examination of the works published by Newcome, Greswell, Michaelis, De Wette and Lücke, and Clausen.

The above list contains the *best* Harmonies and Diatessarons of the Gospels. Some are written in Greek, or Greek and Latin, others in Latin,

* This Ammonius is not to be confounded with Ammonius Saccas the philosopher, although Eusebius and Jerome in ancient, as also Bayle and Basnage in modern times, have fallen into this mistake. The same blunder is committed by the writer of the article 'Ammonius Saccas' in Smith's *Dictionary of Greek and Roman Biography and Mythology*. See Neander's *Allgem. Geschichte*, i. 3. S. 1183; Murdock's Mosheim, vol. i. p. 174, note 18 (3rd edit. New York).

others in German and Greek, others in English. The *entire number* of Harmonies is very great. Those who wish to see lists tolerably complete may consult Fabricii *Bibliotheca Græca*, vol. iv., ed. Harles; Walchii *Bibliotheca Theologica*, tom. iv.; Michaelis's *Introd.*, by Marsh, vol. iii., with the translator's very valuable notes.—S. D.

HAROD (חֲרֹד; Sept. 'Αρώδ), a brook not far from Jezreel and Mount Gilboa. The name means 'palpitation,' and it has been suggested that it originated in consequence of the alarm and terror of most of the men who were here tested by Gideon (Judg. vii. 1-3); but this supposition seems very far-fetched, and the name more probably arose from some peculiarity in the outflow of the stream.

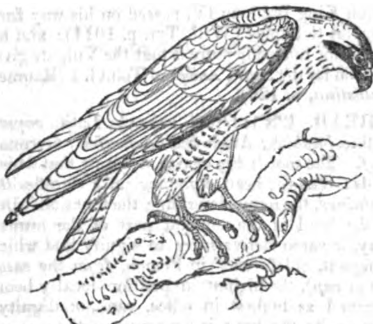
HAROSHETH OF THE GENTILES (חֲרֹשֶׁת הַגּוֹיִם; Sept. 'Αρισώθ τῶν ἐθνῶν), a city supposed to have been situated near Hazor, in the northern parts of Canaan, called afterwards Upper Galilee, or Galilee of the Gentiles [GALILEE]. Harosheth is said to have been the residence of Sisera, the general of the armies of Jabin, king of Canaan, who reigned in Hazor. To this place Jabin himself was pursued and defeated by Deborah and Barak (Judg. iv. 2, 13, 16).

HARP. [MUSIC.]

HART [AJAL; ANTELOPE]. Fallow-deer having been omitted as a separate article, and there being some confusion in the history of the Asiatic and African *Cervidæ*, increased perhaps by the remarks of Ehrenberg (*Symb. Physic.* dec. i.) under the head of *Ant. Leucoryx*, it may be proper to take notice of his attempt to demonstrate, with the aid of Bochart and Rosenmüller, who wrote when the zoology of Syria was almost unknown, that *Antholops* and *Jachmur* denoted fallow-deer, and particularly such as were of a white colour! But Cuvier, in his *Ossemens Fossiles*, has shown that *Dama* among the ancients was oftener intended to refer to the antelope than to the fallow-deer, of which he had sought the native region in vain for many years. The species appeared to be largest in Spain; and it was only after the second edition of his work was in the press that he first received a wild young specimen, shot in the woods south of Tunis. Northern Africa, therefore, may be the original residence of this animal; although it is found wild also in Sweden, where palmated horns are more evidently useful to clear the snow from autumnal verdure; and recent fossil remains attest that it was a native of the whole of western Europe. There is, however, no evidence that it was ever found, or that it now exists, in Asia, or that an occasional *Albino* of any species should have obtained the particular names above cited. Neither Cuvier, nor it appears Ehrenberg, was acquainted with the existence of the *Cervus Barbarus* of northern Africa; which, though allied to the Corsican stag, wants the bisantler, has the horns somewhat flattened, and is slightly speckled: it therefore appears to be intermediate with fallow-deer.

This species, we are assured, has been seen east of the Nile, in the desert of Arabia, and is there reputed to be fond of eating fish (small lizards)—a propensity which impels other species to attack even dangerous serpents; and there is on the north of Palestine the *Gewasen* of Armenia, a species of stag of the *Rusa* group, which comes westward into Anatolia, and is not unlikely the real *Zamor* (זמר) of Scripture, since the name *Saumor* is still in use for the *Rusa* of India and Caubul; and in that case *Akko* (אקו) would naturally designate the *Tragelophus* [GOAT]. Since the discovery of gunpowder great modifications have taken place in the residence of the sporting and more ferocious animals. We know, as yet, little of those ranging in Southern Arabia, and across the Shat-ul-Arab into Persia, and therefore have no just right to deny that there are any species of *Oryx* which may occasionally still visit, or which formerly did frequent, the borders of the Euphrates.—C. H. S.

HAVILAH (חֲוִילָה; Sept. Εὐιλά). 1. A district in Arabia Felix, deriving its name from the second son of Cush (Gen. x. 7), or, according to others, from the second son of Joktan (Gen x. 29; comp. xxv. 18). There can be no doubt, however, of the existence of a double Havilah; one founded by the descendant of *Ham*, and the other by that of *Shem*. Niebuhr (*Beschr. von Arab.*, pp. 270, 280) actually found in Yemen two districts called *Chaulan* or *Haulan* (probably the present خولان), one between Saana and Mecca, and the other a few leagues south-east from Saana; which latter Büsching (*Erdbeschr.* v. i. 601) considers to be the Havilah founded by the son of Cush, as mentioned Gen. x. 7 (Michaelis, *Spicil.* i. 189, sq.; ii. 202). From Gen. xxv. 18, it would appear that the land of Havilah formed the eastern boundary of the Israelites, and so likewise from 1 Sam. xv. 7, where it seems, moreover, to have been a possession belonging to the Amalekites. Others, however, take this Havilah also for a district in Arabia, and understand by *Shur*, the city *Pelusium* or *Sin* (Ezek. xxx. 15) in Egypt (see Michaelis on this passage).



2. חוילה; Sept. Εὐιλάτ, a land rich in gold, bdellium, and shoham, mentioned in Gen. ii. 11, in the geographical description of Paradise. Some identify this with the preceding; but others take it to be *Chwala* on the Caspian Sea, from whence that sea itself is said to have derived the Russian name of *Chwalinskoy more* (Sea of Chwala); and others suppose it a general name for India (*T. Hieros.* הנדק), in which case the river *Pison*, mentioned as surrounding it, would be identified with the *Ganges*.—E. M.

HAVOTH-JAIR (the Hebrew and Arabic חַוֹּת). *Havoth* signifies 'cabins' or 'huts,' such as belong to the Arabians, and a collection of which is regarded as forming a hamlet or village. The district of Havoth-jair (*Jair's hamlets*), mentioned in Num. xxxii. 41, and Deut. iii. 14, was beyond the Jordan in the land of Gilead, and belonged to the half-tribe of Manasseh.

HAURAN (חַוְרָן; Sept. Αὐρανῖτις), a tract or region of Syria, south of Damascus, which is twice mentioned under this name in Scripture (Ezek. xlvii. 16, 18). It was probably of small extent originally; but received extensive additions from the Romans under the name of Auranitis. At present it reaches from about twenty miles south of Damascus to a little below Bozra, including the rocky district of El-Ledja, the ancient Trachonitis, and the mountainous

region of Jebel-Haouran. Within its limits are also included, besides Trachonitis, Ituræa or Ittur, now called Jedour, and part of Batanæa or Bashan. It is represented by Burckhardt as a volcanic region, composed of porous tufa, pumice, and basalt, with the remains of a crater on the Tel Shoba, which is on its eastern border. It produces, however, crops of corn, and has many patches of luxuriant herbage, which are frequented in summer by the Arab tribes for pasturage. It also abounds with interesting remains of cities, scattered over its surface, among which are found Greek inscriptions.

HAWK (נֵץ *netz;* Sept. ἱέραξ; Vulg. *accipiter*, an unclean bird; Lev. xi. 16; Deut. xiv. 15; Job xxxix. 26). The English name is an altered form of the old word fawk or falk, and in natural history represents several genera of raptorial birds; as does the Arabic *naz*, and, no doubt, also the Hebrew *netz*. Western Asia and Lower Egypt, and consequently the intermediate territory of Syria and Palestine, are the habitation or transitory residence of a considerable number of species of the order *Raptores*, which, even including the shortest-winged, have great powers of flight, are remarkably enterprising, live to a great age, are migratory, or followers upon birds of passage, or remain in a region so abundantly stocked with pigeon and turtle-dove as Palestine, and affording such a variety of ground to hunt their particular prey—abounding as it does in mountain and forest, plain, desert, marsh, river and sea-coast. We shall here enumerate, so far as our information will permit, the *Falconidæ* of this region, exclusive of those mentioned in other articles [Azaniah; Eagle; Glede; Kite].

334. [Peregrine Falcon.]

Falcons, or the 'noble' birds of prey used for hawking, have for many ages been objects of great interest, and still continue to be bought at high prices. They are consequently imported from distant countries, as central Asia, Iceland, Barbary, &c. Their love of liberty often renders them irreclaimable when once on the wing; and their powers and boldness, independent of circumstances, and the extent of range which the long-winged species in particular can take, are exemplified by their presence in every quarter of the globe. The *Falco communis*, or Peregrine falcon, is so generally diffused as to occur even in New Holland and South America. As a type of the genus, we may add that it has the two foremost quill-feathers of almost equal length, and that when the wings are closed they nearly reach the end of the tail. On each side of the crooked point of the bill there is an angle or prominent tooth, and from the nostrils backwards a black streak passes beneath the eye and forms a patch on each side of the throat, giving the bird and its congeners a whiskered and menacing aspect.

Next we may place *Falco Aroeris* of Sir J. G. Wilkinson, the sacred hawk of Egypt. This, if it be not in reality the same as, or a mere variety of, the Peregrine, should have retained the ancient epithet of *Hierax*, and the hawkers' name of *Sacre*, derived from the Arabic *Saqr*, which evidently applies to it. This bird has the same moustachio marks, and from them the old name *Gernonia*, which in base Latinity indicates whiskers, may have been derived. Innumerable representations of it occur in Egyptian monuments, since, in the character of *Horhat*, or bird of victory, it overshadows kings and heroes, like the *Garuda*, *Simurg*, and the *Humma* bird of Eastern Asia; but it is also an emblem of Re, the Sun, and numerous other divinities; for an account of which we refer to Sir J. G. Wilkinson's *Manners and Customs of the Ancient Egyptians*, 2nd Series.

The Hobby, *Falco subbuteo*, is no doubt a second or third species of sacred hawk, having similar gernonia. Both this bird and the tractable Merlin, *Falco æsalon*, are used in the falconry of the inferior Moslem landowners of Asiatic Turkey.

Besides these the Kestril, *Falco tinnunculus*, occurs in Syria, and *Falco tinnunculoides*, or lesser Kestril, in Egypt; and it is probable that both species visit these two territories according to the seasons.

To the 'noble' birds we may add the Gerfalcon, *Falco gyrfalco*, which is one-third larger than the Peregrine: it is imported from Tartary and sold at Constantinople, Aleppo, and Damascus. The great birds fly at antelopes, bustards, cranes, &c.; and of the genus *Astur*, with shorter wings than true falcons, the Goshawk, *Falco palumbarius*, and the Falcon Gentil, *Falco gentilis*, are either imported, or taken in their nests, and used to fly at lower and aquatic game. It is among the above that the seven species of hunting hawks enumerated by Dr. Russell must be sought; though from the circumstance that the Arabic names of the birds alone were known to him, it is difficult to assign their scientific denominations; but the following identification is tolerably evident—1. *Al-Huz* or *Barabas* is the Gerfalcon; 2. *Al-Saphy*, the Peregrine; 3. *Al-Shaheen*, the Doctor himself asserts to be the Falcon Gentil; 4. *Al-Zygranus*, the Goshawk. One of the remaining species is, no doubt, the Merlin; and the last, *Al-Bashak*, is the crested Buzzard, *Falco Bacha*, which is most abundant in Africa, and the principal enemy of the Shaphan (Hyrax). The smaller and less powerful hawks of the genus *Nisus* are mostly in use on account of the sport they afford, being less fatiguing, as they are employed to fly at pigeons, partridges, quails, Pterocles, Katta, and other species of Ganga. There are various other raptorial birds, not here enumerated, found in Syria, Arabia, and Egypt. We have at this moment before us coloured representations of three such, copied from the painted sculptures of ancient Egypt; and in conformity with the common laws of animated nature, the Nile cannot be without a variety of species feeding on the produce of its waters and

its visitors; but the above enumeration will be found, we trust, sufficient for our present purpose.—C. H. S.

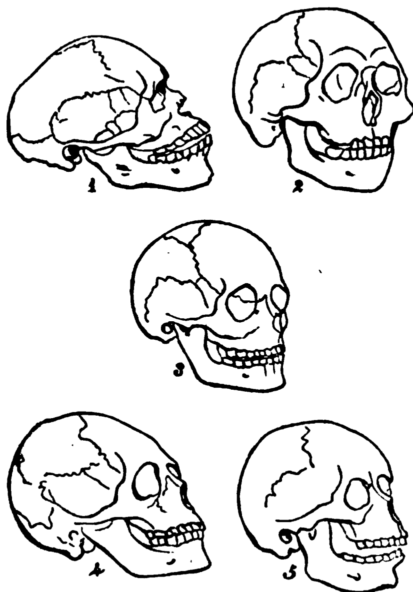
HAY. [CHATZIR.]

HAZAEL (חֲזָאֵל, *vision of God;* Sept. Ἀζαήλ), an officer of Benhadad, king of Syria, whose eventual accession to the throne of that kingdom was made known to Elijah (1 Kings xix. 15); and who, when Elisha was at Damascus, was sent by his master, who was then ill, to consult the prophet respecting his recovery. He was followed by forty camels bearing presents from the king. When Hazael appeared before the prophet, he said, 'Thy son Benhadad, king of Syria, hath sent me to thee, saying, Shall I recover of this disease?' The answer was, that he *might* certainly recover. 'Howbeit,' added the prophet, 'the Lord hath showed me that he shall surely die.' He then looked stedfastly at Hazael till he became confused: on which the man of God then wept; and when Hazael respectfully inquired the cause of this outburst, Elisha replied by describing the vivid picture then present to his mind of all the evils which the man now before him would inflict upon Israel. Hazael exclaimed, 'But what! Is thy servant a dog that he should do this great thing?' The prophet explained that it was as king of Syria he should do it. Hazael then returned, and delivered to his master that portion of the prophetic response which was intended for him. But the very next day this man, cool and calculating in his cruel ambition, took a thick cloth, and, having dipped it in water, spread it over the face of the king, who, in his feebleness, and probably in his sleep, was smothered by its weight, and died what seemed to his people a natural death (2 Kings viii. 8, &c.) B.C. 885. We are not to imagine that such a project as this was conceived and executed in a day, or that it was suggested by the words of Elisha. His discomposure at the earnest gaze of the prophet, and other circumstances, show that Hazael at that moment regarded Elisha as one to whom his secret purposes were known. In that case, his cry, 'Is thy servant a dog,' &c., was not, as some suppose, a cry of joy at the first view of a throne, but of horror at the idea of the public atrocities which the prophet described. This was likely to shock him more than it would do after he had committed his first crime, and obtained possession of a throne acquired at such a cost.

The further information respecting Hazael which the Scriptures afford is limited to brief notices of his wars with Ahaziah and Joash, kings of Judah, and with Jehoram, Jehu, and Jehoahaz, kings of Israel (2 Kings viii. 28; ix. 14; x. 32; xii. 17; xiii. 3; 2 Chron. xxii. 5). It is difficult to distinguish the several campaigns and victories involved in these allusions, and spread over a reign of forty years; but it is certain that Hazael always had the advantage over the Hebrew princes. He devasted their frontiers, rent from them all their territories beyond the Jordan, traversed the breadth of Palestine, and carried his arms into the states of the Philistines; he laid siege to Jerusalem, and only retired on receiving the treasures of the temple and the palace. The details of these conquests redeemed to the very letter the appalling predictions of Elisha. This able and successful, but unprincipled usurper left the throne at his death to his son Benhadad.

HAZARMAVETH, the third son of Joktan (Gen. x. 26), whose name is judged to have been preserved in the Arabian province of Hadramaut [ARABIA].

HAZEL. [LUTZ.]



HAZEROTH, the third station of the Israelites after leaving Sinai, and either four or five days' march from that mountain (Num. xi. 35; xxxiii. 17; comp. x. 33) [WANDERING].

HAZEZON-TAMAR. [EN-GEDI.]

HAZOR (חָצוֹר; Sept. Ἀσώρ), a city near the waters of lake Merom (Huleh), the seat of Jabin, a powerful Canaanitish king, as appears from the summon sent by him to all the neighbouring kings to assist him against the Israelites. He and his confederates were, however, defeated and slain by Joshua, and the city burnt to the ground (Josh. xi. 1, 10-13; Joseph. *Antiq.* v. 5. 1). But by the time of Deborah and Barak the Canaanites had recovered part of the territory then lost, had rebuilt Hazor, and were ruled by a king with the ancient royal name of Jabin, under whose power the Israelites were, in punishment for their sins, reduced. From this yoke they were delivered by Deborah and Barak, after which Hazor remained in quiet possession of the Israelites, and belonged to the tribe of Naphtali (Josh. xix. 36; Judg. iv. 2). Hazor was one of the towns rebuilt or much improved by Solomon (1 Kings ix. 15), and was one of the fortified places of Galilee which the Assyrians under Tiglath-pileser first took on invading Palestine from the north (2 Kings xv. 29). There is no modern notice of this town. Raumer, indeed, queries whether it may not have been the ancient town of Naason, which King Baldwin IV. passed on his way from Tiberias to Saphet (Will. Tyr. p. 1014); and his reason for this conjecture is that the Vulgate gives Naason for the Asor (Ἀσώρ) of Tobit i. 1 (Raumer, *Palästina*, p. 126).

HEAD. ראשׁ; Greek, κεφαλή; Latin, *caput;* Gothic, *haubith;* Anglo-Saxon, *heafod;* German, *kopf.* The root is *kep* or *cap*, denoting that which holds: thus the head etymologically signifies *the container*, the name describing the function. But as the head is the topmost part of the human body, it came derivatively to signify that which is highest, chief (*chef* in French, from the same *kep* or *cap*), the highest in position locally being regarded as highest in office, rank, or dignity: whence, as the head is the centre of the nervous system, holds the brain, and stands above all the other parts, Plato regarded it as the seat of the deathless soul; and it has generally been considered as the abode of the intellect or intelligence by which man is enlightened and his walk in life directed; while the heart, or the parts placed near it, have been accounted the place where the affections lie (Gen. iii. 15; Ps. iii. 3; Eccles. ii. 14). The head and the heart are sometimes taken for the entire person (Is. i. 5). Even the head alone, as being the chief member, frequently stands for the man (Prov. x. 6). The head also denotes sovereignty (1 Cor. xi. 3). Covering the head, and cutting off the hair, were signs of mourning and tokens of distress, which were enhanced by throwing ashes on the head, together with sackcloth (Amos viii. 10; Job i. 20; Lev. xxi. 5; Deut.

xiv. 1; 2 Sam. xiii. 10; Esther iv. 1); while anointing the head was practised on festive occasions, and considered an emblem of felicity (Eccles. ix. 8; Ps. xxiii. 5; Luke vii. 46). It was usual to swear by the head (Matt. v. 36).

336. 1. Ethiopian; 2. Mongolian; 3. Caucasian; 4. Malay; 5. American.

The general character of the human head is such as to establish the identity of the human race, and to distinguish man from every other animal. At the same time different families of mankind are marked by peculiarities of construction in the head, which, though in individual cases, and when extremes are compared together, they run one into the other to the entire loss of distinctive lines, yet are in the general broadly contrasted one with the other. These peculiarities in the structure of the skull give rise to and are connected with other peculiarities of feature and general contour of face. In the union of cranial peculiarities with those of the face certain clear marks are presented, by which physiologists have been able to range the individuals of our race into a few great classes, and in so doing to afford an unintentional corroboration of the information which the Scriptures afford regarding the origin and dispersion of mankind. Camper, one of the most learned and clear-minded physicians of the eighteenth century, has the credit of being the first who drew attention to the classification of the human features, and endeavoured, by means of what he termed the facial angle, to furnish a method for distinguishing different nations and races of men, which, being himself an eminent limner, he designed for application chiefly in the art of drawing, and which, though far from producing strictly definite and scientific results, yet affords views that are not without interest, and approximations that at least prepared the way for something better (see a collection of Camper's pieces entitled *Œuvres qui ont pour Objet l'Histoire Naturelle, la Physiologie, et l'Anatomie comparée*, Paris, 1803). It is, however, to the celebrated J. F. Blumenbach, whose merits in the entire sphere of natural history are so transcendent, that we are mainly indebted for the accurate and satisfactory classifications in regard to cranial structure which now prevail. Camper had observed that the breadth of the head differs in different nations; that the heads of Asiatics (the Kalmucs) have the greatest breadth; that those of Europeans have a middle degree of breadth; and that the skulls of the African negroes are the narrowest of all. This circumstance was by Blumenbach made the foundation of his arrangement and description of skulls. By comparing different forms of the human cranium together, that eminent physiologist was led to recognise three great types to which all others could be referred—the Caucasian, Mongolian and Ethiopic. These three differ more widely from each other than any other that can be found; but to these three Blumenbach, in his classification of skulls, and of the races of men to which they belong, added two others, in many respects intermediate between the three forms already mentioned. In this way five classes are established, corresponding with five great families. 1. The Caucasian family, comprising the nations of Europe, some of the Western Asiatics, &c., have the head of the most symmetrical shape, almost round, the forehead of moderate extent, the cheek bones rather narrow, without any projection, but a direction downwards from the molar process of the frontal bone; the alveolar edge well rounded; the front teeth of each jaw placed perpendicularly; the face of oval shape, straight, features moderately prominent; forehead arched; nose narrow, slightly arched; mouth small; chin full and round. 2. The second is the Mongolian variety. 3. Ethiopian. 4. Malay and South Sea Islanders. 5. American. The description of their peculiarities may be found in Prichard's *Researches into the Physical History of Man*, 2nd edit. vol. i. p. 167, sq. The reader may also consult Lawrence's *Lectures on the Natural History of Man*; J. Muller's *Handbuch der Physiologie*. But the most recent, if not the best, work on the subject before us is Prichard's *Natural History of Man*, 1843; a work which comprises and reviews, in the spirit of a sound philosophy, all that has hitherto been written and discovered on the origin, physical structure, and propagation over the earth of the race of man. In this invaluable work full details may be found of the methods of studying the human head of which we have spoken, and of some others, not less interesting in themselves, nor less valuable in their results (see particularly p. 116, sq.).—J. R. B.

HEART. All the phrases, more or less metaphorical, in which this word occurs, are rendered intelligible, without detailed examples, when we are told that the heart was, among the Hebrews, regarded poetically not only as the seat of the passions and emotions, as of love, pleasure, and grief, but also of the intellectual faculties—the mind, the understanding. In the original Scriptures, as well as in the English and other translations, the word 'heart,' therefore, constantly occurs where 'mind' is to be understood, and would be used by a modern English writer. We say modern, because the ancient usage of the English word

'heart' was more conformable than the present to that of the Hebrews.

HEATH. [OROR.]

HEAVEN, the state and place of blessedness in the life to come.

Of the nature of this blessedness it is not possible that we should form any adequate conception, and, consequently, that any precise information respecting it should be given to us. Man, indeed, usually conceives the joys of heaven to be the same as, or, at least, to resemble the pleasures of this world; and each one hopes to obtain with certainty and to enjoy in full measure, beyond the grave, that which he holds most dear upon earth —those favourite employments or particular delights which he ardently longs for here, but which he can seldom or never enjoy in this world, or in the enjoyment of which he is never fully satisfied. But one who reflects soberly on the subject, will readily see that the happiness of heaven must be a very different thing from earthly happiness. In this world the highest pleasures of which our nature is capable satiate by their continuance, and soon lose the power of giving positive enjoyment. This alone is sufficient to show that the bliss of the future world must be of an entirely different kind from what is called earthly joy and happiness, if we are to be there *truly* happy, and happy *for ever*. But since we can have no distinct conception of those joys which never have been and never will be experienced by us here in their full extent, we have of course no words in human language to express them, and cannot therefore expect any clear description of them even in the Holy Scriptures. Hence the Bible describes this happiness sometimes in general terms, designating its greatness (as in Rom. viii. 18-22; 2 Cor. iv. 17, 18); and sometimes by various figurative images and modes of speech, borrowed from everything which we know to be attractive and desirable.

The greater part of these images were already common among the Jewish contemporaries of Christ; but Christ and his apostles employed them in a purer sense than the great multitude of the Jews. The Orientals are rich in such figures. They were employed by Mohammed, who carried them, as his manner was, to an extravagant excess, but who at the same time said expressly that they were mere figures, although many of his followers afterwards understood them literally, as has been often done in a similar way by many Christians.

The following are the principal terms, both literal and figurative, which are applied in Scripture to the condition of future happiness.

Among the *literal* appellations we find ζωή, ζωὴ αἰώνιος, which, according to Hebrew usage, signify 'a happy life,' or 'eternal well-being,' and are the words rendered 'life,' 'eternal life,' and 'life everlasting,' in the Auth. Version (*e. g.* Matt. vii. 14; xix. 16, 29; xxv. 46): δόξα, δόξα τοῦ Θεοῦ, 'glory,' 'the glory of God' (Rom. ii. 7, 10; v. 2); and εἰρήνη, 'peace' (Rom. ii. 10). Also αἰώνιον βάρος δόξης, 'an eternal weight of glory' (2 Cor. iv. 17); and σωτηρία, σωτηρία αἰώνιος, 'salvation,' 'eternal salvation' (Heb. v. 9), &c.

Among the *figurative* representations, we may place the word 'heaven' itself. The abode of departed spirits, to us who live upon the earth, and while we remain here, is invisible and inaccessible, beyond the bounds of the visible world, and entirely separated from it. There they live in the highest well-being, and in a nearer connection with God and Christ than here below. This place and state cannot be designated by any more fit and brief expression than that which is found in almost every language, namely, 'heaven,'—a word in its primary and material signification denoting the region of the skies, or the visible heavens. This word, in Hebrew שָׁמַיִם *shammayim*, in Greek οὐρανός, is therefore frequently employed by the sacred writers. It is there that the highest sanctuary or temple of God is situated, *i. e.* it is there that the omnipresent God most gloriously reveals himself. This, too, is the abode of God's highest spiritual creation. Thither Christ was transported: he calls it the house of his Father, and says that he has therein prepared an abode for his followers (John xiv. 2).

This place, this 'heaven,' was never conceived of in ancient times, as it has been by some modern writers, as a particular planet or world, but as the wide expanse of heaven, high above the atmosphere, or starry heavens; hence it is sometimes called the *third* heaven, as being neither the atmosphere nor the starry heavens.

Another figurative name is 'Paradise,' taken from the abode of our first parents in their state of innocence, and transferred to the abode of the blessed (Luke xxiii. 43; 2 Cor. xii. 4; Rev. ii. 7; xxii. 2).

Again, this place is called 'the heavenly Jerusalem' (Gal. iv. 26; Heb. xii. 22; Rev. iii. 12), because the earthly Jerusalem was the capital city of the Jews, the royal residence, and the seat of divine worship; the 'kingdom of heaven' (Matt. xxv. 1; Jas. ii. 5); the 'heavenly kingdom' (2 Tim. iv. 18); the 'eternal kingdom' (2 Pet. i. 11). It is also called an 'eternal inheritance' (1 Pet. i. 4; Heb. ix. 15), meaning the possession and full enjoyment of happiness, typified by the residence of the ancient Hebrews in Palestine. The blessed are said 'to sit down at table with Abraham, Isaac, and Jacob,' that is, to be a sharer with the saints of old in the joys of salvation; 'to be in Abraham's bosom' (Luke xvi. 22; Matt. viii. 11), that is, to sit near or next to Abraham [BOSOM]; 'to reign with Christ' (2 Tim. ii. 11), *i. e.* to be distinguished, honoured, and happy as he is—to enjoy regal felicities; to enjoy 'a Sabbath,' or 'rest' (Heb. iv. 10, 11), indicating the happiness of pious Christians, *both* in this life and in the life to come.

All that we can with certainty know or infer from Scripture or reason respecting the blessedness of the life to come, may be arranged under the following particulars:—1. We shall hereafter be entirely freed from the sufferings and adversities of this life. 2. Our future blessedness will involve a continuance of the real happiness of this life.

I. The entire exemption from suffering and all that causes suffering here, is expressed in the Scripture by words which denote rest, repose, refreshment, after performing labour and enduring affliction. But all the terms which are employed to express this condition, define (in the original) the promised 'rest,' as rest after labour, and exemption from toil and grief; and not the absence of employment, not inactivity or indolence

(2 Thess. i. 7; Heb. iv. 9, 11; Rev. xiv. 13; comp. vii. 17).

This deliverance from the evils of our present life includes—

1. Deliverance from this earthly body, the seat of the lower principles of our nature and of our sinful corruption, and the source of so many evils and sufferings (2 Cor. vi. 1, 2; 1 Cor. xviii. 15).

2. Entire separation from the society of wicked and evil-disposed persons, who, in various ways, injure the righteous man and embitter his life on earth (2 Tim. iv. 18). It is hence accounted a part of the felicity even of Christ himself in heaven to be 'separate from sinners' (Heb. vii. 26).

3. Upon this earth everything is inconstant, and subject to perpetual change; and nothing is capable of completely satisfying our expectations and desires. But in the world to come it will be different. The bliss of the saints will continue without interruption or change, without fear of termination, and without satiety (Luke xx. 36; 2 Cor. iv. 16, 18; 1 Pet. i. 4; v. 10; 1 John iii. 2, sq.).

II. Besides being exempt from all earthly trials, and having a continuance of that happiness which we had begun to enjoy even here, we have good reason to expect hereafter other rewards and joys, which stand in no natural or necessary connection with the present life. For our entire felicity would be extremely defective and scanty, were it to be confined merely to that which we carry with us from the present world, to that peace and joy of soul which result from reflecting on what we may have done which is good and pleasing in the sight of God; since even the best man will always discover great imperfections in all that he has done. Our felicity would also be incomplete were we compelled to stop short with that meagre and elementary knowledge which we take with us from this world,—that knowledge so broken up into fragments, and yielding so little fruit, and which, poor as it is, many good men, from lack of opportunity, and without any fault on their part, never here acquire. Besides the natural rewards of goodness, there must, therefore, be others, which are *positive*, and dependent on the will of the Supreme Legislator.

On this point almost all philosophers are, for the above reasons, agreed—even those who will admit of no *positive punishments* in the world to come. But for want of accurate knowledge of the state of things in the future world, we can say nothing definite and certain as to the nature of the positive rewards. In the doctrine of the New Testament, however, positive rewards are considered most obviously as belonging to our future felicity, and as constituting a principal part of it. For it always represents the joys of heaven as resulting strictly from *the favour of God*, and as being *undeserved* by those on whom they are bestowed. Hence there must be something more added to the natural good consequences of our actions, something which cannot be considered as the necessary and natural consequences of the good actions we may have here performed. But, on this subject, we know nothing more in general than this, that God will so appoint and order our circumstances, and make such arrangements, that the principal faculties of our souls—reason and affection, will be heightened and developed, so that we shall continually obtain more pure and distinct knowledge of the truth, and make continual advances in holiness.

The following remarks may be of some use in illustrating this subject:—

(1). In this life God has very wisely allotted various capacities, powers, and talents, in different ways and degrees, to different men, according to the various ends for which he designs them, and the business on which he employs them. Now there is not the least reason to suppose that God will abolish this variety in the future world; it will rather continue there in all its extent. We must suppose, then, that there will be, even in the heavenly world, a diversity of tastes, of labours, and of employments, and that to one person this, to another that field, in the boundless kingdom of truth and of useful occupation, will be assigned for his cultivation, according to his peculiar powers, qualifications, and tastes. A presentiment of this truth is contained in the idea, which was widely diffused throughout the ancient world, viz., that the manes will continue to prosecute, in the future life, the employments to which they had been here accustomed. At least such arrangements will doubtless be made by God in the future life, that each individual will there develope more and more the germs implanted within him by the hand of the Creator; and will be able, more fully than he ever could do here, to satisfy the wants of his intellectual nature, and thus to make continual progress in the knowledge of everything worthy of being known, of which he could only learn the simplest elements in this world; and he will be able to do this in such a way that the increase of knowledge will not be detrimental to piety, as it often proves on earth, but rather promotive of it. To the sincere and ardent searcher after truth it is a rejoicing and consoling thought that he will be able hereafter to perfect that knowledge which here has so many deficiencies (1 Cor. xiii. 9).

But there is danger of going too far on this point, and of falling into strange misconceptions. Various as the tastes and wants of men in the future world will doubtless be, they will still be in many respects different from what they are here; because the whole sphere of action, and the objects by which we shall there be surrounded, will be different. We shall there have a changed and more perfect body, and by this single circumstance shall be freed at once from many of the wants and inclinations which have their seat in the earthly body. And this will also contribute much to rectify, enlarge, and perfect our knowledge. Many things which seem to us very important and essential during this our state of infancy upon earth, will hereafter doubtless appear in a different light: we shall look upon them as trifles and children's play, and employ ourselves in more important occupations, the utility and interest of which we may have never before imagined.

Some theologians have supposed that the saints in heaven may be taught by *immediate divine revelations* (lumen gloriæ); especially those who may enter the abodes of the blessed without knowledge, or with only a small measure of it; *e. g.* children and others who have died in ignorance, for which they themselves were not to blame.

On this subject nothing is definitely taught in the Scriptures; but both Scripture and reason warrant us in believing that provision will be made for all such persons in the world to come. A principal part of our future happiness will consist, according to the Christian doctrine, in the enlarging and correcting of our knowledge respecting God, his nature, attributes, and works, and in the salutary application of this knowledge to our own moral benefit, to the increase of our faith, love, and obedience. There has been some controversy among theologians with regard to the *vision of God* (visio Dei intuitiva, *sensitiva, beatifica, comprehensiva*). The question is, whether the saints will hereafter behold God with the eyes of the mind, *i. e.* merely know him with the understanding.

But in the Scriptures God is always represented as a being invisible by the bodily eye (ἀόρατος), as, indeed, every spirit is. The texts of Scripture which speak of *seeing God* have been misunderstood: they signify, sometimes, *the more distinct knowledge of God*, as we speak of knowing by seeing, of seeing with the eyes of the mind (John i. 18; 1 John iii. 2; iv. 12; comp. v. 20; 1 Tim. vi. 16); and Paul uses βλέπειν and γινώσκειν as synonymous (1 Cor. xiii. 12, 13; comp. v. 10). Again, they express the idea of *felicity*, the enjoyment of God's favour, the being thought worthy of his friendship, &c. Still more frequently are both of these meanings comprehended under the phrase *to see God*. The image is taken from Oriental princes, to see whose face, and to be in whose presence, was esteemed a great favour (Matt. v. 8.; Heb. vii. 14). 'Without holiness, οὐδεὶς ὄψεται τὸν Κύριον.' The opposite of this is to be removed from God and from his face.

But Christ is always represented as one who will be *personally visible* to us, and whose personal, familiar intercourse and guidance we shall enjoy. Herein Christ himself places a chief part of the joy of the saints (John xiv. xvii., &c.); and the apostles often describe the blessedness of the pious by the phrase *being with Christ*. To his guidance has God entrusted the human race, in heaven and on earth. And Paul says (2 Cor. iv. 6), we see 'the brightness of the divine glory in the face of Christ,' he is 'the visible representative of the invisible God' (Col. i. 15). According to the representation contained in the Holy Scriptures, the saints will dwell together in the future world, and form, as it were, a kingdom or state of God (Luke xvi.; xx. 38; Rom. viii. 10; Rev. vii. 9; Heb. xii. 22). They will there partake of a common felicity. Their enjoyment will doubtless be very much heightened by friendship, and by their confiding intercourse with each other. We must, however, separate all earthly imperfections from our conceptions of this heavenly society. But that we shall there recognise our former friends, and shall be again associated with them, was uniformly believed by all antiquity. And when we call to mind the affectionate manner in which Christ soothed his disciples by the assurance that they should hereafter see him again, should be with him, and enjoy personal intercourse and friendship with him, in that place to which he was going (John xiv. 3; comp. 1 Pet. i. 8), we may gather just grounds for this belief. Paul indeed says expressly that we shall be with Christ, in company with our friends who died before us (ἅμα σὺν αὐτοῖς, 1 Thess. iv. 17); and this presupposes that we shall recognise them, and have intercourse with them, as with Christ himself.

1. HEBER (עֵבֶר, *one of the other side*; Sept. Ἔβερ and Ἕβερ), son of Salah, who became the father of Peleg at the age of 34 years, and died at the age of 464 (Gen. x. 24; xi. 14; 1 Chron. i. 25). His name occurs in the genealogy of Christ (Luke iii. 35). There is nothing to constitute Heber a historical personage; but there is a degree of interest connected with him from the notion, which the Jews themselves entertain, that the name of Hebrews, applied to them, was derived from this alleged ancestor of Abraham. No historical ground appears why this name should be derived from him rather than from any other personage that occurs in the catalogue of Shem's descendants; but there are so much stronger objections to every other hypothesis, that this perhaps is still the most probable of any which have yet been started.

2. HEBER (חֶבֶר; Sept. Χαβέρ), a descendant of Hobab, son of Jethro, and brother of the wife of Moses. His wife was the Jael who slew Sisera, and he is called Heber the Kenite (Judg. iv. 11, 17; v. 24), which seems to have been a name for the whole family (Judg. i. 16). Heber appears to have lived separate from the rest of the Kenites, leading a patriarchal life, amid his tents and flocks. He must have been a person of some consequence, from its being stated that there was peace between the house of Heber and the powerful king Jabin. At the time the history brings him under our notice his camp was in the plain of Zaanaim, near Kedesh in Naphtali [JAEL; KENITES].

HEBREW LANGUAGE. The Hebrew language is that which was the national idiom of those descendants of 'Eber which received the distinctive name of the People of Israel, and, as such, was that in which all the books of the Old Testament (with the exception of the few Chaldee passages occurring in those after the Babylonian captivity) were originally composed. It belongs to the Semitic, or, as it is more appropriately called, the Syro-Arabian family of languages; and it occupies a central point amidst all the branches of this family, as well with reference to the geographical position of the country in which it prevailed, as with reference to the degree of development to which it attained. In point of antiquity, however, it is the oldest form of human speech known to us, and, from the early civilization, as well as from the religious advantages of the Hebrews, has preserved to us the oldest and purest form of the Syro-Arabian language.*

If we except the terms 'lip of Canaan' (שְׂפַת כְּנַעַן) in Isa. xix. 18—where the diction is of an elevated character, and is so far no evidence that this designation was the one commonly employed—the only name by which the Hebrew language is mentioned in the Old Testament is 'Jewish' (יְהוּדִית, used adverbially, *Judaicè, in Jewish*, 2 Kings xviii. 26, 28; Isa. xxxvi. 11, 13;

* It may suffice here to refer generally to Ewald's *Hebrew Grammar*, §§ 1-18, 135-160, where the whole subject of this article is treated of.

2 Chron. xxxii. 18*), where the feminine may be explained as an abstract of the last formation, according to Ewald's *Hebr. Gram.* §§ 344, 457, or as referring to the usual gender of לָשׁוֹן understood. In a strict sense, however, 'Jewish' denotes the idiom of the kingdom of Judah, which became the predominant one after the deportation of the ten tribes. It is in the Greek writings of the later Jews that 'Hebrew' is first applied to the language, as in the ἑβραϊστί of the prologue to Ecclesiasticus, and in the γλῶσσα τῶν Ἑβραίων of Josephus. (The ἑβραῒς διαλέκτος of the New Testament is used in contradistinction to the idiom of the Hellenist Jews, and does not mean the *ancient* Hebrew language, but the then vernacular Aramaic dialect of Palestine.) Our title to use the designation *Hebrew* language is, therefore, founded on the fact that the nation which spoke this idiom was properly distinguished by the ethnographical name of *Hebrews*.

The appellation *Hebrews* may, indeed, originally have embraced more tribes than the Israelites, as it appears from Genesis (x. 21, 25) that the descendants of Ioqtan had some claim to it. Nevertheless, it was soon appropriated to the Israelites as their distinctive name *as a nation* in the earlier periods of their history, and (after giving place, in the intervening centuries, to that of *Israel*, and, subsequently to the deportation of the ten tribes, to that of *Jews*) was at length revived not long before the Christian era—when, however, it also served to distinguish the Jews of Palestine from the Hellenist Jews—and passed over, together with that of *Jews*, to the classical writers. As for the origin of the name, there are two theories (besides that which makes it a patronymic from 'Eber), one of which, by deriving *'ibri* from the verb עָבַר, *to pass over*, assumes the name to have been assigned to Abraham by the Canaanites, in consequence of his having crossed the Euphrates, so that the word means *transitor;* while the other assumes that, as Mesopotamia is called the country *beyond the river* (עֵבֶר הַנָּהָר, Jos. xxiv. 2), *'ibri* is derived from the preposition עֵבֶר in that combination, so that the word should mean *transfluvialis;* one of the people who *dwell* on the other side of the river. If the fact that the Sept. translators have rendered 'the Hebrew,' in Gen. xiv. 13, by ὁ περάτης, and Aquila by ὁ περαΐτης (from περαία, 'the country over the water;' cf. Joseph. *De Bell. Jud.* ii. 20. 4) may not prove that *both* these opinions existed at the date of those versions, yet they establish the existence of one of them. However distinct these views may be, they have frequently been confounded; but many early Christian writers, such as Origen and Jerome, favoured the former theory, viz. that *'ibri* is derived from the verb. The latter appears to have been virtually held by Diodorus Tarsensis, whose words are: περάτην καλεῖ τὸν Ἀβραὰμ ὡσανεὶ πέραν οἰκοῦντα τοῦ Ἰορδάνου (see the note of Flam. Nobilius *ad loc.* in Walton's *Bibl. Polyglot.* tom. vi.); and expressly by Chrysostom, who, in his 35th homily on Genesis, says: ἐπειδὴ γὰρ πέραν τοῦ Εὐφράτου τὴν κατοίκησιν εἶχε, διὰ τοῦτο καὶ περάτης ἐλέγετο. This view is the one which has found most favour in recent times. S. Morinus, who rejects both these views, encounters the former with very pertinent arguments; especially when he insists that, even if there were evidence that the name *Hebrew* was imposed on Abraham by the Canaanites, it could not, in the first signification, have been a distinctive name, at a period when so many tribes must have recently passed westwards over the Euphrates (*De Ling. Primæva*, p. 64). Hezel also has stated some of the best objections to each theory, in his *Geschichte der Heb. Sprache*, § 4; and Ewald in his latest work, *Geschichte des Volkes Israel*, i. 334, has briefly, though emphatically, declared both to be untenable.

The best evidences which we possess as to the form of the Hebrew language, prior to its first historical period, tend to show that Abraham, on his entrance into Canaan, found the language then prevailing among almost all the different tribes inhabiting that country to be in at least dialectual affinity with his own. This is gathered from the following facts: that nearly all the names of places and persons relating to those tribes admit of Hebrew etymologies; that, amidst all the accounts of the intercourse of the Hebrews with the nations of Canaan, we find no hint of a diversity of idiom; and that even the comparatively recent remains of the Phœnician and Punic languages bear a manifest affinity to the Hebrew. But whether the Hebrew language, as seen in the earliest books of the Old Testament, is the very dialect which Abraham *brought with him* into Canaan; or whether it is the common tongue of the Canaanite nations, which Abraham only *adopted* from them, and which was afterwards developed to greater fulness under the peculiar moral and political influences to which his posterity were exposed, are questions which, in the absence of conclusive arguments, are generally discussed with some dogmatical prepossessions. Almost all those who support the first view contend also that Hebrew was the primitive language of mankind. S. Morinus, in the work above cited, and Löscher, in his *De Causis Ling. Hebr.*, are among the best champions of this opinion; but Hävernick has recently advocated it with such modifications as make it more acceptable (*Einleit. in das Alte Test.*, I. i. p. 148, sq.). The principal argument on which they depend is that, as the most important proper-names in the first part of Genesis (as Cain, Seth, and others) are evidently founded on Hebrew etymologies, the essential connection of these names with their etymological origins involves the historical credibility of the records themselves, and leaves no room for any other conclusion than that the Hebrew language is coæval with the earliest history of man. The advocates of the other opinion attach some weight to the cogency with which they infer, from the phenomena of the Hebrew language itself, that its roots were at one period biliteral, and were afterwards developed to the compass of three consonants. They also rest on the evidence which Gen. xxxi. 47 affords that the near relatives of Abraham, residing too in the country from which he had recently emigrated, spoke *Aramaic;* and they think this warrants

* The passage in Neh. xiii. 24 is not included here, because, as will be seen below, it is a disputed point at what time the Hebrew language ceased to be a living tongue; and it depends on the decision of that question whether the 'Jewish' of Nehemiah means *Hebrew* or *Aramaic*.

the conclusion that Aramaic must have been the vernacular dialect of Abraham himself. Lastly, Gesenius lays some stress on the circumstance that the language not only denotes *west* by ים, *sea*, but that it does not possess any other word to express that sense.

The history of the Hebrew language, as far as we can trace its course by the changes in the diction of the documents in which it is preserved, may be here conveniently divided into that of the period preceding, and that of the period succeeding, the Exile. If it be a matter of surprise that the thousand years which intervened between Moses and the Captivity should not have produced sufficient change in the language to warrant its history during that time being distributed into subordinate divisions, the following considerations may excuse this arrangement. It is one of the signal characteristics of the Hebrew language, as seen in all the books prior to the Exile, that notwithstanding the existence of some isolated, but important, archaisms, such as in the form of the pronoun, &c. (the best collection of which may be seen in Hävernick, *l. c.* p. 183, sq.) it preserves an unparalleled general uniformity of structure. The extent to which this uniformity prevails may be estimated, either by the fact that it has furnished many modern scholars, who reason from the analogies discovered in the changes in other languages in a given period, with an argument to show that the Pentateuch could not have been written at so remote a date as is generally believed (Gesenius, *Gesch. der Hebr. Sprache*, § 8); or, by the conclusion, *à fortiori*, which Hävernick, whose express object it is to vindicate its received antiquity, candidly concedes that 'the books of Chronicles, Ezra and Nehemiah are the *earliest* in which the language differs sensibly from that in the historical portions of the Pentateuch' (*Einleit.* i. p. 180). We are here solely concerned with the fact that this uniformity of type exists. The general causes to which it is to be ascribed are to be sought in the genius of the language itself, as less susceptible of change; in the stationary civilization of the Hebrews during the period; and in their comparative isolation, as regarded nations of foreign language (see Ewald's *Hebr. Gram.* § 7). The particular causes depend on the age and author assigned to each book falling within this period, and involve questions utterly alien to the scope of this article.

In the canonical books belonging to the first period, the Hebrew language appears in a state of mature development. Although it still preserves the charms of freshness and simplicity, yet it has attained great regularity of formation, and such a precision of syntactical arrangement as ensures both energy and distinctness. Some common notions of its laxity and indefiniteness have no other foundation than the very inadequate scholarship of the persons who form them. A clearer insight into the organism of language absolutely, joined to such a study of the cognate Syro-Arabian idioms as would reveal the secret, but no less certain, laws of its syntactical coherence, would show them to what degree the simplicity of Hebrew is compatible with grammatical precision.

One of the most remarkable features in the language of this period is the difference which distinguishes the diction of poetry from that of prose. This difference consists in the use of unusual words and flexions (many of which are considered to be Aramaisms or Archaisms, although in this case these terms are nearly identical), and in a harmonic arrangement of thoughts, as seen both in the parallelism of members in a single verse, and in the strophic order of longer portions; the delicate art of which Ewald has traced with preeminent success in his *Poetische Bücher des Alt. Bundes*, vol. i.

The Babylonian captivity is assigned as the commencement of that decline and corruption which mark the second period in the history of the Hebrew language; but the Assyrian deportation of the ten tribes, in the year B.C. 720, was probably the first means of bringing the Aramaic idiom into injurious proximity to it. The Exile, however, forms the epoch at which the language shows evident signs of that encroachment of the Aramaic on its integrity, which afterwards ended in its complete extinction. The diction of the different books of this period discovers various grades of this Aramaic influence; and in some cases approaches so nearly to the type of the first period, that it has been ascribed to mere imitation.

An interesting question has been raised as to the precise time at which the Hebrew ceased to be the living vernacular language of the Jews. Some learned men, among whom are Kimchi, Buxtorf, and Walton, maintain that the Jews entirely lost the living use of Hebrew during the Captivity. Others, as Pfeiffer and Löscher, argue that it is quite unreasonable, considering the duration and other circumstances of the Exile, to suppose that the Jews did not retain the partial use of their native tongue for some time after their return to Palestine, and lose it by slow degrees at last. The points on which the question chiefly turns, are the sense in which the words מפורש and יהודית, in Neh. viii. 8; xiii. 24, are to be taken; and Hengstenberg, in his *Authentie des Daniel*, p. 299, sq., and Gesenius, in his *Gesch. d. Hebr. Sprache*, § 13, are the best modern advocates of either view. But, on whichever side the truth may be here, it is certain that the language continued to be understood and used in writing by the educated, for some time after the Exile, as is evident from the date of the latest Biblical books; and it is found in the inscriptions on the coins of the Maccabees. No decisive evidence, however, shows at what exact time it became a virtually dead language; although there is every reason to conclude that, more than a century before the Christian era, it gave place altogether in writing, as before in speech, to that corrupt Aramaic dialect, which some have called the Syro-Chaldaic, and that it was thenceforth solely studied, as the language of the sacred books, by the learned.

The palæographical history of the Hebrew language requires a brief notice, at least as far as regards the results of modern inquiries. The earliest monuments of Hebrew writing which we possess are the *genuine* coins of the Maccabees, which date from the year B.C. 143. The character in which their inscriptions are expressed bears a very near resemblance to the Samaritan alphabet, and both are evidently derived from the Phœnician alphabet. The Talmud also, and Origen and Jerome, both attest the fact that an ancient Hebrew character had fallen into disuse; and, by stating that the Samaritans employed it, and by giving some descriptions of its form, they distinctly

prove that the ancient character spoken of was essentially the same as that on the Hasmonæan coins. It is, therefore, considered to be established beyond a doubt that, before the exile, the Hebrews used this ancient character (the Talmud even calls it the 'Hebrew'). At what period, however, the square Hebrew character of our printed books was first adopted, is a matter of some dispute. The Talmud, and Origen and Jerome ascribe the change to Ezra; and those who, like Gesenius, admit this tradition to be true in a limited sense, reconcile it with the late use of the ancient letters on the coins, by appealing to the parallel use of the Kufic character on the Mahommedan coins, for several centuries after the Nischi was employed for writing; or, by supposing that the Maccabees had a mercantile interest in imitating the coinage of the Phœnicians. The other opinion is that, as the square Hebrew character has not, to all appearance, been developed directly out of the ancient stiff Phœnician type, but out of an alphabet bearing near affinity to that found in the Palmyrene inscriptions, a combination of this palæographical fact with the intercourse which took place between the Jews and the Syrians under the Seleucidæ, renders it probable that the square character was first adopted at some inconsiderable but undefinable time before the Christian era. Either of these theories is compatible with the supposition that the square character underwent many successive modifications in the next centuries, before it attained its full calligraphical perfection. The passage in Matt. v. 18 is considered to prove that the copies of the law were already written in the square character, as the *jod* of the ancient alphabet is as large a letter as the *aleph;* and the Talmud and Jerome speak as if the Hebrew MSS. of the Old Testament were, in their time, already provided with the final letters, the *Taggin*, the point on the broken horizontal stroke of ה, and other calligraphical minutiæ.*

The origin of the vowel-points is to be ascribed to the effort which the Jewish learned men made to preserve the pronunciation of their sacred language, at a time when its extinction as a living tongue endangered the loss of the traditional memory of its sound. Every kind of evidence renders it probable that these signs for the pronunciation were first introduced about the seventh century of the Christian era, that is, after the completion of the Talmud, and that the minute and complex system which we possess was gradually developed, from a few indispensable signs, to its present elaborateness. The existence of the present complete system can, however, be traced back to the eleventh century. The skilful investigation of Hupfeld (in the *Studien und Kritiken* for 1830) has proved that the vowel-points were unknown to Jerome and the Talmud; but, as far as regards the former, we are able to make a high estimate of the degree to which the traditionary pronunciation, prior to the use of the points, accorded with our Masoretic signs: for Jerome describes a pronunciation which agrees wonderfully well with our vocalisation. We are thus called on to avail ourselves thankfully of the Masoretic punctuation, on the double ground that it represents the Jewish traditional pronunciation, and that the Hebrew language, unless when read according to its laws, does not enter into its full dialectual harmony with its Syro-Arabian sisters.

Although it may be superfluous to enforce the general advantages, not to say indispensable necessity, of a sound scholarlike study of the Hebrew language to the theological student, yet it may be allowable to enumerate some of those particular reasons, incident to the present time, which urgently demand an increased attention to this study. First, we have an ancient honourable name to regain. Selden, Castell, Lightfoot, Pocock, Walton, Spencer, and Hyde, were once contemporary ornaments of our country. We daily see their names mentioned with deference in the writings of German scholars; but we are forcibly struck with the fact that, since that period, we have hardly, with the exception of Lowth and Kennicott, produced a single Syro-Arabian scholar whose labours have signally advanced Biblical philology. Secondly, the bold inquiries of the German theologians will force themselves on our notice. It is impossible for us much longer to be ignorant of their existence; for that which no English bookseller ventures to undertake finds a more enterprising publisher in America, and soon visits our shores in an English dress. These investigations are conducted in a spirit of philological and historical criticism which has never yet been brought to bear, with such force, on the most important Biblical questions. The wounds which they deal to the ancient traditions cannot be healed by reference to commentators whose generation knew nothing of our doubts and difficulties. The cure must be sympathetic; it must be effected by the same weapon that caused the wound. If the monstrous disproportion which books relating to ecclesiastical antiquity bear, in almost every theological bookseller's catalogue, over those relating to Biblical philology, be an evidence of the degree to which these studies have fallen into neglect, and if the few books in which an acquaintance with Hebrew is necessary, which do appear, are a fair proof of our present ability to meet the Germans with their own weapons—then there is indeed an urgent necessity that theological students should prepare for the increased demands of the future.—J. N.

HEBREW OF THE HEBREWS (Ἑβραῖος ἐξ Ἑβραίων), emphatically a Hebrew, one who was so by both parents, and that by a long series of ancestors, without admixture of Gentile or even proselyte blood. Of this the Jews were as proud as were those Christians in Spain who called themselves Old Christians, of having no mixture of Moorish blood.

HEBREWS. The question as to the origin of

* Some have attempted to find, in the discrepancies between the Septuagint and the Hebrew text, the basis for discovering in what character the MSS. from which they translated must have been written, by trying to reduce these discrepancies to mistakes of one letter for another. Eichhorn favours the notion that the Septuagint was made from MSS. in the Samaritan character; while Gesenius decides that the letters which are interchanged are only alike in the square character. The decision of this question would in some degree affect the view entertained of the antiquity of the square character. The latest author on this subject, however, Frankel, asserts that the evidence does not preponderate on either side (*Vorstudien zu der Septuaginta*, 1841, p. 213).

the Hebrew name is incidentally considered in the article HEBREW LANGUAGE.

HEBREWS, EPISTLE TO THE. In the received text this composition appears as part of the Canonical Scriptures of the New Testament, and also as the production of the apostle Paul. For neither of these assumptions is the evidence allowed on all hands to be conclusive; and hence the greatest diversity of opinion prevails among critics as to the claims of this epistle, some contending for its canonical authority and Pauline origin, some denying both of these, and some admitting the former, whilst they repudiate the latter. As the question of its canonicity becomes of importance as a *separate* question only where its Pauline authorship is denied, and as on the latter of these points we mean to advocate the side of the affirmative, it will not be necessary to occupy space with any discussion of the former by itself. We shall proceed accordingly to the consideration of the question of the authorship of this composition.

On no subject, perhaps, in the department of the higher criticism of the New Testament, have opinions been more divided and more keenly discussed, than on this. Of those who have rejected the claims of the apostle Paul to the authorship of this epistle, some have advocated those of Barnabas, others those of Luke, others those of Clement of Rome, others those of Silas, others those of Apollos, others those of some unknown Christian of Alexandria, and others those of some 'apostolic man,' whose name is no less unknown. Of these hypotheses some are so purely conjectural and destitute of any basis either historical or internal, that the bare mention of them as the vagaries of learned men is almost all the notice they deserve. That which ascribes this production to Apollos was first suggested by Luther, and it has been in more recent times adopted by Heumann, Bertholdt, De Wette, Bleek, and, apparently, also Tholuck. Unsupported as this theory is by a shadow of direct evidence either external or internal, it would deserve only to be passed over in silence, were it not for the great names which have espoused it, and the ingenious reasons they have urged in its support. As, however, it rests entirely on the hypothesis that the author of this epistle must have been an Alexandrian, we shall defer any remarks upon it till we come to examine that hypothesis. The claims of Silas have been urged by Böhme in the introduction to his commentary on this epistle (Lips. 1825), and by Mynster in the *Studien und Kritiken*, bd. ii. s. 344; but they have adduced nothing in support of these claims which might not with equal plausibility have been urged on behalf of any other of the companions of Paul. The same might almost be said regarding the supposition that Clement is the author of this work; for though his name is mentioned by Origen in relation to this subject, it is only as that of the supposed amanuensis of Paul, whom Origen's statement sets forth as the reputed author of the epistle, as we shall have occasion more fully to see afterwards; and though Jerome and Philastrius attest that some in the Roman Church ascribed the authorship of this epistle to Clement, the very terms in which they give the statement show that it is one to which they thought no credit was to be attached; nor does a comparison of the style and contents of this epistle with those of Clement's extant productions tend to any other conclusion than that the author of the one could not have been the author of the other. The claims of Luke apparently rise a degree higher from the circumstance that, besides being named by Origen, Jerome, and Philastrius, as dividing with Clement the honours which, these writers testify, were in certain quarters assigned to the latter, there is a character of similarity in respect of language and style between this epistle and the acknowledged productions of the evangelist. But on this circumstance no stress can legitimately be laid. For, 1st, where there is no other evidence, or at least none of any weight, in favour of identity of authorship, mere general similarity of style cannot be allowed to possess much force. 2ndly. Assuming the epistle to be the production of Paul, it is easy to account for the resemblance of its style to that of Luke, from the fact that Luke was for so many years the companion and disciple of Paul; for it is well known that when persons for a long time associate closely with each other, and especially when one of the parties is an individual of powerful intellect whose forms of thought and modes of speech imperceptibly impress themselves on those with whom he associates, they fall insensibly into a similarity of tone and style both of speaking and writing. To this, indeed, Chrysostom, whose authority in all such matters must be allowed to stand very high, expressly ascribes the similarity of Luke's style to that of Paul, when, contrasting the language of the former with that of Mark, he says, *ἕκαστος δὲ ὁμοίως τὸν διδάσκαλον ἐμιμήσατο· ὁ μὲν* [*ὁ Λουκᾶς*] *τὸν Παῦλον ὑπὲρ τοὺς ποταμοὺς ῥέοντα· ὁ δὲ* [*ὁ Μάρκος*] *τὸν Πέτρον βραχυλογίας ἐπιμελούμενον* (*Hom.* iv. *in Matt.*, quoted by Forster, *Apostolical Authority of the Epistle to the Hebrews*, p. 648). 3rdly. It is not in the epistle to the Hebrews alone that a resemblance to the style of Luke may be detected: the same feature pervades all Paul's epistles, especially those of a later date, as has been frequently observed by critics. This argument, then, if used against the Pauline origin of the epistle to the Hebrews would prove too much, as it would go to invalidate the claims of almost all the acknowledged writings of the apostle. In fine, whilst there are such resemblances of style, &c., as have been referred to between this epistle and the writings of Luke, there are *differences* of a nature so weighty as completely to overbalance these resemblances, and authorize the conclusion that the author of the latter could not also be the author of the former. Both Stuart (*Comment.* vol. i. p. 333, Lond. 1828) and Eichhorn (*Einleit.* bd. iii. s. 465) justly lay stress on the greater predominance of Jewish feelings in the Epistle to the Hebrews than in any of Luke's writings, and still more on the marked familiarity with the peculiarities of the Jewish schools displayed by the writer of the epistle, but of which no traces are apparent in any of the writings of the evangelist. Both writings display the combination of the Palestinian and the Hellenistic character on the part of their author; but in the Epistle to the Hebrews the former so decidedly predominates over the latter, whilst the reverse is the case with the writings of Luke, that it seems to the last degree improbable that the same person

could have written both. It appears, therefore, that for the theory which ascribes this epistle to Luke, there is no evidence of any kind which will bear examination, but, on the contrary, not a little against it. That which claims the authorship of this epistle for Barnabas has in its support the testimony of Tertullian (*De Pudicitia*, c. 20), with whom, as we learn from Jerome (*Epist.* 129, *ad Dardanum*), several (*plerique*) among the Latins concurred.* For this opinion Tertullian, in the passage referred to, assigns no reasons, and Jerome appears to have treated it as a mere conjecture resting upon Tertullian's authority alone; for, in his catalogue of ecclesiastical writers (c. 5), he refers to this opinion as one 'juxta Tertullianum,' whilst he says that the opinion that Luke was the author was one 'juxta quosdam.' Hug is of opinion (*Introd.* p. 596, Fosdick's transl.), that in this passage we have not Tertullian's own view so much as a concession on his part to those whom he was opposing, and who, because of the very passage he is about to quote from the Epistle to the Hebrews (vi. 4-8), were inclined to reject the claims of that epistle to be esteemed the production of Paul. This conjecture is of use, as it tends to show that Tertullian might have another reason for ascribing this epistle to Barnabas than his total ignorance that it had ever been imputed to Paul, as has been confidently inferred by several writers from the fact that it was obviously to the interest of his argument to uphold the Pauline origin of this epistle had he been aware of it. In recent times the ablest defender of this hypothesis is Ullmann, who has devoted to it an article in the first volume of his journal, the *Studien und Kritiken*, but the evidence he adduces in favour of it is very feeble. After enlarging on the testimony of Tertullian, he proceeds to the internal evidence in favour of Barnabas; but of the *six* reasons he assigns for ascribing the epistle to him, none possesses any force. The *first*, viz. the traces in the epistle of an Alexandrian education on the part of the author, supposing it granted, would not apply particularly to Barnabas, who was a native of Cyprus, and who, though Ullmann says, 'he had *perhaps* been in Alexandria,' for aught we know had never seen that seat of allegorical learning. The *second*, viz. that Barnabas being a Levite was the more likely, on that account, to understand the Jewish ritual, as we see the author of this epistle did, is of no weight, for there is nothing stated in the epistle on that head which any intelligent Jew might not have known, whether a Levite or not. The *third*, viz. that what the author of this epistle says concerning the law, divine revelation, faith, &c., is very Pauline, and such as we might expect from a companion of Paul, such as Barnabas was; the *fourth*, viz. that the tenor of the epistle is worthy such a man as Barnabas; the *fifth*, viz. that the writer of this epistle speaks of the Saviour very frequently by the appellation ὁ Ἰησοῦς, which Dr. Ullmann thinks indicates that the writer must have known our Lord during his personal ministry, which was *probably* the case with Barnabas; and the *sixth*, viz. that the names of persons mentioned in this epistle are names which Barnabas *might* have referred to had he written it—are reasons such as it would be idle to refute, and such as fill us with surprise that a man of Ullmann's learning and vigour should have gravely adduced them. With regard to the *fifth* also, Olshausen has justly observed (*Opusc. Theologica*, p. 115) that if it were certain that Barnabas had enjoyed the advantage of our Lord's personal ministry, it would clearly prove that he was not the author of this epistle, for the latter distinctly classes himself with those by whom this advantage had not been enjoyed (ch. ii. 3). Stuart and some others have laid great stress on the contrast afforded by this epistle to the extant epistle which passes under the name of Barnabas, in respect of style, tone, and general character, as supplying indubitable evidence that the former is the production of a different and a far superior mind. Of this there can be no question, and, were we quite certain that the epistle ascribed to Barnabas was really his production, the argument would be conclusive. But though some very distinguished names may be cited in support of its authenticity, the greater weight, both of authority and evidence, is against it [BARNABAS, EPISTLE OF]. The total absence of any reason in favour of imputing the authorship of the Epistle to the Hebrews to Barnabas affords sufficient ground for rejecting this hypothesis without our attempting to adduce dubious and uncertain reasons against it.

It only remains that we should consider the alleged traces of an Alexandrian origin in this epistle. These have been much insisted upon by Eichhorn, Schulz, Bleek, and others; but they are not such, we think, as will carry conviction to any impartial inquirer. The standard of comparison by which the supposed Alexandrian tone of this epistle is evinced, is supplied by the writings of Philo, between which and this epistle it is affirmed that there is so close a resemblance that it can be accounted for only on the supposition that the author of the latter was, like Philo, an Alexandrian Jew. Now before this reasoning can be so much as looked at, it behoves those who use it to point out clearly how much of Philo's peculiar style and sentiment was owing to his Jewish, and how much to his Alexandrian, education or habits of thought; because, unless this can be done, it will be impossible to show that any alleged peculiarity *necessarily* bespeaks an Alexandrian origin, and could not possibly have appeared in the writings of a pure Jew of Palestine. No attempt, however, of this sort has been made; on the contrary, it has been assumed that whatever is Philonian is therefore Alexandrian, and hence, all resemblances between the writings of Philo and the Epistle to the Hebrews have been urged as certain proofs that the latter must have been written by a converted Jew of Alex-

* Ullmann (*Stud. und Krit.* i. 391) has laboured to show that the 'plerique' in this passage must be understood of persons belonging to the Eastern church, the 'Græci sermonis scriptores,' of whom Jerome speaks in the same sentence. Had he read the passage attentively, however, he would have perceived that what Jerome says is, that though in his day 'plerique eam vel Barnabæ vel Clementis arbitrantur,' it was viewed as Paul's 'non solum ab ecclesiis Orientis, sed ab *omnibus* retro [*i. e.* antiquioribus] ecclesiasticis Græci sermonis scriptoribus.' If *all* the Greek writers judged it to be Paul's, how could *many* of them ascribe it to Barnabas?

andria. Such an assumption, however, we would by no means concede; and we feel confirmed in this by an examination of the evidence adduced in support of the alleged Alexandrian character of this epistle. As Stuart has, we think, clearly shown (i. 321), and as even Tholuck, though obviously inclining the other way, has candidly admitted (*Comment. on the Hebrews*, i. p. 68, § 7), there is nothing in this evidence to show that this epistle might not have been written by a Jew who had never left the bounds of Palestine. It is worthy of notice that several of the points on which Eichhorn chiefly insists as favouring his view, such as the prevalence of typical expositions of the Mosaic ritual in this epistle, and the greater elegance of its language and style (*Einleit.* iii. 443 ff.), are given up by Bleek, and that of the two chiefly insisted upon by the latter, viz. the close affinity between this epistle and the writings of Philo, and the alleged mistake in regard to the furniture of the tabernacle which Bleek charges upon the author of this epistle in ch. ix. 3, 4, and which he thinks no Jew of Palestine could have committed, both are relinquished by Tholuck as untenable (comp. the valuable remarks of Hug, *Introd.* p. 584, note, Fosdick's transl.). With regard to the latter, it may be remarked that, even supposing it proved that the writer of this epistle had erred in asserting that the pot containing the manna and Aaron's rod were placed in the ark of the testimony, and that, supposing θυμιατήριον to denote the *altar of incense*, and not the *censer*, he had fallen into the mistake of placing this within instead of without the vail, nothing could be thence deduced in favour of the Alexandrian origin of the author. For, with regard to the former of these it was a matter on which the Jews of Palestine had no better means of information than those of any other place, since, in the Temple as then standing, none of the furniture of the Holy of Holies had been preserved; and with regard to the latter, as it could not be the result of *ignorance* either in a Jew of Palestine or in a Jew of Alexandria, but must have been a piece of mere *inadvertence* on the part of either, it seems rather too much to conclude that it was such as the latter alone was capable of committing. That, however, there is no blunder in the case, has, we think, been very satisfactorily shown by Deyling (*Obs. Sac.* tom. ii. No. 47) and others (comp. Stuart and Tholuck *in loc.*).

On the alleged Alexandrian tone of this epistle rests, as already remarked, the entire claims of Apollos to the authorship. In setting aside the former, therefore, we of necessity repudiate also the latter. But it may be permitted us to remark that, even supposing the former established, the latter would by no means follow, any more than because a work produced in Germany in the present day was deeply tinctured with Hegelianism, it would follow from that alone, that it must be the production of Strauss rather than of Weisse, or any other disciple of Hegel's school. The adoption of this theory by Dr. Tholuck, after his exposure of the unsoundness of Bleek's reasonings, has filled us with surprise. 'Still,' says he (i. 69), 'could it be rendered probable that any distinguished person having intercourse with Paul, were an Alexandrian, and of Alexandrian culture, we might, with the greatest appearance of truth, regard him as the author of the epistle. Now such an one is found in the person of Apollos.' What is this but to say, 'The arguments for the Alexandrian origin of this epistle, I must confess, prove nothing; but show me an end to be gained by it and I will admit them to be most conclusive!' Such a statement affords, we think, very clear evidence that the disposition to ascribe this epistle to Apollos is to be traced not to any constraining force of evidence, but exclusively to what Olshausen in his strictures on Bleek (*Opusc.* p. 92) justly denounces as the main source of that able writer's errors on this question—'Quod non ab omni partium studio alienum animum servare ipsi contigit.'

We have occupied so much space in the examination of these hypotheses, partly because we wish to make it apparent how slender and shadowy are the grounds on which the opponents of the Pauline origin of this epistle are content to acquiesce in the claims of the parties who have been put forward as the Apostle's competitors; and partly because, before proceeding to consider the evidence directly for and against the claims of the Apostle, we are desirous to make it apparent that, unless these claims can be substantiated, we must give up as hopeless all attempts to ascertain the author of this epistle. Our sole choice lies here between Paul and some unknown writer of the apostolic age. This gives the question a character of no small importance, for it renders it virtually a question as to the canonical authority of this epistle. In the formation of the New Testament Canon we have no reason to believe that any supernatural aid was vouchsafed; but each church received or rejected books according as they were satisfied or not with the evidence historical and internal of their having proceeded from some apostolic source [CANON]. The only ground, therefore, upon which we can receive any book as canonical, is its being shown that it was received in the primitive churches as sanctioned by apostolic authority, confirmed by a comparison of its contents with the general doctrines of the Bible, and of its style and statements with those of the known writings of the party to whom it is ascribed. Where this cannot be done the mere antiquity of the book proves nothing to the point; the fact that, however ancient, the book cannot be shown to have been received by those who alone were qualified to judge accurately of such matters, as either the production of an apostle or of some *known* individual who wrote under the sanction and guidance of an apostle, is enough to set aside all its claims to be reverenced as a part of the divine word. Now if all attempts to ascribe the Epistle to the Hebrews to the pen of any of the known companions of Paul must be regarded as futile, it follows that unless it can be shown to have been received by the early churches as the production of the Apostle himself, and that upon grounds not incompatible with actual evidence to the contrary, it must be struck out from its place in the sacred Canon, and, masterly as it is, be ranked with the productions of uninspired human wisdom.

Referring our readers for particulars to the able and copious discussion of this question furnished by the works of Stuart (*Commentary*, vol. i.), Forster (*The Apostol. Authority of the Ep. to the Hebrews*, &c.), and Hug, we shall attempt to

present a condensed outline of the evidence, both for and against the Pauline authorship of this epistle. Following the example of Hug and Forster, we shall commence with the *internal* evidence, taking up first that in favour of the Pauline origin of the epistle.

1. A person familiar with the doctrines on which Paul is fond of insisting in his acknowledged epistles, will readily perceive that there is such a correspondence in this respect between these and the Epistle to the Hebrews, as supplies good ground for presuming that the latter proceeded also from his pen. That Christianity as a system is superior to Judaism in respect of clearness, simplicity and moral efficiency; that the former is the substance and reality of what the latter had presented only the typical adumbration; and that the latter was to be abolished to make way for the former, are points which, if more fully handled in the Epistle to the Hebrews, are familiar to all readers of the Epistles of Paul (comp. 2 Cor. iii. 6-18; Gal. iii. 22; iv. 1-9, 21-31; Col. ii. 16, 17, &c.). The same view is given in this epistle as in those of Paul, of the divine glory of the Mediator, not simply as θεάνθρωπος, but specifically as the εἰκων τοῦ θεοῦ, the reflection or manifestation of Deity to man (comp. Col. i. 15-20; Phil. ii. 6; Heb. i. 3, &c.); His condescension is described as having consisted in an impoverishing, and lessening, and lowering of Himself for man's behalf (2 Cor. viii. 9; Phil. ii. 7, 8; Heb. ii. 9); and His exaltation is set forth as a condition of royal dignity, which shall be consummated by all His enemies being put under His footstool (1 Cor. xv. 25-27; Heb. ii. 8; x. 13; xii. 2). He is represented as discharging the office of a μεσίτης, a word which is never used except by Paul and the writer of this epistle (Gal. iii. 19, 20; Heb. viii. 6); His death is represented as a sacrifice for the sins of man; and the peculiar idea is announced in connection with this, that He was prefigured by the sacrifices of the Mosaic dispensation (Rom. iii. 22-26; 1 Cor. v. 7; Eph. i. 7; v. 2; Heb. vii.-x.). Peculiar to Paul and the author of this epistle is the phrase ὁ θεὸς τῆς εἰρήνης (Rom. xv. 33, &c.; Heb. xiii. 20); and both seem to have conceived of the χαρίσματα under the aspect of διαιρέσεις and μερισμοὶ πνεύματος (1 Cor. xii. 4; Heb. ii. 4). It is worthy of remark also that the momentous question of a man's personal acceptance with God is answered in this epistle in the same peculiar way as in the acknowledged Epistles of Paul. All is made to depend upon the individual's exercising what both Paul and the author of this epistle call πίστις, and which they both represent as a realizing apprehension of the facts, and truths, and promises of revelation.* By both also the power of this πίστις is frequently referred to and illustrated by the example of those who had distinguished themselves in the annals of the Jewish race (comp. Rom. iii. 4; v. 2; Heb. iii. 6; Gal. iii. 5-14; Heb. x. 38; xi. 40). On all these points the sentiments of this epistle are so obviously Pauline, that not only did Origen remark that it contained τὰ νοήματα Παύλου, but even the most decided opponents of its Pauline authorship in recent times have laid it down as undeniable that it must have been written by some companion and disciple of Paul. 2. Some of the figures and allusions employed in this epistle are strictly Pauline. Thus the word of God is compared to a *sword* (Eph. vi. 17; Heb. iv. 12); inexperienced Christians are *children* who need *milk*, and must be instructed in the *elements*, whilst those of *maturer* attainments are *full-grown men* who require *strong meat* (1 Cor. iii. 1, 2; xiv. 20; Gal. iv. 9; Col. iii. 14; Heb. v. 12, 13; vi. 1); redemption through Christ is an *introduction* and an *entrance with confidence* unto God (Rom. v. 2; Eph. ii. 18; iii. 12; Heb. x. 19); afflictions are a *contest* or *strife* ἀγὼν (Phil. i. 30; Col. ii. 1; Heb. x. 32); the Christian life is a *race* (1 Cor. ix. 24; Phil. iii. 14; Heb. xii. 1); the Jewish ritual is a λατρεία (Rom. ix. 4; Heb. ix. 1, 6); a person under the constraint of some unworthy feeling or principle is ἔνοχος δουλείας (Gal. v. 1; Heb. ii. 15), &c. The fact that these and other such like figurative phrases occur only in this epistle and in the acknowledged Epistles of Paul, affords strong evidence that the former is his production, for in nothing does a writer more readily betray himself than by the use of peculiar and favourite figures. 3. Certain marked characteristics of Paul's style are found in this epistle. This department of the internal evidence has, more, perhaps, than any other, been canvassed by recent critics, and in some cases opposite conclusions have been drawn from the same phenomena. Thus the occurrence of ἅπαξ λεγομένα in this epistle has been adduced by the German scholars *against* the Pauline origin of it, whilst Stuart and Forster have both rested on this part as strongly *in favour* of that conclusion; and as it appears to us with justice, for if it be made out from Paul's acknowledged writings that the use of unusual words is a characteristic of his style (and this has been placed by these writers beyond all question), it is obvious that the occurrence of the *same* characteristic in this epistle, so far from being an argument *against*, is, as far as it goes, an argument *for* our ascribing it to Paul. On arguments, however, based on such minute phenomena, we are not disposed to rest much weight on either side. Every person must be aware that an author's use of words is greatly modified by the circumstances under which he writes or the design he has in writing; and the literature of every country presents us with numerous cases of authors, whose works, written at different periods, and with different designs, present far greater diversities of expression than any which have been pointed out between the Epistle to the Hebrews and the acknowledged Epistles of Paul. Hence cautious critics have declined to rest

---

* Bleek and Tholuck have both endeavoured to show that the πίστις of the Epistle to the Hebrews is not the same as the πίστις of Paul's acknowledged writings, but with singular want of success in our view. Tholuck's chief argument, and which he urges as of more weight than any Bleek has advanced, is, that the writer has not here contrasted νόμος and πίστις, the ἔργα νόμου, and the ἔργα πίστεως, as Paul would have done. But how can this be said when the great lesson of the epistle is, that *always*, even *under the law itself*, πίστις was the medium of acceptance and the channel of divine blessing to men?

much in questions of literary parentage upon what Bentley calls (*Dissert. on Phalaris*, p. 19, Lond. 1699) 'censures that are made from stile and language alone,' and which, he adds, 'are commonly nice and uncertain, and depend upon slender notices.' Apart, however, from such minute niceties, there are certain marked peculiarities of style which attach to particular writers, and flow so directly from the character of their genius or education, that they can hardly express themselves in discourse without introducing them. Now such peculiarities the writings of Paul present, and the occurrence of them has always been felt to afford no small evidence of the authenticity of any production claiming to be his in which they are found. Paley, in enumerating these (*Horæ Paulinæ*), has laid stress chiefly on the following: A disposition to the frequent use of a word, which cleaves as it were to the memory of the writer, so as to become a sort of *cant* word in his writings; a propensity 'to go off at a word,' and enter upon a parenthetic series of remarks suggested by that word; and a fondness for the paronomasia, or play upon words. In the Epistle to the Hebrews these peculiarities of Paul's style are richly exemplified; an evidence in favour of its Pauline origin which can never be enfeebled by adducing words, phrases, or features of style *peculiar* to this epistle, unless it can be first shown that it was *impossible* for Paul to have used such. 4. There is a striking analogy between Paul's use of the Old Testament and that made by the writer of this epistle. Both make frequent appeals to the Old Testament; both are in the habit of accumulating passages from different parts of the Old Testament, and making them bear on the point under discussion (comp. Rom. iii. 10-18; ix. 7-33, &c.; Heb. i. 5-14; iii.; x. 5-17); both are fond of linking quotations together by means of the expression καὶ πάλιν (comp. Rom. xv. 9-12; 1 Cor. iii. 19, 20; Heb. i. 5; ii. 12, 13; iv. 4; x. 30); both make use of the same passages, and that occasionally in a sense not naturally suggested by the context whence they are quoted (1 Cor. xv. 27; Eph. i. 22; Heb. ii. 8; Rom. i. 17; Gal. iii. 11; Heb. x. 38); and both, in one instance, quote the same passage in the same way, but in a form in which it does not agree with the Sept., and with an addition of the words λέγει κύριος, not found in the Hebrew; thereby indicating that the passage is given in both instances as it was present to the memory of one and the same writer (comp. Rom. xii. 19; Heb. x. 30). On the other hand, great stress has been laid by the opponents of the Pauline origin of this epistle on the fact, that whilst Paul in his acknowledged writings quotes from the Hebrew original in preference to the Sept. where the latter differs from the former, the author of this epistle quotes exclusively from the Sept., even when it departs very widely from the Hebrew. To this it may be replied: 1st, That both Paul and the author of this epistle quote *generally* from the Sept.; 2ndly, That where the Sept. differs from the Hebrew, Paul does not *always* follow the Hebrew in preference to the Sept. (comp. Rom. ii. 24; x. 11-18; xi. 27; xv. 12; 1 Cor. i. 19, &c.); and, 3rdly, That the writer of this epistle does not *always* follow the Sept. where it differs from the Hebrew, but occasionally deserts the former for the latter (*e. gr.* x. 30; xiii. 5). There is no ground, therefore, for this objection to the Pauline origin of this epistle. *In fine:* The Epistle to the Hebrews contains some personal allusions on the part of the writer which strongly favour the supposition that he was Paul. These are the mention of his intention to pay those to whom he was writing a visit speedily, in company with Timothy, whom he affectionately styles 'our brother,' and whom he describes as having been set at liberty, and expected soon to join the writer (Heb. xiii. 23); the allusion to his being in a state of imprisonment at the time of writing, as well as of his having partaken of their sympathy while formerly in a state of bondage among them (Heb. xiii. 19; x. 34); and the transmission to them of a salutation from the believers in Italy (Heb. xiii. 24); all of which agree well with the supposition that Paul wrote this epistle while a prisoner at Rome.

Such is an outline of the internal evidence furnished by this epistle of its Pauline origin. Let us now glance at the main objections which from various sources have been urged against it. 1. It is unaccountable that Paul, had he written this epistle, should have withheld his name. But is it less unaccountable that Clement, or Apollos, or Luke, had any of them been the author, should have withheld his name? Might not Paul write anonymously as well as any other man? *Why* he should have done so in this case we admit our inability to say satisfactorily; the only apparent reason, as far as we have been able to see, being the more rhetorical character of the production, which *might* induce the author to waive the usual form of epistolary address. But our inability to assign the reason why this work should have been issued anonymously cannot surely be held to be an argument against its authenticity, else it would be impossible to establish the authenticity of any anonymous production unless we could satisfactorily show what were the author's reasons for withholding his name—a thing which in five cases out of six it is impossible to do. 2. 'This epistle is more calmly and logically written than it was possible for the energetic Paul to have written; all the analogies between Judaism and Christianity are calmly investigated and calmly adduced; the materials are arranged in the strictest order, and carefully wrought out according to this disposition, and conclusion follows conclusion with the greatest regularity; the language also is rotund and choice, and the representation unusually clear. All this is unlike Paul' (Eichhorn, *Einleit.* iii. 459). It will perhaps surprise our readers to find the author of the Epistle to the Romans pronounced so utterly incapable of calm, connected, and logical reasoning, that it is inconceivable he should have written the Epistle to the Hebrews. If there be one thing for which Paul's writings are more remarkable than another, it is their dialectic accuracy; and as for calmness, whilst we admit that as a whole there is less of ardour and vehemence in this epistle than in the majority of Paul's acknowledged epistles, we think this is to be ascribed to the fact that a large portion of it is occupied with remarks of an explanatory and illustrative kind—remarks which are usually made in a calmer tone than where the design of the writer is to expose error, or to exhort to duty; and, on the other hand, we would assert that in

those parts of the epistle where his subject calls the writer to the utterance of reproof, warning, or exhortation, the language is equally ardent with that used in any analogous passages in the writings of Paul. This brings us to the closing part of Eichhorn's objection, which relates to the use in this epistle of a more rotund, elegant, and perspicuous style than we find usually in the epistles of Paul. Now it must be admitted here that this composition does partake much more of the character of a flowing, continuous discourse, than is found in the apostle's acknowledged productions. The question, however, is not, Whether Paul might not for some sufficient reason prefer attempting such a discourse in this particular case? a question which it would surely be absurd to discuss; but, Whether, *supposing* him to make the attempt, it is conceivable that he should succeed in it to the extent realized by the writer of this epistle? Eichhorn concludes in the negative; but on what grounds? Apparently on the grounds that the apostle's acknowledged writings present no specimens of such success; so that his argument is this: Supposing Paul to have attempted to write rhetorically, it is impossible he should have succeeded so well, because we find that, where he makes no such attempt, his style is far from being rhetorical! Of such reasoning we ar content to say, 'Valeat quantum valere potest. We may also hint that, in our opinion, there is no passage in the Epistle to the Hebrews, imposing as it is, which might not have flowed from the same pen which composed the 8th chapter of Romans, and the 13th of 1st Corinthians.—3. 'Whilst we occasionally meet Pauline *termini*, we find precisely in the *leading ideas* of the epistle a terminology different from that of Paul' (Tholuck, i. 39, Eng. transl.). The instances specified by Dr. Tholuck are the use of *ἱερεύς*, *ποιμήν*, and *ἀπόστολος*, as designations of Christ; of *ὁμολογία*, which he says is confined to this epistle; of *ἐγγίζειν τῷ θεῷ*; and of *τελειοῦν*, with its derivatives in the sense in which it is used Heb. vii. 19. Now, with regard to this objection, it may be observed, 1st, That supposing all the instances adduced by Tholuck to be unimpeachable, and supposing no reason could be assigned why Paul should use such in writing to Hebrews, when he did not use them in writing to others, still the objection cannot have much weight with any person accustomed to weigh evidence, because not only is the number of Pauline *termini* found in this epistle far greater than the number of termini which, according to Tholuck, are 'foreign to the apostle to the Gentiles;' but it is always less likely that the peculiar phrases of a writer should be borrowed by another, than that a writer noted for the use of peculiar words and phrases should, in a composition of a character somewhat different from his other productions, use terms not found elsewhere in his writings, But, 2ndly, let us examine the instances adduced by Tholuck, and see whether they bear out his reasoning. 'Paul nowhere calls Christ *priest*.' True; but though Paul, in writing to churches composed more or less of Gentile converts, whose previous ideas of priests and priestly rites were anything but favourable to their receiving under sacerdotal terms right notions of Christ and his work, never calls Christ a priest, is that any reason for our concluding that in writing to Jews, who had amongst them a priesthood of divine organization, and writing for the express purpose of showing that that priesthood was typical of Christ, it is inconceivable that the apostle should have applied the term *priest* to Christ? To us the difficulty would rather seem to be to conceive how, in handling such a topic, he could *avoid* calling Christ a priest.—'Paul nowhere calls Christ a *shepherd* and an *apostle*, as the writer of this epistle does.' But the whole weight of this objection to the Pauline origin of this epistle must rest on the assumption that Paul never uses figurative appellations of Christ in his writings; for if he do, why not here as well as elsewhere? Now it could only be the grossest unacquaintedness with the apostle's writings which could lead any to affirm this. The very opposite tendency is characteristic of them. Thus we find Christ termed *τέλος νόμου* (Rom. x. 4), *διάκονον περιτομῆς* (xv. 18), *τὸ πάσχα ἡμῶν* (1 Cor. v. 7), *ἡ πέτρα* (x. 4), *ἀπαρχὴ* (xv. 23), *ἑνὶ ἀνδρὶ* (2 Cor. ii. 2), *ἀκρογωνιαίου* (Eph. ii. 20), &c. With these instances before us, why should it be deemed so utterly incredible that Paul could have called Christ *ἀπόστολος* and *ποιμήν*, that the occurrence of such terms in the epistle before us is to be held as a reason for adjudging it not to have been written by him? With regard to the use of *ὁμολογία* in the sense of *religious profession*, the reader may compare the passages in which it occurs in this epistle with Rom. x. 9; 2 Cor. ix. 13; 1 Tim. vi. 12, and judge for himself how far such a usage is foreign to the apostle. The phrase *ἐγγίζειν τῷ θεῷ* occurs once in this epistle (vii. 19), and once in the Epistle of James; Paul also once uses the verb actively (Phil. ii. 30); and, on the other hand, the author of this epistle once uses it intransitively (x. 25). As there is thus a perfect analogy in the usage of the verb between the two, why it should be supposed improbable that Paul should use it in reference to God, or why a phrase used by James should be deemed too Alexandrian to be used by Paul, we feel ourselves utterly at a loss to conceive. With regard to the use of *τελειοῦν*, Dr. Tholuck himself contends (*Appendix*, ii. 297) that it everywhere in this epistle retains the idea of *completing;* but he cannot understand how Paul could have contemplated the work of redemption under this term in this epistle, since in no other of his epistles is it so used. This difficulty of the learned professor may, we think, be very easily removed, by remarking that it does not appear to have been Paul's design elsewhere, so fully at least as here, to represent the superiority of Christianity over Judaism, as that arises from the former being sufficient, whilst the latter was not sufficient, to *complete* men in a religious point of view, *i. e.* to supply to them all they need, and advance them to all of which they are capable. That this is the theme of the writer the passages in which the word in question occurs show; and we see no reason why such an idea might not have occurred to Paul as well as to any other man.

Such are the objections on which the more recent impugners of the Pauline authorship of this epistle seem inclined to lay most stress. A multitude of others have been urged by Bertholdt, Schulz, Seyffarth, &c., which have been carefully noticed and replied to by Stuart, but which it is unnecessary to adduce here, as their futility seems

very generally admitted even by those who take the anti-Pauline side.

It appears, therefore, that from the epistle itself nothing can be gathered materially unfavourable to the opinion that Paul was its author, whilst there is much in it strongly tending to support that opinion. It yet remains that we should look at the external evidence bearing on this question. Here we shall find the same conclusion still more decisively supported.

Passing by, as somewhat uncertain, the alleged testimony of Peter, who is supposed (2 Pet. iii. 15, 16) to refer to the Epistle to the Hebrews as the composition of Paul, and passing by, also, the testimonies of the apostolic fathers, which, though very decisive as to the antiquity and canonical authority of this epistle (see Forster's *Inquiry*, § 13), yet say nothing to guide us to the author, we come to the testimony of the Eastern church upon this subject. Here we meet the important fact, that of the Greek fathers not one ascribes this epistle to any but Paul. Pantænus (ap. Euseb. *Hist. Eccles.* vi. 14), in the second century, ascribes it to the apostle; and so does Clement of Alexandria (*ibid.*, *Stromat.* vi. 645, et sæpe). Origen (ap. Euseb. *Hist. Eccles.* vi. 15), in affirming that the Pauline authorship of this epistle was in his day matter of *ancient tradition*, assents to the truth of this opinion, and in noticing what he thinks the un-Pauline features of the style, mentions that a report was extant to the effect that, whilst the ideas were Paul's, the words were those of Clement of Rome or of Luke; though, so far from regarding this as certain, he says that 'God knows who was the writer (*i. e.*, as the context shows, *the amanuensis*) of this epistle.' Eusebius, whilst he places this epistle among the *ἀντιλεγόμενα*, knowing that in the church at Rome its claims had been questioned, nevertheless often quotes it as Paul's (see the passages in Lardner's *Credibility; Works*, iv. 249, ed. 1788), and includes it as received by the church generally among the Pauline epistles (*Hist. Eccles.* iii. 25). A number of other testimonies from the Eastern church may be found in Lardner (vol. vi. p. 391), fully justifying the assertion above made. Jerome also assures us (*Ep. ad Dardanum*) that it was received as Paul's by all the Greek writers. Nor does it appear that in any part of the Eastern church the Pauline origin of this epistle was ever doubted or suspected (comp. Olshausen, *Opusc. Theolog.* p. 95).

In the Western church this epistle did not meet with the same early and universal reception. Notwithstanding the regard shown for it by Clement, the church at Rome seems to have placed it under a ban (comp. Euseb. *Hist. Eccles.* iii. 3; vi. 20, see Heinichen's note); and hence Tertullian ascribed it to Barnabas, and others to Luke and Clement, whilst no Latin writer is found during the first three centuries who ascribed it to Paul. In the middle of the fourth century, Hilary of Poictiers quotes it as Paul's; and from that time the opinion seems to have gained ground till the commencement of the fifth century, when it speedily became as general in the Western as it had been in the Eastern churches (Lardner, vol. vi. p. 393). Now, of what value is this state of opinion in the early churches of the West in the question of evidence now before us? To judge of this, we must bear in mind that the sole amount of evidence arising from the testimony of the Latin churches is *negative;* all we can conclude from it, at the most, is that they had no sufficient evidence in favour of this epistle being Paul's; they do not seem to have had a shadow of historical evidence against its being his. The claims of Barnabas, Clement, and Luke, rest upon mere individual conjecture, and have no historical support. Supposing, then, that the rejection of this epistle by the Latins cannot be accounted for by circumstances peculiar to them, still this fact cannot diminish the weight of evidence accruing from the unanimity of the Greeks and Asiatics. Had the Latins been as unanimous in favour of Apollos or Clement as the Eastern churches were in favour of Paul, the case would have been different. The value of Paul's claims would in that case have been equal to the difference between the value of the Eastern tradition and the value of the Western. This would have furnished a somewhat puzzling problem; though even in that case the superiority of the Eastern witnesses to the Western would have materially advocated the claims of the apostle. As the case stands, *all* the positive evidence extant is in favour of the Pauline authorship of this epistle; and the only thing against it is that in the Latin churches there appears to have been no commonly received tradition on the subject. Under such circumstances, the claims of the apostle are entitled to be regarded as fully substantiated by the external evidence.

The result of the previous inquiry may be thus stated. 1. There is no substantial evidence external or internal in favour of any claimant to the authorship of this epistle except Paul. 2. There is nothing incompatible with the supposition that Paul was the author of it. 3. The preponderance of the internal, and all the direct external, evidence, go to show that it was written by Paul.

Assuming the Pauline authorship of the epistle, it is not difficult to determine *when* and *where* it was written. The allusions in ch. xiii. 19, 21, point to the closing period of the apostle's two years imprisonment at Rome as the season during 'the serene hours' of which, as Hug describes them (*Introd.* p. 603), he composed this noblest production of his pen. In this opinion almost all who receive the epistle as Paul's concur; and even by those who do not so receive it, nearly the same time is fixed upon, in consequence of the evidence furnished by the epistle itself of its having been written a good while after those to whom it is addressed had become Christians, but yet before the destruction of the Temple.

That the parties to whom this epistle was addressed were converted Jews, the epistle itself plainly shows. Ancient tradition points out the church at Jerusalem, or the Christians in Palestine generally, as the recipients. Stuart contends for the church at Cæsarea, not without some show of reason.

An early opinion that the epistle was first written in Hebrew or Aramaic, and then translated into Greek, has found in Michaelis a strenuous defender (*Introd.* iv. p. 221). The arguments he adduces, however, are more specious than sound; and it has been abundantly shown by Lardner, Hug, Eichhorn, and others, that this opinion is untenable. Why Paul should have

written in Greek to persons residing in Judæa is best answered by the reasons which Hug (*Introd.* p. 326, sqq.) and Diodati (*De Christo Græce loquente exercitatio*, &c., edited by O. T. Dobbin, LL.B., Lond. 1843) have adduced, to show that Greek was at that time well known to the mass of the Jews (comp. Tholuck, i. 78).

Some have doubted whether this composition be justly termed an epistle, and have proposed to regard it rather as a treatise. The salutations, however, at the close, seem rather to favour the common opinion; though it is of little moment which view we espouse.

The *design* of this epistle is to dissuade those to whom it is written from relapsing into Judaism, and to exhort them to hold fast the truths of Christianity which they had received. For this purpose the apostle shows the superiority of the latter over the former, in that it was introduced by one far greater than angels, or than Moses, from whom the Jews received their economy (i.-iii.), and in that it affords a more secure and complete salvation to the sinner than the former (iv.-x.). In demonstrating the latter position the apostle shows that in point of dignity, perpetuity, sufficiency, and suitableness, the Jewish priesthood and sacrifices were far inferior to those of Christ, who was the substance and reality, whilst these were but the type and shadow. He shows, also, that by the appearance of the anti-type the type is necessarily abolished; and adduces the important truth, that now, through Christ, the privilege of personal access to God is free to all. On all this he founds an exhortation to a life of faith and obedience, and shows that it has ever been only by a spiritual recognition and worship of God that good men have participated in his favour (xi.). The epistle concludes, as is usual with Paul, with a series of practical exhortations and pious wishes (xii.-xiii.).

Of *Commentaries* on this epistle the following may be enumerated as ranking among the best. Owen's *Exposition of the Epistle to the Hebrews, with preliminary exercitations*, 4 vols. folio, Lond. 1668-84; Maclean's *Paraphrase and Commentary on the Epistle to the Hebrews*, 2 vols. 8vo., Lond. 1819; Stuart's *Commentary on the Epistle to the Hebrews*, 2 vols. 8vo., Lond. 1828; 1 vol. ibid. 1831; Carpzov, *Sacræ Exercitt. in Pauli Ep. ad Heb.* 8vo., Helmst. 1750; Storr, *Pauli Brief. an d. Heb. erläutert*, 8vo., Tüb. 1809; Ernesti, *Lectiones Acadd. in Ep. ad Heb.* 8vo., Lips. 1795; Böhme, *Ep. ad Heb. lat. vert. et comment. perpet. instruxit.* 8vo., Lips. 1825; Kuinoel, *Comment. in Ep. ad Heb.* 8vo., Lips. 1831; Bleek, *Der. Br. an d. Heb. erläutert u.s.w.* 2 bd., Berl. 1828-40. Tholuck, *Kommentar zum Br. an d. Heb.* 8vo., Hamb. 1840 (2te. Aufl.), translated into English by James Hamilton, M.A., and J. E. Ryland, Esq., 2 vols. s. 8vo., Edin. 1842.—W. L. A.

HEBRON (חֶבְרוֹן; Sept. Χεβρών), a town in the south of Palestine and in the tribe of Judah, 18 miles south from Jerusalem, in 31° 32′ 30″ N. lat., 35° 8′ 20″ E. long., at the height of 2664 Paris feet above the level of the sea (Schubert). It is one of the most ancient cities existing, having, as the sacred writer informs us, been built 'seven years before Zoan in Egypt,' and being mentioned even prior to Damascus (Num. xiii. 22; Gen. xiii. 18; comp. xv. 2). Its most ancient name was Kirjath-arba, that is, 'the city of Arba,' from Arba, the father of Anak and of the Anakim who dwelt in and around Hebron (Gen. xxiii. 2; Josh. xiv. 15; xv. 3; xxi. 11; Judg. i. 10). It appears to have been also called Mamre, probably from the name of Abraham's Amoritish ally (Gen. xxiii. 19; xxxv. 27; comp. xiv. 13, 28). The ancient city lay in a valley; and the two remaining pools, one of which at least existed in the time of David, serve, with other circumstances, to identify the modern with the ancient site (Gen. xxxvii. 14; 2 Sam. iv. 12). Much of the life-time of Abraham, Isaac, and Jacob was spent in this neighbourhood, where they were all entombed; and it was from hence that the patriarchal family departed for Egypt by the way of Beersheba (Gen. xxxvii. 14; xlvi. 1). After the return of the Israelites, the city was taken by Joshua and given over to Caleb, who expelled the Anakim from its territories (Josh. x. 36, 37; xiv. 6-15; xv. 13-14; Judg. i. 20). It was afterwards made one of the cities of refuge, and assigned to the priests and Levites (Josh. xx. 7; xxi. 11, 13). David, on becoming king of Judah, made Hebron his royal residence. Here he reigned seven years and a half; here most of his sons were born; and here he was anointed king over all Israel (1 Sam. ii. 1-4, 11; 1 Kings ii. 11; 2 Sam. v. 1, 3). On this extension of his kingdom Hebron ceased to be sufficiently central, and Jerusalem then became the metropolis. It is possible that this step excited a degree of discontent in Hebron which afterwards encouraged Absalom to raise in that city the standard of rebellion against his father (2 Kings xv. 9, 10). Hebron was one of the places fortified by Rehoboam (2 Chron. xi. 10); and after the exile the Jews who returned to Palestine occupied Hebron and the surrounding villages (Neh. xi. 15).

Hebron is not named by the prophets, nor in the New Testament; but we learn from the first book of Maccabees, and from Josephus, that it came into the power of the Edomites, who had taken possession of the south of Judah, and was recovered from them by Judas Maccabæus (1 Macc. v. 65; Joseph. *Antiq.* xii. 8. 6). During the great war, Hebron was seized by the rebel Simon Giorides, but was re-captured and burnt by Cerealis, an officer of Vespasian (Joseph. *De Bell. Jud.* iv. 9; vii. 9). Josephus describes the tombs of the patriarchs as existing in his day; and both Eusebius and Jerome, and all subsequent writers who mention Hebron down to the time of the Crusades, speak of the place chiefly as containing these sepulchres. In the course of time the remarkable structure enclosing the tombs of Abraham and the other patriarchs was called the 'Castle of Abraham;' and by an easy transition this name came to be applied to the city itself; till in the time of the Crusades the names of Hebron and Castle of Abraham were used interchangeably. Hence, as Abraham is also distinguished among the Moslems by the appellation of *el Khulil*, 'the Friend' (of God), this latter epithet became, among them, the name of the city; and they now know Hebron only as el Khulil (Robinson's *Researches*, ii. 456).

Soon after the Crusaders had taken Jerusalem, Hebron also appears to have passed into their hands, and, in 1100, was bestowed as a fief

upon Gerhard of Avennes; but two years after it is described as being in ruins (Wilken, *Gesch. der Krus.* ii. 44; Saewulf, *Peregrin.* p. 269). In 1167 Hebron was raised to the rank of a bishopric, and the title of bishop of Hebron long remained in the Romish church; for it occurs so late as A.D. 1365. But it was merely nominal; for after the capture of Jerusalem by Saladin in 1187, Hebron also reverted to the Moslems, and has ever since remained in their possession. In the modern history of Hebron the most remarkable circumstance is the part which the inhabitants of the town and district took in the rebellion of 1834, and the heavy retribution which it brought down upon them. They held out to the last, and gave battle to Ibrahim Pasha near Solomon's Pools. They were defeated; but retired and entrenched themselves in Hebron, which Ibrahim carried by storm, and gave over to sack and pillage. The town has not yet recovered from the blow it then sustained.

In the fourteenth century pilgrims passed from Sinai to Jerusalem direct through the desert by Beersheba and Hebron. In the following century this route seems to have been abandoned for that by Gaza; yet the pilgrims sometimes took Hebron in their way, or visited it from Gaza. The travellers of that period describe as existing here an immense charitable establishment, or hospital, where 1200 loaves of bread, besides oil and other condiments, were daily distributed to all comers, without distinction of age or religion, at the annual expense of 20,000 ducats.

Hebron continued to be occasionally visited by European travellers down to the latter part of the seventeenth century; but from that time till the present century it appears to have been little frequented by them. The principal travellers who have been more recently there are Seetzen, Ali Bey, Irby and Mangles, Poujoulat, Monro, Stephens, Paxton, Lord Lindsay, Russegger, Schubert, Dr. Robinson, and Dr. Olin.

The town of Hebron lies low down on the sloping sides of a narrow valley (of Mamre), chiefly on the eastern side, but in the southern part stretches across also to the western side. The houses are all of stone, high and well built, with windows and flat roofs, and on these roofs are small domes, sometimes two or three to each house. This mode of building seemed to Dr. Robinson peculiar to Judæa, as he had not observed it further north than Nabulus. It is, however, common in the countries farther east, where wood is scarce. The streets are narrow, seldom more than two or three yards in width; the pavement, where one exists, is rough and difficult. The bazaars are to a considerable extent covered, either by some kind of awning, or by arches springing from the tops of the houses and spanning the street. The goods in them are thus secured from the effects of the sun and rain, but the streets are rendered gloomy as well as damp. The shops are well furnished, better indeed than those of towns of the same class in Egypt, and the commodities are of a very similar description. The only display of local manufactures is the produce of the glass-works, for which the place has long been celebrated in these parts. The articles manufactured consist almost exclusively of glass lamps, many of which are exported to Egypt, and rings of coloured glass worn by females on the arms. Gates are placed not only at the entrance of the city, but in different parts of the interior, and are closed at night for the better preservation of order, as well as to prevent communication between the different quarters. This is a rude contrivance much resorted to in Eastern towns from the want of an efficient ambulatory night-watch.

There are nine mosques in Hebron, none of which possess any architectural or other interest, with the exception of the massive structure which is built over the tombs of the patriarchs. This is esteemed by the Moslems one of their holiest places, and Christians are rigorously excluded from it. The only Europeans who have found their way to the interior are Ali Bey and Giovanni Finati, the Italian servant of Mr. Bankes. The best account of it, from whatever source derived, is that furnished by the Rev. V. Monro, who states that 'the mosque, which covers the cave of Machpelah, and contains the patriarchal tombs, is a square building with little external decoration, at the south end of the town. Behind it is a small cupola, with eight or ten windows, beneath which is the tomb of Esau, excluded from the privilege of lying among the patriarchs. Ascending from the street, at the corner of the mosque, you pass through an arched way by a flight of steps to a wide platform, at the end of which is another short ascent; to the left is the court, out of which, to the left again, you enter the mosque. The dimensions within are about forty paces by twenty-five. Immediately on the right of the door is the tomb of Sarah, and beyond it that of Abraham, having a passage between them into the court. Corresponding with these, on the opposite side of the mosque, are those of Isaac and Rebekah, and behind them is a recess for prayer, and a pulpit. These tombs resemble small huts, with a window on each side and folding-doors in front, the lower parts of which are of wood, and the upper of iron or bronze bars plated. Within each of these is an imitation of the sarcophagus which lies in the cave below the mosque, which no one is allowed to enter. Those seen above resemble coffins with pyramidal tops, and are covered with green silk, lettered with verses from the Koran. The doors of these tombs are left constantly open; but no one enters those of the women—at least, men do not. In the mosque is a baldakin, supported by four columns, over an octagonal figure of black and white marble inlaid, around a small hole in the pavement, through which a chain passes from the top of the canopy to a lamp continually burning to give light in the cave of Machpelah, where the actual sarcophagi rest. At the upper end of the court is the chief place of prayer; and on the opposite side of the mosque are two larger tombs, where are deposited the bodies of Jacob and Leah' (*Summer's Ramble*, i. 245). The cave itself he does not describe, nor does it appear that even Moslems are admitted to it; for Ali Bey (a Spaniard travelling as a Moslem) does not even mention the cave below while describing the shrines of the mosque. John Sanderson (A.D. 1601) expressly says that none might enter, but that persons might view it, as far as the lamp allowed, through the hole at the top, Moslems being furnished with more light for the purpose than Jews. At an earlier period, however, when the

Holy Land was in the power of the Christians, access was not denied; and Benjamin of Tudela says that the sarcophagi above ground were shown to the generality of pilgrims as what they desired to see; but if a rich Jew offered an additional fee, 'an iron door is opened, which dates from the time of our forefathers who rest in peace, and with a burning taper in his hands the visitor descends into a first cave, which is empty, traverses a second in the same state, and at last reaches a third, which contains six sepulchres, those of Abraham, Isaac, and Jacob, and of Sarah, Rebekah, and Leah, one opposite the other. All these sepulchres bear inscriptions, the letters being engraved; thus upon that of Abraham: "This is the sepulchre of our father Abraham, upon whom be peace;" even so upon that of Isaac and all the other sepulchres. A lamp burns in the cave and upon the sepulchres continually, both night and day; and you there see tubs filled with the bones of Israelites; for it is a custom of the house of Israel to bring hither the bones and relics of their forefathers, and leave them there, unto this day' (*Itinerary*, i. 77; ed. Asher, Berlin, 1840). The identity of this place with the cave of Machpelah is one of the few local traditions in Palestine which even Dr. Robinson suffers to pass without dispute, and may therefore be taken for granted.

The court in which the mosque stands is surrounded by an extensive and lofty wall, formed of large stones, and strengthened by square buttresses. This wall is the greatest antiquity in Hebron, and even Dr. Robinson supposes that it may be substantially the same which is mentioned by Josephus (*Antiq.* i. 14; *De Bell. Jud.* iv. 9. 7), and by Eusebius and Jerome (*Onomast.* s. v. *Arboch*) as the sepulchre of Abraham. The enclosed structure is usually ascribed to the empress Helena; but Dr. Robinson thinks it more likely to have been erected by the Crusaders, and that till their time no building existed within the great wall. If, however, we rightly understand the Rabbi Benjamin, he says there was a synagogue here under the Moslems (before the Crusades); but he certainly ascribes to the Gentiles (Christians) the six sepulchres which appear above ground. If this were so, they have since been renewed by the Moslems, as those which now exist are, as described, quite similar to the Moslem shrines of Jewish saints which the present writer has seen in countries where Christians never had power. A common Moslem tomb in the neighbourhood of Hebron passes as the tomb of Abner. He was certainly interred in this city (2 Sam. iii. 32); and the head of Ishbosheth, after his assassination, was deposited in the same sepulchre (2 Sam. iv. 12); but there is slight evidence in favour of the tradition which professes to point out this locality to the modern traveller.

Besides this venerable wall, there is nothing at Hebron bearing the stamp of antiquity, save two reservoirs for rain water outside the town. One of these is just without the southern gate in the bottom of the valley. It is a large basin, 133 feet square, and 21 feet 8 inches deep. It is built with hewn limestone of very solid workmanship, and obviously of ancient date. The depth of water of course varies at different times of the year: in May, it is 14 feet. The descent is by flights of steps at the four corners, by which the water is brought up in vessels and skins, and poured out into troughs for the flocks, or carried away for domestic uses. Just at the north end of the main part of the town is another and smaller pool, also occupying the bed of the valley, and measuring 85 feet by 55, with a depth of 18½ feet, containing (in May) 7 feet of water. These cisterns, which are connected with no perennial springs, and which are filled only by the rains, seem (at least in summer) to be the main dependence of the inhabitants for water, although that of the larger pool is neither clear nor clean. As these pools are doubtless of high antiquity, one of them is in all likelihood the 'pool of Hebron' over which David hanged up the assassins of Ishbosheth (2 Sam. iv. 12).

The present population of Hebron has not been clearly ascertained. Monro heard it called 10,000, but thought half that number more probable. Dr. Robinson, however, was inclined to receive the larger number; but Dr. Olin was assured by the resident Jewish chief rabbi that it did not exceed 4000 or 5000; and as the Jews at Hebron are mostly Europeans, their information is of more value than that of Asiatics, who have a singular vacancy of ideas in numerical computations. Mr. Stent also states the population at 5000, on the authority of Bishop Alexander's chaplain at Jerusalem (*Egypt and Holy Land*, ii. 113). Most of the inhabitants are Moslems, of fierce and intolerant character. There are no resident Christians. The Jews amount to about one hundred families, mostly natives of different countries of Europe, who have emigrated to this place for the purpose of having their bones laid near the sepulchres of their illustrious ancestors. They have two synagogues and several schools. As usual, they have a quarter of the city to themselves, where the streets are narrow and filthy, and the houses mean. In a few instances, however, they are in tolerable repair and whitewashed—a circumstance which Dr. Olin judged peculiar to Hebron, as he had not observed it elsewhere.

The environs of Hebron are very fertile. Vineyards and plantations of fruit-trees, chiefly olive-trees, cover the valleys and arable grounds; while the tops and sides of the hills, although stony, are covered with rich pastures, which support a great number of cattle, sheep, and goats, constituting an important branch of the industry and wealth of Hebron. The hill country of Judah, of which it is the capital, is indeed highly productive, and under a paternal government would be capable of sustaining a large population. That it did so once, is manifest from the great number and extent of ruined terraces and dilapidated towns. It is at present abandoned, and cultivation ceases at the distance of two miles north of the town. The hills then become covered with prickly and other stunted trees, which furnish Bethlehem and other villages with wood. See the various travellers above named as having visited Hebron, and in particular, Dr. Robinson, Dr. Olin, Rev. V. Monro, and Schubert.

HEDUOSMON (Gr. ἡδύοσμον, *i. e.* having a sweet smell), translated *mint*, is mentioned in Matt. xxiii. 23: 'Woe unto you, Scribes and Pharisees, hypocrites! for ye pay tithe of *mint* and anise (properly *dill*) and cummin, and have omitted the weightier matters of the law;' and, again, in Luke xi. 42: 'But woe unto you, Pha-

risees! for ye tithe *mint* and rue, and all manner of herbs, and pass over judgment and the love of God: these ought ye to have done, and not to leave the other undone.' All the plants mentioned in the above passages belong to the smaller ones cultivated in gardens in Europe, and which usually come under the denomination of sweet herbs. Lady Calcott inquires whether mint was one of the bitter herbs which the Israelites ate with the Paschal Lamb; and infers the probability of its being so from our own practice of eating lamb with mint sauce. Dr. Harris argues that mint, anise, and cummin were not tithed, and that the Pharisees only paid tithes of these plants from an overstrained interpretation of the law. But, in the article Anethon (Dill), it may be seen that dill was tithed, and it is one of the herbs mentioned along with mint. The meaning, therefore, seems to be, that the Pharisees, while, in conformity with the law, they paid these minute tithes, neglected the most important moral duties,—truth, justice, and mercy; for it is added, 'these ought ye to have done, and not to leave the other undone.'

336. [Mentha sylvestris.]

The plant ἡδύοσμος or ἡδύοσμον, so called 'ab odoris bonitate vel jucunditate,' was also called μίνθα and μίνθος by the Greeks, and *mentha*, or *menta*, by the Romans. The Arabs give *minthes* as the Greek synonyme of their نعنع *nana;* and in India, Persian works give *podeena* as the Hindee name of the latter. *Podeena* is the common name of a species of mint cultivated in the gardens of North-Western India. These names are interesting as occurring in works on Materia Medica; because both were employed by early translators as the equivalent of ἡδύοσμον in the above passages of Matthew and Luke; and all European translators, according to Celsius, concur in considering *mint* as intended. The species most common in Syria is *mentha sylvestris*, found by Russell at Aleppo, and mentioned by him as one of the herbs cultivated in the gardens there. It also occurs in Greece, Taurus, Caucasus, the Altai Range, and as far as Cashmere, whence we have obtained specimens. *M. arvensis*, of which *M. sativa* (Linn.) is one of the varieties, is also a widely diffused species, being found in Greece, in parts of Caucasus, in the Altai Range, and in Cashmere. Mint is highly esteemed in Eastern countries, and apparently was so also by the Jews. Celsius says, 'Patet olus fuisse in Judæa quondam notum, et Judæis ob virtutes et præstantiam singularem acceptissimum.' It was much esteemed by the ancients, as Pliny (*Hist. Nat.* xix. 47) testifies: 'Mentæ nomen suavitas odoris apud Græcos mutavit, cum alioqui mintha vocaretur: unde veteres nostri nomen declinaverunt. Grato menta mensas odore percurrit in rusticis dapibus;' and again (xx. 53), 'Mentæ ipsius odor animum excitat et sapor aviditatem in cibis, ideo embammatum mixturæ familiaris.' Dioscorides also (iii. 41) mentions it as useful to the stomach, and peculiarly grateful as a condiment. Mint was employed by the ancients in the preparation of many dishes. 'Hinc in Apicii libro coquinario, singulis fere paginis menthæ tam viridis, quam aridæ, mentio' (Cels. *Hierobot.* i. p. 546). 'Sic apud Ebræos in cibis receptam fuisse mentham manifeste tradunt Talmudici Tract. *Shem. Ve Jobel*, vii. 2; et Tract. *Oketzin*, i. 2; *Sheb.* vii. 1. Unde et olerum decimationi subjecta fuit' (Ib. p. 547).

It is difficult to determine the exact species or variety of mint employed by the ancients. There are numerous species very nearly allied to one another. They usually grow in moist situations, and are herbaceous, perennial, of powerful odour, especially when bruised, and have small reddish-coloured flowers, arranged in spikes or whorls. The taste of these plants is bitter, warm, and pungent, but leaving a sensation of coolness on the tongue: in their properties they are so similar to each other, that either in medicine, or as a condiment, one species may safely be substituted for another. But the species *M. sylvestris* and *M. arvensis*, which have been mentioned above, probably yielded the varieties cultivated in Palestine.—J. F. R.

HEIFER, RED. [Sacrifice.]

HEIR. [Birthright; Inheritance.]

HELBON (חֶלְבּוֹן; Sept. Χελβών), or Chelbon, a name which occurs only in Ezek. xxvii. 18, where 'the wine of Helbon' is named among the commodities brought to the great market of Tyre. The Syriac, Symmachus, the Chaldee, and Vulgate, all regard the word as an appellative descriptive of the quality of the wine as 'pingue vinum' or 'vinum dulce coctum.' But it is better to accept the indication of the Septuagint, which, by giving the proper name Χελβών, must be supposed to have had in view that old city of Syria which appears under the form of Chalybon (Χαλυβών) in Ptolemy (*Geog.* v. 15) and Strabo (xv. p. 505). The latter author mentions this Chalybon as a place famous for wine; and in describing the luxury of the kings of Persia, he says they would have wheat brought from Assos in Æolia, Chalybonian wine out of Syria, and water from the Eulæus (the river Ulai of Dan. viii. 2), which was the lightest of any. Athenæus repeats the fact of the kings of Persia drinking only the Chalybonian wine (*Sympos.* i. 22).

Now, it is generally agreed that the ancient

Chalybon is represented by the modern Aleppo. At the present time, when the prohibitions of the Moslem religion occasion much neglect in respect to wines, we can merely judge by comparison of the qualities of the ancient wines in these parts. Thevenot, however, informs us that a strong wine is made from the grapes of Aleppo (*Travels*, part i. p. 25); and Russell (*Nat. Hist. of Aleppo*, i. 80) states that although the white wines are thin and poor, and difficult to keep, the red wine, which is deep-coloured, is strong and heady, and more apt to produce drowsiness than to raise the spirits. But one third part of the white wine mixed with two of the red produces a liquor tolerably palatable, and much lighter than the red wine by itself. This wine is preferred by the Europeans, who use it when the wines of Provence (their usual beverage) happen to be scarce.

Aleppo, styled by the natives Haleb, is situated in N. lat. 36° 11′ 25″, E. long. 37° 9′, and

337. [Aleppo.—Helbon.]

is seventy-six miles from the sea by way of Scanderoon, in a straight line, and ninety miles by way of Antioch. It is one of the few ancient cities of these parts which have retained their ancient importance; and this it owes to its happy position upon the line of the commercial intercourse of Asia Minor and Syria with Egypt, and of Europe and Westernmost Asia with the countries beyond the Euphrates. It seems to have risen to commercial importance on the decline of Palmyra, to which it succeeded. It is indeed remarkable that the earliest mention of the place, in Ezekiel, occurs in a commercial connection, and in the same connection it would probably be mentioned at the present day. As the town is only once named, and then only with reference to its wine, and as no Biblical interest is attached to it, we must refer to general or geographical dictionaries for an account of its history and present condition. It may suffice to indicate that it has long ranked as the capital of Syria, and as the third, if not the second city of the Ottoman empire. It has suffered dreadfully from earthquakes at different times, and has never recovered the terrible visitation of this kind which it sustained in 1822: the population, which was formerly reckoned above 200,000, is not supposed to reach half that number at present.

HELIOPOLIS. [On.]

HELL. Much that belongs to this subject has already been considered under the head Hades. It is there shown that hell is represented by the word שְׁאוֹל (*Sheol*) in the Old and by ᾅδης (*Hades*) in the New Testament. But as both these words mean also the grave or the condition of the dead. hell, as the place of final punishment for sinners, is more distinctively indicated by the term Gehenna (γέεννα), which is the word translated 'hell' in Matt. v. 22, 29, 30; x. 28; xviii. 9; xxiii. 15, 33; Mark ix. 43, 45, 47; Luke xii. 5; James iii. 6. It is also distinctively indicated by such phrases as 'the place of torment' (Luke xvi. 28); 'everlasting fire' (Matt. xxv. 41); 'the hell of fire, where the worm dieth not, and the fire is not quenched' (Mark ix. 44). The dreadful nature of the abode of the wicked is implied in various figurative expressions, such as 'outer darkness,' 'I am tormented in this flame,' 'furnace of fire,' 'unquenchable fire,' 'where the worm dieth not,' 'the blackness of darkness,' 'torment in fire and brimstone,' 'the ascending smoke of their torment,' 'the lake of fire that burneth with brimstone' (Matt. viii. 12; xiii. 42; xxii. 13; xxv. 30; Luke xvi. 24; comp. Matt. xxv. 41;

Mark ix. 43-48; Jude 13; comp. Rev. xiv. 10, 11; xix. 20; xx. 14; xxi. 8). The figure by which hell is represented as burning with fire and brimstone is probably derived from the fate of Sodom and Gomorrah, as well as that which describes the smoke as ascending from it (comp. Rev. xiv. 10, 11, with Gen. xix. 24, 28). To this coincidence of description Peter also most probably alludes in 2 Pet. ii. 6.

The names which in many of the other instances are given to the punishments of hell, are doubtless in part figurative, and many of the terms which were commonly applied to the subject by the Jews are retained in the New Testament. The images, it will be seen, are generally taken from death, capital punishments, tortures, prisons, &c. And it is the obvious design of the sacred writers, in using such figures, to awaken the idea of something terrible and fearful. They mean to teach that the punishments beyond the grave will excite the same feelings of distress as are produced on earth by the objects employed to represent them. We are so little acquainted with the state in which we shall be hereafter, and with the nature of our future body, that no strictly literal representation of such punishments could be made intelligible to us. Many of the Jews, indeed, and many of the Christian fathers, took the terms employed in Scripture in an entirely literal sense, and supposed there would be actual fire, &c. in hell. But from the words of Christ and his apostles nothing more can with certainty be inferred than that they meant to denote great and unending miseries.

The punishments of sin may be distinguished into two classes—1. *Natural* punishments, or such as necessarily follow a life of servitude to sin: 2. *Positive* punishments, or such as God shall see fit, by his sovereign will, to inflict.

1. Among the natural punishments we may rank the privation of eternal happiness (Matt. vii. 21, 23; xxii. 13; xxv. 41; comp. 2 Thess. i. 9); the painful sensations which are the natural consequence of committing sin, and of an impenitent heart; the propensities to sin, the evil passions and desires which in this world fill the human heart, and which are doubtless carried into the world to come. The company of fellow-sinners and of evil spirits, as inevitably resulting from the other conditions, may be accounted among the natural punishments, and must prove not the least grievous of them.

2. The positive punishments have been already indicated. It is to these chiefly that the Scripture directs our attention. 'There are but few men in such a state that the merely natural punishments of sin will appear to them terrible enough to deter them from the commission of it. Experience also shows that to threaten positive punishment has far more effect, as well upon the cultivated as the uncultivated, in deterring them from crime, than to announce, and lead men to expect, the merely natural consequences of sin, be they ever so terrible. Hence we may see why it is that the New Testament says so little of natural punishments (although these beyond question await the wicked), and makes mention of them in particular far less frequently than of positive punishments; and why, in those passages which treat of the punishments of hell, such ideas and images are constantly employed as suggest and confirm the idea of positive punishments' (Knapp's *Christian Theology*, § 156).

As the sins which shut out from heaven vary so greatly in quality and degree, we should expect from the justice of God a corresponding variety both in the natural and the positive punishments. This is accordingly the uniform doctrine of Christ and his apostles. The more knowledge of the divine law a man possesses, the more his opportunities and inducements to avoid sin, the stronger the incentives to faith and holiness set before him, the greater will be his punishment if he fails to make a faithful use of these advantages. 'The servant who knows his lord's will and does it not, deserves to be beaten with many stripes:' 'To whom much is given, of him much will be required' (Matt. x. 15; xi. 22, 24; xxiii. 15; Luke xii. 48). Hence St. Paul says that the heathen who acted against the law of nature would indeed be punished; but that the Jews would be punished more than they, because they had more knowledge (Rom. ii. 9-29). In this conviction, that God will, even in hell, justly proportion punishment to sin, we must rest satisfied. We cannot now know more; the precise degrees as well as the precise nature of such punishments are things belonging to another state of being, which in the present we are unable to understand (Knapp's *Christian Theology*, translated by Leonard Woods, Jun., DD., §§ 156-158; Storr and Flatt's *Biblical Theology*, with Schmucker's Additions, § iii. 58).

HELLENIST (Ἑλληνιστής). This word is derived from the Greek verb ἑλληνίζω, which in Aristotle means 'to talk (good) Greek' (*Rhetoric*, iii. 5. 1; 12. 1); but, according to the analogy of other verbs in —ίζω, it might mean 'to favour the Greeks,' or 'to imitate Greek manners.' In the New Testament it seems to be appropriated as the name of those persons who, being of Jewish extraction, nevertheless talked Greek as their mother-tongue; which was the case generally with the Jews in Egypt, Syria, Asia Minor, and Greece; and in fact, through the influence of the Greek cities in northern Palestine (Decapolis), it would appear that the Galilæans from their childhood learned nearly as much Greek as Hebrew. The appellation *Hellenist* is opposed to that of *Hebrew* in Acts vi. 1: in Acts ix. 29 the reading is not so certain, yet probably it should there also be 'Hellenists,' meaning unconverted Jews. Modern critics have accordingly agreed to denominate the Jewish dialect of Greek 'Hellenistic;' and, whatever name be used, the thing itself ought to be distinctly conceived of.

The Greeks who conquered the Persian empire spoke many different dialects; and the leading nation, the Macedonians, were too deficient in literary pretensions to give an exclusive currency to their own idiom. A necessary result of this was, that even in the written style the current Greek became more or less a compound of several dialects; and much more must this have happened to the speech which foreigners learned to talk as Greek. They could not discriminate Ionic and Macedonian words and phrases from those of Attica; and while they fused the language into a new mould, they would also fail to learn the niceties of Greek grammar, and the peculiarities of its genius. Add to this, that each separate people was of course liable to introduce its

own idioms into the Greek—a source of corruption less influential perhaps in the case of those languages (such as Phrygian and Persian) which belonged to the Indo-European stock, but which in the case of the Jews must have been peculiarly powerful, both because of the eminent contrast between the genius of their tongue and that of the Greek, and because their national literature had taken so deep a hold. In consequence, so similar in style are *most* parts of the New Testament and of the Apocrypha to the Old Testament, that even the best scholar would fail of finding out from the English translation, close as it is, in which of the two languages the original was written.

The last remark, however, has its exceptions; for in the Hellenistic Greek the Jewish element is not always equally predominant. As might naturally be expected, it is generally found to be most abundant in the *translations* from Hebrew, such as the Alexandrine Version of the Old Testament and the first book of Maccabees. The Apocalypse, of all original compositions in Greek, though full of natural eloquence, is the most thoroughly Hebraic, and most violates the laws of Greek grammar. Next to it, the three first Gospels and the first half of the Acts may be fitly reckoned, and perhaps after these the Gospel and Epistles of John. Still more vigorous and natural Greek is found in the Catholic Epistles and in those of Paul; better still is the latter half of the Acts, and the preface to the third Gospel, which is nearly or quite on a par with the Epistle to the Hebrews. The book called The Wisdom of Solomon, and the second book of Maccabees, are likewise written in a Greek decidedly superior to the common Hellenistic style. But from all other Jewish writers Josephus and Philo are separated by a long interval. Their studies led them to a close perusal of classical authors, whose idiom they have anxiously imitated, and with much success.

Every such arrangement as has been just given must be liable to objections. We cannot, for instance, draw so sharp a line between the first and second half of the Acts of the Apostles as may seem to be implied. No writer of the New Testament has so great inequality of style as Luke; of which a more striking illustration is not needed than the sudden change from the preface of his Gospel to the actual narrative. It seems impossible to assign this to any other cause than his having worked up into his own account the very words and sentences of those from whom he gained his information, though he has done this in such a way that here and there a better Greek phraseology seems to come out. In the latter part of the Acts, where he is describing what he himself saw, the style is almost free from Jewish idiom, and, though not perfectly the language of European Greece, is yet deeply imbued with its spirit. Again, it is not easy to decide in what place we should rank the Gospel and Epistles of John. In them we complain of meagreness of vocabulary and general monotony. In Matthew, Mark, and Luke the genius of the Hebrew language obtrudes itself, on the whole, more than in John, and yet the style of John is rather to be called less Hebraic than more Greek. This may be plausibly ascribed to his long absence from Palestine and from Hebrew influences, and to the absorption of his mind in contemplations peculiarly his own. Once more, the Epistles of Peter, James, and Jude contain a profusion of Ionic or poetical words, beyond what can have entered into the spoken tongue, and scarcely to be paralleled in the contemporaneous prose Greek. It might almost seem that the writers (as often happens to foreigners learning our language, or indeed to half-educated persons) had never learned to feel the difference between the poetical and the common diction. In this respect these Epistles may be judged hardly as good Greek as those of Paul: still they have, in common with his, a certain freedom, fluency, and vigour; and their differences may be ascribed to peculiarities rather of mind than, strictly speaking, of dialect.

It belongs to a grammar to detail all that distinguishes the Greek of the New Testament (see Winer's excellent *Grammatik des neu-testamentlichen Sprach-idioms*). But in fact, by knowing Hebrew and Greek, it might almost have been predicted what sort of errors and defects would exist in the degenerate tongue. Whatever specially characterizes the Greek would be ill-learned or lost, such as the use of numerous particles, the sequence of moods and tenses, the multifarious use of the participles, the delicate proprieties of prepositions and their cases. It was to be expected that a part of the vocabulary would never be learned at all, and another large part be slightly misapplied; that Hebrew secondary and metaphorical senses would be obtruded on Greek words; that various new vocables or compounds would arise, not always generated according to a sound analogy; that in the structure of sentences the tame uniform concatenated Hebraic idiom would, to a great extent, supersede the periodic and varying form of the Greek sentence, flexible for rhetorical energy or logical perspicuity; and (as an indication of the fact) that the conjunction *and* would predominate over all others. This is exactly what has occurred. A still further step is a neglect of the common laws of concord, which, however, is generally restricted within narrow limits. Only in the Apocalypse do we meet with very gross instances of it; such as, ἀπὸ Ἰησοῦ Χριστοῦ, ὁ μάρτυς ὁ πιστός (i. 5); τὴν γυναῖκα ἡ λέγουσα (ii. 20); τῷ ἀγαπήσαντι ἡμᾶς, καὶ ἐποίησεν ἡμᾶς, for ποιήσαντι (i. 5, 6). The repetition also of the pronoun, as in the last instance, so natural to the Hebrew, is slavish in the Greek. Once only (and that not without dispute) is an instance found of the singular idiom which technical grammar has denominated in Hebrew *Vau conversive*; viz. καὶ ἐτελέσθη for τελεσθήσεται (x. 7). In the Greek of the New Testament generally the optative mood is observed to be very rare; which appears as the first stage of the process by which it has vanished in modern Greek. So too, instead of the participle, the infinitive is substituted in Hebrew fashion; which often gives an ungraceful stiffness to passages otherwise well written. As a single instance, in James iii. 3, ἰδού, τῶν ἵππων τοὺς χαλινοὺς εἰς τὰ στόματα βάλλομεν πρὸς τὸ πείθεσθαι αὐτοὺς ἡμῖν . . . . down to βάλλομεν the Greek is good, and suited to the elevated tone of the writer, but the words which follow spoil it to a classical ear.

The Epistle to the Hebrews differs from all the other compositions of the New Testament, in being the writing of one who has evidently spent much pains on the cultivation of his style. With a few

exceptions, it is scarcely more thoroughly idiomatic than the 27th chapter of the Acts; but it is full of indications that the writer had not only moved in circles where good Greek was talked, but had studied well-written models, and aimed to imitate them. In point of mere style it may be fairly compared with the Wisdom of Solomon (although the *subject* of the latter book often throws the sentences into a more Hebrew form); and in fact both appear to exhibit sufficient marks of the Alexandrian culture.

It has been thought unnecessary here to enter into detail concerning the old controversies between the Purists, who tried to prove that all the Greek of the New Testament was classical, and the Hebraists, who overdid the opposite argument (Winer's *Gram.* § 1, edit. of 1836); for on this subject there are no longer two opinions amongst the learned.

The fact that so large a portion of the Jewish nation was Hellenistic, was destined to work great results on the Christian cause. Indeed, in some sense, Christianity itself may be said to have had its human birth among Hellenists, since Jesus himself and the majority of his disciples were reared in Galilee, and were probably nearly as familiar with the Greek as with the Hebrew tongue. Nevertheless, during the early times which followed the day of Pentecost, no striking result appears from this, except that it must have facilitated communication with the Jews of the dispersion. The important part which the Hellenists were to sustain, was first indicated by the preaching of Stephen; who discerned the lower place which must be assigned to the national law of Moses in the kingdom of Messiah. Stephen, indeed, was abruptly cut off by the odium which his principles caused; but the same were soon after adopted, and yet more efficiently inculcated, by his persecutor Saul, to whom the high office was allotted of establishing the peculiar system of doctrine which thenceforward distinguished the Gentile from the Jewish church. The Epistle of James (whether written, as Neander thinks, *before* the development of the Pauline views or not) exhibits to us undoubtedly the state of Christian doctrine in the mother-church of Jerusalem. We see in it the higher spirit of Christ struggling to put down the law into its right place, but having by no means as yet brought out into their full clearness the distinguishing doctrines of the gospel. All of these were preached and established by Paul in his own churches, founded among Gentile proselytes to Hellenistic Judaism, and from them in no long time were imbibed by all Gentile Christendom. But, simultaneously, the struggle began within the church itself between the Hebraic and the Hellenistic spirit. The (so-called) first council at Jerusalem (Acts xv.) decided, for the time at least, that the Mosaic law was not to be enforced upon the Gentiles, but it did not lessen the importance of it to Jewish Christians; and it would appear that the Hebrew spirit became afterwards even stronger still within the Jerusalem church, if we may interpret literally the words of James (Acts xxi. 20):—'Thou seest, brother, how many thousands of Jews there are which believe, and *they are all zealous of the law.*' At any rate it appears certain that the resistance to the Pauline doctrine continued intense in the great body of the Hebrew Christians; for they show themselves in ecclesiastical history only under the names of Nazarenes and Ebionites, and are always regarded as (more or less) heretical by the Gentile churches, since they held only the bare rudimental creed on which the original Pentecostal church was founded; and pertinaciously rejected the distinguishing tenets of Paul, which were confirmed by Peter, and perhaps extended by John. This first and greatest of controversies ended in the extinction of the Hebrew churches, which had refused to grow with the growth of the Christian spirit in its highest and most favoured leaders. But long before that event the Hellenistic Jews had been swallowed up in the mass of Gentile believers; and to follow the further development of the Grecian mind within the bosom of Christianity, belongs, not to this article, but to a history of Gentile Christendom.

HELMET. [Arms; Armour.]

HELPS (ἀντιλήψεις; Vulg. *opitulationes*; 1 Cor. xii. 28). The Greek word, signifying aids or assistances, has also this meaning, among others, in the classical writers (*e. g.* Diod. Sic. i. 87). In the Sept. it answers to עֶזְרָה (Ps. xxii. 19), to מָעוֹן (Ps. cviii. 12), and to זְרוֹעַ (Ps. lxxxiii. 8). It is found in the same sense, Ecclus. xi. 12; 2 Macc. xi. 26; and in Josephus (*De Bell. Jud.* iv. 5. 1). In the New Testament it occurs once, viz. in the enumeration of the several orders or classes of persons possessing miraculous gifts among the primitive Christians (*ut supra*), where it seems to be used by metonymy, the abstract for the concrete, and to mean *helpers*; like the words δυνάμεις, 'miracles,' i. e. *workers* of miracles; κυβερνήσεις, 'governments,' that is, *governors*, &c., in the same enumeration. The Americans, it is well known, by a similar idiom, call their servants 'helps.' Great difficulty attends the attempt to ascertain the nature of the office so designated among the first Christians. Theophylact explains ἀντιλήψεις by ἀντιχέσθαι τῶν ἀσθενῶν, *helping* or *supporting the infirm*. And so Gennadius, in Œcumenius. But this seems like an inference from the etymology (see Gr. of Acts xx. 35). It has been *assumed* by some eminent modern writers that the several 'orders' mentioned in ver. 28, correspond respectively to the several 'gifts' of the Spirit enumerated in ver. 8, 9. In order, however, to make the two enumerations tally, it is necessary to make 'divers kinds of tongues' and '*interpretation* of tongues,' in the *one*, answer to '*diversities of tongues*' in the *other*, which, *in the present state of the received text*, does not seem to be a *complete* correspondence. The *result* of the collation is that ἀντιλήψεις answers to 'prophecy;' whence it has been inferred that these persons were such as were qualified with the gift of 'lower prophecy,' to *help* the Christians in the public devotions (Barrington's *Miscellanea Sacra*, i. 166; Macknight on 1 Cor. xii. 10-28). Another result is, that 'governments' answers 'to discerning of spirits.' To both these Dr. Hales very reasonably objects, as unlikely, and pronounces this tabular view to be 'perplexed and embarrassing' (*New Analysis*, &c., Lond. 1830, iii. 289). Bishop Horsley has adopted this classification of the gifts and office-bearers, and points out as 'helps,' *i. e.* persons gifted with 'prophecies or predictions,' such per-

sons as Mark, Tychicus, Onesimus. Vitringa, from a comparison of ver. 28, 29, 30, infers that the ἀντιλήψεις denote those who had the gift of *interpreting foreign languages* (*De Synag. Vet.* ii. 505, Franque. 1696); which, though certainly *possible*, as an *arbitrary* use of a very significant word, stands in need of confirmation by actual instances. Dr. Lightfoot also, according to his biographer, adopted the same plan and arrived at the same conclusion (Strype's *Life of Lightfoot*, prefixed to his *Works*, p. 4, Lond. 1684). But Lightfoot himself explains the word 'persons who accompanied the apostles, baptized those who were converted by them, and were sent to places to which they, being employed in other things, could not come, as Mark, Timothy, Titus.' He observes that the Talmudists sometimes call the Levites מסעדי לכהנים, 'the helpers of the priests' (vol. ii. p. 781). Similar catalogues of miraculous gifts and officers occur Rom. xii. 6-8, and Eph. iv. 11, 12; but they neither correspond in *number* nor in the *order of enumeration*. In the *former*, 'prophecy' stands first, and in the *latter*, second; and in the former many of the terms are of wide import, as 'ministering,' while *minute distinctions* are made between others, as between 'teaching' and 'exhortation,' 'giving' and 'showing mercy.' Other writers pursue different methods, and arrive at different conclusions. For instance, Hammond, arguing from the etymology of the word, and from passages in the early writers, which describe the office of relieving the poor as peculiarly connected with that of the apostles and bishops by the deacons, infers that ἀντιλ. 'denotes a special *part of the office* of those men which are set down at the beginning of the verse.' He also explains κυβερνήσεις as another part of their *office* (Hammond, *Comment. in loc.*). Schleusner understands '*deacons* who had the care of the sick.' Rosenmüller, 'Diaconi qui pauperibus, peregrinis, ægrotis, mortuis, procurandis præerant.' Bishop Pearce thinks that both these words may have been originally put in the *margin* to explain δυνάμεις, 'miracles or powers,' and urges that ἀντιλ. is nowhere mentioned as a gift of the Spirit, and that it is not *recapitulated* in ver. 29, 30. Certainly the *omission* of these two words would nearly produce exactitude in the *recapitulation*. Bowyer adopts the same conjecture; but it is without support from MSS. or versions. He also observes that to the end of ver. 28 some copies of the Vulgate add 'interpretationes sermonum,' ἑρμηνείας γλωσσῶν; as also the later Syriac, Hilary, and Ambrose. This *addition* would make the *recapitulation perfect*. Chrysostom and all the Greek interpreters consider the ἀντιλ. and κυβερν. as importing the *same thing*, viz. *functionaries* so called with reference to the *two* different parts of their *office*: the ἀντιλ. superintending the care of the poor, sick, and strangers; the κυβερν. the burial of the dead, and the executorship of their effects, including the care of their widows and orphans, rather *managers* than governors (Blomfield's *Recensio Synopt.*). After all it must be confessed, with Doddridge, that 'we can only guess at the meaning of the words in question, having no principles on which to proceed in fixing it absolutely' (*Family Expositor*, on 1 Cor. xii. 28). (Alberti, *Glossar.* p. 123; Suicer *Thesaur.* in voc.; Salmasius, *De Fœnore Trapezitico*, p. 409; Wolfii *Curæ Philolog.* Basil. 1741.)—J. F. D.

1. HEMAN (הֵימָן; Sept. Αἱμουάν), a person of the tribe of Judah, named with others celebrated for their wisdom, to which that of Solomon is compared (1 Kings iv. 31; 1 Chron. ii. 6). The considerations stated under ETHAN will distinguish this Heman from the following, with whom he is sometimes confounded.

2. HEMAN, a Kohathite of the tribe of Levi, and one of the leaders of the temple-music as organized by David (1 Chron. vi. 33; xvi. 41, 42). This, doubtless, is the Heman to whom the 88th Psalm is ascribed.

HEMLOCK. [ROSH.]

HERAKLES (Ἡρακλῆς) is mentioned in 2 Macc. iv. 19, as the Tyrian god to whom the Jewish high-priest Jason sent a religious embassy (θεωρούς), with the offering of 300 drachmæ of silver. That this Tyrian Hercules (Herod. ii. 44) is the same as the Tyrian Baal, is evident from a bilingual Phœnician inscription found at Malta (described by Gesenius, *Monum. Ling. Phœn.* i. 96), in which the Phœnician words, 'To our Lord, to Melkarth, the Baal of Tyre,' are represented by the Greek Ἡρακλεῖ Ἀρχηγέτει. Moreover, Herakles and Astarte are mentioned together by Josephus (*Antiq.* viii. 5. 3), just in the same manner as Baal and Ashtoreth are in the Old Testament. The further identity of this Tyrian Baal with the Baal whom the idolatrous Israelites worshipped, is evinced by the following arguments, as stated chiefly by Movers (*Die Phönizier*, i. 178). The worship of Baal, which prevailed in the time of the Judges, was put down by Samuel (1 Sam. vii. 4), and the effects of that suppression appear to have lasted through the next few centuries, as Baal is not enumerated among the idols of Solomon (1 Kings xi. 5-8; 2 Kings xxiii. 13), nor among those worshipped in Judah (2 Kings xxiii. 12), or in Samaria, where we only read of the golden calves of Jeroboam (1 Kings xii. 28; xv. 26). That worship of Baal which prevailed in the reign of Ahab, cannot, therefore, be regarded as a mere continuation or revival of the old Canaanite idolatry (although there is no reason to doubt the essential identity of both Baals), but was introduced directly from Phœnicia by Ahab's marriage with the Sidonian princess Jezebel (1 Kings xvi. 31). In like manner, the establishment of this idolatry in Judah is ascribed to the marriage of the king with a daughter of Jezebel. (Comp. Josephus, *Antiq.* viii. 13. 1; ix. 6. 6.)

The power of nature, which was worshipped under the form of the Tyrian Hercules, Melkarth, Baal, Adonis, Moloch, and whatever his other names are, was that which originates, sustains, and destroys life. These functions of the Deity, according to the Phœnicians, were represented, although not exclusively, by the *sun*, the influence of which both animates vegetation by its genial warmth, and scorches it up by its fervour.

Almost all that we know of the worship of the Tyrian Hercules is preserved by the classical writers, and relates chiefly to the Phœnician colonies, and not to the mother-state. The eagle, the lion, and the thunny-fish, were sacred to him, and are often found on Phœnician coins. Pliny expressly testifies that human sacrifices were offered

up every year to the Carthaginian Hercules (*Hist. Nat.* xxxvi. v. 12); which coincides with what is stated of Baal in Jer. xix. 5, and with the acknowledged worship of Moloch.

Movers endeavours to show that Herakles and Hercules are not merely Greek and Latin synonymes for this god, but that they are actually derived from his true Phœnician name. This original name he supposes to have consisted of the syllables אר (as found in ארי, *lion*, and in other words), meaning *strong*, and כל, from יכל, *to conquer;* so that the compound means *Ar conquers*. This harmonizes with what he conceives to be the idea represented by Hercules as the destroyer of Typhonic monsters (*l. c.* p. 430). Melkarth, the Μελίκαρθος of Sanchoniathon, occurs on coins only in the form מלקרת. We must in this case assume that a *kaph* has been absorbed, and resolve the word into מלך קרתא, *king of the city*, πολιοῦχος. The bilingual inscription renders it by Ἀρχηγέτης; and it is a title of the god as the patron of the city.—J. N.

HERMAS, Ἑρμᾶς, one of the Christians at Rome, to whom Paul addressed special salutations in his Epistle (Rom. xvi. 14). Of his history and station in life nothing is known. By several writers, ancient and modern, he has been reputed to be the author of a work entitled *The Shepherd of Hermas*, which from its high antiquity and the supposed connection of the writer with St. Paul, has been usually classed with the epistles of the so-called Apostolic Fathers. It was originally written in Greek, but we possess it only in a Latin version (as old as the time of Tertullian), a few fragments excepted, which are found as quotations in other ancient authors. It has been divided by modern editors (for in the manuscript copies there is no such division) into three books; the first consisting of four visions, the second of twelve commands, and the third of ten similitudes. It is called the 'Shepherd' (ὁ Ποιμήν, *Pastor*), because the Angel of Repentance (*Nuntius Pœnitentiæ*), at whose dictation Hermas professes that he wrote the second and third books, appeared in the garb of a shepherd—'habitu pastorali, pallio albo amictus, peram in humeris, et virgam in manu gestans.' It is doubtful whether the author really believed that he saw the visions he describes, or merely adopted the fiction to render his work more attractive. It is frequently quoted by Clemens Alexandrinus, either by the author's name (*Strom.* i. 29. § 181; *Opp.* ed. Klotz, ii. 119; ii. 1. § 3; *Opp.* ii. 124), or by the phrase 'the Shepherd says' (*Strom.* i. 17. § 85; *Opp.* ii. 60; ii. 12. § 55; *Opp.* ii. 158; ii. 9. § 43; *Opp.* ii. 150; ii. 12. § 55; *Opp.* ii. 158; iv. 9. § 76; *Opp.* ii. 318; vi. 6. § 46; *Opp.* iii. 125), though he does not expressly identify the author as the Hermas in Rom. xvi. Eusebius is more definite. In his *Eccles. Hist.* (iii. 3) he says, 'The apostle, in the salutations at the end of his Epistle to the Romans, makes mention among others of Hermas, who, it is said, wrote the book called the Shepherd; it is to be noted that this book is called in question (ἀντιλέλεκται), so that it cannot be ranked among the books received as canonical (ἐν ὁμολογουμένοις). By others it is judged to be a most necessary book for elementary instruction. And we know that it is publicly read in churches, and that some very ancient writers make use of it.' Elsewhere he says, 'among the spurious (ἐν τοῖς νόθοις) are to be placed the Acts of Paul, *the Book called the Shepherd*, and the Revelation of Peter' (*Hist. Eccles.* iii. 25). And in giving an account of the opinions of Irenæus (*Hist. Eccles.* v. 8.), he remarks, 'the book (τὴν γραφὴν) of the Shepherd he not only knew, but received with approbation, saying, Well spake the book (ἡ γραφὴ) which says, "first of all believe that there is one God."' This passage has been adduced, but, perhaps, improperly, to prove that Irenæus regarded '*The Shepherd*' as canonical: the word γραφή, by some here translated *Scripture*, may mean simply *the book* or *writing* (Lardner's *Credibility*, ch. xvii.; *Works*, ii. 171). Origen often quotes '*The Shepherd*,' speaks of it as useful, and, in his opinion, inspired: *ut puto, divinitus inspirata* (*Ep. ad Rom. Comment.* lib. x.; *Opera*, vii. 437, ed. Lommatzsch). Elsewhere he describes it as 'a book circulated in the church, but not universally acknowledged to be divine' (*Comment. in Evang. Matt. Hom.* xiv.; *Opp.* iii. 316). Jerome also states that 'it was publicly read in some of the churches of Greece, though among the Latins it was almost unknown' (*De Illust. Vir.* cap. x). The testimonies of other writers are given by Cotelerius and Fabricius. If it be admitted that '*The Shepherd*' was written by the Hermas of St. Paul, its date must be fixed towards the end of the first century. Some eminent critics, however, ascribe it to Hermas, a brother of Pius, who was Bishop of Rome about A.D. 141. Mosheim argues at some length, and with no little vehemence, in favour of this opinion; but the only authorities he adduces on its behalf are some lines in a poem against the Marcionites, falsely attributed to Tertullian, the fragment of an anonymous work on the canon, published by Muratori in his *Antiquitates Ital. Med. Ævi*, and a passage in the *Liber Pontificalis*, respecting Easter, there said to be from a book called the Shepherd, written by Hermas, the brother of Pius, but not found in the work that has come down to us under that title (*Commentaries on the Affairs of the Christians*, vol. i. pp. 180-188, Vidal's transl). The same opinion is advocated by Dr. Hefele, in the Tübingen *Theol. Quart. Schrifft.*, 1839. Dr. Neander, while he allows that it may be doubted whether '*The Shepherd*' was written by the Hermas of St. Paul, seems to consider the other supposition still more questionable, since we cannot determine what credit is due to the authorities adduced in its favour, and it is difficult to reconcile with the later origination of the work, the high esteem in which it was held in the age of Irenæus and Clement of Alexandria (*Allgemeine Geschichte*, &c. Abth. i. Band 2, p. 1139, 2nd edit.) Impartial judges will probably agree with Mosheim, that '*The Shepherd*' contains such a mixture of folly and superstition with piety, of egregious nonsense with momentous truth, as to render it a matter of astonishment that men of learning should ever have thought of giving it a place among the inspired writings.

The Shepherd of Hermas was first published at Paris in 1513, and is included in the editions of the apostolic fathers by Cotelerius, Galland, and Hefele. Fabricius also published it in his *Codex Apocryphus*, Hamburgi, 1719. Archbishop Wake's translation is well known.—J. E. R.

HERMES (Ἑρμῆς), the Mercurius of the Romans, was the messenger of the gods, and was equally characterized by adroitness of action and readiness of speech. He was also the customary attendant of Jupiter when he appeared on earth (Ovid, *Fast.* v. 495). These circumstances explain why the inhabitants of Lystra (Acts xiv. 12), as soon as ever they were disposed to believe that the gods had visited them in the likeness of men, discovered Hermes in Paul, as the chief speaker, and as the attendant of Jupiter. It seems unnecessary to be curious whether the representations of Mercury in ancient statues accord with the supposed personal appearance of Paul, and especially in the matter of the *beard* of the latter; for all known representations of the god differ in much more important particulars from the probable costume of Paul (*e. g.* in the absence of any garment at all, or in the use of the short chlamys merely; in the caduceus, the petasus, &c.). It is more reasonable to suppose that those who expected to see the gods mixing in the affairs of this lower world, in human form, would not look for much more than the outward semblance of ordinary men. Comp. the 'dissimulantque deos' of Ovid (*l. c.* 504.)—J. N.

HERMOGENES (Ἑρμογένης) and PHYGELLUS, disciples of Asia Minor, and probably companions in labour of St. Paul. They abandoned him during his second imprisonment at Rome, doubtless from alarm at the perils of the connection (2 Tim. i. 15).

HERMON (חֶרְמוֹן; Sept. Ἀερμών), a mountain which formed the northernmost boundary of the country beyond the Jordan which the Hebrews conquered from the Amorites (Deut. iii. 8), and which, therefore, must have belonged to Anti-Libanus, as is, indeed, implied or expressed in most of the other passages in which it is named. In Deut. iii. 9 it is said to have been called by the Sidonians Sirion (שִׂרְיוֹן), and by the Amorites, Shenir (שְׂנִיר), both of which words signify 'a coat of mail.' In the next chapter (iv. 49) it is called Mount Sion (שִׂיאֹן), meaning 'an elevation,' 'a high mountain'—which it was well entitled to be designated by way of excellence, being (if correctly identified with Jebel Es-sheikh) by far the highest of all the mountains in or near Palestine. In the later books of the Old Testament, however (as in 1 Chron. v. 23; Sol. Song iv. 8), Shenir is distinguished from Hermon properly so called. Since modern travellers have made us acquainted with the country beyond the Jordan, no doubt has been entertained that the Mount Hermon of those texts is no other than the present Jebel Es-sheikh, or the Sheikh's mountain, or, which is equivalent, Old Man's Mountain, a name it is said to have obtained from its fancied resemblance (being topped with snow, which sometimes lies in lengthened streaks upon its sloping ridges) to the hoary head and beard of a venerable sheikh (Elliot, i. 317). This Jebel Es-sheikh is a south-eastern, and in that direction culminating, branch of Anti-Libanus. It is probably the highest of all the Lebanon mountains, and is thought to rival Mont Blanc, though, as Elliot observes, the high ground on which it stands detracts considerably from its apparent altitude, and makes it a less imposing object than that king of European mountains as viewed from the Italian valley of Aösta. Its top is covered with snow throughout the summer, and must therefore rise above the point of perpetual congelation, which in this quarter is about 11,000 feet. It might, perhaps, be safe to add another 1000 feet for the height *above* that point, making in all 12,000 feet; but we must wait the result of more accurate observations than have yet been made. Some statements make it so low as 10,000 feet. Dr. Clarke, who saw it in the month of July, says 'the summit is so lofty that the snow entirely covered the upper part of it, not lying in patches, but investing all the higher part with that perfect white and smooth velvet-like appearance which snow only exhibits when it is very deep.' Dr. Robinson only differs from the preceding by the statement that the snow is perpetual only in the ravines, so that the top presents the appearance of radiant stripes, around and below the summit (*Bib. Researches*, iii. 344). The mention of Hermon along with Tabor in Ps. lxxxix. 12, led to its being sought near the latter mountain, where, accordingly, travellers and maps give us a 'Little Hermon.' But that passage, as well as Ps. cxxxiii. 3, applies better to the great mountain already described; and in the former it seems perfectly natural for the Psalmist to call upon these mountains, respectively the most conspicuous in the western and eastern divisions of the Hebrew territory, to rejoice in the name of the Lord. Besides, we are to consider that Jebel Es-sheikh is seen from Mount Tabor, and that both together are visible from the plain of Esdraelon. There is no reason to suppose that the so-called Little Hermon is at all mentioned in Scripture. Its actual name is Jebel ed-Duhy; it is a shapeless, barren, and uninteresting mass of hills, in the north of the valley of Jezreel and opposite Mount Gilboa.

HERODIAN FAMILY. Josephus introduces us to the knowledge of the Herodian family in the fourteenth book of his *Antiquities*. He there tells us (c. i. § 3) that among the chief friends of Hyrcanus, the high-priest, was an Idumæan, named Antipater, distinguished for his riches, and no less for his turbulent and seditious temper. He also quotes an author who represented him as descended from one of the best of the Jewish families which returned from Babylon after the captivity, but adds that this statement was founded on no better grounds than a desire to flatter the pride and support the pretensions of Herod the Great. The times were favourable to men of Antipater's character; and, while he obtained sovereign authority over his native province of Idumæa, he contrived to subject Hyrcanus completely to his will, and to induce him to form an alliance with Aretas, from which he trusted to secure the best means for his own aggrandizement. Having so far accomplished his designs as to make himself the favourite ally of Rome, he obtained for his son Phasælus the governorship of Jerusalem, and for Herod, then only fifteen years old, the chief command in Galilee.

Herod soon distinguished himself by his talents and bravery. The country was at that time infested with numerous bands of robbers. These he assailed and vanquished, and his success was proclaimed, not only throughout Galilee, but in Judæa and the neighbouring countries. This increasing popularity of a member of the family of Antipater alarmed the ruling men at

Jerusalem, and they willingly hearkened to the complaints made against Herod by some of the relatives of those whom he had slain. He was accordingly summoned to take his trial before the Sanhedrim: nor did he disobey the summons; but on the day of trial he appeared at the tribunal gorgeously clad in purple, and surrounded by a numerous band of armed attendants. His acquittal was speedily pronounced. One only of the judges ventured to speak of his guilt, and the venerable old man prophesied that, sooner or later, this same Herod would punish both them and Hyrcanus for their pusillanimity.

In the events which followed the death of Cæsar, Herod found fresh opportunities of accomplishing his ambitious designs. By collecting a considerable tribute for Cassius in Galilee, he obtained the friendship of that general, and was appointed to the command of the army in Syria. No less successful with Marc Antony, he overcame the powerful enemies who represented the dangerous nature of his ambitious views, and was exalted, with his brother Phasælus, to the dignity of tetrarch of Judæa. They had not, however, long enjoyed their office when the approach of Antigonus against Jerusalem compelled them to meditate immediate flight. Phasælus and Hyrcanus fell into the hands of the enemy; but Herod, making good his escape, hastened to Rome, where he pleaded his cause and his former merits with so much skill, that he was solemnly proclaimed king of the Jews, and endowed with the proper ensigns and rights of royalty. Augustus, three years afterwards, confirmed this act of the senate; and Herod himself scrupled not to perpetrate the most horrible crimes to give further stability to his throne. The murder of his wife Mariamne, a daughter of Hyrcanus, and of his two sons Alexander and Aristobulus, place him in the foremost rank of those tyrants whose names blacken the page of history. Of the massacre at Bethlehem the Jewish historian says nothing; but it has been well observed that such an event, in a reign marked by so many horrible deeds, and occurring as it did in a small, obscure town, was not likely to obtain a place in the national annals. As a vain attempt to set aside the purposes of God, it affords a startling instance of the awful follies to which the acutest and most politic of rulers may be tempted by the love of empire. Had Herod not proved, by the acts here alluded to, the little confidence which he felt in himself, or in the actual claims which his courage and ability gave him to dominion, he might have merited the title of Great, conferred on him by his admirers. His reign, prolonged through thirty-seven years, was in many respects prosperous; and the splendour of his designs restored to Jerusalem, as a city, much of its earlier magnificence.

According to the custom of the times, Herod made his sons the heirs to his kingdom by a formal testament, leaving its ratification to the will of the emperor. Augustus assenting to its main provisions, Archelaus became tetrarch of Judæa, Samaria, and Idumæa; Philip, of Trachonitis and Ituræa; and

Herod Antipas, of Galilee and Peræa. This Herod was first married to a daughter of King Aretas of Arabia; but forming an unholy attachment for Herodias, the wife of his brother Philip, he soon became involved in a course of guilt which ended in his utter ruin. Aretas, to avenge his daughter, sent a considerable army against Herod, whose generals in vain attempted to oppose its progress. The forces which they led were totally destroyed, and instant ruin seemed to threaten both Herod and his dominions. An appeal to the Romans afforded the only hope of safety. Aretas was haughtily ordered by the emperor to desist from the prosecution of the war; and Herod accordingly escaped the expected overthrow. But he was not allowed to enjoy his prosperity long. His nephew Agrippa having obtained the title of King, Herodias urged him to make a journey to Italy and demand the same honour. He weakly assented to his wife's ambitious representations; but the project proved fatal to them both. Agrippa anticipated their designs; and when they appeared before Caligula they were met by accusations of hostility to Rome, the truth of which they in vain attempted to disprove. Sentence of deposition was accordingly passed upon Herod, and both he and his wife were sent into banishment, and died at Lyons in Gaul.

Herod Agrippa, alluded to above, was the son of Aristobulus, so cruelly put to death by his father Herod the Great. The earlier part of his life was spent at Rome, where the magnificence and luxury in which he indulged reduced him to poverty. After a variety of adventures and sufferings he was thrown into bonds by Tiberius; but on the succession of Caligula was not only restored to liberty, but invested with royal dignity, and made tetrarch of Abilene, and of the districts formerly pertaining to the tetrarchy of Philip. His influence at the Roman court increasing, he subsequently obtained Galilee and Peræa, and at length Judæa and Samaria, his dominion being thus extended over the whole country of Palestine.

To secure the good-will of his subjects, he yielded to their worst passions and caprices. Memorable instances are afforded of this in the apostolic history, where we are told that 'He stretched forth his hands to vex certain of the church, and he killed James, the brother of John, with the sword; and because he saw it pleased the Jews, he proceeded further to take Peter also' (Acts xii. 1-3). His awful death, described in the same chapter, and by Josephus almost in the same words (*Antiq.* xix. 8), occurred in the fifty-fourth year of his age.

Herod Agrippa, the son of the above-named, was in his seventeenth year when his father died. The emperor Claudius, at whose court the young Agrippa was then residing, purposed conferring upon him the dominions enjoyed by his father. From this he was deterred, says Josephus, by the advice of his ministers, who represented the danger of trusting an important province of the empire to so youthful a ruler. Herod was, therefore, for the time, obliged to content himself with the small principality of Chalcis, but was not long after created sovereign of the tetrarchies formerly belonging to Philip and Lysanias; a dominion increased at a subsequent period by the grant of a considerable portion of Peræa. The habits which he had formed at Rome, and his strong attachment to the people to whose rulers he was indebted for his prosperity, brought him into frequent disputes with his own nation. He

died, at the age of seventy, in the early part of the reign of Trajan.—H. S.

HERODIANS, a class of Jews that existed in the time of Jesus Christ, whether of a political or religious description it is not easy, for want of materials, to determine. The passages of the New Testament which refer to them are the following, Mark iii. 6; xii. 13; Matt. xxii. 16; Luke xx. 20. The particulars are these:—the ecclesiastical authorities of Judæa having failed to entrap Jesus by demanding the authority by which he did his wonderful works, especially as seen in his expurgation of the temple; and being incensed in consequence of the parable spoken against them, namely, 'A certain man planted a vineyard,' &c., held a council against him, and associating with themselves the Herodians, sent an embassy to our Lord with the express but covert design of ensnaring him in his speech, that thus they might compass his destruction. The question they put to him was one of the most difficult—'Is it lawful to pay tribute to Cæsar?' The way in which Jesus extricated himself from the difficulty and discomfited his enemies is well known.

Do these circumstances afford any light as to what was the precise character of the Herodians? Whatever decision on this point may be arrived at, the general import of the transaction is very clear, and of a character highly honourable to Jesus. That his enemies were actuated by bad faith, and came with false pretences, might also be safely inferred. Luke, however, makes an express statement to this effect, saying (xx. 18-20), 'they sought to lay hands on him; and they feared the people; and they watched him, and sent forth spies which *should feign themselves just men*, that they might take hold of his words, that so they might *deliver him* unto the power and authority *of the governor*.' The aim, then, was to embroil our Lord with the Romans. For this purpose the question put had been cunningly chosen. These appear to have been the several feelings whose toils were around Jesus—the hatred of the priests, the favour of the people towards himself, and their aversion to the dominion of the Romans, their half faith in him as the Messiah, which would probably be converted into the vexation and rage of disappointment, should he approve the payment of tribute to Rome; another element of difficulty had in the actual case been deliberately provided—the presence of the Herodians. Altogether the scene was most perplexing, the trial most perilous. But what additional difficulty did the Herodians bring? Herod Antipas was now Tetrarch of Galilee and Peræa, which was the only inheritance he received from his father Herod the Great. As Tetrarch of Galilee he was specially the ruler of Jesus, whose home was in that province. The Herodians then may have been subjects of Herod, Galilæans, whose evidence the priests were wishful to procure, because theirs would be the evidence of fellow-countrymen, and of special force with Antipas as being that of his own immediate subjects (Luke xxiii. 7).

Herod's relations with Rome were in an unsafe condition. He was a weak prince, given to ease and luxury, and his wife's ambition conspired with his own desires to make him strive to obtain from the Emperor Caligula the title of king. For this purpose he took a journey to Rome, and was banished to Lyons in Gaul.

The Herodians may have been favourers of his pretensions: if so, they would be partial hearers, and eager witnesses against Jesus before the Roman tribunal. It would be a great service to the Romans to be the means of enabling them to get rid of one who aspired to be king of the Jews. It would equally gratify their own lord, should the Herodians give effectual aid in putting a period to the mysterious yet formidable claims of a rival claimant of the crown.

We do not see that the two characters here ascribed to the Herodians are incompatible; and if they were a Galilæan political party who were eager to procure from Rome the honour of royalty for Herod (Mark vi. 14, the name of king is merely as of courtesy), they were chosen as associates by the Sanhedrim with especial propriety.

The deputation were to 'feign themselves just men,' that is, men whose sympathies were entirely Jewish, and, as such, anti-heathen: they were to intimate their dislike of paying tribute, as being an acknowledgment of a foreign yoke; and by flattering Jesus, as one who loved truth, feared no man, and would say what he thought, they meant to inveigle him into a condemnation of the practice. In order to carry these base and hypocritical designs into effect, the Herodians were appropriately associated with the Pharisees; for as the latter were the recognised conservators of Judaism, so the former were friends of the aggrandisement of a native as against a foreign prince.

Other hypotheses may be found in Paulus on the passage in Matt.; in Wolf, *Curæ Phil.* i. 311, sq.; see also J. Steuch, *Diss. de Herod.* Lund. 1706; J. Floder, *Diss. de Herod.* Upsal. 1764.—J. R. B.

HERODIAS. [HERODIAN FAMILY.]

HERON (אֲנָפָה *anaphah*, Lev. xi. 19; Deut. xiv. 18). The original is a disputed name of an unclean bird, which has also been translated kite, woodcock, parrot, and crane. For the first of these

338. [Ardea Herodias.]

see GLEDE; the second is rare and only a momentary visitor in Palestine; the third, surely, required no prohibition where it was not a resident species, and probably not imported till the reign of Solomon; and, as to the crane, we have already shown it to have been likewise exotic, making only a momentary appearance, and that rarely, in Syria, where it is commonly represented by the African species *Grus virgo* (crane). If the Hebrew name be derived from אנף *anaph*, 'to breathe short,' or 'to sniff through the nostrils with

an irritated expression,' the most obvious application would be to the goose, a bird not, perhaps, otherwise noticed in the Hebrew Scriptures, though it was constantly eaten in Egypt, was not held unclean by the Jews, and, at some seasons, must have frequented the lakes of Palestine. The heron, though not so constantly hissing, can utter a similar sound of displeasure with much more meaning, and the common species *Ardea cinerea* is found in Egypt, and is also abundant in the Hauran of Palestine, where it frequents the margins of lakes and pools, and the reedy water-courses in the deep ravines, striking and devouring an immense quantity of fish. The Greek ἀνοπαῖα (Hom. *Odyss.* i. 320), though in sound resembling *anaphah*, is not, therefore, as Bochart pretends, necessarily a mountain hawk; for then the root could not be taken from *anaph*, unless it applied to one of the smaller species, such as the Kestril or sparrow-hawk.—C. H. S.

HESHBON (חֶשְׁבּוֹן; Sept. Ἐσεβών; Euseb. Ἐσσεβών), a town in the southern district of the Hebrew territory beyond the Jordan, parallel with, and twenty-one miles east of, the point where the Jordan enters the Dead Sea, and nearly midway between the rivers Jabbok and Arnon. It originally belonged to the Moabites; but when the Israelites arrived from Egypt, it was found to be in the possession of the Amorites, whose king, Sihon, is styled both king of the Amorites and king of Heshbon, and is expressly said to have 'reigned in Heshbon' (Josh. iii. 10; comp. Num. xxi. 26; Deut. ii. 9). It was taken by Moses (Num. xxi. 23-26), and eventually became a Levitical city (Josh. xxi. 39; 1 Chron. vi. 81) in the tribe of Reuben (Num. xxxii. 37; Josh. xiii. 17); but being on the confines of Gad, is sometimes assigned to the latter tribe (Josh. xxi. 39; 1 Chron. vi. 81). After the ten tribes were sent into exile, Heshbon was taken possession of by the Moabites, and hence is mentioned by the prophets in their declarations against Moab (Isa. xv. 4; Jer. xlviii. 2, 34, 45). Under King Alexander Jannæus we find it again reckoned as a Jewish city (Joseph. *Antiq.* xiii. 15. 4). In the time of Eusebius and Jerome it was still a place of some consequence under the name of Esbus (Ἐσβοὺς); but at the present day it is known by its ancient name of Heshbon, in the slightly modified form of Hesban. The ruins of a considerable town still exist, covering the sides of an insulated hill, but not a single edifice is left entire. The view from the summit is very extensive, embracing the ruins of a vast number of cities, the names of some of which bear a strong resemblance to those mentioned in Scripture. There are reservoirs connected with this and the other received towns of this region. These have been supposed to be the pools of Heshbon mentioned by Solomon (Cant. vii. 4); but, say Irby and Mangles, 'The ruins are uninteresting, and the only pool we saw was too insignificant to be one of those mentioned in Scripture.' In two of the cisterns among the ruins they found about three dozen of human skulls and bones, which they justly regard as an illustration of Gen. xxxvii. 20 (*Travels*, p. 472; see also Burckhardt, George Robinson, Lord Lindsay, &c.).

HEZEKIAH (חִזְקִיָּה; Sept. Ἐζεκίας), son of Ahaz, and thirteenth king of Judah, who reigned from B.C. 725 to B.C. 696.

From the commencement of his reign the efforts of Hezekiah were directed to the reparation of the effects of the grievous errors of his predecessors; and during his time the true religion and the theocratical policy flourished as they had not done since the days of David. The Temple was cleared and purified; the utensils and forms of service were restored to their ancient order; all the changes introduced by Ahaz were abolished; all the monuments of idolatry were destroyed, and their remains cast into the brook Kedron. Among the latter was the brazen serpent of Moses, which had been deposited first in the Tabernacle, and then in the Temple, as a memorial of the event in which it originated: and it is highly to the credit of Hezekiah, and shows more clearly than any other single circumstance the spirit of his operations, that even this interesting relic was not spared when it seemed in danger of being turned to idolatrous uses. Having succeeded by his acts and words in rekindling the zeal of the priests and of the people, the king appointed a high festival, when, attended by his court and people, he proceeded in high state to the Temple, to present sacrifices of expiation for the past irregularities, and to commence the re-organised services. A vast number of sacrifices evinced to the people the zeal of their superiors, and Judah, long sunk in idolatry, was at length reconciled to God (2 Kings xviii. 1-8; 2 Chron. xxix.).

The revival of the great annual festivals was included in this reformation. The Passover, which was the most important of them all, had not for a long time been celebrated according to the rites of the law; and the day on which it regularly fell, in the first year of Hezekiah, being already past, the king, nevertheless, justly conceiving the late observance a less evil than the entire omission of the feast, directed that it should be kept on the 14th day of the second month, being one month after its proper time. Couriers were sent from town to town, inviting the people to attend the solemnity; and even the ten tribes which formed the neighbouring kingdom were invited to share with their brethren of Judah in a duty equally incumbent on all the children of Abraham. Of these some received the message gladly, and others with disdain; but a considerable number of persons belonging to the *northernmost* tribes (which had more seldom than the others been brought into hostile contact with Judah) came to Jerusalem, and by their presence imparted a new interest to the solemnity. A profound and salutary impression appears to have been made on this occasion; and so strong was the fervour and so great the number of the assembled people, that the festival was prolonged to twice its usual duration; and during this time the multitude was fed abundantly from the countless offerings presented by the king and his nobles. Never since the time of Solomon, when the whole of the twelve tribes were wont to assemble at the Holy City, had the Passover been observed with such magnificence (2 Chron. xxx.).

The good effect of this procedure was seen when the people carried back to their homes the zeal for the Lord which had thus been kindled, and proceeded to destroy and cast forth all the

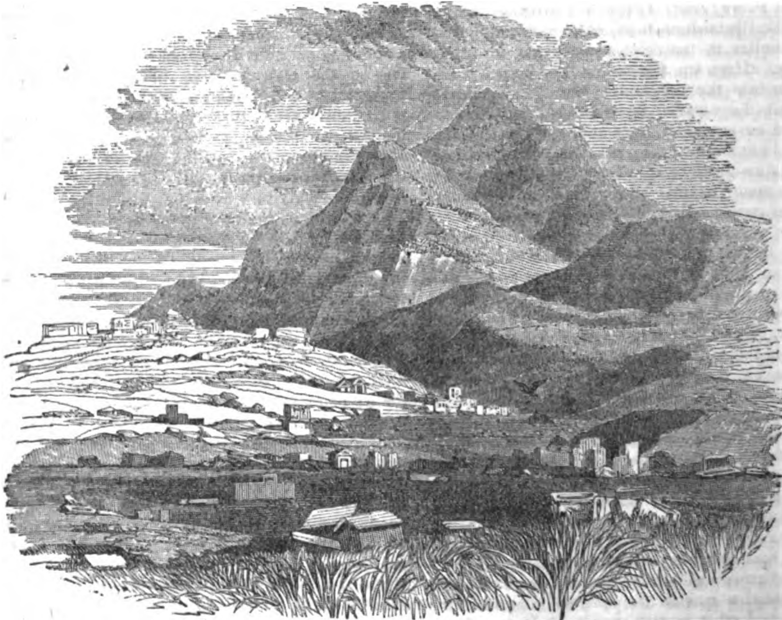
abominations by which their several towns had been defiled; thus performing again, on a smaller scale, the doings of the king in Jerusalem. Even the 'high places,' which the pious kings of former days had spared, were on this occasion abolished and overthrown; and even the men of Israel, who had attended the feast, were carried away by the same holy enthusiasm, and, on returning to their homes, broke all their idols in pieces (2 Chron. xxxi. 1).

The attention of this pious and able king was extended to whatever concerned the interests of religion in his dominions. He caused a new collection of Solomon's proverbs to be made, being the same which occupy chaps. xxv. to xxix. of the book which bears that name. The sectional divisions of the priests and Levites were re-established; the perpetual sacrifices were recommenced, and maintained from the royal treasure; the stores of the temple were once more filled by the offerings of the people, and the times of Solomon and Jehoshaphat seemed to have returned (2 Chron. xxxi.). These improvements indicate the peculiar nature of the operations required to establish the character of a good prince under the Hebrew theocracy. It was not necessary that he should create new and beneficial institutions; even from the most reforming king it was only required that he should re-establish the old institutions which had fallen into neglect, and to abolish all recent innovations adverse to their principles. Of all people the Hebrews lived most on the memories of the past; and the retrospective character of all their reformations necessarily arose out of the divine authority by which their institutions had been established, and their perfect adaptation to their condition as a peculiar people.

This great work having been accomplished and consolidated (2 Kings xvii. 7, &c.), Hezekiah applied himself to repair the calamities, as he had repaired the crimes, of his father's government. He took arms, and recovered the cities of Judah which the Philistines had seized. Encouraged by this success, he ventured to withhold the tribute which his father had paid to the Assyrian king; and this act, which the result shows to have been imprudent, drew upon the country the greatest calamities of his reign. Only a few years before, namely, in the fourth of his reign, the Assyrians had put an end to the kingdom of Israel and sent the ten tribes into exile; but had abstained from molesting Hezekiah, as he was already their tributary. Seeing his country invaded on all sides by the Assyrian forces under Sennacherib, and Lachish, a strong place which covered Jerusalem, on the point of falling into their hands, Hezekiah, not daring to meet them in the field, occupied himself in all necessary preparations for a protracted defence of Jerusalem, in hope of assistance from Egypt, with which country he had contracted an alliance (Isa. xxx. 1-7). Such alliances were not favoured by the Divine sovereign of Israel and his prophets, and no good ever came of them. But this alliance did not render the good king unmindful of his true source of strength; for in quieting the alarms of the people he directed their attention to the consideration that they in fact had more of power and strength in the divine protection, than the Assyrian king possessed in all his host: 'There is more with us than with him: with him is an arm of flesh, but with us is the Lord our God to help us and fight our battles.' Nevertheless, Hezekiah was himself distrustful of the course he had taken, and at length, to avert the calamities of war, sent to the Assyrian king offers of submission. Sennacherib, who was anxious to proceed against Egypt, consented to withdraw his forces on the payment of three hundred talents of silver and thirty talents of gold; which the king was not able to raise without exhausting both his own treasury and that of the temple, and stripping off the gold with which the doors and pillars of the Lord's house were overlaid (2 Kings xviii. 7-16).

But after he had received the silver and gold, the Assyrian king broke faith with Hezekiah, and continued to prosecute his warlike operations. While he employed himself in taking the fortresses of Judæa, which it was important to secure before he marched against Egypt, he sent three of his generals, Rabshakeh, Tartan, and Rabsaris, with part of his forces, to threaten Jerusalem with a siege unless it were surrendered, and the inhabitants submitted to be sent into Assyria; and this summons was delivered in language highly insulting not only to the king and people, but to the God they worshipped. When the terms of the summons were made known to Hezekiah, he gathered courage from the conviction that God would not fail to vindicate the honour of his insulted name. In this conviction he was confirmed by the prophet Isaiah, who, in the Lord's name, promised the utter discomfiture and overthrow of the blasphemous Assyrian: 'Lo, I will send a blast upon him, and he shall hear a rumour, and shall return to his own land, and I will cause him to die by the sword in his own land' (2 Kings xix. 7). The rumour which Sennacherib heard was of the advance of Tirhakah the Ethiopian to the aid of the Egyptians, with a force which the Assyrians did not deem it prudent to meet; but, before withdrawing to his own country, Sennacherib sent a threatening letter to Hezekiah, designed to check the gladness which his retirement was likely to produce. But that very night the predicted blast—probably the hot pestilential south wind—smote 180,000 men in the camp of the Assyrians, and released the men of Judah from all their fears (2 Kings xviii. 17-37; xix. 1-34; 2 Chron. xxxii. 1-23; Isa. xxxvi. 37).

It was in the same year, and while Jerusalem was still threatened by the Assyrians, that Hezekiah fell sick of the plague; and the aspect which the plague-boil assumed assured him that he must die. In this he was confirmed by Isaiah, who warned him that his end approached. The love of life, the condition of the country—the Assyrians being present in it, and the throne of David without an heir—caused him to grieve at this doom, and to pray earnestly that he might be spared. And his prayer was heard in heaven. The prophet returned with the assurance that in three days he should recover, and that fifteen additional years of life should be given to him. This communication was altogether so extraordinary, that the king required some token by which his belief might be justified; and accordingly the 'sign' which he required was granted to him. The shadow of the sun went back upon the dial of Ahaz, the ten degrees it had gone down [DIAL.]



This was a marvel greater than that of the cure which the king distrusted; for there is no known principle of astronomy or natural philosophy by which such a result could be produced. A cataplasm of figs was then applied to the plague-boil, under the direction of the prophet, and on the third day, as foretold, the king recovered (2 Kings xx. 1-11; 2 Chron. xxxii. 24-26; Isa. xxxviii.). [PLAGUE].

The destruction of the Assyrians drew the attention of foreign courts for a time towards Judæa, and caused the facts connected with Hezekiah's recovery, and the retrogression of the shadow on the dial, to be widely known. Among others Merodach Baladan, king of Babylon, sent ambassadors with presents to make inquiries into those matters, and to congratulate the king on his recovery. Since the time of Solomon the appearance of such embassies from distant parts had been rare at Jerusalem; and the king, in the pride of his heart, made a somewhat ostentatious display to Baladan's ambassadors of all his treasures, which he had probably recovered from the Assyrians, and much increased with their spoil. Josephus (*Antiq.* x. 2. 2) says that one of the objects of the embassy was to form an alliance with Hezekiah against the Assyrian empire; and if so, his readiness to enter into an alliance adverse to the theocratical policy, and his desire to magnify his own importance in the eyes of the king of Babylon, probably furnished the ground of the divine disapprobation with which his conduct in this matter was regarded. He was reprimanded by the prophet Isaiah, who revealed to him the mysteries of the future, so far as to apprise him that all these treasures should hereafter be in the possession of the Babylonians, and his family and people exiles in the land from which these ambassadors came. This intimation was received by the king with his usual submission to the will of God; and he was content to know that these evils were not to be inflicted in his own days. He has sometimes been blamed for this seeming indifference to the fate of his successors; but it is to be borne in mind that at this time he had no children. This was in the fourteenth year of his reign, and Manasseh, his successor, was not born till three years afterwards (2 Kings xx. 12-19; 2 Chron. xxxii. 31; Isa. xxxix.) The rest of Hezekiah's life appears to have been peaceable and prosperous. No man before or since ever lived under the certain knowledge of the precise length of the span of life before him. When the fifteen years had expired, Hezekiah was gathered to his fathers, after a reign of twenty-nine years. He died sincerely lamented by all his people, and the public respect for his character and memory was testified by his corpse being placed in the highest niche of the royal sepulchre (2 Kings xx. 20, 21; 2 Chron. xxxii. 32, 33).

HIEL (חִיאֵל, *God liveth;* Sept. Ἀχιήλ), a native of Beth-el, who rebuilt Jericho, above 500 years after its destruction by the Israelites, and who, in so doing, incurred the effects of the imprecation pronounced by Joshua (1 Kings xvi. 34).

Accursed the man in the sight of Jehovah,
Who shall arise and build this city, even Jericho;
With the loss of his first-born shall he found it,
And with the loss of his youngest shall he fix its gates (Josh. vi. 26).—J. E. R.

HIERAPOLIS (Ἱεράπολις), a city of Phrygia, not far from Colossæ and Laodicea, where there was a Christian church under the charge of Epaphras, as early as the time of St. Paul, who commends him for his fidelity and zeal (Colos.

339. [Hierapolis.]

iv. 12, 13.) The place is visible from the theatre at Laodicea, from which it is five miles distant northward.

Smith, in his journey to the Seven Churches (1671), was the first to describe the ancient sites in this neighbourhood. He was followed by Pococke and Chandler; and more recently by Richter, Cockerell, Hartley, and Arundell.

The place now bears the name of Pamluck-kale (Cotton-castle), from the white appearance of the cliffs of the mountain on the lower summit, or rather an extended terrace, on which the ruins are situated. It owed its celebrity, and probably the sanctity indicated by its ancient name (Holy City), to its very remarkable springs of mineral water, the singular effects of which, in the formation of stalactites and incrustations by its deposits, are shown in the accounts of Pococke (ii. pt. 2, c. 13) and Chandler (*Asia Minor*, c. 68), to have been accurately described by Strabo (xiii. p. 629). A great number and variety of sepulchres are found in the different approaches to the site, which on one side is sufficiently defended by the precipices overlooking the valleys of the Lycus and Mæander, while on the other sides the town walls are still observable. The magnificent ruins clearly attest the ancient importance of the place. The main street can still be traced in its whole extent, and is bordered by the remains of three Christian churches, one of which is upwards of 300 feet long. About the middle of this street, just above the mineral springs, Pococke, in 1741, thought that he distinguished some remains of the Temple of Apollo, which, according to Damascius, quoted by Photius (*Biblioth.* p. 1054), was in this situation. But the principal ruins are a theatre and gymnasium, both in a state of uncommon preservation; the former 346 feet in diameter, the latter nearly filling a space of 400 feet square. Strabo (*loc. cit.*) and Pliny (*Hist. Nat.* v. 29) mention a cave called the Plutonium, filled with pestilential vapours, similar to the celebrated Grotto del Cane in Italy. High up the mountain-side is a deep recess far into the mountain; and Mr. Arundell says that he should have supposed that the mephitic cavern lay in this recess, if Mr. Cockerell had not found it near the theatre, the position anciently assigned to it. He adds that the experiments made in this mountain-side recess do not seem very conclusive, and conjectures that it may be the same in which Chandler distinguished the area of a stadium (Arundell, *Asia Minor*, ii. 210). The same writer gives, from the *Oriens Christianus*, a list of the bishops of Hierapolis down to the time of the emperor Isaac Angelus. Fuller accounts of the ruins, &c., may be seen in the authors named above (comp. also Col. Leake's *Geogr. of Asia Minor*, pp. 252, 253).

HIGH PLACES AND GROVES. As high places and groves are almost constantly associated in Scripture, it seems undesirable to separate them in our consideration.

By 'high places' (במות *bamoth*) we are content to understand natural or artificial eminences, where worship by sacrifice or offering was made, usually upon an altar erected thereon.

By a 'grove' we understand a plantation of trees around a spot in the open air set apart for worship and other sacred services, and therefore around or upon the 'high places' which were set apart for the same purposes.

In looking at matters of this nature we are constantly liable to error, and constantly do err, from not taking into account the altered circumstances under which the same subject may be brought before us in the course of a long series of ages. Thus, with reference to the present topic, it is manifest that the patriarchs worshipped in groves and upon high places; and much difficulty has been felt in reconciling this with the deep reprobation with which the practice is mentioned at a later period. It seems to have occurred to no one that the conditions of the question had altered in the course of ages; and that what was more anciently an indifferent or laudable custom, had in the lapse of time become, by abuses and corrupting associations, criminal and dangerous. Yet we incline to think that this is the real solution of the difficulties by which this question has seemed to be surrounded.

We find traces of these customs so soon *after* the deluge, that it is probable they existed *prior* to that event. It appears that the first altar after the deluge was built by Noah upon the mountain on which the ark rested (Gen. viii. 20). Abraham, on entering the Promised Land, built an altar upon a mountain between Beth-el and Hai (xii. 7, 8). At Beersheba he planted a grove, and called there upon the name of the everlasting God (Gen. xxi. 33). The same patriarch was required to travel to the mount Moriah, and there to offer up his son Isaac (xxii. 2, 4). It was upon a mountain in Gilead that Jacob and Laban offered sacrifices before they parted in peace (xxxi. 54). In fact, such seem to have been the general places of worship in those times; nor does any notice of a temple, or other covered or enclosed building for that purpose, occur. Thus far all seems clear and intelligible. There is no reason in the mere nature of things why a hill or a grove should be an objectionable, or, indeed, why it should not be a very suitable, place for worship. Yet by the time the Israelites returned from Egypt, some corrupting change had taken place, which caused them to be repeatedly and strictly enjoined to overthrow and destroy the high places and groves of the Canaanites wherever they found them (Exod. xxxiv. 13; Deut. vii. 5; xii. 2, 3). That they were not themselves to worship the Lord on high places or in groves is implied in the fact that they were to have but one altar for regular and constant sacrifice; and it was expressly enjoined that near this sole altar no trees should be planted (Deut. xvi. 21).

It is evident from the prohibition itself that other nations continued to preserve the primeval practice of worshipping upon high places and in groves. Among them circumstances had arisen which rendered it inexpedient that the practice should be continued by the chosen people. What these circumstances were we must ascertain from the accounts given by the heathen themselves, for the Scripture does not explain this matter. And it is important to observe that the heathen writers perfectly agree with Scripture in describing hills and groves as the earliest places of worship.

It is possible that the Canaanites had not yet fallen into rank idolatry in the time of Abraham —at least, not into such idolatries as defiled the

very places in which they worshipped. We know, at all events, that their iniquity was not full in those earlier times, but that when the Israelites invaded the land their iniquity was full to overflowing. As included in this, we may with tolerable certainty infer that their religion had become so grossly erroneous and impure, that it was needful to place under ban even their places of worship, which might otherwise bring the Israelites into danger by the associations which had become connected with them.

The great object of the law was to attach the Israelites to the worship of the One Jehovah, the Creator of heaven and earth, and to preserve them from the polytheism into which the nations had fallen. Now it is certain that the Canaanites had become polytheistic, and, consequently, that their high places and groves were dedicated to different gods. By continuing or adopting the use of this custom, the Israelites would infallibly have fallen into the same notions. They would probably have begun by worshipping Jehovah himself under different names and attributes, which would eventually have been erected into distinct gods. There could not be polytheism without idolatry, all but the one God being idols. The one condition, therefore, involves the other; and injunctions or statements beyond this apply to the forms which the idolatry assumed, in the character and attributes of the worshipped gods.

The information derivable from heathen writers cannot of course ascend beyond the first forms of idolatry; for, as idolaters, they had no notion or tradition of the times when idolatry had no existence. Now, by universal consent, the earliest idolatry was solar and planetary; the heavenly bodies being worshipped at first in their natural appearances, and at length by representative figures and images. It is clear that this was the case among the Canaanites and the other nations with whom the Israelites were brought into contact. And here much might be said of, for much is suggested by, the sacrifice of Balaam, who upon each of the high places where he sacrificed, built *seven* altars, and offered *seven* bullocks and *seven* rams on every altar. Here there was manifestly a polytheistic reference, and the number *seven* suggests a planetary one; although Balaam certainly had a historical knowledge at least of the true God, and was, after a sort, his worshipper.

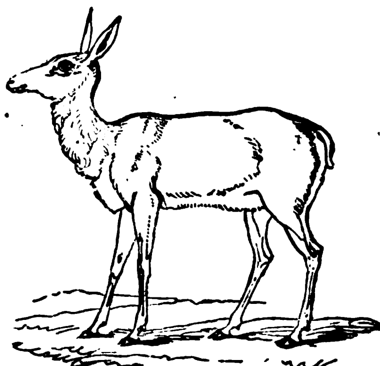
As long as the nations continued to worship the heavenly bodies themselves, they worshipped in the open air, holding that no walls could contain infinitude. Afterwards, when the symbol of fire or of images brought in the use of temples, they were usually built in groves and upon high places, and sometimes without roofs. The principle on which high places were preferred is said to have been, that they were nearer to the gods, and that on them prayer was more acceptable than in the valleys (Lucian, *De Sacrif.* i. 4). The ancient writers abound in allusions to this worship of the gods upon the hill-tops; and some of their divinities took their distinctive names from the hill on which their principal seat of worship stood, such as Mercurius Cyllenius, Venus Erycina, Jupiter Capitolinus, &c. To prove facts so well known as this preference and special appropriation of high places, is scarcely necessary; but among other authorities the following may be consulted: Sophocles, *Trachin.* 1207, 1208; Herod. i. 131; Xenoph. *Cyrop.* viii. 7, p. 500; Strabo, xv. p. 732; Appian, *De Bello Mithrid.* § 131.

The groves which ancient usage had established around the places of sacrifice for the sake of shade and seclusion, idolatry preserved not only for the same reasons, but because they were found convenient for the celebration of the rites and mysteries, often obscene and abominable, which were gradually superadded. Then the presence of a grove of a particular species of tree at the principal seat of the worship of a particular god, would occasion trees of the same kind to be planted at other seats of the same worship; whence that kind of tree came to be regarded as specially appropriate to the particular idol; and, in process of time, there was no important tree which had not become the property of some god or goddess, so that every stranger who passed by a sacred grove could determine by the species of tree of which it was composed to what God the high place, altar, or temple with which it was connected belonged. To this effect there is an interesting passage in the beginning of Pliny's twelfth book: 'Trees were formerly the only temples of the gods; and even now the simple peasantry, in imitation of this ancient custom, dedicate to some god the finest tree of their district Nor do we ourselves adore with more reverence the statues of the gods resplendent with ivory and gold, than the sacred groves and the holy silence which reigns in them. Trees were also anciently, as at present, consecrated to particular divinities; as the esculus to Jove (*ut Jovis esculus*, which seems to have been a kind of oak), the laurel to Apollo, the olive to Minerva, the myrtle to Venus, the poplar to Hercules. It is also believed that as the heavens have their proper and peculiar deities, so also the woods have theirs, being the Fauns, the Sylvans, and certain goddesses' (doubtless, such demi-goddesses as the dryades and hamadryades). To this it may be added that groves were enjoined by the Roman law of the twelve tables as part of the public religion. Plutarch (*Numa*, i. 61) calls such groves ἄλση θεῶν, 'groves of the gods,' which he says Numa frequented, and thereby gave rise to the story of his intercourse with the goddess Egeria. In fact, a degree of worship was, as Pliny states, transferred to the trees themselves. They were sometimes decked with ribbons and rich cloths, lamps were placed on them, the spoils of enemies were hung from them, vows were paid to them, and their branches were encumbered with votive offerings. Traces of this arborolatry still exist everywhere, both in Moslem and Christian countries; and even the Persians, who abhorred images as much as the Hebrews ever did, rendered homage to certain trees. The story is well known of the noble plane-tree, near Sardis, before which Xerxes halted his army a whole day, while he rendered homage to it, and hung royal offerings upon its branches (Herod. vii. 31). There is much curious literature connected with this subject which we leave untouched; but the reader may consult Sir W. Ouseley's learned dissertation on Sacred Trees, appended to the first volume of his *Travels in the East*.

This statement of the notions connected with religious worship in high places and in groves seems amply to support the view we have taken as to the nature of the dangers which the prohibition of it

was designed to obviate. The explanation as to the special appropriation of trees to particular gods alone suffices to throw a flood of light upon the injunction to cut down the sacred groves of the Canaanites; seeing that while these groves remained, it would be impossible to dissociate the idea of the god to which the trees had been consecrated; and the disgraceful orgies which were celebrated under their obscure shade, would alone suffice to explain the same injunction on the ground of the holy abhorrence with which the scene of such abominations must be regarded by One who is of purer eyes than to behold iniquity.

The injunctions, however, respecting the high places and groves were very imperfectly obeyed by the Israelites; and their inveterate attachment to this mode of worship was such that even pious kings, who opposed idolatry by all the means in their power, dared not abolish the high places at which the Lord was worshipped. And it appears to us likely, that this toleration of an acknowledged irregularity arose from the indisposition of the people living at a distance from the temple to be confined to the altar which existed there; to their determination to have places nearer home for the chief acts of their religion—sacrifice and offering; and to the apprehension of the kings that if they were prevented from having places for offerings to the Lord in their own neighbourhood, they would make the offerings to idols. This view of the case seems to be strongly confirmed by the fact that we hear no more of this proneness to worship in high places and in groves after synagogues and regular religious services had been established in the towns and gave sufficient operation to the disposition among men to create a local interest in religious observances.



It is more difficult to explain how it happens that, in the face of the prohibition against sacrificing at more than one altar, many persons of piety, and even prophets, not only did so, but, in some instances, did so in high places: Gideon, for instance, at Ophrah (Judg. vi. 25), Manoah in Dan (Judg. xiii. 16-29), Samuel at Mizpeh (1 Sam. vii. 10), and at Bethlehem (xvi. 5), David in the threshing-floor of Ornan (1 Chron. xxi. 22), and Elijah on Mount Carmel (1 Kings xviii. 30, sq.). It will, however, be observed that in these cases the parties either acted under an immediate command from God, or were invested with a general commission of similar force with reference to such transactions. As this law more immediately concerned the honour of God, and derived all its force from his command, being based on no obvious principle of duty, He undoubtedly had a right to supersede it in particular instances, in which the attendant circumstances and the character of the parties precluded the possibility of the abuses against which it was framed to guard. It has also been suggested that greater latitude was allowed in this point before the erection of the temple gave to the ritual principles of the ceremonial law a fixity which they had not previously possessed. This is possible; for it is certain that all the authorized examples occur before it was built, excepting that of Elijah; and that occurred under circumstances in which the sacrifices could not possibly have taken place at Jerusalem, and in a kingdom where no authorized altar to Jehovah then existed.

HIGH-PRIEST. [PRIESTS.]

HILKIAH (חִלְקִיָּהוּ; Sept. Χελκίᾳ). Several persons of this name occur in Scripture, of whom the following are the chief: 1. The father of Jeremiah (Jer. i. 1). 2. A high-priest in the reign of Josias (2 Kings xxii. 4, 8, 10). 3. The father of Eliakim (2 Kings xviii. 18, 26; Isa. xxii. 20).

HIN, a Hebrew liquid measure [WEIGHTS AND MEASURES.]

HIND (אַיָּלָה *ajalah*, Gen. xlix. 21; 2 Sam. xxii. 34; Job xxxix. 1; Ps. xviii. 33, &c.), the female of the hart or stag, doe being the female of the fallow-deer, and roe being sometimes used for that of the roebuck. All the females of the

340.

Cervidæ, with the exception of the reindeer, are hornless. It may be remarked on Ps. xviii. 33 and Hab. iii. 19, where the Lord is said to cause the feet to stand firm like those of a hind on high places, that this representation is in perfect harmony with the habits of mountain stags; but the version of Prov. v. 19, 'Let the wife of thy bosom be as the beloved hind and favourite roe,' seems to indicate that here the words are generalized so as to include under *roe* monogamous species of antelopes, whose affections and consortship are permanent and strong; for stags are polygamous. Finally, the emendation of Bochart on the version of Gen. xlix. 21, where for 'Naphthali is a hind let loose, he giveth goodly words,' he, by a small change in the punctuation of the original, proposes to read 'Naphthali is a spreading tree, shooting forth beautiful branches,' restores the text to a consistent meaning, agreeing with the Sept., the Chaldee paraphrase, and the Arabic version. [AJAL, HART].—C. H. S.

HINNOM, or rather Ben-Hinnom (בֶּן הִנֹּם; Sept. υἱοῦ Ἐννόμ), an unknown person, whose name was given to the valley which bounds Jerusalem on the north, below Mount Zion, and which in Scripture is often mentioned in connection with the horrid rites of Moloch, which under idolatrous kings were there celebrated (Josh. xv. 8; xviii. 16; Neh. xi. 30; Jer. vii. 31; xix. 2). When Josiah overthrew this idolatry, he defiled the valley by casting into it the bones of the dead, the greatest of all pollutions among the Hebrews: and from that time it became the common jakes of Jerusalem, into which all refuse of the city was cast, and where the combustible portions of that

refuse were consumed by fire. Hence it came to be regarded as a sort of type of hell, the Gehenna of the New Testament being no other than the name of this valley of Hinnom (Ge-Hinnom); see Matt. v. 22, sq.; Mark ix. 43; Luke vii. 5; John iii. 6 [Hades; Jerusalem].

1. HIRAM (חִירָם; Sept. Χειράμ), king of Tyre at the commencement of David's reign. He sent an embassy to felicitate David on his accession, which led to an alliance, or strengthened a previous friendship between them. It seems that the dominion of this prince extended over the western slopes of Lebanon; and when David built himself a palace, Hiram materially assisted the work by sending cedar-wood from Lebanon, and able workmen to Jerusalem (2 Sam. v. 11; 1 Chron. xiv. 1), B.C. 1055.

2. HIRAM, king of Tyre, son of Abibaal, and grandson of the Hiram who was contemporary with David, in the last years of whose reign he ascended the throne of Tyre. Following his grandfather's example, he sent to Jerusalem an embassy of condolence and congratulation when David died and Solomon succeeded, and contracted with the new king a more intimate alliance than ever before or after existed between a Hebrew king and a foreign prince. The alliance seems to have been very substantially beneficial to both parties, and without it Solomon would scarcely have been able to realise all the great designs he had in view. In consideration of large quantities of corn, wine, and oil, furnished by Solomon, the king of Tyre agreed to supply from Lebanon the timber required for the temple, to float it along the coast, and deliver it at Joppa, which was the port of Jerusalem (1 Kings v. 1, sq.; ix. 10, sq.; 1 Chron. ii. 3, sq.). The vast commerce of Tyre made gold very plentiful there; and Hiram supplied no less than 500 talents to Solomon for the ornamental works of the temple, and received in return twenty towns in Galilee; which, when he came to inspect them, pleased him so little, that he applied to them a name of contempt, and restored them to the Jewish king (2 Chron. viii. 2) [Cabul]. It does not, however, appear that the good understanding between the two kings was broken by this unpleasant circumstance; for it was after this that Hiram suggested, or at least took part in, Solomon's traffic to the Eastern seas—which certainly could not have been undertaken by the Hebrew king without his assistance in providing ships and experienced mariners (1 Kings ix. 27; x. 11, &c.; 2 Chron. viii. 18; ix. 10, &c.), B.C. 1007 [Ophir; Solomon; Phœnicians].

3. HIRAM, or HURAM, son of a widow of the tribe of Dan, and of a Tyrian father. He was sent by the king of the same name to execute the principal works of the interior of the temple, and the various utensils required for the sacred services. We recognise in the enumeration of this man's talents by the king of Tyre a character common in the industrial history of the ancients, namely, a skilful artificer, knowing all the arts, or at least many of those arts which we practise, in their different branches [Handicraft]. It is probable that he was selected for this purpose by the king from among others equally gifted, in the notion that his half Hebrew blood would render him the more acceptable at Jerusalem.

HISTORY. Under this term we here intend to give, not a narrative of the leading events detailed in the Bible, but such general remarks on the Biblical history as may enable the reader to estimate the comparative value, and apply for information to the proper sources, of historical knowledge, as presented in or deduced from the sacred records. The question of inspiration we here leave untouched, because it is one of a dogmatical nature, which will be fully discussed in a separate article. The historical books that are contained in the Bible pass, therefore, under review as other historical documents, and are subjected to the same rules of criticism as those which are applied to the productions of profane writers. And if the believer should, in consequence, find himself for a moment deprived in imagination of a basis of reliance, he will be repaid by the fact that, while he thus meets the unbeliever on his own ground, he is enabled, by the application of recognised principles of historical criticism, to prove beyond a question that no history in existence can compare with the Biblical history either in age, credibility, value, or interest.

The subject-matter contained in the Biblical history is of a wide and most extensive nature. In its greatest length and fullest meaning it comes down from the creation of the world till near the close of the first century of the Christian era, thus covering a space of some 4000 years. The books presenting this long train of historical details are most diverse in age, in kind, in execution, and in worth; nor seldom is it the fact that the modern historian has to construct his narrative as much out of the implications of a letter, the highly coloured materials of poetry, the far-reaching visions of prophecy, and the indirect and allusive information of didactic and moral precepts, as from the immediate and express statements of history strictly so denominated. The history of Herodotus, embracing as it does most of the world known at his time, and passing, under the leading of a certain thread of events, from land to land,—this history, with its naïve, graphic, gossip, and traveller-like narratives, interweaving in a succession of fine old tapestries many of the great events and moving scenes which had, up to his time, taken place on the theatre of the world, presents to the intelligent reader a continuation of varied gratifications. But even the history of Herodotus must yield to that contained or implied in the Bible, not merely in extent of compass, but also in variety, in interest, and beyond all comparison, in grandeur, importance, and moral and spiritual significance. The children of the faithful Abraham seem to have had one great work of Providence intrusted to them, namely, the development, transmission, and infusion into the world of the religious element of civilization. Their history, accordingly, is the history of the rise, progress, and diffusion of true religion, considered in its source and its developments. Such a history must possess large and peculiar interest for every student of human nature, and pre-eminently for those who love to study the unfoldings of Providence, and desire to learn that greatest of all arts—the art of living at once for time and for eternity.

The Jewish history contained in the Bible embraces more and less than the history of the

Israelites;—more, since it begins with the beginning of the earth and narrates with extraordinary brevity events which marked the period terminated by the flood, going on till it introduces us to Abraham, the primogenitor of the Hebrew race; less, since, even with the assistance of the poetical books, its narratives do not come down to a later date than some 600 years before the birth of Christ. The historical materials furnished relating to the Hebrew nation may be divided into three great divisions: 1. The books which are consecrated to the antiquity of the Hebrew nation—the period that elapsed before the era of the judges. These works are the Pentateuch and the book of Joshua, which, according to Ewald (*Geschichte des Volkes Israel*, i. 72), properly constitute only one work, and which may be termed the great book of original documents. 2. The books which describe the times of the judges and the kings up to the first destruction of Jerusalem; that is, Judges, Kings, and Samuel, to which belongs the book of Ruth: 'all these,' says Ewald, 'constitute also, according to their last formation, but one work, which may be called the Great Book of Kings.' 3. The third class comprises the books included under the head of Hagiographa, which are of a much later origin, Chronicles, with Ezra and Nehemiah, forming the great book of general history reaching to the Grecian period. After these books come those which are classed together under the name of Apocrypha, whose use in this country we think unduly neglected. Then the circle of evangelical records begins, which closed within the century that saw it open. Other books found in the Old and New Testaments, which are not properly of a historical character, connect themselves with one or other of these periods, and give important aid to students of sacred history.

Biblical history has not hitherto been satisfactorily treated. Particular parts of it may indeed have received the kind and degree of attention required, but most writers who have treated that history as a whole have been swayed, some by one, some by another warping influence, so that the Bible has been made to speak the most diverse tongues, now in favour of a naturalism which finds an impossibility in every miracle, and now in favour of a mysticism which sees a great spiritual secret in every fact, if not in every letter. It is useless indeed to expect that men will not be influenced by their pre-conceptions; but they cannot be justified, when they profess to write history, in ascribing their opinions and forcing their views on writers who lived thousands of years before them, and with whose modes of thinking and manner of writing they have not much in common. History and the philosophy of history, the history of fact and the history of opinion, the statement of what men have done, said, and thought, and the discussion of what is true and proper, are two different and very distinct departments of knowledge and art, the confounding of which must lead to perplexity and may involve us in serious error. The proper way to treat of biblical history is what we may term *the historical* (in other words the chronological) deduction of the facts presented, as these facts were seen, believed, and recorded by the several writers. An historian of the Hebrews should as far as possible place himself, and aim to place the mind of his readers, in the centre of the mind of each biblical historian, in order that, by seeing as the Hebrew saw, he may, aided by skill and light which the Hebrew did not and could not possess, present a vivid picture of the several periods that are passed in review. These remarks are not intended to be taken so as to exclude the exercise of criticism on authorities and alleged facts; but it must be historical not philosophical criticism—criticism whose implements, processes, and spirit, are borrowed from philology, which is the hand-maid of history, not the crucible of modern anti-supernaturalism, which, starting from a preconceived notion, some persons would say, a huge, dark falsehood, tries to extinguish every ray of heavenly light which may struggle amid the darkness of earth, and to make history as rayless and dull as itself. Philosophy has its own sphere, in which we have no desire to give it disturbance, but we do object to its attempting to pass off its own offspring as pure historical results.

Biblical history was often treated by the older writers as a part of church history in general, as they considered the history given in the Bible as presenting different and successive phases of the church of God (Buddei *Hist. Eccles.* 2 vols. 1726-29; Stolberg, *Geschichte der Religion Jesu*, i. 111). Other writers have viewed this subject in a more practical light, presenting the characters found in the Bible for imitation or avoidance; among whom may be enumerated Hess (*Geschichte der Israeliten vor den Zeiten Jesu*). Hess also wrote a history of Jesus (*Geschichte Jesu*; Zürich, 1775); but the best work is a more recent, and a very valuable one, by Niemeyer (*Characteristik der Bibel*, Halle, 1830). Among the more strictly learned writers several have had it in view to supply the gaps left in the succession of events by the Bible, out of sources found in profane writers. Here the chief authors are of English birth, namely, Prideaux, Shuckford, Russell; and for the New Testament, the learned, cautious, and fair-dealing Lardner [CHRONOLOGY]. There is a valuable work by G. Langen: *Versuch einer Harmonie der heiligen und profan scrib. in der Geschichte der Welt*, Bayreuth, 1775-80. Jahn, in his *Bib. Archäologie*, has, according to Gesenius (art. 'Bib. Geschichte' in Ersch and Gruber's *Allg. Enc.*), made free use of Prideaux. Other writers have pursued a strictly chronological method, such as Usher (*Annales Vet. N. T.* London, 1650), and Des Vignoles (*Chronologie de l'Hist. Sainte*, Berlin, 1738). Heeren (*Handb. der Geschichte*, p. 50) recommends, as containing many valuable inquiries on the monarchical period, the following work: J. Bernhardi *Commentatio de causis quibus effectum sit ut regnum Judæ diutius persisteret quam regnum Israel*, Lovanni, 1825. Heeren also declares that Bauer's *Handbuch der Geschichte des H. Volks*, 1800, is the best introduction both to the history and the antiquities of the Hebrew nation; though Gesenius complains that he is too much given to the construction of hypotheses. The English reader will find a useful but not sufficiently critical compendium in *The History of the Hebrew Commonwealth*, translated from the German of John Jahn, D.D. A far more valuable as well as more interesting, yet by no means faultless work, is Milman's

History of the Jews, published originally in Murray's *Family Library*. A more recent and very valuable work, Kitto's *Pictorial History of Palestine*, 1841, combines with the Bible history of the Jews the results of travel and antiquarian research, and is preceded by an elaborate Introduction, which forms the only Natural History of Palestine in our language.

German theologians are strongly imbued with the feeling that the history of the Hebrews has yet to be written. Niebuhr's manner of treating Roman history has had a great influence on them, and has aroused the theological world to new efforts, which have by no means yet come to an end; nor can we add that they have hitherto led to very definite and generally approved results. The works of Jost (*Gesch. d. Israel. s. d. Zeit. der Maccab.* 1820-9), and Nork (*Das Leben Mosis aus Astron. Stand. betrachtet*, 1838), and others, must not be overlooked by the professional student; nor will he fail to study with care the valuable introductions to the knowledge of the Old Testament put forth in Germany, with which we have nothing comparable in our language: among these introductions we can confidently recommend—*Einleitung in das alte Test.* von I. G. Eichhorn (a work which forms an epoch); *Lehrbuch der Hist. Krit. Einleit. in die Bücher des A. Test.* von W. M. L. de Wette, 5th edit. 1840: and *Handb. der Hist. Krit. Einleit. in das alte Testament*, von H. A. Ch. Hävernick, 1806; in which last work a more full and thorough treatment of the subject may be found. Of the more recent works we may mention Stähelin's *Kritische Untersuchungen über der Pentateuch*, &c. 1843; and H. Ewald's *Geschichte des Volkes Israel bis Christus*, Erster Band, 1843. Something worth notice may also be found in *De Anno Hebræorum Jubilæo*, scripsit J. T. K. Kranold. Ewald intends his present work to be a complete history of the Israelites, and considers it as a continuation of his *Die Propheten des Alten Bundes*, 1840. We have not space to give an account here of the views which these writers put forth, and we mean our recommendation of them to extend only to the calm, dignified, and profoundly learned manner in which they handle their subject, subjoining that works like these must eventually produce a great influence in the theological world.

The sources of Biblical history are chiefly the Biblical books themselves. Any attempt to fix the precise value of these sources in a critical point of view would require a volume instead of an article. Whatever hypothesis, however, may eventually be held touching the exact time when these books, or any of them, were put into their actual shape, as also touching the materials out of which they were formed, one thing appears very certain, that (to take an instance) Genesis, the earliest book (probably), contains most indubitable as well as most interesting historical facts; for though the age, the mode of life, and the state of culture differ so widely from our own, we cannot do otherwise than feel that it is among men and women, parents and children—beings of like passions with ourselves,—and not with mere creations of fancy or fraud, that we converse when we peruse the narratives which this composition has so long preserved. The conviction is much strengthened in the minds of those who, by personal acquaintance with the early profane writers, are able to compare their productions with those of the Hebrews, which were long anterior, and must, had they been of an equally earthly origin, have been at least, equally deformed by fable. The sole comparison of the account given in Genesis of the creation of the world with the Cosmogonies of heathen writers, whether Hindoo, Greek, or Latin, is enough to assure the impartial reader that a purer, if not a higher influence, presided over the composition of Genesis, than that whence proceeded the legends or the philosophies of heathenism; nor is the conclusion in the slightest degree weakened in the writer's mind by any discrepancy which modern science may seem to show us between its own discoveries and the statements in Genesis. The Biblical history, as found in its Biblical sources, has a decided peculiarity and a great recommendation in the fact that we can trace in the Bible more clearly and fully than in connection with any other history, the first crude elements and the early materials out of which all history must be constructed. How far the literature supplied in the Bible may be only a relic of a literary cyclus called into being by the felicitous circumstances and favourable constitution of the great Shemitic family, but which has perished in the lapse of ages, it is now impossible to determine; but had the other portions of this imagined literature been of equal *religious* value with what the Bible offers, there is little risk in affirming that mankind would scarcely have allowed it to be lost. The Bible, however, bears traces that its were not the only books current in the time and country to which it relates; for writing, writers, and books are mentioned without the emphasis and distinction which always accompany new discoveries or peculiar local possessions, and as ordinary, well-known, and matter-of-course things. And it is certain that we do not possess all the works which were known in the early periods of Israelite history, since in Numbers xxi. 14 we read of 'the book of the wars of the Lord,' and in Joshua x. 13, of 'the book of Jasher.' Without writing, history, properly so called, can have no existence. Under the head Writing we shall trace the early rudiments and progress of that important art: here we merely remark that an acquaintance with it was possessed by the Hebrews at least as early as their Exodus from Egypt—a fact which shows at least the possibility that the age of the Biblical records stands some thousand years or more [CHRONOLOGY] prior to the earliest Greek historian, Herodotus.

There is another fact which has an important bearing on the worth and credibility of the Biblical narratives, namely, that the people of which they speak were a *commemorative race*, were, in other words, given to create and preserve memorials of important events. Even in the patriarchal times we find monuments set up in order to commemorate events. Jacob (Gen. xxviii. 18) 'set up a pillar' to perpetuate the memory of the divine promise; and that these monuments had a religious import and sanction appears from the statement that 'he poured oil upon the top of the pillar' (see Gen. xxxi. 45; Josh. iv. 9; 1 Sam. vii. 12; Judg. ix. 6). Long-lived trees, such as oak and terebinth, were made use of as remembrancers (Gen. xxxv. 4; Josh. xxiv. 26). Commemorative names, also, were given to per-

sons, places, and things; and from the earliest periods it was usual to substitute a new and descriptive for an old name, which may in its origin have been descriptive too (Exod. ii. 10; Gen. ii. 23; iv. 1). Genealogical tables appear, moreover, to have had a very early existence among the people of whom the Bible speaks, being carefully preserved first memoriter, afterwards by writing, among family treasures, and thus transmitted from age to age. These, indeed, as might be expected, appear to have been the first beginnings of history—a fact which is illustrated and confirmed by the way in which what we should term a narrative or historical sketch is spoken of in the Bible, that is, as 'the book of the generation' ('of Adam,' Gen. v. 1): a mode of speaking which is applied even to the account of the creation (Gen. ii. 4), 'these are the generations of the heavens and the earth when they were created.' The genealogical tables in the Bible (speaking generally) are not only of a very early date, but are free from the mixtures of a theogonical and cosmogonical kind which are found in the early literature of other primitive nations, wearing the appearance of being, so far at least as they go, true and complete lists of individual and family descent (Gen. v. 1). But, perhaps, the most remarkable fact connected with this subject is the employment of poetry at a very early period to perpetuate a knowledge of historical events. Even in Gen. iv. 23, in the case of Lamech, we find poetry thus employed, that is, by the great-grandson of the primitive father. Other instances may be found in Exod. xv.; Judg. v.; Josh x. 13; 2 Sam. i. 18. This early use of poetry, which must be regarded as a considerable step in civilization, implies a still earlier pre-existent culture; confutes the notion that human society began with a period of barbarism; looks favourably on the hypothesis that language had an immediately divine origin; explodes the position that the Hebrews were at first an ignorant, untutored, and unlettered race; and creates a presumption on behalf of their historical literature. Poetry is a good vehicle for the transmission of great leading facts; for, though it may throw over fact a colouring borrowed from the imagination, yet the form in which it appears gives warning that such hues are upon its details, which hues, besides being themselves a species of history, are then easily removed, while the form shuts up and holds in the facts intrusted to the custody of verse, and so transmits them to posterity without additions and without loss. By means of these several forms of commemoration much knowledge would be preserved from generation to generation, and to their existence from the first may we ascribe the brief, but still valuable, notices which the Bible presents of the primitive ages and condition of the world.

Other sources for at least the early Biblical history are comparatively of small value. Josephus has gone over the same periods as the Bible treats of, but obviously had no sources of consequence relating to primitive times which are not open to us, and in regard to those times does little more than add here and there a patch of a legendary or traditional hue which could have been well spared. His Greek and Roman predilections and his apologetical aims detract from his value, while in relation to the early history of his country he can be regarded in no other light than a sort of philosophical interpreter; nor is it till he comes to his own age that he has the value of an independent (not even then an impartial) eye-witness or well-informed reporter. In historical criticism and linguistic knowledge he was very insufficiently furnished. The use of both Josephus and Philo is far more safe for the student of the New Testament than for the expounder of the old.

The Talmud and the Rabbins afford very little assistance for the early periods, but might probably be made to render more service in behalf of the times of the Saviour than has been generally allowed. The illustrations which Lightfoot and Wetstein have drawn from these sources are of great value; and Gfrörer, in his *Jahrhundert des Heils* (Stuttgart, 1838), has made an ample use of the materials they supply in order to draw a picture of the first century, a use which the learned author is at no small pains to justify. The compilations of the Jewish doctors, however, require to be employed with the greatest caution, since the Rabbins were the depositaries, the expounders, and the apologists of that corrupt form of the primitive faith and the Mosaic institutions which has been called by the distinctive name of Judaism, which comprised an heterogeneous mass of false and true things, the colluvies of the East as well as light from the Bible, and which, to a great extent, lies under the express condemnation of Christ himself. How easy it is to propagate fables on their authority, and to do a disservice to the Gospel records, may be learnt from the fact that older writers, in their undue trust of Rabbinical authority, went so far as to maintain that no cock was allowed to be kept in Jerusalem because fowls scratched unclean things out of the earth, though the authority of Scripture (which in the case they refused to admit) is most express and decided (Matt. xxvi. 34; Mark xiv. 30, 60, 72). On the credibility of the Rabbins see Ravii *Diss. Phil. Theol. de eo quod Fidei merentur*, etc. in Oelrich's *Collect. Opusc. Hist. Phil. Theol.*; Wolf, *Bibl. Hebr.* ii. 1095; Fabricius, *Bibliog. Antiq.* i. 3, 4; Brunsmann, *Diss. de Judaica levitate*, Hafniæ, 1705.

The classic authors betray the grossest ignorance almost in all cases where they treat of the origin and history of the Hebrew people; and even the most serious and generally philosophic writers fall into vulgar errors and unaccountable mistakes as soon as they speak on the subject. What, for instance, can be worse than the blunder or prejudice of Tacitus, under the influence of which he declared that the Jews derived their origin from Mount Ida in Crete; that by the advice of an oracle they had been driven out of Egypt; and that they set up in their temple at Jerusalem as an object of worship the figure of an ass, since an animal of that species had directed them in the wilderness and discovered to them a fountain (Tacit. *Hist.* v. 1, 2). Dion Cassius (xxxvii. 17) relates similar fables. Plutarch (*Quæst. Sympos.* iv. 5) makes the Hebrews pay divine honours to swine, as being their instructors in agriculture, and affirms that they kept the Sabbath and the Feast of Tabernacles in honour of Bacchus. A collection of these gross misrepresentations, together with a profound and successful inquiry into their origin, and a full exposure of their false-

hood, may be found in a paper by Dr. J. G. Müller, recently published in the *Theologische Studien und Kritiken* (1843, Viertes Heft. p. 893).—J. R. B.

HITTITES (חִתִּים; Sept. Χετταῖοι), or children of Heth, one of the tribes of Canaanites which occupied Palestine before the Israelites (Gen. xv. 20; Exod. iii. 8; xxiii. 23). They lived in and about Hebron; and Abraham, when he abode in that neighbourhood, was treated by them with respect and consideration (Gen. xxiii. 3-7, 11, 12). This intimacy led to Esau's marriage with two women of this nation, to the grief and annoyance of his parents (Gen. xxvi. 34, 35; xxxvi. 2). The Hittites are described in Num. xiii. 29, along with the Amorites, as 'dwelling in the mountains,' that is in what were afterwards called 'the mountains of Judah,' of which Hebron was the chief town. Uriah, who had the high honour of being one of David's thirty 'worthies,' and, unhappily for him, the husband of Bathsheba, is called a Hittite (2 Sam. xi. 3, 6; 1 Kings ix. 20). He was, doubtless, a proselyte, and probably descended from several generations of proselytes; but the fact shows that Canaanitish blood was in itself no bar to advancement in the court and army of David. Solomon subjected the remaining Hittites to the same tribute of bond-service as the other remnants of the Canaanite nations (1 Kings ix. 20). Of all these the Hittites appear to have been the most important, and to have been under a king of their own: for 'the kings of the Hittites' are, in 1 Kings x. 29, coupled with the kings of Syria as purchasers of the chariots which Solomon imported from Egypt. We might have supposed that this was some different division of the Hittite family living far away somewhere in the north. But in 2 Kings vii. 6 we find that when the Syrians, besieging Samaria, heard the sound of advancing chariots, they concluded that the king of Israel (Joram I.) had hired against them 'the kings of the Hittites and the kings of the Egyptians.' Now the mention of the Egyptians shows that the noise came from the south, from which quarter it seems they and the Egyptians were the only people who could be expected to make an attack with chariots. This identifies them with the southern Hivites, who were subject to the sceptre of Judah, and it shows also that it was they who purchased Egyptian chariots from the factors of Solomon. The Hittites were still present in Palestine as a distinct people after the Exile, and are named among the alien tribes with whom the returned Israelites contracted those marriages which Ezra urged, and Nehemiah compelled, them to dissolve (Ezra ix. 1, &c.; comp. Neh. xiii. 23-28). After this we hear no more of the Hittites, who probably lost their national identity by intermixture with the neighbouring tribes or nations.

HIVITES (חִוִּי; Sept. Εὐαῖοι), one of the nations of Canaan which occupied Palestine before the Israelites (Gen. x. 17; Exod. iii. 8, 17; xxiii. 23; Josh. iii. 10). They occupied the northern and north-eastern part of the country. In Judg. iii. 3, it is stated that 'the Hivites dwelt in Mount Hermon, from Mount Baal-hermon unto the entering in of Hamath;' and in Josh. xi. 3, the Hivites are described as living 'under Hermon in the land of Mizpeh.' The 'cities of the Hivites' are mentioned in 2 Sam. xxiv. 7, and, from being associated with Sidon and Tyre, must have been in the north-west. A remnant of the nation still existed in the time of Solomon, who subjected them to a tribute of personal labour, with the remnants of other Canaanitish nations which the Israelites had been unable to expel (1 Kings ix. 20). A colony of this tribe was also found in Northern Palestine, occupying the towns of Gideon, Chephirah, Beeroth, and Kirjath-jearim; and these obtained from Joshua a treaty of peace by stratagem (Josh. ix. 3-17; xi. 19).

HOBAB, kinsman of Moses and priest or prince (for the word כהן carries both significations) of Midian, a tract of country in Arabia Petræa, on the eastern border of the Red Sea, at no great distance from Mount Sinai. The family of this individual seems to have observed the worship of the true God in common with the Hebrews (Exod. xviii. 11, 12); and from this circumstance some suppose it to have been a branch of the posterity of Midian, fourth son of Abraham, by Keturah; while others, on the contrary, maintain that the aspersion cast upon Moses for having married a Cushite is inconsistent with the idea of its genealogical descent from that patriarch (see Calmet).

Considerable difficulty has been felt in determining who this person was, as well as his exact relation to Moses; for the word חתן, which, in Exod. iii. 1, Num. x. 29, Judg. iv. 11, is translated *father-in-law*, and in Gen. xix. 14, *son-in-law*, is a term of indeterminate signification, denoting simply relationship by marriage; and besides, the transaction which in one place (Exod. xviii. 27) is related of Jethro, is in another related of Hobab. The probability is, that as forty years had elapsed since Moses' connection with this family was formed, his father-in-law (Exod. ii. 18) Reuel or Raguel (the same word in the original is used in both places) was dead, or confined to his tent by the infirmities of age, and that the person who visited Moses at the foot of Sinai was his brother-in-law, called Hobab in Num. x. 29, Judg. iv. 11; Jethro in Exod. iii. 1; and קיני in Judg. i. 16, which, in chap. iv. 11, is rendered improperly 'the Kenite.'

About a year after the Exodus he paid a visit to Moses, while the Hebrew camp was lying in the environs of Sinai, bringing with him Zipporah, Moses' wife, who, together with her two sons, had been left with her family while her husband was absent on his embassy to Pharaoh. The interview was on both sides affectionate, and was celebrated first by the solemn rites of religion, and afterwards by festivities, of which Aaron and the elders of Israel were invited to partake. On the following day, observing Moses incessantly occupied in deciding causes that were submitted to him for judgment, his experienced kinsman remonstrated with him on the speedy exhaustion which a perseverance in such arduous labours would superinduce; and in order to relieve himself, as well as secure a due attention to every case, he urged Moses to appoint a number of subordinate officers to divide with him the duty of the judicial tribunals, with power to decide in all common affairs, while the weightier and more serious matters were reserved to himself. This wise sug-

gestion the Hebrew legislator adopted (Exod. xviii.).

When the Hebrews were preparing to decamp from Sinai, the kinsman of Moses announced his intention to return to his own territory; but if he did carry that purpose into execution, it was in opposition to the urgent solicitations of the Jewish leader, who entreated him, for his own advantage, to cast in his lot with the people of God; at all events to continue with them, and afford them the benefit of his thorough acquaintance with the wilderness. 'Leave us not, I pray thee,' said Moses, 'forasmuch as thou knowest how we are to encamp in the wilderness, and thou *mayest be to us instead of eyes;*' which the Septuagint has rendered *καὶ ἔσῃ ἐν ἡμῖν πρεσβύτης*—'and thou shalt be an elder amongst us.' But there can be little doubt that the true meaning is that Hobab might perform the office of a hybeer or guide [CARAVAN]—his influence as an Arab chief, his knowledge of the routes, the situation of the wells, the places for fuel, the prognostics of the weather, and the most eligible stations for encamping, rendering him peculiarly qualified to act in that important capacity. It is true that God was their leader, by the pillar of cloud by day and of fire by night, the advancement or the halting of which regulated their journeys and fixed their encampments. But beyond these general directions the tokens of their heavenly guide did not extend. And as smaller parties were frequently sallying forth from the main body in quest of forage and other necessaries, which human observation or enterprise were sufficient to provide, so Moses discovered his wisdom and good sense in enlisting the aid of a native sheik, who, from his family connection with himself, his powerful influence, and his long experience, promised to render the Israelites most important services.—R. J.

HOBNIM (הוֹבְנִים) occurs only in one passage of Scripture, where the prophet Ezekiel (xxvii. 15), referring to the commerce of Tyre, says, 'The men of Dedan were thy merchants; many isles were the merchandise of thine hand: they brought thee for a present horns of ivory and *ebony* (*hobnim*).' The Hebrew word is translated 'Ebony' in all the European versions; but, as Bochart states (*Hierozoicon*, i. 20, pars ii.), the Chaldee version, followed by R. Selomo and other Jews, as well as the Greek and Arabic versions, render *hobnim* by *pea-fowl* (*pavones*): 'Itaque soli veterum Symmachus et Hieronymus viderunt (הָבְנִים) *hobnim* esse *hebenum*.' Some of the Hebrew critics, however, as Kimchius, also acknowledge this: '*Hobnim* lignum interpretantur, quod Arabicè vocatur *abenus*.' Of the correctness of this opinion there can now be no doubt. In the first place, we may allude to Dedan being considered one of the ports of Arabia on the Persian Gulf, or at least to the south of the Red Sea; and secondly, as observed by Bochart, '*hobnim* et *hebenus* sunt voces non absimiles,' the latter word being variously written by ancient authors, as *ἐβένη*, *ἔβενος*, *ἔβενον*, ebenus and hebenus. The last form is used by Jerome in his Latin, and *ἔβενος* by Symmachus, in his Greek version. The Arabs have ابنوس, which they apply to Ebony, and by that name it is known in northern India at the present day. Forskäl mentions *abnoos* as one of the kinds of wood imported in his time from India into Arabia. Whether the Arabic name be a corruption of the Greek, or the Greek a modification, as is most likely, of some Eastern name, we require some other evidence, besides the occurrence of the word in Arabic works on Materia Medica, to determine; since in these, Greek words are sometimes employed as the principal terms for substances with which they are not well acquainted. *Bardust* is, however, given by some as the Arabic name; *abnoos* as the Persian. We found the latter applied to ebony in North-west India, as did Forskäl in the Red Sea.

Ebony wood was highly esteemed by the ancients, and employed by them for a variety of purposes. It is very appropriately placed in juxtaposition with ivory, 'quamvis unum ex animali, alterum ex arbore petatur. Quippe, ut notat Fullerus (*Miscell.* vi. 14) utrique est extremus color eodem excellentiæ gradu. Ebori videlicet pulcherrimi candoris, hebeno speciosissimi nigroris. Utrumque politissimum, nitidissimum, et incomparabili lævore conspicuum. Unde est, quod in eosdem usus fere adhibentur, et ex utroque arcus fiunt, pectines, tabulæ lusoriæ, cultrorum manubria,' &c. (Bochart, *l. c.*). Ivory and Ebony are probably, however, also mentioned together because both were obtained from the same countries—Ethiopia and India; and, among the comparatively few articles of ancient commerce, must, from this cause, always have been associated together, while their contrast of colour and joint employment in inlaid work, would contribute as additional reasons for their being adduced as articles characteristic of a distinct commerce.

341. [Diospyros Ebenum.]

But it is not in Ezekiel only that ebony and ivory are mentioned together. For Diodorus, as quoted by Bochart, tells us that an ancient king of Egypt imposed on the Ethiopians the payment of a tribute of ebony, gold, and elephants' teeth. So Herodotus (iii. 97), as translated by Bochart, says, 'Æthiopes Persis pro triennali tributo vehunt duos chœnices auri apyri (*id est, ignem nondum experti*), et ducentas *ebeni* phalangas, et magnos

elephanti dentes viginti.' Pliny, referring to this passage, remarks, 'But Herodotus assigneth it rather to Ethiopia, and saith, that every three years the Ethiopians were wont to pay, by way of tribute, unto the kings of Persia, 100 billets of the timber of that tree (that is Ebene), together with gold and yvorie;' and, again, 'From Syene (which confineth and boundeth the lands of our empire and dominion) as farre as to the island Meroë, for the space of 996 miles, there is little ebene found: and that in all those parts betweene there be few other trees to be found, but date trees, which peradventure may be a cause, that Ebene was counted a rich tribute and deserved the third place, after gold and ivorie' (Holland's *Pliny*, xii. 4).

It is sometimes stated that the ancients supposed ebony to come only from India. This arose probably from the passage of Virgil (*Georg.* ii. 117):—

'——— sola India nigrum
Fert ebenum ———.'

But the term 'India' had often a very wide signification, and included even Ethiopia. Several of the ancients, however, mention both Indian and Ethiopian ebony, as Dioscorides and Pliny; while some mention the Indian, and others the Ethiopian only, as Lucan (*Phars.* x. 304).

—— 'nigris Meroë fecunda colonis,
Læta comis ebeni.'

The only objection to the above conclusion of any weight is, that *hobnim* is in the plural form. To this Bochart and others have replied, that there were two kinds of ebony, as mentioned by Theophrastus, Dioscorides, &c., one Ethiopian, the other Indian. Fuller and others maintain that the plural form is employed because the ebony was in pieces: 'refert ad ebeni palangas, quæ ex India et Æthiopia magno numero afferebantur. Φάλαγγας vocant Herodotus et Arrianus in Periplo. Plinius *palangas*, aut *phalangas*, variante scriptura, id est, fustes teretes, et qui navibus supponuntur, aut quibus idem onus plures bajulant' (Bochart, *l. c.*). But the names of other valued foreign woods, as Shittim and Almuggim, are also used in the plural form. Besides *abnoos*, Arab authors, as stated by Bochart (*l. c.*), mention other woods as similar to and substituted for ebony: one of these is called *sheez*, *sheezee;* also *sasem* and *semsem*, in the plural form *semasim;* described as *nigrum lignum ad patinas conficiendas.* Hence, in the Koran, 'de iis, qui in gehenna torquentur,' it is said, 'Exibunt ex igne post aliquam in eo moram; exibunt, inquam, tanquam ligna *semasim;*' that is, black, from being burnt in the fire. That such a wood was known we have the testimony of Dioscorides—Ἔνιοι δὲ τὰ σησάμινα ἢ ἀκάνθινα ξύλα, ἐμφερῆ ὄντα, ἀντὶ ἐβένου πωλοῦσι; 'Nonnulli sesamina aut acanthina ligna, quod consimilia sunt, pro ebeno vendunt.' Some critics, and even Sprengel, in his late edition of Dioscorides, read συκάμινα, instead of σησάμινα, for no other reason apparently but because συκάμινα denotes a tree with which European scholars are acquainted, while *sesamina* is only known to those who consult Oriental writers, or who are acquainted with the products of the East. Bochart rightly observes, 'Cave igitur ne quidquam mutes. Aliud enim hic *sesamina* quam vulgo. Nempe ligna illius arboris quæ Arabicè *sasim* et *semsem* appellatur, et ita plurali *semasim.* Itaque Dioscoridis Arabs interpres hic recte habet, &c. سيساما *sesama;* and so also 'Arrianus in *Periplo* meminit φαλάγγων σησαμίνων καὶ ἐβενίνων, palangarum sesaminarum et ebeninarum, quæ ex Indiæ urbe Barygasis in Persidem afferuntur' (Bochart, *l. c.*). The above word is by Dr. Vincent translated *sesamum;* but this is an herbaceous oil plant.

If we look to the modern history of ebony, we shall find that it is still derived from more than one source. Thus, Mr. Holtzappfel, in his recent work on Turning, describes three kinds of ebony. 1. One from the Mauritius, in round sticks like scaffold poles, seldom exceeding fourteen inches in diameter, the blackest and finest in the grain, the hardest and most beautiful. 2. The East Indian, which is grown in Ceylon and the Peninsula of India, and exported from Madras and Bombay in logs from six to twenty and sometimes even twenty-eight inches in diameter, and also in planks. This is less wasteful, but of an inferior grain and colour to the above. 3. The African, shipped from the Cape of Good Hope in billets, the general size of which is from three to six feet long, three to six inches broad, and two to four inches thick. This is the least wasteful, as all the refuse is left behind; but it is the most porous, and the worst in point of colour. No Abyssinian ebony is at present imported: this, however, is more likely to be owing to the different routes which commerce has taken, but which is again returning to its ancient channels, than to the want of ebony in the ancient Ethiopia. From the nature of the climate, and the existence of forests in which the elephant abounds, there can be no doubt of its being well suited to the group of plants which have been found to yield the ebony of Mauritius, Ceylon, and India, namely, the genus Diospyros of botanists. Of this several species yield varieties of ebony as their *heart-wood*, as *D. Ebenum* in the Mauritius, and also in Ceylon, where it is called *kaluwara.* It is described by Retz 'foliis ovato-lanceolatis, acuminatis, gemmis hirtis;' and he quotes as identical *D. glaberrima* (Fr. Rottb. *Nov. Act. Havn.* ii. p. 540, tab. 5). *D. Ebenaster* yields the bastard ebony of Ceylon, and *D. hirsuta*, the Calamander wood of the same island, described by Mr. Holtzappfel as of a chocolate brown colour, with black stripes and marks, and stated by him to be considered a variety of ebony. *D. Melanoxylon* of Dr. Roxburgh is the ebony-tree of Coromandel, and is figured among Coromandel plants (i. No. 46): it grows to be a large tree in the mountainous parts of Ceylon, and in the Peninsula of India—in Malabar, Coromandel, and Orissa. The black part of the wood of this tree alone forms ebony, and is found only in the centre of large trees, and varies in quantity according to the size and age of the tree. The outside wood is white and soft, and is soon destroyed by time and insects, leaving the black untouched (Roxb. *Fl. Ind.* ii. p. 530). Besides these, there is in the Peninsula of India a wood called *blackwood* by the English, and *sit-sal* by the natives: it grows to an immense size, is heavy, close-grained, of a greenish black colour, with lighter coloured veins running in various directions. It is yielded

by the *Dalbergia latifolia*. To the same genus belongs the *Sissoo*, one of the most valued woods of India, and of which the tree has been called *Dalbergia Sissoo*. The wood is remarkably strong, of a light greyish hue, with darker coloured veins. It is called *Sissoo* and *Sheeshum* by the natives of India. This is the name which we believe is referred to by Arab authors, and which also appears to have been the original of the *Sesamina* of Dioscorides and of the Periplus. The name may be applied to other nearly allied woods, and therefore, perhaps, to that of the above *D. latifolia*. It is a curious confirmation of this that Forskäl mentions that, in his time, شیشم *shishum*, with teak and ebony, was among the woods imported from India and Arabia. It is satisfactory to have apparently such satisfactory confirmation of the general accuracy of ancient authors, when we fully understand the subjects and the products of the countries to which they allude.—J. F. R.

HOG. [Boar; Swine.]

HONEY. In the Scripture there are three words denoting different sweet substances, all of which are rendered by 'honey' in the Authorized Version. These it is necessary to distinguish.

1. יַעַר *yaar*, which only occurs in 1 Sam. xiv. 25, 27, 29; Cant. v. 1; and denotes the honey of bees and that only.

2. נֹפֶת *nopeth*, honey that drops, usually associated with the comb, and therefore bee-honey. This occurs in Ps. xix. 10; Prov. v. 3; xxiv. 13; xxvii. 7; Cant. iv. 11.

3. דְּבַשׁ *debesh*. This is the most frequent word. It sometimes denotes bee-honey, as in Judg. xiv. 8, but more commonly a vegetable honey distilled from trees, and called *manna* by chemists; also the syrup of dates, and even dates themselves. It appears also sometimes to stand as a general term for all kinds of honey.

We shall here confine our remarks to honey in general, and that of bees in particular, referring for the vegetable honey to Manna, and for the date-honey to Drink, Strong.

It is very evident that the land of Canaan abounded in honey. It is indeed described as 'a land flowing with milk and honey' (Exod. iii. 8, &c.); which we apprehend to refer to *all* the sweet substances which the different Hebrew words indicate, as the phrase seems too large to be confined to the honey of bees alone. Yet the great number of bees in Palestine has been noticed by many travellers; and they were doubtless still more common in ancient times when the soil was under more general cultivation. A recent traveller, in a sketch of the natural history of Palestine, names bees, beetles, and mosquitoes, as the insects which are most common in the country (Schubert, *Reise ins Morgenlande*, ii. 120).

The natural history of the bee, with illustrations of the passages of Scripture in which its name occurs, has been given under a distinct head [Bee]; and the use of honey in food, under another [Food]. The principal use of the present notice is therefore that of an index to the other articles in which the different parts of this large subject are separately investigated.

The 'wild honey' (μέλι ἄγριον) which, with locusts, formed the diet of John the Baptist, was probably the vegetable honey, which we refer to Manna.

No travellers in the East have given us much information respecting the treatment of bees, or any peculiar modes of preparing the honey.

Honey was not permitted to be offered on the altar (Lev. ii. 11). As it is coupled with leaven in this prohibition, it would seem to amount to an interdiction of things sour and sweet. Aben Ezra and others allege that it was because honey partook of the fermenting nature of leaven, and when burnt yielded an unpleasant smell—qualities incompatible with offerings made by fire of a sweet savour unto the Lord. But Maimonides and others think it was for the purpose of making a difference between the religious customs of the Jews and the heathen, in whose offerings honey was much employed. The first-fruits of honey were, however, to be presented, as these were destined for the support of the priests, and not to be offered upon the altar.

Under the different heads to which we have referred, the passages of Scripture relating to honey are explained. The remarkable incident related in 1 Sam. xiv. 24-32, requires, however, to be here noticed. Jonathan and his party coming to the wood, find honey dropping from the trees to the ground, and the prince extends his rod to the honeycomb to taste the honey. On this the present writer is unable to add anything to what he has stated elsewhere (*Pictorial Bible*, in loc.), which is to the following effect:—First, we are told that the honey was on the ground, then that it dropped, and lastly, that Jonathan put his rod into the honeycomb. From all this it is clear that the honey was bee-honey, and that honey-combs were above in the trees, from which honey dropped upon the ground; but it is not clear whether Jonathan put his rod into a honey-comb that was in the trees or shrubs, or into one that had fallen to the ground, or that had been formed there.

Where wild bees are abundant they form their combs in any convenient place that offers, particularly in cavities or even on the branches of trees; nor are they so nice as is commonly supposed in the choice of situations. In India particularly, and in the Indian islands, the forests often swarm with bees. 'The forests,' says Mr. Roberts, 'literally flow with honey; large combs may be seen hanging on the trees, as you pass along, full of honey' (*Oriental Illustrations*). We have good reason to conclude, from many allusions in Scripture, that this was also, to a considerable extent, the case formerly in Palestine. Rabbi Ben Gershom and others indeed fancy that there were bee-hives placed 'all of a row' by the wayside. If we must needs have bee-hives, why not suppose that they were placed in the trees, or suspended from the boughs? This is a practice in different parts where bees abound, and the people pay much attention to realise the advantages which their wax and honey offer. The woods on the western coast of Africa, between Cape Blanco and Sierra Leone, and particularly near the Gambia, are full of bees, to which the negroes formerly, if they do not now, paid considerable attention for the sake of the wax. They had bee-hives, like baskets, made of reeds and sedge, and hung on the out-boughs of the trees, which the bees easily appropriated for the purpose

of forming their combs in them. In some parts these hives were so thickly placed that at a distance they looked like fruit. There was also much wild honey in the cavities of the trees (Jobson's *Golden Trade*, p. 30, in Astley's Collection). Moore confirms this account, and adds, that when he was there, the Mandingoes suspended in this way straw bee-hives not unlike our own, boarded at the bottom, and with a hole for the bees to go in and out (*Travels into the inland parts of Africa*, Drake's Collection). As to the other supposition, that the honeycomb had been formed on the ground, we think the context rather bears against it; but the circumstance is not in itself unlikely, or incompatible with the habits of wild bees. For want of a better resource they sometimes form their honey in any tolerably convenient spot they can find in the ground, such as small hollows, or even holes formed by animals. Mr. Burchel, in his *Travels in South Africa*, mentions an instance in which his party (Hottentots) obtained about three pounds of good honey from a hole which had formerly belonged to the weazel kind. The natives treated this as a usual circumstance, and indeed their experience in such affairs was demonstrated by the facility with which they managed to obtain the honey without being injured by the bees.

HOOK, HOOKS. The following Hebrew words are so rendered in the English Version: סִיר, צִנָּה, שְׁפַתַּיִם, מְזַמְּרָה, מַזְלֵג, וָו, חַכָּה, חָח. The idea of a *thorn* enters into the etymology of several of them, probably because a thorn, *hooked* or straight, was the earliest instrument of this kind. Tacitus thus describes the dress of the ancient Germans, Sagum, fibula, aut si desit *spina* consertum; a 'loose mantle, fastened with a clasp, or, when that cannot be had, with a thorn' (*Germ.* 17).

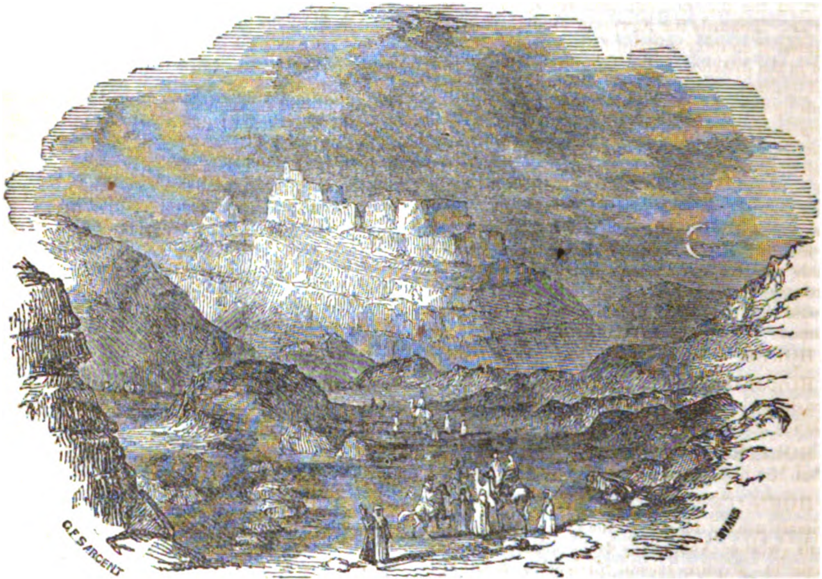
1. חח; (2 Kings xix. 28). 'I will put my hook in thy nose.' Sept. θήσω τὰ ἀγκιστρά μου ἐν τοῖς μυκτῆρσί σου; Vulg. *circulum in naribus tuis*. In the parallel passage (Isa. xxxvii. 29) the Sept. reads, καὶ ἐμβαλῶ φιμὸν εἰς τὴν ῥῖνά σου, 'I will put my *muzzle*, halter, or noose,' &c. Jehovah here intimates his absolute control over Sennacherib, by an allusion to the practice of leading buffaloes, camels, dromedaries, &c., by means of a cord, or of a cord attached to a *ring*, passed through the nostrils (Shaw's *Travels*, pp. 167, 8, 2nd edit.); Job xli. 1 [xl. 25] 'Canst thou draw out Leviathan with a hook? (חכה occurs Isa. xix. 8, and Hab. i. 15; ἀγκίστρον, *hamum*) or his tongue with a cord which thou lettest down? Canst thou place a reed-cord (אגמן, comp. Gr. σχοῖνος) in his nose, or bore through his cheek with a thorn?' (*clasp*, or possibly bracelet, &c.) Sept. ἄξεις δὲ δράκοντα ἐν ἀγκίστρῳ, περιθήσεις δὲ φορβαίαν περὶ ῥῖνα αὐτοῦ; ἢ δήσεις κρίκον ἐν τῷ μυκτῆρι αὐτοῦ, ψελλίῳ δὲ τρυπήσεις τὸ χεῖλος αὐτοῦ. 'Wilt thou draw out a dragon with a hook? Wilt thou bind a band about his nose? Wilt thou fasten a ring in his nose, or bore his lip with a bracelet?' (Vulg. An extrahere poteris Leviathan hamo, et fune ligabis linguam ejus? Nunquid pones circulum in naribus ejus, aut *armilla* perforabis maxillam ejus?) 'Wilt thou put a ring in his nostrils, or bore through his cheek with a *bracelet*?' This passage in Job has undergone the following speculations (see, for instance, Harris's *Nat. Hist. of the Bible*, art. Leviathan, Lond. 1825). It has been assumed, that Bochart has completely proved the Leviathan to mean the *crocodile* (Rosenmüller on Bochart, vol. iii. 737, &c., 769, &c., Lips. 1796). Herodotus has then been quoted, where he relates that the Egyptians near Lake Mœris select a crocodile, render him tame, and suspend ornaments to his ears, and sometimes gems of great value; his fore-feet being adorned with *bracelets* (ii. 69); and the mummies of crocodiles, having their ears thus bored, have been discovered (Kenrick's *Egypt of Herodotus*, p. 97, Lond. 1841). Hence it is concluded that this passage in Job refers to the facts mentioned by Herodotus; and, doubtless, the terms employed, especially by the Sept. and Vulg., and the *third and following verses*, favour the supposition; for there the captive is represented as suppliant and obsequious, in a state of security and servitude, and the object of diversion, 'played with' as with a bird, and serving for the sport of maidens. Herodotus is further quoted to show that in his time the Egyptians captured the crocodile with a hook (ἀγκιστρον), with which (ἐξελκύσθη εἰς τὴν γῆν) he was *drawn* ashore; and accounts are certainly given by modern travellers of the continuance of this practice (Maillet, *Descrip. d'Egypte*, tom. ii. p. 127, ed. Hag., 1740). But does not the *entire description* go upon the supposition of the *impossibility* of so treating *Leviathan?* Supposing the allusions to be correctly interpreted, is it not as much as to say, 'Canst thou treat *him* as thou canst treat the crocodile and *other fierce* creatures?' Dr. Lee has, indeed, given reasons which render it *doubtful*, at least, whether the leviathan *does* mean the crocodile in this passage; or whether it does not mean some species of *whale*, as was formerly supposed; the Delphinus orca communis, or common grampus, found in the Mediterranean, the Red Sea, and also in the Nile. (See his examination of Bochart's reasonings, &c. in *Translation and Notes on Job*, pp. 197 and 529-539, Lond. 1837) [LEVIATHAN]. Ezek. xxix. 4 (חחיים) 'I will put my hooks in thy jaws,' &c. (παγίδας εἰς τας σιαγόνας; *frænum in maxillis tuis*); 'and I will *cause thee to come up out of the midst of thy rivers*,' where the prophet foretells the destruction of Pharaoh king of Egypt, by allusions to the destruction, possibly, of a crocodile, the symbol of Egypt. Thus Pliny (*Hist. Nat.* viii. 25) states, that the Tentyritæ (inhabitants of Egypt) followed the crocodile, swimming after it in the river, sprung upon its back, thrust a bar into its mouth, which being held by its two extremities, serves—*ut frænis in terram agant*—as a bit, enables them *to force it on shore* (comp. Ezek. xxix. 3, 4). Strabo relates that the Tentyritæ displayed their feats before the Romans (xvii. p. 560, ed. Casaub.). But see Dr. Lee on this passage, *ut supra*.

2. ווים, (Exod. xxvi. 32, 37; xxxviii. 19), 'hooks,' αἱ κεφαλίδες, *capita, capita columnarum;* where the Sept. and Jerome seem to have understood the *capitals of the pillars*; and it has been urged that this is more likely to be the meaning than *hooks*, especially as 1775 shekels of silver were used in making these ווים for the pillars, overlaying the chapiters, and filleting them (ch. xxxviii. 28); and that the *hooks* are really the קרסי, *taches* (Exod. xxvi. 6, 11, 33, 35,

xxxix. 33). Yet the Sept. also renders ווים, κρίκοι, 'rings,' or 'clasps' (Exod. xxvii. 10, 11, and ἀγκύλαι, Exod. xxxviii. 17, 19); and from a comparison of these two latter passages it would seem that these hooks, or rather *tenters*, rose out of the chapiters or heads of the pillars.

3. מזלג (1 Sam. ii. 13, 14), 'flesh-hook,' κρεάγρα, *fuscinula*, and the מזלגות, 'the flesh-hooks' (Exod. xxvii. 3, and elsewhere). This was evidently in the first passage, a trident 'of three teeth,' a kind of fork, &c. for turning the sacrifices on the fire, and for collecting fragments, &c. (3.) מזמרות (Is. ii. 4, and elsewhere) 'beat their spears into pruning-hooks' (δρέπανα, *falces*). The Roman poets have the same metaphor (Martial, xiv. 34, 'Falx ex ense'). In Mic. iv. 3, *in ligones*, weeding-hooks, or shovels, spades, &c. Joel reverses the metaphor 'pruning-hooks' into spears (iii. 10, *ligones*); and so Ovid (*Fasti*, i. 697, *in pila ligones*). (4.) שפתים (Ezek. xl. 43), 'hooks,' which Gesenius explains *stalls* in the courts of the Temple, where the sacrificial victims were fastened: our translators give in the margin 'endirons, or the two hearth-stones.' The Sept. seems equally at a loss, καὶ παλαιστὴν ἕξουσι γεῖσος; as also Jerome, who renders it *labia*. Schleusner pronounces γεῖσος to be a barbarous word formed from חיץ, and understands *epistylium*, a little pillar set on another, and *capitellum*, columned. The Chaldee renders עונקלין, short posts in the house of the slaughterers on which to suspend the sacrifices. Dr. Lightfoot, in his chapter 'on the altar, the rings, and the laver,' observes, 'On the north side of the altar were six orders of rings, each of which contained six, at which they killed the sacrifices. Near by were *low pillars* set up, upon which were laid overthwart beams of cedar; on these were fastened rows of *hooks*, on which the sacrifices were hung; and they were flayed on marble tables, which were between these pillars' (See vers. 41, 42; *Works*, vol. 11, ch. xxxiv., Lond. 1684-5-6.) צנה (Amos iv. 2), 'take you away with hooks,' ὅπλοις, *contis*, 'poles' or 'spears.' In the same verse, סירות דוגה, 'fish-hooks,' εἰς λέβητας ὑποκαιομένους ἐμβαλοῦσιν, ἔμπυροι λοιμοί, *et reliquias vestras in ollis ferventibus*, where both Sept. and Vulg. seem to have taken סיר in the sense of a pot or caldron instead of a fish-hook.—J. F. D.

HOPHNI AND PHINEHAS, the sons of Eli, whose misconduct in the priesthood (as described in 1 Sam. ii. 12-17) brought down that doom of ruin and degradation upon the house of Eli which formed the first divine communication through the young Samuel (1 Sam. iii.). Hophni and Phinehas were slain in the battle in which the ark of God was taken by the Philistines, B.C. 1141 (1 Sam. iv. 11). [ELI.]



HOPHRA (חָפְרַע; Sept. Οὐαφρῆ, or PHARAOH-HOPHRA), king of Egypt in the time of Zedekiah king of Judah, and of Nebuchadnezzar king of Babylon. He formed alliance with the former against the latter, and his advance with an Egyptian army constrained the Chaldæans to raise the siege of Jerusalem (Jer. xxxvii. 5); but they soon returned and took and destroyed the city. This momentary aid, and the danger of placing reliance on the protection of Hophra, led Ezekiel to compare the Egyptians to a broken reed, which was to pierce the hand of him that leaned upon it (Ezek. xxix. 6, 7). This alliance was, however, disapproved by God; and Jeremiah was authorized to deliver the prophecy contained in his 44th chapter, which concludes with a prediction of Hophra's death and the subjugation of his country by the Chaldæans [comp. EGYPT].

This Pharaoh-hophra is identified with the Apries or Vaphres of ancient authors, and he may be the Psamatik III. of the monuments. Under this identification we may conclude that his wars with the Syrians and Cyrenæans prevented him from affording any great assistance to Zedekiah. Apries is described by Herodotus (ii. 169) as a monarch who, in the zenith of his glory, felt persuaded that it was not in the power even of a deity to dispossess him of his kingdom, or to shake the stability of his sway; and this account of his arrogance fully accords with that contained in the Bible. Ezekiel (xxix. 3) speaks of this king as 'the great dragon that lieth in the midst of the rivers, which hath said, my river is mine own, and I have made it for myself.' His overthrow and subsequent captivity and death are foretold with remarkable precision by Jeremiah (xliv. 30); 'I will give Pharaoh-hophra, king of Egypt, into the hands of his enemies, and into the hands of them that seek his life.' This was brought about by a revolt of the troops, who placed Amasis at their head, and after various conflicts took Apries prisoner. He was for a time kept in easy captivity by Amasis, who wished to spare his life; but he was at length constrained to give him up to the vengeance of his enemies, by whom he was strangled (Herod. ii. 169; Wilkinson, *Anc. Egyptians*, i. 168-182).

HOR (הֹר, הור; Sept. Ὢρ), a mountain of Arabia Petræa, on the confines of Idumæa, and forming part of the mountain of Seir or Edom. It is only mentioned in Scripture in connection with the circumstances recorded in Num. xx. 22-29. The Israelites were encamped before it, when Aaron was summoned to its top to die there, in the presence of his brother and son, who alone witnessed his final departure [AARON].

The mountain now identified with Mount Hor is the most conspicuous in the whole range of Mount Seir, and at this day bears the name of Mount Aaron (Jebel Haroun). It is in N. lat. 30° 18′ E. long. 35° 33′ about mid-way between the Dead Sea and the Ælanitic Gulf. It may be open to question if this is really the Mount Hor on which Aaron died, seeing that the whole range of Seir was anciently called by that name; yet, from its height and the conspicuous manner in which it rises among the surrounding rocks, it seems not unlikely to have been the chosen scene of the high-priest's death (Kinnear, p. 127). To this may be added that Josephus affirms Mount Hor to have been near Petra; and near *that* place there is certainly no mountain which can contest the distinction with the one now in view. The base of the highest pinnacle of this mountain is in fact but a little removed from the skirts of the city to the westward. The account of it given twenty years since by Captains Irby and Mangles, in their then unpublished volume of Travels, is the best we yet possess, and we therefore present the substance of their description in their own words.

'We engaged an Arab shepherd as our guide, and leaving Abou Raschid with our servants and horses where the steepness of the ascent commences, we began to mount the track, which is extremely steep and toilsome, and affords but an indifferent footing. In some parts the pilgrim must pick his way as he can, and frequently on his hands and knees. Where by nature it would have been impassable there are flights of rude steps or inclined planes, constructed of stones laid together, and here and there are niches to receive the footsteps, cut in the live rock: the impressions of pilgrims' feet are scratched in the rock in many places, but without inscriptions. Much juniper grows on the mountain, almost to the very summit, and many flowering plants which we had not observed elsewhere; some of these are very beautiful; most of them are thorny. On the top there is an overhanging shelf in the rock which forms a sort of cavern: here we found a skin of extremely bad water suspended for drinking, and a pallet of straw, with the pitcher and other poor utensils of the sheikh who resides here. He is a decrepit old man, who has lived here during the space of forty years, and occasionally endured the fatigue of descending and re-ascending the mountain. The tomb itself is enclosed in a small building, differing not at all in external form and appearance from those of Mahommedan saints common throughout every province of Turkey. It has probably been rebuilt at no remote period: some small columns are bedded in the walls, and some fragments of granite and slabs of white marble are lying about. The door is near the south-west angle, within which a constructed tomb, with a pall

342. [Mount Hor.]

thrown over it, presents itself immediately upon entering: it is patched together out of fragments of stone and marble that have made part of other fabrics. Upon one of these are several short lines in the Hebrew character, cut in a slovenly manner: we had them interpreted at Acre, and they proved to be merely the names of a Jew and his family who had scratched this record. It is not probable that any professed Jew has visited the spot for ages past, probably not since the period of the Mahommedan conquest; it may lay claim, therefore, to some antiquity, and in any case is a curious appendage to the testimony of Josephus on the subject. There are rags and shreds of yarn, with glass beads and paras, left as votive offerings by the Arabs.

'Not far from the north-west angle is a passage, descending by steps to a vault or grotto beneath, for we were uncertain which of the two to call it, being covered with so thick a coat of whitewash that it is difficult to distinguish whether it is built or hollowed out. It appeared, in great part at least, a grotto; the roof is covered, but the whole is rude, ill-fashioned, and quite dark. The sheikh, who was not informed that we were Christians, furnished us with a lump of butter. Towards the further end of this dark vault lie the two corresponding leaves of an iron grating, which formerly prevented all nearer approach to the tomb; they have, however, been thrown down, and we advanced so as to touch it; it was covered by a ragged pall. We were obliged to descend barefoot, and were not without some apprehension of treading on scorpions or other reptiles in such a place.'

It is highly interesting to know what view it was which last greeted the eyes of the dying high-priest from this lofty eminence; and it is the more so from the fact that the regions over which the view extends is that in which the Israelites wandered for forty years. Our travellers supply this information:—

'The view from the summit of the edifice is extremely extensive in every direction, and the eye rests on few objects which it can clearly distinguish to give a name to, although an excellent idea is obtained of the general face and features of the country. The chain of Idumæan mountains, which form the western shore of the Dead Sea, seem to run on to the southward, though losing considerably in their height. They appear in this point of view barren and desolate. Below them is spread out a white sandy plain, seamed with the beds of occasional torrents, and presenting much the same features as the most desert parts of the Ghor. Where this desert expanse approaches the foot of Mount Hor, there arise out of it, like islands, several lower peaks and ridges, of a purple colour, probably composed of the same kind of sandstone as that of Mount Hor itself, which, variegated as it is in its hues, presents in the distance one uniform mass of dark purple. Towards the Egyptian side there is an expanse of country without features or limit, and lost in the distance. The lofty district which we had quitted in our descent to Wady Mousa shuts up the prospect on the south-east side; but there is no part of the landscape which the eye wanders over with more curiosity and delight than the crags of Mount Hor itself, which stand up on every side in the most rugged and fantastic forms, sometimes strangely piled one on the other, and sometimes as strangely yawning in clifts of a frightful depth. .... An artist who would study rock-scenery in all its wildest and most extravagant forms would find himself rewarded should he resort to Mount Hor for that sole purpose.'

HOREB. [Sinai.]

HOR-HAGIDGAD, an encampment of the Israelites during their wandering (Num. xxxiii. 32, 33) [Wandering].

HORITES, or HORIM, the people who inhabited Mount Seir before the Edomites [Idumæa].

HORN (קֶרֶן; Gr. κέρας; Lat. *cornu*), from its primary use for defence in the case of horned animals (whence Anacreon's Φύσις κέρατα ταύροις), came to acquire several derivative meanings, some of which are connected with the illustration and right understanding of holy writ. As horns are hollow and easily polished, they have in ancient and modern times been used for drinking-vessels and for military purposes; and as they are the chief source of strength for attack and defence with the animals to which God has given them, they serve in Scripture as emblems of power, dominion, glory, and fierceness (Dan. viii. 5, 9; 1 Sam. xvi. 1, 13; 1 Kings i. 39; Josh. vi. 4, 5; 1 Sam. ii. 1; Ps. lxxv. 5, 10; Jer. xlviii. 25; Ezek. xxix. 21; Amos vi. 13). Hence to defile the horn in the dust (Job xvi. 2), is to lower and degrade oneself, and, on the contrary, to lift up, to exalt the horn (Ps. lxxv. 4; lxxix. 17; cxlviii. 14), is poetically to raise oneself to eminent honour or prosperity, to bear oneself proudly. Something like this is found in classic authors; thus Horace (*Carm.* iii. 21, 18) says,

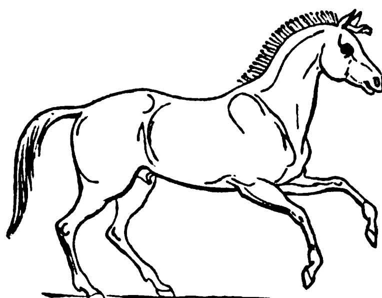
'Tu spem reducis mentibus anxiis
Viresque, et addis cornua pauperi.'

In the East, at present, horns are used as an ornament for the head, and as a token of eminent rank Rosenmüller, *Morg.* iv. 85). The women among the Druses on Mount Lebanon wear on their heads silver horns of native make, 'which are the distinguishing badge of wifehood' (Bowring's *Report on Syria*, p. 8).

343.

By an easy transition, horn came to denote an elevation or hill (Isa. v. 1); in Switzerland mountains still bear this name, thus, Schreckhorn, Buchhorn. The altar of burnt-offerings (Exod. xxvii. 2) and the altar of incense (Exod. xxx. 2), had each at the four corners four horns of shittim-wood, the first being overlaid with brass, the second with gold (Exod. xxxvii. 25; xxxviii. 2; Jer. xvii. 1; Amos iii. 14). Upon the horns of the altar of burnt-offerings was to be smeared with the finger the blood of the slain bullock (Exod. xxix. 12; Lev. iv. 7-18; viii. 15; ix. 9; xvi. 18; Ezek. xliii. 20). By laying hold of these horns of the altar of burnt-offering the criminal found an asylum and safety (1 Kings i. 50; ii. 28). These horns are said to have served as a means for binding the animal destined for sacrifice (Ps. cxviii. 27); but this use Winer (*Handwörterb.*) denies, asserting that they did not and could not answer for such a purpose.

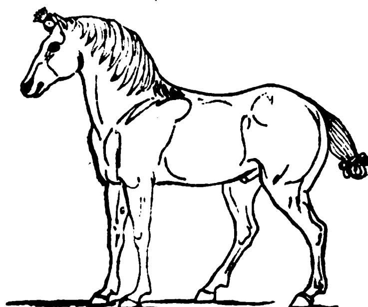
The old painters represented the head of Moses as having two horns proceeding from his temples, one on either side. This practice arose from a mis-translation on the part of the Vulgate of the words found in Exod. xxxiv. 29—cornuta esset facies sua, where it is said in the Common Version 'the skin of his face shone.' The Septuagint seems to have given a good rendering—δεδόξασται ἡ ὄψις τοῦ χρώματος, 'the appearance of his face wore a glory,' or 'nimbus,' that is, rays parting from his head as from a centre, as the Saviour, and, in the Roman Catholic Church, the saints, are often painted—an appearance derived from Moses' interview with God, and designed to convince the Israelites (Rosenmüller, *in loc.*). In a somewhat similar manner the Deity is said (Habak. iii. 4) to have 'had horns coming out of his hands,' that is to say, he was made manifest by lightning and thunder (fulmina).—J. R. B.



HORNET, WASP. (צִרְעָה, Exod. xxiii. 28, Deut. vii. 20; Sept. τὰς σφηκίας; Vulg. *crabrones;* Josh. xxiv. 12, τὴν σφηκίαν, *crabronem;* Wisd. *Sol.* xii. 8, σφῆκας, *vespas*, 'wasps'). The Greek words ἀνθρήνη and σφήξ are given in the lexicons as signifying both 'hornet' and 'wasp,' especially the former of them (Stephens, Scapula,

s. v.); and the Latin *vespa* as denoting the 'wasp,' and *crabro* the 'hornet' (Facciolati, *Lex. s. v.*) But Harduin contends that that which is *vespa* with the Latins is properly with the Greeks ἀνθρήνη (Gallicè, *une guêpe*), and not σφήξ, as was thought by Gaza and Scaliger; and urges that on this point so learned a Latin author as Pliny ought to be considered sufficient evidence; that he ascribes to the *vespæ* those things which Aristotle (*Hist. Anim.* v. 19. 617; ix. 65. 66) ascribes to the ἀνθρῆναι; and, further, that he also ascribes to the *crabrones* those things which Aristotle ascribes to the σφῆκες (comp. Arist. *ut supra;* Pliny, *Hist. Nat.* xi. 24, ed. Harduin, ii. p. 1741). The word *crabrones* Harduin accordingly explains, 'Græcis, σφῆκες; Gallis, *des frelons*, hornets.' If this criticism be just, it vindicates both Jerome's translation of the three first words, and the English also. Our confidence in the definiteness of the Sept. rendering becomes increased when it is remembered that the Pentateuch, the most accurate portion of the whole version, was translated probably within fifty years after the death of Aristotle. Certainly the known characteristics of the hornet agree with the descriptions given of the σφήξ by Aristotle, and of the *crabro* by Pliny. 'The ἀνθρῆναι do not live by the nutriment collected from flowers, as the bees, but prey upon many kinds of flesh; whence also they frequent manure, for they pursue the great flies, and when they have caught them, having removed the head, they fly away, carrying the rest of the body' (*Hist. Anim.* ix.). Again:—*αἱ μὲν ἀνθρῆναι, ἐπὶ μετεώρου τινός· οἱ δὲ σφῆκες, ἐν τρώγλῃ* (*ποιοῦσι κηρία*), 'The ἀνθρῆναι build their nests in some elevated place, but the σφῆκες in a hole or cavity' (v. 19). The description of Pliny is nearly a translation of the above:—'Vespæ in sublimi nidos faciunt, crabrones in cavernis, aut sub terra;' on which Cuvier remarks, 'Sæpe sub tectis, aliquando sub terra vespæ; in *cavis arboribus* crabrones, ædificant' (Plin. *Libri de Animal.* curante J. B. Fr. S. Ajasson De Grandsagne, cum notis a Cuvier, Paris, 1838, p. 424, n. 2).

Still it must be noticed that, as Harduin remarks, with wonder, Pliny, when speaking of the *ichneumones*, a *lesser* species of hornet, calls them *vespæ*, while Aristotle, in the corresponding description, calls them σφῆκες (*N.* 10). It would hence seem probable that the word *vespa* was sometimes used in an analogical and more comprehensive sense by Pliny; which may account for a similar variation in Jerome's rendering, 'vespas' (Wisdom xii. 8). Even the Greek word had already undergone great abuse, for Hesychius, 150 years before Jerome, explains ἀνθρήνη by εἶδος μελίσσης, 'a species of bee'; and Suidas, in the eleventh century, explains it as a species of wasp, and observes that the poets misapplied the word to the *bee* (see also Hom. *Il.* xiii. 167). It being upon the whole most probable, therefore, that 'the hornet' is the true rendering in these passages of Scripture, the only further question which remains is, whether the word is to be taken as literally meaning this well-known and terrific insect, or whether it is to be understood in a metaphorical and figurative sense for diseases, supernatural terror, &c. by which Jehovah 'drove out the Hivites, Canaanites and Hittites from before Israel.' Among the moderns, Michaelis has defended the figurative sense. In addition to other reasons for it, he doubts whether the expulsion of the Canaanites *could* be effected by swarms of σφηκίαι, and proposes to derive the Hebrew from a root signifying 'scourges,' 'plagues,' *scutica, plagæ*, &c. (*Suppl. ad Lexic. Hebr.* vi. 2154); but his reasons are ably refuted by Rosenmüller, apud Bochart (*Hieroz.* Lips. 1796, iii. ch. 13, p. 402, &c.). In favour of the possibility of such an event it is observed, that Ælian relates that the Phaselitæ were actually driven from their locality by such means (Φασηλίτας δὲ σφῆκες κ. τ. λ. *Hist. Anim.* ix. 26), and Bochart has shown that these Phaselitæ were a *Phœnician* people (ut supra, p. 412). Even Rosenmüller himself adopts the figurative sense in his *Scholia* on Exod. xxiii. 28; but on Josh. xxiv. 12 he retracts that opinion, and amply refutes it. His reasonings and refutations have been adopted by numerous writers (among others, see Paxton's *Illustrations of Scripture*, i. 303, &c.; Edin. 1819). Michaelis's doubt of the abstract possibility seems very unreasonable, when the irresistible power of bees and wasps, &c., attested by numerous modern occurrences, and the thin and partial clothing of the Canaanites, are considered. It is observable that the event is represented by the author of the book of Wisdom as a merciful dispensation, by which the Almighty, he says, 'spared as men, the old inhabitants of his holy land,' and 'gave them place for repentance.' If the hornet, considered as a *fly*, was in any way connected with their idolatry, the visitation would convey a practical refutation of their error [see Baalzebub, under BAAL]. It may be remarked, that the hornet, no less than the whole species of wasps, renders an essential service, in checking the multiplication of flies and other insects, which would otherwise become intolerable to man; and that in regard to their architecture, and especially their *instincts* and *habits*, they do not yield to their more popular congener, the bee, but even, in several respects, greatly excel it (Kirby and Spence, *Introduct. to Entomology*, 8vo. Lond. 1828, i. 273, 274; Réaumur, *Mémoire pour servir à l'Histoire des Insectes*, vol. vi. Mem. 6, *pour des Guespes*, 4to. Par. 1734-42).—J. F. D.



HORSE (סוּס *sus;* Gr. ἵππος; Turkish *sukh;* Gen. xlvii. 17; xlix. 17; Exod. xiv. 9, 23, and in many other places; James iii. 3; Rev. vi. 2, &c. Other names and epithets occur in the Hebrew, as פרש *parash*, a 'saddle and chariot horse,' Isa. xxi. 7, 9; פרשים *parashim*, 'Persians' or 'horsemen;' רכש *rechesh*, the 'swift,' Mic. i. 13; רכב *rachab*, 'cavalry,' or 'a group of war chariots,' Gen. l. 9; 2 Sam. viii. 4; רמך *ramach*, 'a mare'?) (Esth. viii. 10; and אבירים *abbirim*, 'mighty or strong ones,' Judg. v. 22; Jer. viii. 16). In the present writer's remarks upon the Hebrew names of the horse, contained in Sir W. Jardine's *Naturalist's Library* (vol. xii., Introduction, pp. 78-81), several are pointed out as of foreign origin. By the subsequent observations in the same work, it appears to be substantiated, that the horse was derived from High Asia, and was not indigenous in Arabia, Syria, or Egypt. They are not mentioned among the presents which Pharaoh bestowed upon Abraham, and occur in Scripture for the first time when the patriarch Joseph receives them from the Egyptians in exchange for bread (Gen. xlvii. 17)—evidently as valuable animals, disposed of singly, and not in

droves or flocks, like cattle and asses. They were still sufficiently important to be expressly mentioned in the funeral procession which accompanied the body of Jacob to his sepulchre in Canaan (Gen. l. 9); and, for centuries after, it does not

844. [Egyptian Horse.]

appear that, under the domestic management of the Egyptians, unless the murrain had greatly reduced them, horses had multiplied as they would have done in a land more congenial to their habits, since only six hundred chariots appear to have pursued Israel (Exod. xiv. 7);—even admitting that there were other chariots and horsemen not included in that number. In the sculptured battle-scenes, which are believed to represent victories of Sesostris, or of Thothmes II. and III., over nations of Central Asia, it is evident that the enemy's armies, as well as the foreign allies of Egypt, are abundantly supplied with horses, both for chariots and for riders; and in triumphal processions they are shown as presents or tribute—proving that they were portions of the national wealth of conquered states sufficiently valuable to be prized in Egypt. At a later period, the books of Deuteronomy (xvii. 16, for the future kings of Israel are forbidden to possess many)

845 [Persian Horse.]

and Joshua (xi. 4) furnish similar evidence of abundance of horses in the plains of Syria; and in Job occurs a description of a perfect war-horse couched in the bold figurative language of inspiration, such as remains unequalled by any other poet, ancient or modern. Though the Israelites had chariots and horsemen opposed to them in the plain country from their first entrance into the land of promise; as in Judges iv. 15, where we find Sisera with his chariots of war defeated at the foot of Mount Tabor; yet not being intended to make military conquests beyond the mountain basin and the adjacent territory assigned them, they long remained without cavalry or chariots themselves (Deut. xvii. 16; 2 Sam. viii. 4): they obeyed the divine injunction to abstain from possessing horses, and, to the time of David, ham-strung such as they captured from their enemies. It appears, however, that a small cavalry force was raised by him; and as, in all the military operations of Western Asia, there was a tendency to increase the mounted force and neglect the infantry, on the full establishment of royalty, when the Hebrew government acquired a more political structure, the reign of Solomon displayed a military system which embraced a regular body of horse and of chariots, evidently become the more necessary, since the limits of his sway were extended to the shores of the Arabian Gulf, and far into the Syrian desert (1 Kings x. 26). Solomon likewise acted with commercial views in the monopolizing spirit which Eastern sovereigns have been prone to exercise in all ages. He bought chariots and teams of horses in Egypt, and probably in Armenia, 'in all lands,' and had them brought into his dominions in strings, in the same manner as horses are still conducted to and from fairs: for this interpretation, as offered by Professor Paxton, appears to convey the natural and true meaning of the text; and not 'strings of linen yarn,' which here seem to be out of place (2 Chron. i. 16, 17; ix. 25, 28).

The Tyrians purchased these objects from Solomon, and, in the time of Ezekiel, imported horses themselves from Togarmah or Armenia. On returning from the Babylonish captivity, the common possession of horses in Palestine was no longer opposed; for Nehemiah numbers seven hundred and thirty-six belonging to the liberated Hebrews (Neh. vii. 68).

All the great original varieties or races of horses were then known in Western Asia, and the Hebrew prophets themselves have not unfrequently distinguished the nations they had in view, by means of the predominant colours of their horses—and that more correctly than commentators have surmised. Taking Bochart's application of the Hebrew names, the bay race, אדום *adom*, emphatically belonged to Egypt and Arabia Felix; the white, לבנים *lebonim*, to the regions above the Euxine Sea, Asia Minor, and northern High Asia; the dun, or cream-coloured, שרקים *serukim*, to the Medes; the spotted piebald, or skewbald, ברדים *berudim*, to the Macedonians, the Parthians, and later Tahtars; and the black, שחורים *shachorim*, to the Romans; but the chesnuts, אמוץ *amutz*, do not belong to any known historical race (Zech. i. 8; vi. 2).

Bay or red horses occur most frequently on Egyptian painted monuments, this being the primitive colour of the Arabian stock; but white horses are also common, and, in a few instances, black—the last probably only to relieve the paler colour of the one beside it in the picture. There is also, we understand, an instance of a spotted pair, tending to show that the valley of the Nile was originally supplied with horses from foreign sources, and distinct regions, as indeed the tribute pictures further attest. The spotted, if not real, but painted horses, indicate the antiquity of a practice still in vogue; for staining the hair of riding animals with spots of various colours, and

dyeing their limbs and tails crimson, is a practice of common occurrence in the East, and was exemplified in London when the late Shah of Persia presented the Prince Regent with several white and grey horses, all of which were ridden to Carlton Palace with their tails dyed crimson, as we ourselves witnessed [Ass].

On the natural history of the horse there is no occasion to enter in this place; but it may be proper to notice that the riding bridle was long a mere slip-knot, passed round the under jaw into the mouth, thus furnishing only one rein; and that a rod was commonly added to guide the animal with more facility. The bridle, however, and the reins of chariot-horses were, at a very early age, exceedingly perfect; as the monuments of Egypt, Etruria, and Greece, amply prove. Saddles were not used, the rider sitting on the bare back, or using a cloth or mat girded on the animal. The Romans, no doubt copying the Persian Cataphractæ, first used pad saddles, and from the northern nations adopted stimuli or spurs. Stirrups were unknown. Avicenna first mentions the *rikiab*, or Arabian stirrup, perhaps the most ancient; although in the tumuli of Central Asia, Tahtar horse skeletons, bridles, and stirrup saddles, have been found along with idols; which proves the tombs to be more ancient than the introduction of Islam. With regard to horse-shoeing, Bishop Lowth and Bracy Clark were mistaken in believing that the Roman horse or mule shoe was fastened on without nails driven through the horny part of the hoof, as at present. A contrary conclusion may be inferred from several passages in the poets; and the figure of a horse in the Pompeii battle mosaic, shod in the same manner as is now the practice, leaves little doubt on the question. The preceding cuts represent ancient Persian and Egyptian horses, both taken from antique bas-reliefs.—C. H. S.

HORSE-LEECH. [ALUKAH.]

HOSANNA (הוֹשִׁיעָה נָּא; New Test. Ὡσαννά), a form of acclamatory blessing or wishing well, which signifies, Save now! Succour now! Be now propitious! It occurs in Matt. xxi. 9 (also Mark xi. 9, 10; John xii. 13)—'Hosanna to the Son of David; Blessed is he that cometh in the name of the Lord; Hosanna in the highest.' This was on the occasion of our Saviour's public entry into Jerusalem, and fairly construed, would mean, 'Lord, preserve this Son of David; heap favours and blessings on him!' It is further to be observed that Hosanna was a customary form of acclamation at the Feast of Tabernacles. This feast was celebrated in September, just before the commencement of the civil year; on which occasion the people carried in their hands bundles of boughs of palms, myrtles, &c. (Joseph. *Antiq.* xiii. 13. 6; iii. 10. 4). They then repeated the 25th and 26th verses of Ps. cxviii., which commence with the word Hosanna; and from this circumstance they gave the boughs, and the prayers, and the feast itself, the name of Hosanna. They observed the same forms also at the Encænia (1 Macc. x. 6, 7; 2 Macc. xiii. 51; Rev. vii. 9) and the Passover. And as they celebrated the Feast of Tabernacles with great joy and gladness, in like manner, on this occasion, did they hail the coming of the Messiah, whose advent they believed to be represented in all the feasts.

HOSEA (הוֹשֵׁעַ), the first in order of the minor prophets in the common editions of the Hebrew Scriptures, as well as of the Alexandrian and Vulgate translations. The arrangement of the other writers, in the Δωδεκαπρόφητον of the Greek version, differs considerably from that of the Hebrew copies. Jerome (*Præf. in* XII. *Prophetas*) says, 'Non idem est ordo duodecim prophetarum apud Hebræos qui est apud nos.' Both, however, place Hosea first in the catalogue; yet the reasons often assigned for the priority of place which this prophet enjoys are by no means satisfactory. They are founded on a misinterpretation of the first clause of the second verse of his oracles, תחלת דבר־יהוה, 'the beginning of the word of the Lord.' Hengstenberg (*Christology*, Keith's translation, vol. ii. p. 23), denying, against Winer and Gesenius, that דבר is a noun, and taking it to be the præter of pi'hel, renders the clause, 'the beginning of the Lord hath spoken;' the status constructus of תחלת, according to him, being explained by the fact 'that the whole following proposition is treated as one substantive idea.' But this phraseology has reference not to priority of time in Hosea's commission as compared with other prophets, but to the early period of the predictions to which it is the introduction. It is merely an intimation that they were the first divine communications which the son of Beeri enjoyed. Neither did Hosea flourish earlier than all the other minor prophets: the very early era assigned to him by the Jewish writers and other expositors of former times are altogether extravagant. By the best computation he seems to have been preceded by Joel, Amos, and Jonah. The prophets are thus arranged by De Wette (*Einleitung*, § 225):—

Hebrew Text.	Greek Text.
1. Hosea.	1. Hosea.
2. Joel.	2. Amos.
3. Amos.	3. Micah.
4. Obadiah.	4. Joel.

Chronological Order.

1. Joel, about	810 B.C.
2. Jonah "	810 B.C.
3. Amos "	790 B.C.
4. Hosea "	785 B.C.

The table given by Rosenmüller (*Scholia in Min. Proph.* p. 7) differs from this only in placing Jonah before Joel in chronological order. Compare Newcome (*Preface to Minor Prophets*, p. 45). The probable causes of this location of Hosea may be the thoroughly national character of his oracles, their length, their earnest tone and vivid representations: because he discharged the duties of his office for a longer period than any of his prophetic associates, is the less natural conjecture which has been hazarded by Rosenmüller. The contour of Hosea's book has a closer resemblance to the greater prophets than any of the eleven productions by which it is succeeded.

The name of this prophet has been variously interpreted. Jerome erroneously renders it 'Salvator.' It may be either the infinitive absolute, 'Salvando,' or the imperative, 'Salva' (O Deus). It is ordinarily written in Greek, Ὡσηέ, and once with the initial aspirate, Ὡσηέ (Rom. ix. 25). The figments of Jewish writers regarding Hosea's parentage need scarcely be mentioned. His father, בְּאֵרִי, has been confounded with בְּאֵרָה, a prince

of the Reubenites, 1 Chron. v. 6. So, too, Beeri has been reckoned a prophet himself, according to the rabbinical notion that the mention of a prophet's father in the introduction to his prophecies is a proof that sire as well as son was endowed with the oracular spirit.

Whether Hosea was a citizen of Israel or Judah has been disputed. The pseudo-Epiphanius and Dorotheus of Tyre speak of him as being born at Belemoth, in the tribe of Issachar (Epiphan. *De Vitis Prophet.* cap. xi.; Doroth. *De Proph.* cap. i.). Drusius (*Critici Sacri*, in loc., tom. v.) prefers the reading 'Beth-semes,' and quotes Jerome, who says, 'Osee de tribu Issachar fuit ortus in Beth-semes.' But Maurer contends strenuously that he belonged to the kingdom of Judah (*Comment. Theol.*, ed. Rosenmüller, vol. ii. p. 391); while Jahn supposes that he exercised his office, not, as Amos did, in Israel, but in the principality of Judah. Maurer appeals to the superscription in Amos as a proof that prophets of Jewish origin were sometimes commissioned to labour in the kingdom of Israel (against the appeal to Amos, vide Credner, *Joel*, p. 66, and Hitzig, *Handb. Kurzge. exeget zum A. T.* p. 72). But with the exception of the case recorded in 1 Kings xiii. 1 (a case altogether too singular and mysterious to serve as an argument), the instance of Amos is a solitary one, and seems to have been regarded as anomalous by his contemporaries (Amos vii. 12). Neither can we assent to the other hypothesis of Maurer, that the mention of the Jewish kings Uzziah, Jotham, Ahaz, and Hezekiah, by Hosea in his superscription, is a proof that the seer regarded them as his rightful sovereigns, as monarchs of that territory which gave him birth. Hengstenberg has well replied, that Maurer forgets 'the relation in which the pious in Israel generally, and the prophets in particular, stood to the kingdom of Judah. They considered the whole separation, not only the religious, but also the civil, as an apostacy from God. The dominion of the theocracy was promised to be the throne of David.' The lofty Elijah, on a memorable occasion, when a direct and solemn appeal was made to the head of the theocracy, took *twelve* stones, one for each tribe—a proof that he regarded the nation as one in religious confederation. It was also necessary, for correct chronology, that the kings of both nations should be noted. Jeroboam of Israel is mentioned as a means of ascertaining at what period in the long reign of Uzziah Hosea began to prophesy, and Uzziah's successors are named in particular, because the confusion and anarchy of the several interregna in the kingdom of Israel rendered computation by the names of Jeroboam's successors very awkward, difficult, and uncertain. The other argument of Maurer for Hosea's being a Jew, viz. because his own people are so severely threatened in his reproofs and denunciations, implies a predominance of national prepossession or antipathy in the inspired breast which is inconsistent with our notions of the piety and patriotism of the prophetic commission (Knobel, *Der Prophetismus der Hebräer*, vol. i. p. 203). So that we accede to the opinion of De Wette, Rosenmüller, Hengstenberg, Eichhorn, Manger, Uhland, and Kuinoel, that Hosea was an Israelite, a native of that kingdom with whose sins and fates his book is specially and primarily occupied.

There is no reason, with De Wette, Maurer, and Hitzig, to doubt the genuineness of the present superscription, or, with Rosenmüller and Jahn, to suppose that it may have been added by a later hand—though the two last writers uphold its authenticity. The first and second verses of the prophecy are so closely connected in the structure of the language and style of the narration, that the second verse itself would become suspicious, if the first were reckoned a spurious addition. The superscription determines the length of time during which Hosea prophesied. That period was both long and eventful, commencing in the days of Jeroboam, the son of Joash, extending through the lives of Uzziah, Jotham, Ahaz, and concluding in the reign of Hezekiah. Uzziah and Jeroboam were contemporary sovereigns for a certain length of time. If we compute from the first year of Uzziah to the last of Hezekiah, we find a period of 113 years. Such a period appears evidently to be too long, and the most probable calculation is to reckon from the last years of Jeroboam to the first of Hezekiah.

We have then at least of		Uzziah's	reign	26	years.
„	„	Jotham	„	16	„
„	„	Ahaz	„	16	„
„	„	Hezekiah	„	2	„
				60*	

This calculation is as close an approximation as it is now possible to obtain. At some point within the last fourteen years of Jeroboam Hosea began to prophesy. From the death of Jeroboam to the beginning of Hezekiah, at an ordinary calculation, are fifty-seven or fifty-eight years. Bishop Horsley extends the period considerably longer (*Commentary on Hosea*; *Works*, vol. iii. p. 234). We do not understand the principle of Rosenmüller's computation, which reduces the time between Jeroboam's death and Hezekiah's accession to a period of almost forty years. We agree with Maurer's remark (*Comment. Gram. Hist. Crit. in Prophetas Minores*, Lipsiæ, 1840), 'Alii annos quadraginta numerant nescio quem computandi modum secuti.' This long duration of office is not improbable, and the book itself furnishes strong presumptive evidence in support of this chronology. The first prophecy of Hosea foretells the overthrow of Jehu's house; and the menace was fulfilled on the death of Jeroboam, his great-grandson. 'This was the word of the Lord which he spake unto Jehu, saying, Thy sons shall sit on the throne of Israel unto the fourth generation; and so it came to pass' (2 Kings xv. 12). A prediction of the ruin which was to overthrow Jehu's house at Jeroboam's death, must have been uttered during Jeroboam's life. This fact defines the period of Hosea's commencement of his labours, and verifies the inscription, which states that the word of the Lord came to him in the reign of Jeroboam, the son of Joash, king of Israel. Again, in ch. x. 14, allusion is made to an expedition of Shalmanezer against Israel; and if it was the first inroad against king Hoshea, who began to reign in the twelfth year of Ahaz, the event referred to by the prophet as past must have happened close upon the beginning of the govern-

* Maurer, in the *Comment. Theol.* p. 284, and more lately in his *Comment. Gram. Hist. Crit. in Proph. Min.*, Lipsiæ, 1840.

ment of Hezekiah (2 Kings xvii. 5). Data are thus in like manner afforded to corroborate the statement that Hezekiah had ascended the throne ere the long-lived servant of Jehovah was released from his toils. The extended duration indicated in the superscription is thus borne out by the contents of the prophecy.

The years of Hosea's life were melancholy and tragic. The vials of the wrath of heaven were poured out on his apostate people. The nation suffered under the evils of that schism which was effected by the craft of him who has been branded with the indelible stigma—'Jeroboam, who made Israel to sin.' The obligations of law had been relaxed, and the claims of religion disregarded; Baal became the rival of Jehovah, and in the dark recesses of the groves were practised the impure and murderous rites of heathen deities; peace and prosperity fled the land, which was harassed by foreign invasion and domestic broils; might and murder became the twin sentinels of the throne; alliances were formed with other nations, which brought with them seductions to paganism; captivity and insult were heaped upon Israel by the uncircumcised; the nation was thoroughly debased, and but a fraction of its population maintained its spiritual allegiance (2 Kings xix. 18). The death of Jeroboam II. was followed by an interregnum of ten years. At the expiry of this period, his son Zechariah assumed the sovereignty, and was slain by Shallum, after the short space of six months (2 Kings xv. 10). In four weeks Shallum was assassinated by Menahem. The assassin, during a disturbed reign of ten years, became tributary to the Assyrian Pul. His successor, Pekahiah, wore the crown but two years, when he was murdered by Pekah. Pekah, after swaying his bloody sceptre for twenty years, met a similar fate in the conspiracy of Hoshea; Hoshea, the last of the usurpers, after another interregnum of eight years, ascended the throne, and his administration of nine years ended in the overthrow of his kingdom and the expatriation of his people. 'The Lord was very angry with Israel, and removed them out of his sight. So was Israel carried out of their own land to Assyria unto this day' (2 Kings xvii. 18, 23).

The prophecies of Hosea were directed especially against the country whose sin had brought upon it such disasters—prolonged anarchy and final captivity. Israel, or Ephraim, is the people especially addressed. Their homicides and fornications, their perjury and theft, their idolatry and impiety are censured and satirised with a faithful severity. Judah is sometimes, indeed, introduced, warned and admonished. Bishop Horsley (*Works*, iii. 236) reckons it a mistake to suppose 'that Hosea's prophecies are almost wholly directed against the kingdom of Israel.' The bishop describes what he thinks the correct extent of Hosea's commission, but has adduced no proof of his assertion. Any one reading Hosea will at once discover that the oracles having relation to Israel are primary, while the references to Judah are only incidental. In ch. i. 7, Judah is mentioned in contrast with Israel, to whose condition the symbolic name of the prophet's son is specially applicable. In ver. 11 the future union of the two nations is predicted. The long oracle in ch. ii. has no relation to Judah, nor the symbolic representation in ch. iii. Ch. iv. is severe upon Ephraim, and ends with a very brief exhortation to Judah not to follow his example. In the succeeding chapters allusions to Judah do indeed occasionally occur, when similar sins can be predicated of both branches of the nation. The prophet's mind was intensely interested in the destinies of his own people. The nations around him are unheeded; his prophetic eye beholds the crisis approaching his country, and sees its cantons ravaged, its tribes murdered or enslaved. No wonder that his rebukes were so terrible, his menaces so alarming, that his soul poured forth its strength in an ecstasy of grief and affection. Invitations, replete with tenderness and pathos, are interspersed with his warnings and expostulations. Now we are startled with a vision of the throne, at first shrouded in darkness, and sending forth lightnings, thunders, and voices; but while we gaze, it becomes encircled with a rainbow, which gradually expands till it is lost in that universal brilliancy which itself had originated (ch. xi. and xiv.).

The peculiar mode of instruction which the prophet details in the first and third chapters of his oracles has given rise to many disputed theories. We refer to the command expressed in ch. i. 2—'And the Lord said unto Hosea, Go, take unto thee a wife of whoredoms and children of whoredoms,' &c.; ch. iii. 1, 'Then said the Lord unto me, Go yet, love a woman beloved of her friend, yet an adulteress,' &c. What was the precise nature of the transactions here recorded? Were they real events, the result of divine injunctions literally understood, and as literally fulfilled? or were these intimations to the prophet only intended to be pictorial illustrations of the apostacy and spiritual folly and unfaithfulness of Israel? The former view, viz. that the prophet actually and literally entered into this impure connubial alliance, was advocated in ancient times by Cyril, Theodoret, Basil, and Augustine; and more recently has been maintained by Mercer, Grotius, Houbigant, Manger, Horsley, and Stuck. Fanciful theories are also rife on this subject. Luther supposed the prophet to perform a kind of drama in view of the people, giving his lawful wife and children these mystical appellations. Newcome (*Min. Prophets*) thinks that a wife of fornication means merely an Israelite, a woman of apostate and adulterous Israel. So Jac. Capellus (*In Hoseam; Opera*, p. 683). Hengstenberg supposes the prophet to relate actions which happened, indeed, actually, but not outwardly. Some, with Maimonides (*Moreh Nevochim*, part ii.), imagine it to be a nocturnal vision; while others make it wholly an allegory, as the Chaldee Paraphrast, Jerome, Drusius, Bauer, Rosenmüller, Kuinoel, and Lowth. The view of Hengstenberg, and such as have held his theory (Markii *Diatribe de uxore fornicationum accipienda*, &c. Lugd. Batav. 1696), is not materially different from the last to which we have referred. Both agree in condemning the first opinion, which the fast and forward mind of Horsley so strenuously maintained. Hengstenberg, at great length and with much force, has refuted this strange hypothesis (*Christology*, ii. 11-22). Besides other arguments resting on the impurity and loathsomeness of the supposed nuptial contract, it may be argued against the external reality of the event, that it must have required several years

for its completion, and that the impressiveness of the symbol would therefore be weakened and obliterated. Other prophetic transactions of a similar nature might be referred to. Jerome (*Comment. in loc.*) has referred to Ezek. iv. 4. It is not to be supposed, as has sometimes been argued, that the prophet was commanded to commit fornication. The divine injunction was to marry—'Scortum aliquis ducere potest sine peccato, scortari non item.' Drusius (*Comm. in loc. in Critici Sacri*, tom. v.). Whichever way this question may be solved; whether these occurrences be regarded as a real and external transaction, or as a piece of spiritual scenery, or only, as is most probable (Witsii *Miscell. Sac.* p. 90), an allegorical description, it is agreed on all hands that the actions are typical; that they are, as Jerome calls them, *sacramenta futurorum*.

Expositors are not at all agreed as to the meaning of the phrase 'wife of whoredoms,' אשת זנונים; whether the phrase refers to harlotry before marriage, or unfaithfulness after it. It may afford an easy solution of the difficulty, if we look at the antitype in its history and character. Adultery is the appellation of idolatrous apostacy. The Jewish nation were espoused to God. The contract was formed on Sinai; but the Jewish people had prior to this period gone a-whoring. Josh. xxiv. 2-14, 'Your fathers dwelt on the other side of the flood in old time, and they served other gods.' Comp. Lev. xvii. 7, in which it is implied that idolatrous propensities had also developed themselves during the abode in Egypt: so that אשת זנונים may signify one devoted to lasciviousness prior to her marriage. The marriage must be supposed a real contract, or its significance would be lost. Jer. ii. 2, 'I remember thee, the kindness of thy youth, the love of thine espousals, when thou wentest after me in the wilderness, in a land that was not sown.' ילדי זנונים, *children of whoredoms*, refer most naturally to the two sons and daughter afterwards to be born. They were not the prophet's own, as is intimated in the allegory, and they followed the pernicious example of the mother. Spiritual adultery was the debasing sin of Israel. 'Non dicitur,' observes Manger, 'cognovit uxorem, sed simpliciter concepit et peperit.' The children are not his. It is said, indeed, in verse 3, 'She bare *him* a son.' The word לו is wanting in some MSS. and in some copies of the Septuagint. If genuine it only shows the effrontery of the adulteress, and the patience of the husband in receiving and educating as his own a spurious brood. The Israelites, who had been taken into covenant, very soon fell from their first love, and were characterized by insatiable spiritual wantonness: yet their Maker, their husband, did not at once divorce them, but exhibited a marvellous long-suffering.

The names of the children being symbolical, the name of the mother has probably a similar signification. גמר בת־דבלים may have the symbolic sense of 'one thoroughly abandoned to sensual delights:' גמר signifies completion (Ewald, *Gram.* 228); בת־דבלים, 'daughter of grape-cakes,' the dual form being expressive of the mode in which these dainties were baked in double layers. The Greek form, παλάθη, is apparently a corruption of the Hebrew דבלה. The names of the children are יזרעאל, Jezreel, לא רחמה, Lo-ruhamah, and לא עמי, Lo-ammi. The prophet explains the meaning of the appellations. It is generally supposed that the names refer to three successive generations of the Israelitish people. Hengstenberg, on the other hand, argues that 'wife and children both are the people of Israel: the three names must not be considered separately, but taken together.' But as the marriage is first mentioned, and the births of the children are detailed in order, some time elapsing between the events, we rather adhere to the ordinary exposition. Nor is it without reason that the second child is described as a female.

The first child, Jezreel, may refer to the first dynasty of Jeroboam I. and his successors, which was terminated in the blood of Ahab's house which Jehu shed at Jezreel. The name suggests also the cruel and fraudulent possession of the vineyard of Naboth, 'which was in Jezreel,' where, too, the woman Jezebel was slain so ignominiously (1 Kings xvi. 1; 2 Kings ix. 21). But as Jehu and his family had become as corrupt as their predecessors, the scenes of Jezreel were again to be enacted, and Jehu's race must perish. Jezreel, the spot referred to by the prophet, is also, according to Jerome, the place where the Assyrian army routed the Israelites. The name of this child associates the past and future, symbolizes past sins, intermediate punishments, and final overthrow. The name of the second child, Lo-ruhamah, 'not-pitied,' the appellation of a degraded *daughter*, may refer to the *feeble, effeminate* period which followed the overthrow of the first dynasty, when Israel became weak and helpless as well as sunk and abandoned. The favour of God was not exhibited to the nation: they were as abject as impious. But the reign of Jeroboam II. was prosperous; new energy was infused into the kingdom; gleams of its former prosperity shone upon it. This revival of strength in that generation may be typified by the birth of a third child, a *son*, Lo-ammi, 'not-my-people' (2 Kings xiv. 25). Yet prosperity did not bring with it a revival of piety; still, although their vigour was recruited, they were not God's people (*Lectures on the Jewish Antiquities and Scriptures*, by J. G. Palfrey, vol. ii. 422, Boston, N.A., 1841). The space we have already occupied precludes more minute criticism; but the general principles we have indicated may be applied to the second and third chapters.

Recent writers, such as Bertholdt, Eichhorn, De Wette, Stuck, Maurer, and Hitzig, have laboured much, but in vain, to divide the book of Hosea into separate portions, assigning to each the period at which it was written; but from the want of sufficient data the attempt must rest principally on taste and fancy. A sufficient proof of the correctness of this opinion may be found in the contradictory sections and allotments of the various writers who have engaged in the task. Chapters i. ii. and iii. evidently form one division: it is next to impossible to separate and distinguish the other chapters. The form and style are very similar throughout all the second portion.

The peculiarities of Hosea's style have been often remarked. Jerome says of him, 'Com-

maticus est, et quasi per sententias loquens' (*Præf. ad XII. Proph.*). His style, says De Wette, 'is abrupt, unrounded, and ebullient; his rhythm hard, leaping, and violent. The language is peculiar and difficult' (*Einleitung*, § 228). Lowth (*Prælect.* 21) speaks of him as the most difficult and perplexed of the prophets. Bishop Horsley has remarked his peculiar idioms,—his change of person, anomalies of gender and number, and use of the nominative absolute (*Works*, vol. iii.). Eichhorn's description of his style was probably at the same time meant as an imitation of it (*Einleitung*, § 555):—'His discourse is like a garland woven of a multiplicity of flowers: images are woven upon images, comparison wound upon comparison, metaphor strung upon metaphor. He plucks one flower, and throws it down that he may directly break off another. Like a bee he flies from one flower-bed to another, that he may suck his honey from the most varied pieces. It is a natural consequence that his figures sometimes form strings of pearls. Often is he prone to approach to allegory—often he sinks down in obscurity' (comp. ch. v. 9; vi. 3; vii. 8; xiii. 3, 7, 8, 16). Unusual words and forms of connection sometimes occur (De Wette, § 228). Of the former, examples are to be found in ch. viii. 13, הבהבים; xiii. 5, תלאובות; x. 2, ערף; xi. 7, תלוא; v. 13; x. 6, מלך ירב; of the latter, in ch. vii. 16, לא על; ix. 8, צפה עם; xiv. 3. נשלמה פרים שׂפתינו. Many examples occur of the *comparatio decurtata*, arising from the peculiar abruptness of the style; the particles of connection, causal, adversative, transitive, &c. being frequently omitted.

Hosea, as a prophet, is expressly quoted by Matthew (ii. 15). The citation is from the first verse of ch. xi. Hosea vi. 6 is quoted twice by the same evangelist (ix. 13; xii. 7). Quotations from his prophecies are also to be found in Rom. ix. 25, 26. References to them occur in 1 Cor. xv. 55, and in 1 Pet. ii. 10. Messianic references are not clearly and prominently developed (Gramberg, *Religionsid.* ii. 298). This book, however, is not without them; but they lie more in the spirit of its allusions than in the letter. Hosea's Christology appears written not with ink, but with the spirit of the living God, on the fleshly tables of his heart. The future conversion of his people to the Lord their God, and David their king, their glorious privilege in becoming sons of the living God, the faithfulness of the original promise to Abraham, that the number of his spiritual seed should be as the sand of the sea, are among the oracles whose fulfilment will take place only under the new dispensation.

Hengstenberg (vol. ii. 1) gives a long commentary on the introductory chapters. In his *Die authentie des Pentateuches, Ersten Band*, s. 49-82, occur also many important remarks on this book of prophecy, especially proving how much its style and form are based on the language and peculiar idioms of the Pentateuch. The argument is triumphant and conclusive.

Of commentaries on Hosea, distinct from those on the minor prophets generally, may be mentioned Burrough's *Exposition of Hosea*, Lond. 1643; Seb. Schmidt, *Comment. in Hoseam*, Francf. 1687; Ed. Pocock, *Comment. on Hosea*, Oxf. 1685; Manger, *Commentarius in Hoseam*, Campis. 1782; Chr. Fr. Kuinoel, *Hoseæ Oracula, Hebr. et Lat. perpetua annotatione illustravit*, Lipsiæ, 1792; L. Jos. Uhland, *Annotationes in Hoseam*, Tüb. 1785-1797; Horsley, *Hosea, translated from the Hebrew, with Notes, explanatory and critical*, Lond. 1801-4; Stuck, *Hoseas Propheta*, Lipsiæ, 1828; Schröder, *Hoschea, Joel, und Amos, uebersetzt und erläutert*, Leipz. 1829; De Wette, *Ueber die geschichtliche Beziehung der prophetischen Reden des Hoseas*, in *Theol. Stud. und Crit.* 1831, s. 807; Rückert, *Die Hebraischen Propheten uebersetzt*, &c., 1831; Hitzig, *Die 12 kleinen Proph. erklärt*, 1838.—J. E.

HOSEA, son of Elah, and last king of Israel. He conspired against and slew his predecessor Pekah, and seized his dominions. 'He did evil in the sight of the Lord,' but not in the same degree as his predecessors: and this, by the Jewish commentators, is understood to mean that he did not, like former kings of Israel (2 Kings xv. 30), restrain his subjects from going up to Jerusalem to worship. The intelligence that Hosea had entered into a confederacy with So, king of Egypt, with the view of shaking off the Assyrian yoke, caused Shalmaneser, the king of Assyria, to march an army into the land of Israel; and after a three year's siege Samaria was taken and destroyed, and the ten tribes were sent into the countries beyond the Euphrates, B.C. 720 (2 Kings xv. 30; xvii. 1-6; xviii. 9-12). The chronology of this reign is much perplexed [see CHRONOLOGY, ISRAEL].

HOSPITALITY. The practice of receiving strangers into one's house and giving them suitable entertainment, may be traced back to the early origin of human society. It is not, however, confined to any age or to any country, but has been observed in all parts of the globe wherever circumstances have been such as to render it desirable—thus affording one among many instances of the readiness with which human nature, in its moral as well as in its physical properties, adapts itself to every varying condition. Hospitality is therefore not a peculiarly Oriental virtue. It was practised, as it still is, among the least cultivated nations (Diod. Sic. v. 28, 34; Cæs. *Bell. Gall.* vi. 23; Tac. *Germ.* 21). It was not less observed, in the early periods of their history, among the Greeks and Romans. With the Greeks, hospitality (ξενία) was under the immediate protection of religion. Jupiter bore a name (ξένιος) signifying that its rights were under his guardianship. In the *Odyssey* (vi. 206) we are told expressly that all guests and poor people are special objects of care to the gods. There were both in Greece and Italy two kinds of hospitality, the one private, the other public. The first existed between individuals, the second was cultivated by one state towards another. Hence arose a new kind of social relation: between those who had exercised and partaken of the rites of hospitality an intimate friendship ensued,—a species of freemasonry, which was called into play wherever the individuals might afterwards chance to meet, and the right, duties, and advantages of which passed from father to son, and were deservedly held in the highest estimation.

But though not peculiarly Oriental, hospitality has nowhere been more early or more fully prac-

tised than in the East. It is still honourably observed among the Arabs, especially at the present day. An Arab, on arriving at a village, dismounts at the house of some one who is known to him, saying to the master, 'I am your guest.' On this the host receives the traveller, and performs his duties, that is, he sets before his guest his supper, consisting of bread, milk, and borgul, and, if he is rich and generous, he also takes the necessary care of his horse or beast of burden. Should the traveller be unacquainted with any person, he alights at any house, as it may happen, fastens his horse to the same, and proceeds to smoke his pipe until the master bids him welcome, and offers him his evening meal. In the morning the traveller pursues his journey, making no other return than 'God be with you' (good bye) (Niebuhr, *Reis.* ii. 431, 462; D'Arvieux, iii. 152; Burckhardt, i. 69; Rosenmüller, *Morgenl.* vi. 82, 257). The early existence and long continuance of this amiable practice in Oriental countries, are owing to the fact of their presenting that condition of things which necessitates and calls forth hospitality. When population is thinly scattered over a great extent of country, and travelling is comparatively infrequent, inns or places of public accommodation are not found: yet the traveller needs shelter, perhaps succour and support. Pity prompts the dweller in a house or tent to open his door to the tired wayfarer, the rather because its master has had, and is likely again to have, need of similar kindness. The duty has its immediate pleasures and advantages; for the traveller comes full of news—false, true, wonderful; and it is by no means onerous, since visits from wayfarers are not very frequent, nor are the needful hospitalities costly. In later periods, when population had greatly increased, the establishment of inns (caravanserais) diminished, but did by no means abolish the practice (Joseph. *Antiq.* v. 1. 2; Luke x. 34).

Accordingly we find hospitality practised and held in the highest estimation at the earliest periods in which the Bible speaks of human society (Gen. xviii. 3; xix. 2; xxiv. 25; Exod. ii. 20; Judg. xix. 16). Express provision for its exercise is made in the Mosaic law (Lev. xix. 33; Deut. xiv. 29). In the New Testament also its observance is enjoined, though in the period to which its books refer the nature and extent of hospitality would be changed with the change that society had undergone (1 Pet. iv. 9; 1 Tim. iii. 2; Tit. i. 8; 1 Tim. v. 10; Rom. xii. 13; Heb. xiii. 2). The reason assigned in this last passage, 'for thereby some have entertained angels unawares,' is not without a parallel in classical literature; for the religious feeling which in Greece was connected with the exercise of hospitality, was strengthened by the belief that the traveller might be some god in disguise (Hom. *Odyss.* xvii. 484). The disposition which generally prevailed in favour of the practice was enhanced by the fear lest those who neglected its rites should, after the example of impious men, be subjected by the divine wrath to frightful punishments (Ælian, *Anim.* xi. 19). Even the Jews, in 'the latter days,' laid very great stress on the obligation: the rewards of Paradise, their doctors declared, were his who spontaneously exercised hospitality (Schöttgen, *Hor. Heb.* i. 220; Kypke, *Observ. Sacr.* i. 129).

The guest, whoever he might be, was on his appearing invited into the house or tent (Gen. xix. 2; Exod. ii. 20; Judg. xiii. 15; xix. 21). Courtesy dictated that no improper questions should be put to him, and some days elapsed before the name of the stranger was asked, or what object he had in view in his journey (Gen. xxiv. 33; *Odyss.* i. 123; iii. 69; *Iliad*, vi. 175; ix. 222; Diod. Sic. v. 28). As soon as he arrived he was furnished with water to wash his feet (Gen. xviii. 4; xix. 2; 1 Tim. v. 10; *Odyss.* iv. 49; xvii. 88; vi. 215); received a supply of needful food for himself and beast (Gen. xviii. 5; xix. 3; xxiv. 25; Exod. ii. 20; Judg. xix. 20; *Odyss.* iii. 464); and enjoyed courtesy and protection from his host (Gen. xix. 5; Josh. ii. 2; Judg. xix. 23). The case of Sisera, decoyed and slain by Jael (Judg. iv. 18, sq.), was a gross infraction of the rights and duties of hospitality. On his departure the traveller was not allowed to go alone or empty-handed (Judg. xix. 5; Waginseil, *ad Sot.* pp. 1020, 1030; Zorn, *ad Hecat. Abder.* 22; *Iliad*, vi. 217). As the free practice of hospitality was held right and honourable, so the neglect of it was considered discreditable (Job xxxi. 32; *Odyss.* xiv. 56); and any interference with the comfort and protection which the host afforded, was treated as a wicked outrage (Gen. xix. 4, sq.). Though the practice of hospitality was general, and its rites rarely violated, yet national or local enmities did not fail sometimes to interfere; and accordingly travellers avoided those places in which they had reason to expect an unfriendly reception. So in Judg. xix. 12, the 'certain Levite' spoken of said, 'We will not turn aside hither into the city of a stranger, that is not of the children of Israel.' The quarrel which arose between the Jews and Samaritans after the Babylonish captivity destroyed the relations of hospitality between them. Regarding each other as heretics, they sacrificed every better feeling. It was only in the greatest extremity that the Jews would partake of Samaritan food (Lightfoot, p. 993), and they were accustomed, in consequence of their religious and political hatred, to avoid passing through Samaria in journeying from one extremity of the land to the other. The animosity of the Samaritans towards the Jews appears to have been somewhat less bitter; but they showed an adverse feeling towards those persons who, in going up to the annual feast at Jerusalem, had to pass through their country (Luke ix. 53). At the great national festivals hospitality was liberally practised so long as the state retained its identity. On these festive occasions no inhabitant of Jerusalem considered his house his own; every home swarmed with strangers; yet this unbounded hospitality could not find accommodation in the houses for all who stood in need of it, and a large proportion of visitors had to be content with such shelter as tents could afford (Helon, *Pilgrim.* i. 228, sq. On the general subject, see Unger, *de ξενοτοκίᾳ ejusque ritu antiquo;* Stuck, *Antiq. Conviv.* i. 27; De Wette, *Lehrb. der Archäologie;* and Scholz, *Handb. der Bibl. Archäologie.*—J. R. B.

HOURS. The ancient Hebrews, like the Greeks (Homer, *Il.* xxi. 3), were unacquainted with any other means of distinguishing the times of day than the natural divisions of morning, mid-day or noon, twilight, and night (Gen. xv. 12; xviii. 1; xix. 1, 15, 23). The earliest

mention of hours occurs in Daniel (iii. 15; iv. 19; v. 5); and even in the Septuagint ὥρα invariably signifies a season of the year, as in Homer and Hesiod. As the Chaldæans claimed the honour of inventing this system of notation (Herod. ii. 119.), it is most probable that it was during their residence in Babylon that the Jews became familiar with their artificial distribution of the day. At all events no trace of it occurs before the captivity of that people; while, subsequently to their return to their own land, we find the practice adopted, and, in the time of Christ, universally established, of dividing the day and night respectively into twelve equal portions (Matt. xx. 3-5; John xi. 9; Acts v. 7; xix. 34). The Jewish horology, however, in common with that of other Eastern nations, had this inherent defect, that the hours, though always equal to one another, were unequal in regard to the seasons, and that as their day was reckoned from sunrise to sunset, and not from the fixed period of noon, as with us, the twelve hours into which it was divided varied, of course, in duration according to the fluctuations of summer and winter. The mid-day, which with us is the twelfth hour, the Jews counted their sixth, while their twelfth hour did not arrive till sunset. At the equinoxes, their hours were exactly of the same length with ours, and the time from which they began to reckon their day at those seasons corresponded precisely with our six o'clock A.M.; their first hour being our seven o'clock, their third (Acts ii. 15), our nine, their ninth (Acts iii. 1), our three o'clock P.M., and their eleventh (Matt. xx. 6), our five. This equality, however, in the duration of their hours, as well as in their correspondence to ours, was disturbed as the season approached towards the summer or winter solstice. In midsummer, when sunrise in Judæa takes place at five o'clock A.M., and sunset at seven P.M., the Jewish hours were a little longer than ours; and the only one of their hours which answered exactly to ours was the sixth, or twelve o'clock, while in all the rest there was a considerable difference. Their third hour was shortly *before* our nine, and their ninth a little *after* our three. In like manner, in winter, when the sun rises at seven and sets at five, the Jewish hour was proportionally shorter than ours, their third hour not occurring till a little *after* our nine, and their ninth a little *before* our three. Hence it is evident that in order to determine exactly the duration of Daniel's silence, for instance ('he was astonied one hour,' Dan. iv. 19), or the exact time when the darkness at Christ's crucifixion ended, it is necessary to ascertain the particular seasons when these incidents occurred.

In ancient times the only way of reckoning the progress of the day was by the length of the shadow—a mode of reckoning which was both contingent on the sunshine, and served only for the guidance of individuals. By what means the Jews calculated the length of their hours—whether by dialling, by the clepsydra or water-clock, or by some horological contrivance, like what was used anciently in Persia (Joseph. *Antiq.* xi. 6), and by the Romans (Martial, viii. *Epig.* 67; Juv. *Sat.* x. 215), and which is still used in India (*Asiat. Resear.* v. 88), a servant notifying the intervals, it is now impossible to discover. The Chaldee word שעה (Dan. iv. 16), which signifies *announcer*, seems to countenance the latter (as it seems to refer to the mode employed by the Persians, Romans, and Indians) supposition.

Besides these smaller hours, there was another division of the day into larger hours, with reference to the stated periods of prayer, viz. the third, sixth, and ninth hours of the day (Ps. xlv. 17; Joseph. *Antiq.* iv. 4. 3).

The night was divided into twelve equal portions or hours, in precisely the same manner as the day. The most ancient division, however, was into three watches (*Antiq.* lxiii. 6; xc. 4); the first, or beginning of the watches, as it is called (Lament. ii. 19); the middle-watch (Judg. vii. 19); and the morning-watch (Exod. xiv. 24). When Judæa became a province of Rome, the Roman distribution of the night into four watches was introduced [see COCK-CROWING and DAY]; to which division frequent allusions occur in the New Testament (Luke xii. 38; Matt. xiv. 25; xiii. 35), as well as to that of hours (Matt. xxv. 13; xxvi. 40; Mark xiv. 37; Luke xvii. 59; Acts xxiii. 23; Rev. iii. 3).

It remains only to notice that the word *hour* is sometimes used in Scripture to denote some determinate season, as 'mine *hour* is not yet come,' 'this is your *hour*, and the power of darkness,' 'the *hour* is coming,' &c.—R. J.

HOUSE. Houses are often mentioned in Scripture, several important passages of which cannot be well understood without a clearer notion of the houses in which the Hebrews dwelt, than can be realized by such comparisons as we naturally make with those in which we ourselves live. But things so different afford no grounds for instructive comparison. We must therefore bring together such facts as can be collected from the Scripture and from ancient writers, with such details from modern travellers and our own observations, as may tend to illustrate these statements; for there is every reason to conclude that little substantial difference exists between the ancient houses and those which are at this day found in south-western Asia.

The agricultural and pastoral forms of life are described in Scripture as of equally ancient origin. Cain was a husbandman, and Abel a keeper of sheep. The former is a settled, the latter an unsettled mode of life. Hence we find that Cain, when the murder of his brother constrained him to wander abroad, built a town in the land where he settled. At the same time, doubtless, those who followed the same mode of life as Abel, dwelt in tents, capable of being taken from one place to another, when the want of fresh pastures constrained those removals which are so frequent among people of pastoral habits. We are not required to suppose that Cain's town was more than a collection of huts.

Our information respecting the abodes of men in the ages before the Deluge is, however, too scanty to afford much ground for notice. The enterprise at Babel, to say nothing of Egypt, shows that the constructive arts had made considerable progress during that obscure but interesting period; for we are bound in reason to conclude that the arts possessed by man in the ages immediately following the Deluge, existed before that great catastrophe [ANTEDILUVIANS].

We may, however, leave this early period, and proceed at once to the later times in which the Hebrews flourished.

The observations offered under ARCHITECTURE will preclude the expectation of finding among this Eastern people that accomplished style of building which Vitruvius requires, or that refined taste by which the Greeks and Romans excited the admiration of foreign nations. The reason of this is plain. Their ancestors had roved through the country as nomade shepherds, dwelling in tents; and if ever they built huts they were of so light a fabric as easily to be taken down when a change of station became necessary. In this mode of life solidity in the structure of any dwelling was by no means required; much less were regular arrangement and the other requisites of a well-ordered dwelling matters of consideration. Under such circumstances as these, no improvement in the habitation takes place. The tents in which the Arabs now dwell are in all probability the same as those in which the Hebrew patriarchs spent their lives. It is not likely that what the Hebrews observed in Egypt, during their long sojourn in that country, had *in this respect* any direct influence upon their own subsequent practice in Palestine. The reasons for this have been given under ARCHITECTURE.

346.

Nevertheless, the information which may be derived from the figures of houses and parts of houses in the Egyptian tombs, is not to be overlooked or slighted. We have in them the *only* representations of ancient houses in that part of the world which now exist: and however different may have been the *state* architecture of Egypt and Palestine, we have every reason to conclude that there was considerable resemblance in the private dwellings of these neighbouring countries. Such a resemblance now exists, and the causes which produce it equally existed in ancient times: and, which is more to the purpose, the representations to which we refer have almost the same amount of agreement and of difference with the present houses of Syria as with those of modern Egypt. On these and other grounds we shall not decline to avail ourselves of this interesting source of illustration; but before turning to its details, we shall give a general statement, which may render them more intelligible.

On entering Palestine, the Israelites occupied the dwellings of the dispossessed inhabitants; and for a long time no new buildings would be needed. The generation which began to build new houses must have been born and bred in the country, and would naturally erect buildings like those which already existed in the land. Their mode of building was therefore that of the Canaanites whom they had dispossessed. Of *their* style of building we are not required to form any exalted notions. In all the history of the conquest of the country by the Israelites, there is no account of any large or conspicuous building being taken or destroyed by them. It would seem also as if there had been no temples; for we read not that any were destroyed by the conquerors; and the command that the monuments of idolatry should be overthrown, specifies only altars, groves, and high places—which seems to lead to the same conclusion; since, if there had been temples existing in the land of Canaan, they would doubtless have been included. It is also manifest from the history that the towns which the Hebrews found in Palestine were mostly small, and that the largest were distinguished rather by their number than by the size or magnificence of their buildings.

It is impossible to say to what extent Solomon's improvements in state architecture operated to the advancement of domestic architecture. He built different palaces, and it is reasonable to conclude that his nobles and great officers followed more or less the models which these palaces presented. In the East, however, the domestic architecture of the bulk of the people is little affected by the improvements in state buildings. Men go on building from age to age as their forefathers built; and in all probability the houses which we now see in Palestine are such as those in which the Jews, and the Canaanites before them, dwelt—the mosques, the Christian churches, and the monasteries being the only new features in the scene.

There is no reason to suppose that many houses in Palestine were constructed with wood. A great part of that country was always very poor in timber, and the middle part of it had scarcely any wood at all. But of stone there was no want; and it was consequently much used in the building of houses. The law of Moses respecting leprosy in houses (Lev. xiv. 33-40) seems to prove this, as the characteristics there enumerated could only occur in the case of stone walls. Still, when the Hebrews intended to build a house in the most splendid style and in accordance with the taste of the age, as much wood as possible was used. Having premised this, the principal building materials mentioned in Scripture may be enumerated with reference to their place in the three kingdoms of nature.

I. VEGETABLE SUBSTANCES:—

1. *Shittim*, or the timber of the acacia tree, which grows abundantly in the valleys of Arabia Petræa, and was therefore employed in the construction of the tabernacle. Not being, however, a tree of Palestine, the wood was not subsequently used in building.

2. *Shakemim;* that is, the wood of the sycamore fig-tree, mentioned in Isa. ix. 10, as a building timber in more common use than cedar, or perhaps than any other wood known in Palestine.

3. *Eres*, or cedar. As this was a wood imported from Lebanon, it would only be used in the higher class of buildings. For its quality as a building timber, and respecting the question of its being really what we call the cedar, see ERES.

4. *Algum-wood*, which, being imported from the Eastern seas, must have been valued at a high price. It was used by Solomon for pillars for his own palace, and for the temple (1 Kings x. 11, 12).

5. *Berosh*, or cypress-wood. Boards of this were used for the floor of the Temple, which may suggest the use to which it was ordinarily applied (1 Kings vi. 15; 2 Chron. iii. 5).

Particular accounts of all these woods, and of the trees which afforded them, may be seen under the respective words.

II. Mineral Substances:—

1. *Marble.* We find the court of the king of Persia's palace covered with marble of various colours (Esth. i. 6). David is recorded to have possessed abundance of marble (1 Chron. xxx. [xxix.] 2; comp. Cant. v. 13), and it was used by Solomon for his palace, as well as for the Temple.

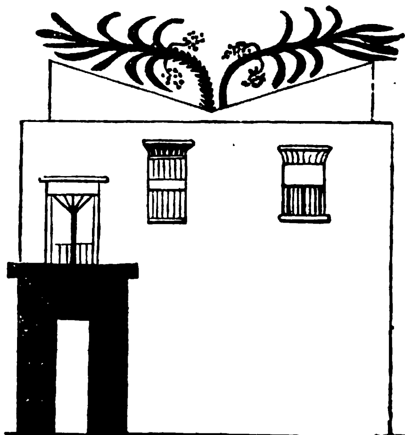
2. *Porphyry and Granite* are supposed to be 'the glistering stones, and stones of divers colours' named in 1 Chron. xxix. 2. If so, the mountains of Arabia Petræa furnished the nearest source of supply, as these stones do not exist in Palestine or Lebanon.

3. *Bricks.* Bricks hardened by fire were employed in the construction of the tower of Babel (Gen. xi. 3), and the hard bondage of the Israelites in Egypt consisted in the manufacture of sun-dried bricks (Exod. v. 7, 10-13). This important building-material has been noticed under another head [Bricks]; and it only remains to remark that no subsequent notice of bricks as being used by the Hebrews occurs after they had entered Palestine. Yet, judging from existing analogies, it is more than probable that bricks were to a considerable extent employed in their buildings. From the expense and labour of quarrying and conveying stone, bricks are often extensively used in Eastern countries even where stone is abundant; and it is not unusual to see the foundations and lower parts of the house of stone, while the superstructure is of brick.

3. *Chalk and Gypsum*, which the Hebrews appear to have comprehended under the general name of שִׂיד *sid.* That the Hebrews were acquainted with these materials appears from Deut. xxvii. 2; and from Dan. v. 5; Acts xxiii. 3, it further appears that walls were covered with them. A highly instructive and curious account of the plasters used in the East may be seen in tome iv. of Langles's edition of Chardin's *Voyages.*

4. *Mortar*, a cement made of lime, ashes, and chopped straw, or of gypsum and chopped straw. This is probably meant in Jer. xliii. 9; Ezek. xiii. 10, 11, 20.

5. *Asphaltum*, or *Bitumen*, which is mentioned as being used for a cement by the builders of Babel. This must have been in the want of lime-mortar, the country being a stoneless plain. But the Israelites, who had no lack of the usual cements, did not employ asphaltum [Bitumen].



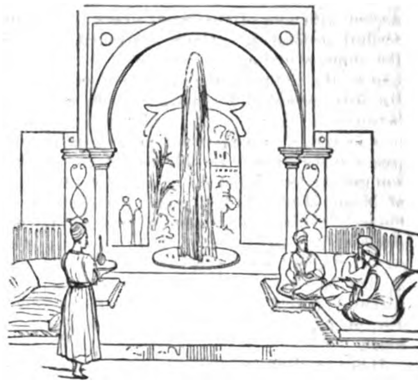
6. The metals also must be, to a certain extent, regarded as building materials: lead, iron, and copper are mentioned; and even silver and gold were used in combination with wood, for various kinds of solid, plated, and inlaid work (Exod. xxxvi. 34, 38).

III. Animal Substances:—

Such substances can be but in a small degree applicable to building. *Ivory* houses are mentioned in 1 Kings xxii. 39; Amos iii. 14; most likely from certain parts of the wood-work, probably about the doors and windows, being inlaid with this valuable substance. Solomon obtained ivory in great quantities from Tyre (1 Kings x. 22; 2 Chron. ix. 21). [Ivory.]

In describing the houses of ancient Palestine, there is no way of arriving at distinct notions but by taking the texts of Scripture and illustrating them by the existing houses of those parts of Western Asia which have been the least exposed to the changes of time, and in which the manners of ancient days have been the best preserved. Writers on the subject have seen this, and have brought together the descriptions of travellers bearing on the subject; but these descriptions have generally been applied with very little judgment, from the want of that distinct knowledge of the matter which only actual observation can give. Travellers have seldom been students of Scripture, and students of Scripture have seldom been travellers. The present writer, having resided for a considerable time in Turkish Arabia, where the type of Scriptural usages has been better preserved than in Egypt, or even in Palestine itself, is enabled to speak on this matter with somewhat more precision. Of four houses in which he there resided, two were first-rate, and two were second-rate. One of the latter has always seemed to him to suggest a more satisfactory idea of a Scriptural house than any of the others, or than any that he ever saw in other Eastern countries. That one has therefore formed the basis of all his ideas on this subject; and where it seemed to fail, the others have usually supplied the illustration he required. This course he has found so beneficial, that he will endeavour to impart a clear view of the subject to the reader by giving a general notion of the house referred to, explaining any points in which the others differed from it, and producing the passages of Scripture* which seem to be illustrated in the process.

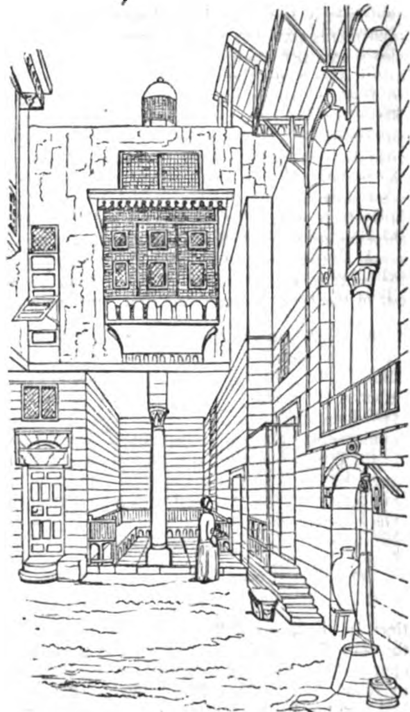
We may premise that the houses present little more than a dead wall to the street. The privacy of Oriental domestic habits would render our plan of throwing the front of the houses towards the street most repulsive. On coming to a house, one finds a lofty wall, which would be blank but for the low door of entrance [Gate]; over which is



347.

usually the kiosk, or latticed window (sometimes projecting like the huge bay windows of Elizabethan houses), or screened balcony of the 'summer parlour.' Besides this, there may be a small latticed window or two high up the wall, giving

light and air to upper chambers. This seems, from the annexed engraving (No. 347), to have been the character of the fronts of ancient Egyptian houses.

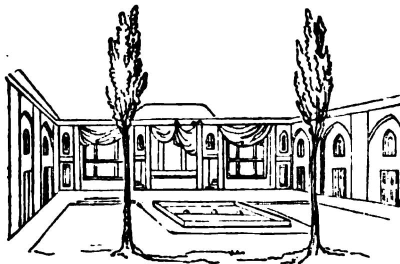


The buildings which form the house front towards an inner square or court. Small houses have one of these courts, but superior houses have two, and first-rate houses three, communicating with each other; for the Orientals dislike ascending stairs or steps, and prefer to gain room rather by the extent than height of their habitations. It is only when the building-ground is confined by nature or by fortifications, that they build high houses. None of our four houses had more than one story; but, from the loftiness of the rooms, they were as high as houses of three stories among ourselves. If there are three or more courts, all except the outer one are much alike in size and appearance; but the outer one, being devoted to the more public life of the occupant, and to his intercourse with society, is materially different from all the others. If there are more than two, the second is devoted chiefly to the use of the master, who is there attended only by his eunuchs, children, and females, and sees only such persons as he calls from the third or interior court in which they reside. In the history of Esther, she incurs danger by going from her interior court to that of the king, to invite him to visit her part of the palace; but she would not on any account have gone to the outermost court, in which the king held his public audiences. When there are only two courts, the innermost is the harem, in which the women and children live, and which is the true domicile of the master, to which he withdraws when the claims of business, of society, and of friends have been satisfied, and where no man but himself ever enters, or could be induced to enter, even by strong persuasions.

Entering at the street-door, a passage, usually sloping downward, conducts to the outer court; the opening from the passage to this is not opposite the gate of entrance, but by a side turn, to preclude any view from the street into the court when the gate is opened. On entering the outer court through this passage, we find opposite to us the public room, in which the master receives and gives audience to his friends and clients. This is entirely open in front, and, being richly fitted up, has a splendid appearance when the first view of it is obtained. A refreshing coolness is sometimes given to this apartment by a fountain throwing up a jet of water in front of it. Some idea of the apartment may be formed from the annexed cut (No. 348). This is the 'guest-chamber' of Luke xxii. 11. A large portion of the other side of the court is occupied with a frontage of lattice-work filled with coloured glass, belonging to a room as large as the guest-chamber, and which in winter is used for the same purpose, or serves as the apartment of any visitor of distinction, who cannot of course be admitted into the interior parts of the house. The other apartments in this outer court are comparatively small, and are used for the accommodation of visitors, retainers, and servants. These various apartments are usually upon what we should call the first floor, or at least upon an elevated terrace. The ground floor is in that case occupied by various store-rooms and servants' offices. In all cases the upper floor, containing the principal rooms, is fronted by a gallery or terrace, protected from the sun by a sort of penthouse roof supported by pillars of wood.

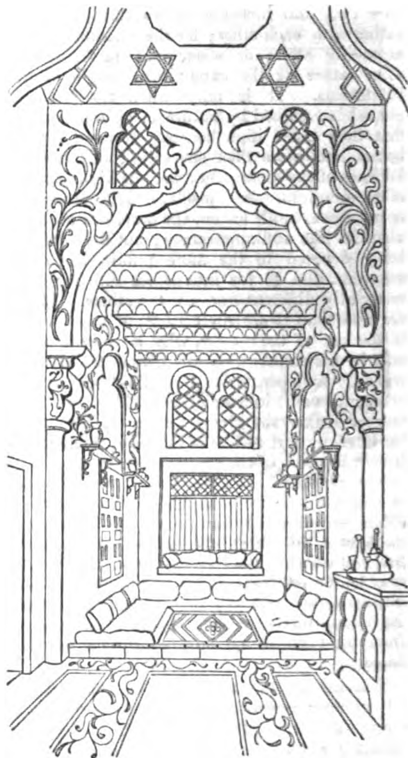
348.

In houses having but one court, the reception-room is on the ground floor, and the domestic establishment in the upper part of the house. This arrangement is shown in the annexed engraving (No. 349), which is also interesting from its showing the use of the 'pillars' so often mentioned in Scripture, particularly 'the pillars on which the house stood, and by which it was borne



349.

up' (Judg. xvi. 29). Some other of the cuts which we introduce will exhibit pillars of similar importance to the support of the house.

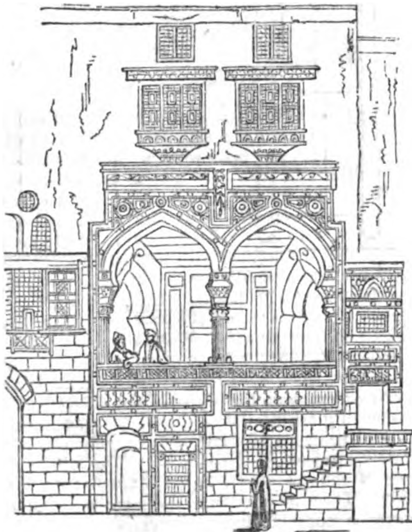


The kiosk, which has been mentioned above as fronting the street, over the gateway, is connected with one of the larger rooms already described, or forms a separate apartment, which is the summer parlour of Scripture. Here, in the heat of the afternoon, the master lounges or dozes listlessly, refreshed by the air which circulates between the openings of the lattice-work; and here he can, if he pleases, notice unobserved what passes in the street. In this we are to seek the summer parlour in which Ehud smote the king of Moab (Judg. iii. 20), and the 'chamber on the wall,' which the Shunamite prepared for the prophet (2 Kings iv. 10). The projecting construction over the reception chamber in No. 349 is, like the kiosk, towards the street of a summer parlour; but there it belongs to the women's apartments, and looks into the court, and not the street.

It is now time to proceed to the inner court, which we enter by a passage and door similar to those by which we entered from the street. This passage and door are usually at one of the innermost corners of the outer court. Here a much more extended prospect opens to us, the inner court being generally much larger than the former. The annexed cut (No. 350) will convey some notion of it; but being a Persian house, it somewhat differs from that which we have more particularly in view. It is lower, the principal apartments standing upon a terrace or bank of earth, and not upon a basement story of offices; and it also wants the veranda or covered gallery in front, which we find in Syro-Arabian houses. The court is for the most part paved, excepting a portion in the middle, which is planted with trees (usually two) and shrubs, with a basin of water in the midst. In our Arabian house the two trees were palm-trees, in which a number of wild doves built their nests. In the second cut (No. 347), showing an ancient Egyptian house, we see the same arrangement: two palm-trees growing in the court extend their tops above, and, as it were, out of the house—a curious effect frequently noticed in the towns of South-western Asia. That the Jews had the like arrangement of trees in the courts of their houses, and that the birds nested in them, appears from Psa. lxxxiv. 2, 3. They had also the basin of water in the inner court, or haram; and among them it was used for bathing, as is shown by David's discovering Bathsheba bathing as he walked on the roof of his palace. This use of the reservoir has now been superseded by the establishment of public warm baths in every town, and in private mansions. Cold bathing has all but ceased in Western Asia.

350.

The arrangement of the inner court is very similar to that of the outer; but the whole is more open and airy. The buildings usually occupy two sides of the square, of which the one opposite the entrance contains the principal apartments. They are upon what we should call the first floor, and open into a wide gallery or veranda, which in good houses is nine or ten feet deep, and covered by a wooden penthouse supported by a row of wooden columns. This terrace, or gallery, is furnished with a strong wooden balustrade, and is usually paved with squared stones, or else floored with boards. In the centre of the principal front is the usual open drawing-room, on which the best art of the Eastern decorator is expended (No. 351). Much of one of the sides of the court front is usually occupied by the large sitting-room, with the latticed front covered with coloured glass, similar to that in the outer court. The other rooms, of smaller size, are the more private apartments of the mansion. The interior of one of these is shown in the annexed cut (No. 352). There are usually no doors to the sitting or drawing-rooms of Eastern houses: they are closed by curtains, at least in summer, the opening and shutting of doors being odious to most Orientals. The same seems to have been the case among the Hebrews, as far as we may judge from the curtains which served instead of doors to the



351.

tabernacle, and which separated the inner and outer chambers of the temple. The curtained entrances to our Westminster courts of law supply a familiar example of the same practice.

352.

Some ideas respecting the arrangements and architecture of the interior parts of the dwelling may be formed from the annexed cut (No. 353), although the house in this case, being modern Egyptian, differs in some points of arrangement from those on which our description is chiefly based.

353.

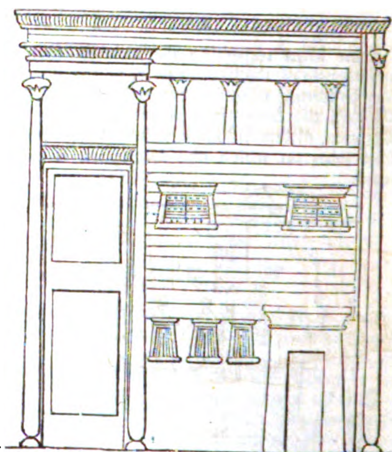
These observations apply to the principal story. The basement is occupied by various offices, stores of corn and fuel, places for the water-jars to stand in, places for grinding corn, baths, kitchens, &c. The kitchens are always in this inner court, as the cooking is performed by women, and the ladies of the family superintend or actually assist in the process. The kitchen, open in front, is on the same side as the entrance from the outer court; and the top of it forms a terrace, which affords a communication between the first floor of both courts by a private door, seldom used but by the master of the house and attendant eunuchs.

The kitchen, of which the annexed cut (No. 354) is the only existing representation, is surrounded by a brick terrace, on the top of which are the fireplaces formed in compartments, and separated by little walls of fire-brick or tile. In these different compartments the various dishes of an Eastern feast may be at once prepared at charcoal fires. This place being wholly open in front, the half-tame doves, which have their nests in the trees of the court, often visit it, in the absence of the servants, in search of crumbs, &c. As they sometimes blacken themselves, this perhaps explains the obscure passage in Ps. lxviii. 13, 'Though ye have lien among the pots, ye shall be as the wings of a dove covered with silver,' &c. In Turkish Arabia most of the houses have underground cellars or vaults, to which the inhabitants retreat during the mid-day heat of summer, and there enjoy a refreshing coolness. We do not discover any notice of this usage in Scripture. But at Acre the substructions of very ancient houses were some years ago discovered, having such cellars, which were very probably subservient to this use. In the rest of the year these cellars, or *serdaubs*, as they are called, are abandoned to the bats, which swarm in them in scarcely credible numbers (Isa. ii. 20).

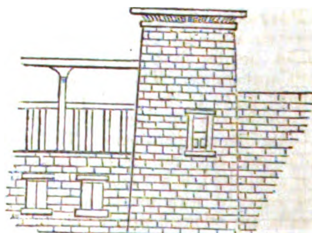
From the court a flight of stone steps, usually at the corner, conducts to the gallery, from which a plainer stair leads to the house-top. If the house be large, there are two or three sets of steps to the different sides of the quadrangle, but seldom more than one flight from the terrace to the house-top of any one court. There is, however, a separate stair from the outer court to the roof, and it is usually near the entrance. This will bring to mind the case of the paralytic, whose friends, finding they could not get access to Jesus through the people who crowded the court of the house in which he was preaching, took him up to the roof, and let him down in his bed through the tiling, to the place where Jesus stood (Luke v. 17-26). If the house in which our Lord then was had more than one court, he and the auditors were certainly in the outer one; and it is reasonable to conclude that he stood in the veranda addressing the crowd below. The men bearing the paralytic therefore, perhaps went up the steps near the door; and finding they could not even then get near the person of Jesus, the gallery being also crowded, continued their course to the roof of the house, and removing the boards over the covering of the gallery, at the place where Jesus stood, lowered the sick man to his feet. But if they could not get access to the steps near the door, as is likely, from the door being much crowded, their alternative was to take him to the roof of the next house, and there hoist him over the parapet to the roof of the house which they desired to enter.

The roof of the house is, of course, flat. It is

formed by layers of branches, twigs, matting, and earth, laid over the rafters and trodden down;



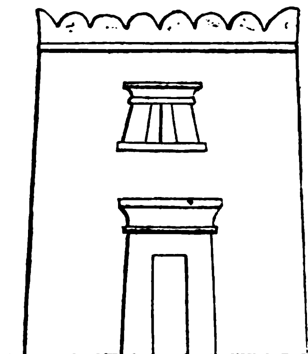
354.



after which it is covered with a compost which acquires considerable hardness when dry. Such roofs would not, however, endure the heavy and continuous rains of our climate; and in those parts of Asia where the climate is more than usually moist, a stone roller is usually kept on every roof, and after a shower a great part of the population is engaged in drawing these rollers over the roofs. It is now very common, in countries where timber is scarce, to have domed roofs; but in that case, the flat roof, which is indispensable to Eastern habits, is obtained by filling up the hollow intervals between the several domes, so as to form a flat surface at the top. These flat roofs are often alluded to in Scripture; and the allusions show that they were made to serve the same uses as at present. In fine weather the inhabitants resorted much to them to breathe the fresh air, to enjoy a fine prospect, or to witness any event that occurred in the neighbourhood (2 Sam. xi. 2; Isa. xxii. 1; Matt. xxiv. 17; Mark xiii. 15). The dryness of the summer atmosphere enabled them, without injury to health, to enjoy the bracing coolness of the night-air by sleeping on the house-tops; and in order to have the benefit of the air and prospect in the daytime, without inconvenience from the sun, sheds, booths, and tents, were sometimes erected on the house-tops (2 Sam. xvi. 22).

The roofs of the houses are well protected by walls and parapets. Towards the street and neighbouring houses is a high wall, and towards the interior court-yard usually a parapet or wooden rail. 'Battlements' of this kind, for the prevention of accidents, are strictly enjoined in the Law (Deut. xxii. 8); and the form of the battlements of the Egyptian houses, as shown in the annexed engravings, suggest some interesting analogies, when we consider how recently the Israelites had quitted Egypt when that law was delivered. These cuts, with the one before given (No. 347), are highly interesting, not only with reference to this particular point, but as elevations of different styles of houses, existing in a neighbouring country in the early ages of the Hebrew history. One of them (Nos. 355, 356) exhibits different forms of a peculiarity which we have not observed in any modern example. The top of the house is covered with a roof or awning, supported by columns, whereby the sun was excluded, and a refreshing stream of air passed through. Other Egyptian houses had merely a parapet wall, sometimes surmounted with a row of battlements, as in the cut here given (No. 357).

Of the inferior kinds of Oriental dwellings, such as are met with in villages and very small towns, the subjoined is not an unfavourable specimen. In these there is no central court, but there is generally a yard attached, either on one side or at the rear. The shaded platform in front is such as is usually seen attached to coffee-houses, which is, in fact, the character of the house represented in No. 357. Here the customers sit and smoke their pipes, and sip their coffee. The village cabins and abodes of the peasantry are, of course, of a still inferior description; and, being the abodes of people who live much in the open air, will not bear comparison with the houses of the same class in Northern Europe, where the cottage is the *home* of the owner.



355.

356.

No ancient houses had chimneys. The word so translated in Hos. xiii. 3, means a hole through which the smoke escaped; and this existed only

in the lower class of dwellings, where raw wood was employed for fuel or cooking, and where there was an opening immediately over the hearth to let out the smoke. In the better sort of houses the rooms were warmed in winter by charcoal in braziers, as is still the practice (Jer. xxxvi. 22; Mark xiv. 54; John xviii. 18).

357.

The windows had no glass. They were only latticed, and thus gave free passage to the air and admitted light, while birds and bats were excluded. In winter the cold air was kept out by veils over the windows (see cut 352), or by shutters with holes in them sufficient to admit light (1 Kings vii. 17; Cant. ii. 9).

In the East, where the climate allows the people to spend so much of their time out of doors, the articles of furniture and the domestic utensils

358.

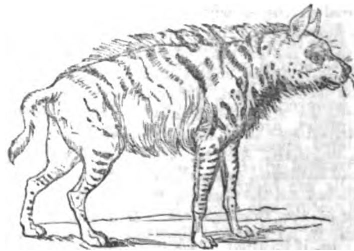
have always been few and simple. They are in this work noticed under separate heads [Bed; Lamps; Pottery; Seats; Tables]. The rooms, however, although comparatively vacant of moveables, are far from having a naked or unfurnished appearance. This is owing to the high ornament given to the walls and ceilings. The walls are broken up into various recesses, and the ceiling into compartments. The ceiling, if of wood and flat, is of curious and complicated joinery; or, if vaulted, is wrought into numerous coves, and enriched with fret-work in stucco; and the walls are adorned with arabesques, mosaics, mirrors, painting, and gold; which, as set off by the marble-like whiteness of the stucco, has a truly brilliant and rich effect. There is much in this to remind one of such descriptions of splendid interiors as that in Isa. liv. 11, 12.

HULDAH or rather Chuldah (חֻלְדָּה; Sept. Ὀλδα), wife of Shallum, a prophetess, who, in the reign of Josiah, abode in that part of Jerusalem called the Mishneh, where the book of the Law was discovered by the high-priest Hilkiah. This prophetess was consulted respecting the denunciations which it contained. She then delivered an oracular response of mingled judgment and mercy; declaring the not remote destruction of Jerusalem, but promising Josiah that he should be taken from the world before these evil days came; B.C. 623 (2 Kings xxii. 14-20; 2 Chron. xxxiv. 22-28). Huldah is only known for this circumstance. She was probably at this time the widow of Shallum, a name too common to suggest any information; but he is said to have been grandson of one Harhas, 'keeper of the wardrobe,' but whether the priestly or the royal wardrobe is uncertain. If the former, he must have been a Levite, if not a priest. As to her residence בַּמִּשְׁנֶה, in the Mishneh, which the Auth. Vers. renders 'in the college,' there is no ground to conclude that any school or college of the prophets is to be understood. The name means 'second' or 'double;' and many of the Jews themselves (as Jarchi states) understood it as the name of the suburb lying between the inner and outer wall of Jerusalem. It is safest to regard it as a proper name denoting some quarter of Jerusalem about which we are not certain, and, accordingly, to translate 'in the Mishneh;' for which we have the precedent of the Septuagint which has ἐν τῇ Μασενᾷ. The place of her residence is mentioned probably to show why she, being at hand, was resorted to on this urgent occasion, and not Jeremiah, who was then probably away at his native town Anathoth, or at some more distant place. There were gates of the temple called 'the gates of Huldah' (Mishn. tit. *Middoth*, i. 3); but this name had probably no connection with the prophetess.

HUNTING. The pursuit and capture of beasts of the field, was the first means of sustenance which the human race had recourse to, this mode of gaining a livelihood having naturally preceded the engagements of agriculture, as it presented food already provided, requiring only to be taken and slaughtered; whereas tillage must have been an afterthought, and a later resource, since it implies accumulated knowledge, skill, and such provision aforehand of subsistence as would enable a clan or a family to wait till the fruits of the earth were matured. Hunting was, therefore, a business long ere it was a sport. And originally, before man had established his empire on the earth, it must have been not only a serious but a dangerous pursuit. In process of time, however, when civilization had made some progress, when cities were built and lands cultivated, hunting was carried on not so much for the food which it brought as for the recreation it gave and its conduciveness to health.

The East—the cradle of civilization—presents us with hunting in both the characters now spoken of, originally as a means of support, then as a manly amusement. In the early records of history we find hunting held in high repute, partly, no doubt, from its costliness, its dangers, its similitude to war, its capability of combining the energies of many, and also from the relief which

it afforded to the stagnant monotony of a court, in the high and bounding spirits that it called forth. Hunting has always borne somewhat of a regal character, and down to the present hour has worn an aristocratic air. In Babylon and Persia this attribute is presented in bold relief. Immense parks (παράδεισοι) were enclosed for nurturing and preserving beasts of the chace. The monarch himself led the way to the sport, not only in these preserves, but also over the wide surface of the country, being attended by his nobles, especially by the younger aspirants to fame and warlike renown (Xen. *Cyr*. viii. 1. 38).



In the Bible—our chief storehouse of primitive history and customs — we find hunting connected with royalty so early as in Gen. x. The great founder of Babel was in general repute as 'a mighty hunter before the Lord.' The patriarchs, however, are to be regarded rather as herdsmen than hunters, if respect is had to their habitual mode of life. The condition of the herdsman ensues next to that of the hunter in the early stages of civilization; and so we find that even Cain was a keeper of sheep. This and the fact that Abel is designated 'a tiller of the ground,' would seem to indicate a very rapid progress in the arts and pursuits of social life. The same contrast and similar hostility we find somewhat later, in the case of Jacob and Esau; the first, 'a plain man dwelling in tents;' the second, 'a cunning hunter, a man of the field' (Gen. xxv. sq.). The account given of Esau in connection with his father seems to show that hunting was, conjointly with tillage, pursued at that time as a means of subsistence, and that hunting had not then passed into its secondary state, and become an amusement.

In Egypt the children of Israel would be spectators of hunting carried on extensively and pursued in different manners, but chiefly, as appears probable, with a view rather to recreation than subsistence (Wilkinson's *Anc. Egypt*. vol. iii.). That the land of promise into which the Hebrews were conducted on leaving Egypt was plentifully supplied with beasts of the chace, appears clear from Exod. xxiii. 29, 'I will not drive them out in one year, lest the land become desolate and the beast of the field multiply against thee' (comp. Deut. iii. 22). And from the regulation given in Lev. xvii. 15, it is manifest that hunting was practised after the settlement in Canaan, and was pursued with the view of obtaining food. Prov. xii. 27 proves that hunting animals for their flesh was an established custom among the Hebrews, though the turn of the passage may serve to show that at the time it was penned sport was the chief aim. If hunting was not forbidden in the 'year of rest,' special provision was made that not only the cattle, but 'the beast of the field' should be allowed to enjoy and flourish on the uncropped spontaneous produce of the land (Exod. xxiii. 11; Lev. xxv. 7). Harmer (iv. 357) says 'there are various sorts of creatures in the Holy Land proper for hunting; wild boars, antelopes, hares, &c. are in considerable numbers there, and one of the Christian kings of Jerusalem lost his life (*Gesta Dei*, p. 887) in pursuing a hare.' That the lion and other ravenous beasts of prey were not wanting in Palestine, many passages of the Bible make obvious (1 Sam. xvii. 34; 2 Sam. xxiii. 20; 1 Kings xiii. 24; Harris, *Natural History of the Bible*, Kitto's *Pictorial Palestine*). The lion was even made use of to catch other animals (Ezek. xix. 3), and Harmer long ago remarked that as in the vicinity of Gaza, so also in Judæa, leopards were trained and used for the same purpose (Harmer, iv. 358; Hab. i. 8). That lions were taken by pitfalls as well as by nets appears from Ezek. xix. 4, 8 (Shaw, p. 172). In the latter verse the words of the prophet, 'and spread their net over him,' allude to the custom of enclosing a wide extent of country with nets, into which the animals were driven by hunters (Wilkinson, *Anc. Egypt*. iii. 4). The spots thus enclosed were usually in a hilly country and in the vicinity of water brooks; whence the propriety and force of the language of Ps. xlii. 1, 'As the (hunted) hart panteth after the water brooks.' These places were selected because they were those to which the animals were in the habit of repairing in the morning and evening. Scenes like the one now supposed are found portrayed in the Egyptian paintings (Wilkinson). Hounds were used for hunting in Egypt, and, if the passage in Josephus (*Antiq*. iv. 8. 9) may be considered decisive, in Palestine as well. From Gen. xxvii. 3, 'Now take thy weapons, thy quiver and thy bow,' we learn what arms were employed at least in capturing game. Bulls, after being taken, were kept at least for a time in a net (Is. li. 20). Various missiles, pitfalls, snares, and gins were made use of in hunting (Ps. xci. 3; Amos iii. 5; 2 Sam. xxiii. 20). That hunting continued to be followed till towards the end of the Jewish state appears from Josephus (*De Bell. Jud*. i. 20. 13), where the historian speaks of Herod as 'ever a most excellent hunter, for in one day he caught forty wild beasts.' The same passage makes it clear that horses were employed in the pursuits of the chace (comp. Joseph. *Antiq*. xv. 7. 7; xvi. 10. 3).—J. R. B.

HUSKS. [CERATIA.]

HYACINTH. [LESHEM.]

HYÆNA (צָבוּעַ, *Tzeboa*; in Syro-Hexapl. of Aquila, *Tzaba*; in Arabic, *Tzuba* (Russell's *Aleppo*); *Dubba* (Shaw's *Travels*); *Tzabuon* (Bochart); Ὕαινα, Ecclus. xiii. 18). Excepting in Ecclesiasticus just noted, the word does not occur in the English Bible, although there are several passages in the Hebrew canonical books, where Tseboa, 'streaked' or 'variegated,' is assumed to designate the hyæna. In a work on the *Canidæ*, the present writer formerly questioned the presence of this animal in Egypt and Western Asia before the Macedonian conquest, and main-

359.

-tained that it was scarcely known by name even in the time of Pliny. This opinion was grounded on the total silence of some of the writers of antiquity, and the absurd tales of others; although there were among them natives of Asia Minor; although others had resided in Egypt or in Palestine; and although the whole region in question had been under the successive sway of the Greeks and Romans for above three centuries and a half—the former spreading their language, and the latter maintaining garrisons, in every quarter. Indeed the ancient notices respecting the hyæna are either totally fabulous, or so confused that the moderns, up to a very late period, failed to detect the real animal in the classic authors, and both Belon and Gesner, with others, referred the name to a baboon; while the last-mentioned figured the striped species under the appellation of *lupus marinus*. Ὕαινα, therefore, in Ecclesiasticus xiii. 18, did not bring commentators to a right understanding of the word; although it is there placed in opposition to the dog, and is much more appropriate when taken for the true hyæna than when applied to a baboon. In the Romaic or modern Greek, *hyrakalos* and *glanos* are substituted for the ancient denomination hyæna; and hence, when the Sept. rendered עיט צבוע, in Jer. xii. 9, by σπήλαιον ὑαίνης, 'the cave of the hyæna,' modern commentators, up to a recent period, were at a loss for the meaning, and preferred to translate the Hebrew *oith tzeboa* 'a speckled bird,' as it stands in our version. But Bochart and the continuator of Calmet vindicate what we take to be the true reading, *oith tzaboa*, 'the striped rusher,' *i.e.* the hyæna, turning round upon his lair—introduced after an allusion in the previous verse to the lion calling to the beasts of the field (other hyænas and jackals) to come and devour. This allusion, followed up, as it is, by a natural association of ideas, with a description of the pastor, feeder, or rather consumer or devourer of the vineyard, treading down and destroying the vines, renders the natural and poetical picture complete: for the hyæna seeks burrows and caverns for a lair; like the dog it turns round to lie down; howls, and occasionally acts in concert; is loathsome, savage, insatiable in appetite, offensive in smell; and will, in the season, like canines, devour grapes, as the writer has himself ascertained by actual experiment.

Tzeboa, therefore, we consider proved to be, generically, the hyæna; more specifically, the *canis hyæna* of Linn., the *hyæna vulgaris* of more recent naturalists, the *foodh* of Barbary, the *dub*, *dubbah*, *dabah*, *zabah*, and *kaftaar* of modern Semitic nations: and, if the ancients understood anything by the word, it was also their *trochus*. The striped species is one of three or four—all, it seems, originally African, and, by following armies and caravans, gradually spread over Southern Asia to beyond the Ganges, though not as yet to the east of the Bramapootra. It is now not uncommon in Asia Minor, and has extended into Southern Tahtary; but this progress is comparatively so recent that no other than Semitic names are well known to belong to it. The head and jaws of all the species are broad and strong; the muzzle truncated; the tongue like a rasp; the teeth 34 instead of 42, as in the *canidæ*, but robust, large, and eminently formed for biting, lacerating, and reducing the very bone; the neck stiff; the body short and compact; the limbs tall, with only four toes on each foot; the fur coarse, forming a kind of semi-erectile mane along the back; the tail rather short, with an imperfect brush, and with a fetid pouch beneath it. In stature the species varies from that of a large wolf to much less. Hyænas are not bold in comparison with wolves, or in proportion to their powers. They do not, in general, act collectively; they prowl chiefly in the night; attack asses, dogs, and weaker animals; feed most willingly on corrupt animal offal, dead camels, &c.; and dig into human graves that are not well protected with stakes and brambles. The striped species is of a dirty ashy buff, with some oblique black streaks across the shoulders and body, and numerous cross-bars on the legs; the muzzle and throat are black, and the tip of the tail white.

There is reason to believe that the *deeb*, or Scriptural wolf, when represented as carrying off a lamb, is no other than the hyæna—unless the said wolf has been extirpated; for zoologists have not found the wolf in Syria, and the vague reports of travellers respecting it may apply to wild dogs, whose manners are different, or to *canis anthus* or *thoes anthus*, whose powers are totally inadequate to inspire fear [WOLF.]—C. H. S.

HYMENÆUS (Ὑμέναιος), a professor of Christianity at Ephesus, who, with Alexander (1 Tim. i. 20) and Philetus (2 Tim. ii. 18), had departed from the truth both in principle and practice, and led others into apostacy. The chief doctrinal error of these persons consisted in maintaining that 'the resurrection was past already.' The precise meaning of this expression is by no means clearly ascertained: the most general and perhaps best founded opinion is, that they understood the resurrection in a figurative sense of the great change produced by the Gospel dispensation. Some have suggested, that they attempted to support their views by the Apostle's language in his Epistle to the Ephesians (νεκροὺς—συνεζωοποίησε—συνήγειρεν, &c. ii. 1-5): but this is very improbable; for if such misconception of his language had arisen, it might easily have been corrected; not to say that one of them appears to have been personally inimical to St. Paul (2 Tim. iv. 14), and would scarcely have appealed to him as an authority. Most critics suppose that the same person is referred to in both the epistles to Timothy by the name of Hymenæus. Dr. Mosheim, however, contends that there were two. He seems to lay great stress on the Apostle's declaration in 1 Tim. i. 20, 'whom *I have delivered unto Satan* that they may learn not to blaspheme.' But whatever may be the meaning of this expression, the infliction was evidently designed for the benefit and restoration of the parties (comp. 1 Cor. v. 5), and was therefore far from indicating their hopeless and abandoned wickedness. Nor do the terms employed in the second Epistle import a less flagrant violation of the Christian profession than those in the first. If in the one the individuals alluded to are charged with having 'discarded a good conscience' and 'made shipwreck of faith,' in the other they are described as indulging 'in vain and profane babblings, which would increase to more ungodliness,' as 'having erred concerning the truth,' and 'overthrowing the faith' of others. These can hardly be said to be 'two distinct characters having nothing in common but the name' (Mosheim's *Commentaries*, i. 304-306).

For other interpretations of 2 Tim. ii. 18, see Gill's *Commentary*, in loc., and Walchii *Miscellanea Sacra*, i. 4; *de Hymenæo Phileto*, Amstel. 1741.—J. E. R.

HYMN (ὕμνος). In the only places of the New Testament where this word occurs, it is connected with two others of very similar import. 'Speaking to yourselves in *psalms* (ψαλμοῖς), and *hymns* (ὕμνοις), and spiritual songs (ᾠδαῖς), singing and making melody in your heart to the Lord' (Eph. v. 19; Col. iii. 16). It has been conjectured, that by 'psalms and hymns' the poetical compositions of the Old Testament are chiefly to be understood, and that the epithet 'spiritual,' here applied to 'songs,' is intended to mark those devout effusions which resulted from the spiritual gifts granted to the primitive church; yet in 1 Cor. xiv. 26 a production of the latter class is called 'a psalm.' Josephus, it may be remarked, uses the terms ὕμνοι and ᾠδαί in reference to the Psalms of David (*Antiq.* vii. 12. 3). Our information respecting the hymnology of the first Christians is extremely scanty: the most distinct notice we possess of it is that contained in Pliny's celebrated Epistle (*Ep.* x. 97): '*Carmen Christo quasi deo, dicere secum invicem*' (Augusti, *Handbuch der Christlichen Archäologie, B. V. Gebet und Gesang*, ii. 1-160; Walchii *Miscellanea Sacra*, i. 2; *De hymnis ecclesiæ Apostolicæ*, Amstel. 1744).

The hymn which our Lord sung with his disciples at the Last Supper is generally supposed to have been the latter part of the *Hallel*, or series of psalms which were sung by the Jews on the night of the Passover, comprehending Ps. cxiii.-cxviii.; Ps. cxiii. and cxiv being sung before, and the rest after the Passover (Buxtorfii *Lex. Talm.* s. v. הלל, quoted by Kuinoel, on Matt. xxvi. 30; Lightfoot's *Heb. and Talm. Exercitations*, on Mark xiv. 26; *Works*, xi. 435).—J. E. R.

HYPERBOLE. Any one who carefully examines the Bible must be surprised at the very few hyperbolic expressions which it contains, considering that it is an oriental book. Some of these few have occasioned so much difficulty to sincere men, that we have reason to bless God that the scene of those great events which comprise the history of man's salvation, was laid in Western, and not in Eastern Asia, where the genius of hyperbole reigns without limit or control. In Eastern Asia the tone of composition is pitched so high as to be scarcely intelligible to the sober intellect of Europe; while in Western Asia a medium seems to have been struck between the ultra-extravagance of the far east, and the frigid exactness of the far west.

But even regarded as a book of Western Asia, the Bible is, as compared with almost any other Western Asiatic book, so singularly free from hyperbolic expressions as might well excite our surprise, did not our knowledge of its divine origin permit us to suppose that even the style and mode of expression of the writers were so far controlled, as to exclude from their writings what, in other ages and countries, might excite pain and offence, and prove an obstacle to the reception of divine truth. Nor is it to be said that the usage of hyperbole is of modern growth. We find it in the oldest eastern writings which now exist; and the earlier rabbinical writings attest that, in times approaching near to those in which the writers of the New Testament flourished, the Jewish imagination had run riot in this direction, and has left hyperboles as frequent and outrageous as any which Persia or India can produce.

These things being considered, we shall certainly have more cause to admire the rarity of hyperbolic expressions in the Bible than to marvel at those which do occur.

The strongest hyperbole in all Scripture is that with which the Gospel of St. John concludes:—'There are also many other things which Jesus did, the which, if they should be written every one, I suppose that the world itself could not contain all the books that should be written.' This has so much pained many commentators, that they have been disposed to regard it as an unauthorised addition to the sacred text, and to reject it accordingly. Now this is always a dangerous process, and not to be adopted but on such overwhelming authority of collated manuscripts as does not exist in the present case. How much more natural and becoming is it to regard the verse simply as a hyperbole, so perfectly conformable to Oriental modes of expression, and to some other hyperboles which may be found interspersed in the sacred books, that the sole wonder really is that this one should be rare enough to afford ground for objection and remark.

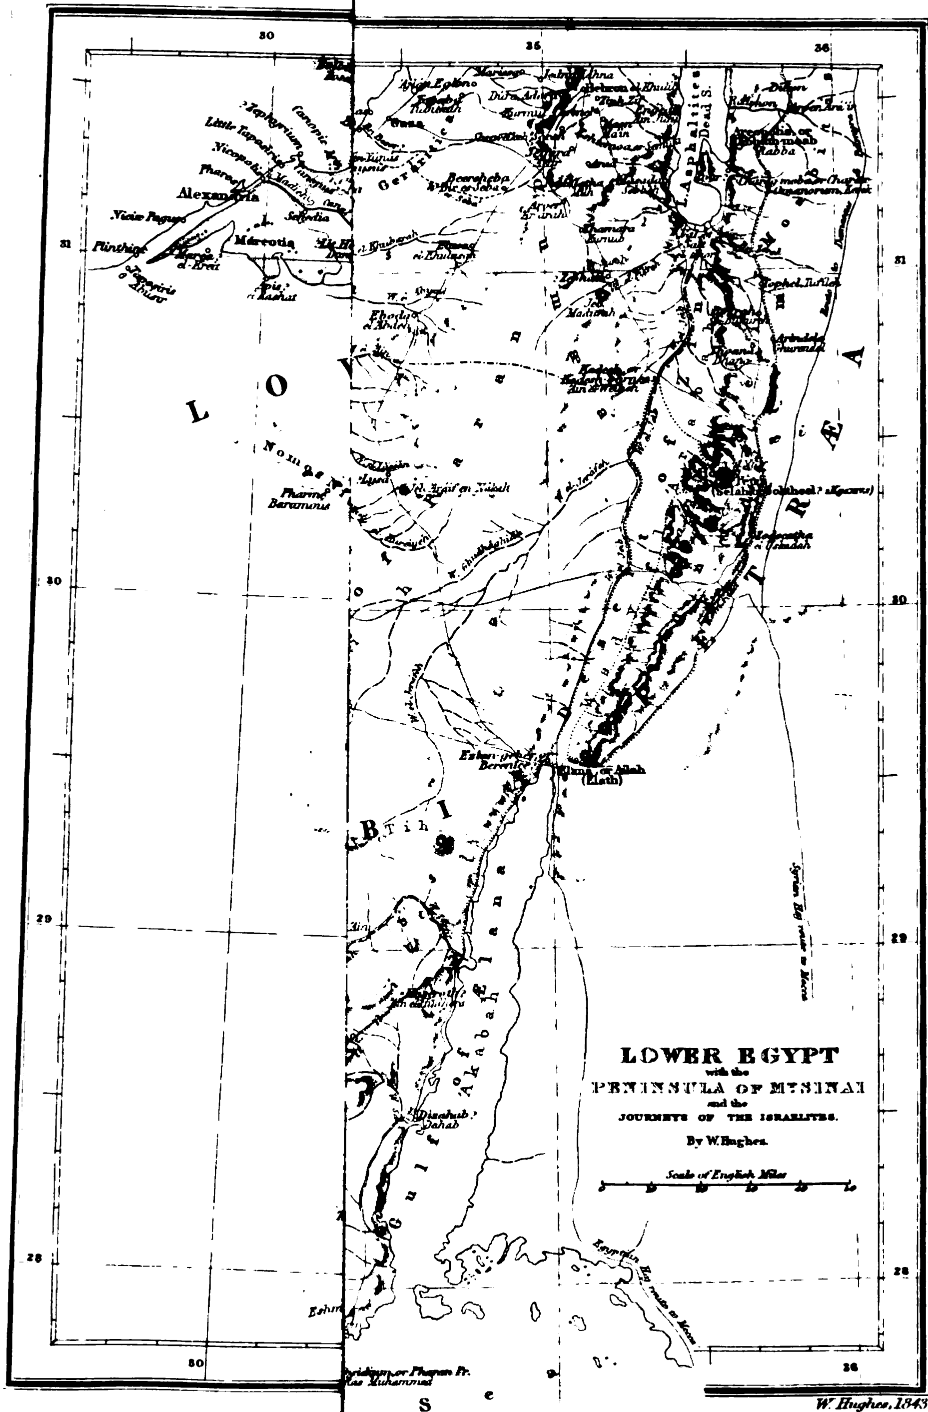
This view of the matter might be illustrated by many examples, in which we find sacred and profane authors using hyperboles of the like kind and signification. In Num. xiii. 33, the spies who had returned from searching the land of Canaan, say, that they saw 'giants there, of such a prodigious size, that they were in their own sight as grasshoppers.' In Deut. i. 28, cities with high walls about them are said to be 'walled up to heaven.' In Dan. iv. 7, mention is made of a tree whereof 'the height reached unto heaven, and the sight thereof unto the end of all the earth:' and the author of Ecclesiasticus (xlvii. 15), speaking of Solomon's wisdom, says, 'Thy soul covered the whole earth, and thou filledst it with parables.' As the world is here said to be filled with Solomon's parables; so in John xxi. 25, by one degree more of hyperbole, it is said that the world could not contain all the books that should be written concerning Jesus's miracles, if a particular account of every one of them were given. In Josephus (*Antiq.* xiv. 22) God is mentioned as promising to Jacob that he would give the land of Canaan to him and his seed; and then it is added 'they shall fill the whole sea and land which the sun shines upon.' Wetstein, in his note on the text in John, and Basnage, in his *Histoire des Juifs* (iii. 1-9; v. 7), have cited from the ancient rabbinical writers such passages as the following:—'If all the seas were ink, and every reed was a pen, and the whole heaven and earth were parchment, and all the sons of men were writers, they would not be sufficient to write all the lessons which Jochanan composed;' and concerning one Eliezer it is said, that 'if the heavens were parchment, and all the sons of men writers, and all the trees of the forest pens, they would not be sufficient for writing all the wisdom which he was possessed of.'

Hyperboles not less strong than that under review find their way into our own poetry, with-

and shocking our judgment or offending our taste, thus:—

'And I as rich in having such a jewel
As fifty seas, if all their sands were pearl,
Their rivers nectar, and their rocks pure gold.'

Homer, who if not born in Asia Minor, had undoubtedly lived there, has sometimes followed the hyperbolic manner of speaking which prevailed so much in the East: thus, in *Iliad* xx. 246, 247, he makes Æneas say to Achilles, 'Let us have done with reproaching one another; for we may throw out so many reproachful words on one another, that a ship of a hundred oars would not be able to carry the load.' Few instances of this are to be found in Occidental writers; yet it is observed that Cicero (*Phil.* ii. 44) has 'præsertim quum illi eam gloriam consecuti sint, quæ vix cœlo capi posse videatur,' and that Livy (vii. 25) says, 'hæ vires populi Romani, quas vix terrarum capit orbis.' See Bishop Pearce's *Commentary on the Four Evangelists*, 1777, &c.



HYSSOP (אֵזוֹב *esobh*; Gr. *ὕσσωπος*). A great variety of opinions have been entertained respecting the plant called *esobh*, translated 'hyssop' in the Authorized Version both of the Old and the New Testament; but as yet no satisfactory investigation has been made, so as to enable us to fix with certainty on the plant intended. The difficulty appears to have arisen from the similarity of the Greek name *ὕσσωπος* to the Hebrew *esobh*, whence the former seems, from an early period, to have been considered synonymous with the latter, and used for it in referring to the passages of the Old Testament where it is mentioned. As the *ὕσσωπος* of Greek authors is generally acknowledged to be the common hyssop (*Hyssopus officinalis* of botanists), it has been inferred that it must also be the plant of the Old Testament, as well as that referred to in the New Testament. This inference has not, however, been universally acquiesced in; for Celsius enumerates, under no less than eighteen heads, the different plants which have been adduced by various authors as the hyssop of Scripture. Before mentioning these, it is desirable to refer to the passages of the Old and New Testament where the plant is mentioned. The first notice of it occurs in Exod. xii. 22, where a bunch of hyssop is directed to be dipped in blood and struck on the lintels and the two side-posts of the doors of the houses in which the Israelites resided. It is next mentioned in Lev. xiv. 4, 6, 52, in the ceremony for declaring lepers to be cleansed; and again, in Num. xix. 6, 18, in preparing the water of separation. To these passages the apostle alludes in Heb. ix. 19:—'For when Moses had spoken every precept to all the people, according to the law, he took the blood of calves, and of goats, with water, and scarlet wool, and hyssop, and sprinkled both the book and all the people.' From this text we find that the Greek name *ὕσσωπος* was considered synonymous with the Hebrew *esobh;* and from the preceding that the plant must have been leafy, and large enough to serve for the purposes of sprinkling, and that it must have been found in Lower Egypt, as well as in the country towards Mount Sinai, and onwards to Palestine. From the following passages we get some information respecting the habits and the supposed properties of the plant. Thus, in 1 Kings iv. 33, it is said, 'Solomon spoke of trees, from the cedar-tree that is in Lebanon, even unto the hyssop that springeth out of the wall;' and in the penitential psalm of David (li. 7), 'Purge me with hyssop, and I shall be clean: wash me, and I shall be whiter than snow.' In this passage it is, no doubt, considered by some commentators that hyssop is used in a figurative sense; but still it is possible that the plant may have possessed some general cleansing properties, and thus come to be employed in preference to other plants in the ceremonies of purification. It ought, at all events, to be found growing upon walls, and in Palestine. In the account of the crucifixion of our Saviour, the Apostle John says (John xix. 29), 'Now there was set a vessel full of vinegar, and they filled a sponge with vinegar, and put it upon *hyssop*, and put it to his mouth.' In the parallel passages of Matthew (xxvii. 48) and Mark (xv. 36), it is stated that the sponge filled with vinegar was put upon a reed or stick. To reconcile these statements, some commentators have supposed that both the sponge and the hyssop were tied to a stick, and that one apostle mentions only the hyssop, because he considered it as the most important; while, for the same reason, the other two mention only the stick; but the simplest mode of explaining the apparent discrepancy is to consider the hyssop and the stick to be the same thing—in other words, that the sponge was affixed to a stick of hyssop.

A great variety of plants have been adduced by different authors as that alluded to in the above passages, though some do not seem to think it necessary to reconcile the plant which they prefer to more than one or two of the passages, and seldom take the trouble of proving that it is found in the localities where the hyssop is stated to have been employed.

Celsius enumerates the several plants which have been adduced, under eighteen different heads. Of these some belong to the class of ferns, as *Capillus Veneris*, maiden-hair, and *Ruta Muraria*, or wall-rue, because they will grow upon walls; so also do the *Polytrichum*, or hair-moss, the *Kloster hyssops*, or pearlwort, and *Sagina procumbens* are suggested by others, because from their growing on rocks or walls, they will answer to the passage in 1 Kings iv. 33, and from their smallness contrast well with the cedar of Lebanon, and are a proof of the minute knowledge of Solomon. Some again contend for species of wormwood, as being, from their bitterness, most likely to have been added to the vinegar in the sponge, that it might be more distasteful to our Saviour. The majority, however, have selected different kinds of fragrant plants belonging to the natural family of *Labiatæ*, several of which are found in dry and barren situations in Palestine, and also in some parts of the Desert. Of these may be mentioned the rosemary, species of lavender, of mint, of marjoram, of thyme, of savory, of thymbra, and others of the same tribe, resembling each other much in characters as well as in properties: but it does not appear that any of them grow on walls, or are possessed of cleansing properties; and, with the exception of the rosemary, they are not capable of yielding a stick, nor are they found in all the required situations. If we look to the most recent authors, we find some other plants adduced, though the generality adhere to the common hyssop. Sprengel (*Hist. Rei Herb.*

i. 14) seems to entertain no doubt that the *Thymbra spicata* found by Hasselquist, on the ruins about Jerusalem, is the hyssop of Solomon; though Hasselquist himself thought that the moss called *Gymnostomum truncatum* was the plant. Lady Calcott asks, 'Whether the hyssop upon which St. John says the sponge steeped in vinegar was put, to be held to the lips of Christ upon the cross, might not be the hyssop attached to its staff of cedar-wood, for the purposes of sprinkling the people, lest they should contract defilement on the eve of the Sabbath, which was a high-day, by being in the field of execution' (*Scripture Herbal*, p. 208). Rosenmüller, again, thinks that the Hebrew word *Esobh* does not denote our hyssop, but an aromatic plant resembling it, the wild marjoram, which the Germans call *Dosten*, or *Wohlgemuth*, the Arabs *Zatar*, and the Greeks *Origanum*. In the *Pictorial Bible* (i. 161), Mr. Kitto observes 'that the hyssop of the sacred Scriptures has opened a wide field for conjecture, but in no instance has any plant been suggested that, at the same time, has a sufficient length of stem to answer the purpose of a wand or pole, and such detergent or cleansing properties as to render it a fit emblem for purification;' and he suggests it as probable, that 'the hyssop was a species of *Phytolacca*, as combining length of stem with cleansing properties, from the quantity of potash which is yielded by the ashes of the American species, *P. decandra*, of this genus.' *P. Abyssinica* grows to the size of a shrub in Abyssinia. Winer (*Bibl. Realwörterbuch*, ii. 819, *s. v.* Ysop) gives a description of the common hyssop, but says that it must not be concealed that the Talmudists distinguish the hyssop of the Greeks and Romans from that mentioned in the law. He then adduces the *Origanum*, mentioned in the quotation from Rosenmüller, as the *Esobh* of the Hebrews; but concludes by observing that a more accurate examination is required of the hyssops and *Origana* of that part of Asia, before the meaning of the Hebrew *Esobh* can be considered as satisfactorily determined. For any new information we may be able to communicate, see Ysop.—J. F. R.
